National Survey of Substance Abuse Treatment Services (N-SSATS): 2019

Data on Substance Abuse Treatment Facilities

DEPARTMENT OF HEALTH AND HUMAN SERVICES
Substance Abuse and Mental Health Services Administration

Acknowledgments

This report was prepared for the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (HHS). Work was performed under Contract No. HHSS283201600001C. The Contracting Officer's Representative (COR) at SAMHSA/CBHSQ was Nichele Waller.

SAMHSA complies with applicable federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, or sex. *SAMHSA cumple con las leyes federales de derechos civiles aplicables y no discrimina por motivos de raza, color, nacionalidad, edad, discapacidad o sexo*.

Table of Contents

List of Tables v

List of Figures xv

Highlights 1

Chapter 1. Description of the National Survey of Substance Abuse Treatment Services (N-SSATS) 5

- Data Collection Procedures for the 2019 N-SSATS 6
- Facility Selection for the 2019 N-SSATS Report 9
- Survey Response Mode 10
- Data Considerations and Limitations 10
- Organization of the Report 11
- Terminology 11

Chapter 2. Trends in Facility Characteristics 13

- Number of Facilities 13
- Facility Operation 13
- Type of Care Offered 14
- Facilities That Use MAT 15

Chapter 3. Trends in Client Characteristics 17

- Number of Clients 17
- Facility Operation 17
- Type of Care Received 18
- Clients Receiving MAT 19
- Substance Abuse Problem Treated 19
- Clients Under the Age of 18 Years in Treatment 20

Chapter 4. Facility Characteristics and Services 21

- Facility Operation and Type of Care 21
- Substance Abuse Treatment 22
- Facility Size 22
- Facility Capacity and Utilization Rates 24
- Services Provided 25
- Clinical/Therapeutic Approaches 27
- MAT for Opioid Use Disorder 28
- Treatment of Alcohol Use Disorder 28
- Programs or Groups for Specific Client Types 29

Table of Contents (continued)

Treatment Services in Sign Language for the Deaf and Hard-of-Hearing and in Languages Other Than English 29
Detoxification Services 30
Client Outreach 30
Facility Licensing, Certification, or Accreditation 30
Federally Qualified Health Centers 31
Payment Options 31
Facility Funding 32
Facilities Using MAT 32
Facility Smoking Policy 33
Suicide Prevention-Related Services in Veterans Affairs Facilities 33

Chapter 5. Client Characteristics 35
Facility Operation and Type of Care 35
Clients in Federally Qualified Health Centers 35
Clients at High Risk of Suicide at VA Facilities 36
Substance Abuse Treatment 36
Clients Under the Age of 18 Years in Treatment 36
Clients Receiving MAT for OUD 36
Clients Receiving MAT for Alcohol Use Disorder 37

Chapter 6. State Data 39
Survey Response 39
Trends 39
Clients in Treatment per 100,000 Population Aged 18 Years and Older 40

Tables 43

Appendix A. N-SSATS Background 253
Survey History 253
N-SSATS in the Context of the Behavioral Health Services Information System (BHSIS) 253
Survey Coverage 254
Changes in Survey Content 256

Appendix B. 2019 N-SSATS Questionnaire 261

Appendix C. Item Response for 2019 N-SSATS 283

Appendix D. List of Contributors 295

List of Tables

Chapter 1

1.1 N-SSATS facilities, by status and mode of response: 2019 9

Chapter 2

2.1 Facility turnover: Number and column percent distribution, 2009–2019 44

2.2 Facility operation: Number and column percent distribution, 2009–2019 45

2.3 All facilities and facilities with opioid treatment programs (OTPs), by type of care offered: Number and column percent, 2009–2019 46

2.4 Medication-assisted opioid therapy provided at facilities with OTPs and non-OTP facilities: Number and column percent, 2009–2019 47

Chapter 3

3.1 Clients in treatment, by facility operation: Number and column percent distribution, 2009–2019 48

3.2 Clients in treatment, by type of care received, and clients receiving buprenorphine, naltrexone, or methadone: Number and column percent distribution, 2009–2019 49

3.3 Clients in treatment, by substance abuse problem and diagnosed co-occurring mental and substance use disorders: Number and column percent distribution, 2009–2019 50

3.4 Clients under the age of 18 years in treatment, by type of care received, and clients under the age of 18 years in treatment in facilities offering special programs or groups for adolescents: Number and column percent distribution, 2009–2019 51

Chapter 4

4.1a Type of care offered, by facility operation: Number, 2019 52

4.1b Type of care offered, by facility operation: Row percent, 2019 53

4.2 Type of substance abuse problem treated and treatment of clients with diagnosed co-occurring mental and substance use disorders, by facility operation: Number and row percent, March 29, 2019 54

4.3 Facility size, by type of care offered and facility operation at facilities with opioid treatment programs (OTPs): Median number of clients per facility, March 29, 2019 55

List of Tables (continued)

4.4 Facility size, by type of care offered and facility operation at facilities without opioid treatment programs (non-OTPs): Median number of clients per facility, March 29, 2019 56

4.5a Facility size in terms of number of clients in outpatient treatment, by facility operation: Number and row percent distribution, March 29, 2019 57

4.5b Facility size in terms of number of clients in residential (non-hospital) treatment, by facility operation: Number and row percent distribution, March 29, 2019 58

4.5c Facility size in terms of number of clients in hospital inpatient treatment, by facility operation: Number and row percent distribution, March 29, 2019 59

4.6 Facility capacity and utilization of residential (non-hospital) care, by facility operation: Number, utilization rate, and row percent distribution, March 29, 2019 60

4.7 Facility capacity and utilization of hospital inpatient care, by facility operation: Number, utilization rate, and row percent distribution, March 29, 2019 61

4.8a Services provided, by facility operation: Number and column percent, 2019 62

4.8b Services provided, by facility type: Number and column percent, 2019 65

4.9a Services provided, by type of care: Number, 2019 68

4.9b Services provided, by type of care: Column percent, 2019 71

4.10 Clinical/therapeutic approaches used frequently, by facility type: Number and column percent, 2019 74

4.11a Provision of MAT for opioid use disorder, by type of care: Number, 2019 75

4.11b Provision of MAT for opioid use disorder, by type of care: Column percent, 2019 76

4.12 Approximate percentage of clients on MAT for opioid use disorder, by medication service: Number and row percent distribution: 2019 77

4.13 Treatment of alcohol use disorder, by facility operation: Number and column percent, 2019 78

4.14a Provision of MAT for alcohol use disorder, by type of care: Number, 2019 79

List of Tables (continued)

4.14b Provision of MAT for alcohol use disorder, by type of care: Column percent, 2019 80

4.15a Facilities offering special programs or groups for specific client types, by facility operation: Number, 2019 81

4.15b Facilities offering special programs or groups for specific client types, by facility operation: Row percent, 2019 83

4.16a Facilities offering substance use treatment services in sign language for the deaf and hard-of-hearing and in languages other than English, by facility operation: Number, 2019 85

4.16b Facilities offering substance use treatment services in sign language for the deaf and hard-of-hearing and in languages other than English, by facility operation: Row percent distribution, 2019 86

4.17 Facilities detoxifying clients, by substance and facility operation: Number and row percent, 2019 87

4.18 Facilities with client outreach, by facility operation: Number and percent, 2019 88

4.19a Facility licensing, certification, or accreditation, by facility operation: Number, 2019 89

4.19b Facility licensing, certification, or accreditation, by facility operation: Row percent, 2019 90

4.20a Facility licensing, certification, or accreditation, by type of care offered: Number, 2019 91

4.20b Facility licensing, certification, or accreditation, by type of care offered: Row percent, 2019 92

4.21 Federally Qualified Health Centers providing substance use treatment, by type of care offered: Number and percent, 2019 93

4.22a Types of payments accepted, by facility operation: Number, 2019 94

4.22b Types of payments accepted, by facility operation: Row percent, 2019 95

4.23 Facility funding, by facility operation: Number and percent, 2019 96

List of Tables (continued)

4.24a Medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and non-OTP facilities, by facility operation: Number, 2019 97

4.24b Medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and non-OTP facilities, by facility operation: Column percent distribution, 2019 98

4.25a Type of care offered in facilities with opioid treatment programs (OTPs), by facility operation: Number, 2019 99

4.25b Type of care offered in facilities with opioid treatment programs (OTPs), by facility operation: Row percent, 2019 100

4.26a Facility licensing, certification, or accreditation of facilities with opioid treatment programs (OTPs), by type of care offered: Number, 2019 101

4.26b Facility licensing, certification, or accreditation of facilities with opioid treatment programs (OTPs), by type of care offered: Row percent, 2019 102

4.27 Facility smoking policy, by facility operation: Number and row percent distribution, 2019 103

4.28 Suicide prevention-related services provided by Veterans Affairs (VA) facilities: Number and percent, 2019 104

Chapter 5

5.1a Clients in treatment, by type of care received and facility operation: Number, March 29, 2019 106

5.1b Clients in treatment, by type of care received and facility operation: Row percent distribution, March 29, 2019 107

5.1c Clients in treatment, by type of care received and facility operation: Column percent distribution, March 29, 2019 108

5.2 Clients in treatment and clients receiving buprenorphine, naltrexone, or methadone at Federally Qualified Health Centers providing substance use treatment: Number and percent, March 29, 2019 109

5.3 Clients in treatment at Veterans Affairs facilities identified as being at high suicide risk, by type of care: Number and column percent distribution, March 29, 2019 110

List of Tables (continued)

5.4 Clients in treatment, according to substance abuse problem and diagnosed co-occurring mental and substance use disorders, by facility operation: Number and row percent distribution, March 29, 2019 111

5.5 Clients under the age of 18 years in treatment, by type of care received and facility operation: Number and row percent distribution, March 29, 2019 112

5.6a Clients receiving medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and non-OTP facilities, by facility operation: Number, March 29, 2019 113

5.6b Clients receiving medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and non-OTP facilities, by facility operation: Column percent distribution, March 29, 2019 114

5.7 Clients receiving medications for alcohol use disorder, by type of care received: Number and row percent distribution, March 29, 2019 115

Chapter 6

6.1 N-SSATS facilities, by status, response rate, mode of response, and state or jurisdiction: Number and row percent, 2019 116

6.2a Facilities and clients in treatment, by state or jurisdiction: Number, 2009–2019 118

6.2b Facilities and clients in treatment, by state or jurisdiction: Column percent distribution, 2009–2019 120

6.3a Clients under the age of 18 years in treatment, and clients under the age of 18 years in facilities offering special programs or groups for adolescents, by state or jurisdiction: Number, 2009–2019 122

6.3b Clients under the age of 18 years in treatment, and clients under the age of 18 years in facilities offering special programs or groups for adolescents, by state or jurisdiction: Percent, 2009–2019 124

6.4a Facility operation, by state or jurisdiction: Number, 2019 126

6.4b Facility operation, by state or jurisdiction: Row percent distribution, 2019 128

6.5a Type of care offered, by state or jurisdiction: Number, 2019 130

6.5b Type of care offered, by state or jurisdiction: Row percent, 2019 132

List of Tables (continued)

6.6a Type of assessment and pre-treatment services offered by facilities, by state or jurisdiction: Number, 2019 134

6.6b Type of assessment and pre-treatment services offered by facilities, by state or jurisdiction: Row percent, 2019 136

6.7a Type of testing offered by facilities, by state or jurisdiction: Number, 2019 138

6.7b Type of testing offered by facilities, by state or jurisdiction: Row percent, 2019 140

6.8 Type of medical services offered by facilities, by state or jurisdiction: Number and row percent, 2019 142

6.9 Type of transitional services offered by facilities, by state or jurisdiction: Number and row percent, 2019 144

6.10a Type of recovery support services offered by facilities, by state or jurisdiction: Number, 2019 146

6.10b Type of recovery support services offered by facilities, by state or jurisdiction: Row percent, 2019 148

6.11a Type of education and counseling services offered by facilities, by state or jurisdiction: Number, 2019 150

6.11b Type of education and counseling services offered by facilities, by state or jurisdiction: Row percent, 2019 152

6.12a Type of pharmacotherapies offered by facilities, by state or jurisdiction: Number, 2019 154

6.12b Type of pharmacotherapies offered by facilities, by state or jurisdiction: Row percent, 2019 158

6.13a Type of ancillary services offered by facilities, by state or jurisdiction: Number, 2019 162

6.13b Type of ancillary services offered by facilities, by state or jurisdiction: Row percent, 2019 164

6.14 Type of other services offered by facilities, by state or jurisdiction: Number and row percent, 2019 166

List of Tables (continued)

6.15 Type of client substance abuse problem treated and treatment of clients with diagnosed co-occurring mental and substance use disorders, by state or jurisdiction: Number and row percent, 2019 168

6.16 Facility size, by type of care offered and state or jurisdiction at facilities with opioid treatment programs (OTPs): Median number of clients per facility, March 29, 2019 170

6.17 Facility size, by type of care offered and state or jurisdiction at facilities without opioid treatment programs (non-OTPs): Median number of clients per facility, March 29, 2019 172

6.18a Facility size in terms of number of clients in outpatient treatment, by state or jurisdiction: Number and row percent distribution, March 29, 2019 174

6.18b Facility size in terms of number of clients in residential (non-hospital) treatment, by state or jurisdiction: Number and row percent distribution, March 29, 2019 176

6.18c Facility size in terms of number of clients in hospital inpatient treatment, by state or jurisdiction: Number and row percent distribution, March 29, 2019 178

6.19 Facility capacity and utilization of residential (non-hospital) and hospital inpatient care, by state or jurisdiction: Number and utilization rate, March 29, 2019 180

6.20a Clinical/therapeutic approaches used frequently, by state or jurisdiction: Number, 2019 182

6.20b Clinical/therapeutic approaches used frequently, by state or jurisdiction: Row percent, 2019 184

6.21a Facilities offering special programs or groups for specific client types, by state or jurisdiction: Number, 2019 186

6.21b Facilities offering special programs or groups for specific client types, by state or jurisdiction: Row percent, 2019 190

6.22a Facilities offering substance use treatment services in sign language for the deaf and hard-of-hearing and in languages other than English, by state or jurisdiction: Number, 2019 194

List of Tables (continued)

6.22b Facilities offering substance use treatment services in sign language for the deaf and hard-of-hearing and in languages other than English, by state or jurisdiction: Row percent distribution, 2019 196

6.23 Facilities detoxifying clients, by substance and state or jurisdiction: Number and row percent, 2019....198

6.24 Facilities with client outreach, by state or jurisdiction: Number and percent, 2019....200

6.25a Facility licensing, certification, or accreditation, by state or jurisdiction: Number, 2019....201

6.25b Facility licensing, certification, or accreditation, by state or jurisdiction: Row percent, 2019....203

6.26 Federally Qualified Health Centers providing substance use treatment, by state or jurisdiction: Number and percent, 2019....205

6.27 Clients in treatment at Federally Qualified Health Centers providing substance use treatment, by state or jurisdiction: Number and percent, March 29, 2019....207

6.28a Types of payments accepted by facility, by state or jurisdiction: Number, 2019....209

6.28b Types of payments accepted by facility, by state or jurisdiction: Row percent, 2019....211

6.29 Facility funding, by state or jurisdiction: Number and percent, 2019....213

6.30a Medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and other facilities, by state or jurisdiction: Number, 2019....214

6.30b Medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and other facilities, by state or jurisdiction: Column percent distribution, 2019....216

6.31a Type of care offered in facilities with opioid treatment programs (OTPs), by state or jurisdiction: Number, 2019....218

6.31b Type of care offered in facilities with opioid treatment programs (OTPs), by state or jurisdiction: Row percent, 2019....220

List of Tables (continued)

6.32a Facility licensing, certification, or accreditation of facilities with opioid treatment programs (OTPs), by state or jurisdiction: Number, 2019 222

6.32b Facility licensing, certification, or accreditation of facilities with opioid treatment programs (OTPs), by state or jurisdiction: Row percent, 2019 224

6.33 Facility smoking policy, by state or jurisdiction: Number and row percent distribution, 2019 226

6.34a Clients in treatment, according to facility operation, by state or jurisdiction: Number, March 29, 2019 228

6.34b Clients in treatment, according to facility operation, by state or jurisdiction: Row percent distribution, March 29, 2019 230

6.35a Clients in treatment, according to type of care received, by state or jurisdiction: Number, March 29, 2019 232

6.35b Clients in treatment, according to type of care received, by state or jurisdiction: Row percent distribution, March 29, 2019 234

6.36 Clients in outpatient treatment at Federally Qualified Health Centers providing substance use treatment, by type of care received and state or jurisdiction: Number and row percent distribution, March 29, 2019 236

6.37 Clients in treatment, according to substance abuse problem and diagnosed co-occurring mental and substance use disorders, by state or jurisdiction: Number and row percent distribution, March 29, 2019 238

6.38a Clients receiving medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and non-OTP facilities, by state or jurisdiction: Number, March 29, 2019 240

6.38b Clients receiving medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and other facilities, by state or jurisdiction: Column percent distribution, March 29, 2019 242

6.39a Clients under the age of 18 years in treatment, according to facility operation, by state or jurisdiction: Number, March 29, 2019 244

6.39b Clients under the age of 18 years in treatment, according to facility operation, by state or jurisdiction: Row percent distribution, March 29, 2019 246

List of Tables (continued)

6.40 Clients under the age of 18 years in treatment, according to type of care received, by state or jurisdiction: Number and row percent distribution, March 29, 2019 248

6.41 Clients in treatment aged 18 years and older, according to substance abuse problem, by state or jurisdiction: Number and clients per 100,000 population aged 18 years and older, March 29, 2019 250

6.42 Clients receiving medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs), by state or jurisdiction: Clients per 100,000 population, March 29, 2019 252

8 Clients in treatment per 100,000 population aged 18 years and older: March 31, 2009 41

Highlights

This report presents results from the 2019 National Survey of Substance Abuse Treatment Services (N-SSATS), an annual census of facilities providing substance abuse treatment. Conducted by the Substance Abuse and Mental Health Services Administration (SAMHSA), N-SSATS is designed to collect data on the location, characteristics, and use of alcohol and drug abuse treatment facilities and services throughout the 50 states, the District of Columbia, and other jurisdictions. It is important to note that values in charts, narrative lists, and percentage distributions are calculated using actual raw numbers and rounded for presentation in this report; calculations using rounded values may produce different results.

- The N-SSATS facility response rate in 2019 was 91 percent. The response rates in 35 states and jurisdictions equaled or surpassed the overall rate [Tables 1.1 and 6.1].
- A total of 16,275 facilities completed the survey. The 15,961 facilities included in this report had a one-day census of 1,460,706 clients enrolled in substance abuse treatment on March 29, 2019 [Tables 1.1 and 3.1].[1]
- Among those 18 years and older, there were 529 clients in treatment per 100,000 population on March 29, 2019. The ratio was highest for clients in treatment for drug abuse only (280 per 100,000 population), followed by both alcohol and drug abuse (174 per 100,000 population), and alcohol abuse only (75 per 100,000 population) [Table 6.41].

Trends in Facility and Client Characteristics 2009–2019

- The number of substance abuse treatment facilities remained stable between 2009 and 2019. The number of surveyed facilities eligible for inclusion in the 2019 N-SSATS report was 18 percent larger in 2019 (15,961) than in 2009 (13,513) [Table 2.1]. The number of clients in treatment on the survey reference date increased from 1,182,077 in 2009 to 1,460,706 in 2019 [Table 3.1].
- The types of entities responsible for operating facilities—private non-profit organizations, private for-profit organizations, or governments—had some notable changes between 2009 and 2019.[2] Facilities operated by private non-profit organizations decreased from 58 percent of all facilities in 2009 to 50 percent of facilities in 2019. Facilities operated by private for-profit organizations increased from 29 percent in 2009 to 40 percent in 2019 [Table 2.2 and Figure 2].
- The proportions of facilities that offered outpatient and hospital inpatient care were stable between 2009 and 2019, while the proportion that offered residential (non-hospital) treatment declined slightly [Table 2.3].

---

[1] Facilities excluded from the report included 125 non-treatment halfway houses, 55 solo practices not approved by their state agency for inclusion, and 33 facilities that treated incarcerated clients only.

[2] Data for the federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other unspecified federal agencies) are detailed in the tables.

- The proportion of facilities with opioid treatment programs (OTPs) certified by SAMHSA for the provision of medication-assisted treatment (MAT) with methadone and/or buprenorphine increased from 9 percent in 2009 to 11 percent in 2019 [Table 2.4].
- Between 2009 and 2019, the proportions of clients in treatment for the major types of care—outpatient, residential (non-hospital), and hospital inpatient—were relatively stable between 2009 and 2019 [Table 3.2 and Figure 5].
- The proportion of all clients who were receiving methadone increased from 24 percent in 2009 to 28 percent in 2019 [Table 3.2].
- The proportion of all clients who were receiving buprenorphine increased from 2 percent in 2009 to 12 percent 2019 [Table 3.2].
- The proportions of clients in treatment for the three broad categories of substance abuse problems—both alcohol and drug abuse, drug abuse only, and alcohol abuse only—changed between 2009 and 2019. The proportion of clients in treatment for both drug and alcohol abuse decreased from 46 to 33 percent of all clients. Clients in treatment for drug abuse only increased from 39 to 51 percent, and clients in treatment for alcohol abuse only decreased from 19 to 14 percent [Table 3.3].
- The number of clients under the age of 18 years declined from 84,326 in 2009 to 59,854 in 2019. The proportion of clients under the age of 18 years in treatment in each type of care (outpatient, residential [non-hospital], or hospital inpatient) differed slightly from the proportion overall and was stable between 2009 and 2019 [Tables 3.4 and 3.2].

Facility Operation—March 29, 2019

- Private non-profit organizations operated 50 percent of all facilities and treated 50 percent of all clients [Tables 2.2 and 3.1].
- Private for-profit organizations operated 40 percent of all facilities and treated 40 percent of all clients.
- Local, county, or community governments operated 4 percent of all facilities and treated 4 percent of all clients.
- State governments operated 2 percent of all facilities and treated 2 percent of all clients.
- The federal government operated 2 percent of all facilities and treated 3 percent of all clients.
- Tribal governments operated 2 percent of all facilities and treated 1 percent of all clients.

Type of Care—March 29, 2019

- Outpatient treatment was offered by 82 percent of all facilities and was received by 93 percent of all clients in treatment [Tables 4.1b and 5.1b].
- Residential (non-hospital) treatment was offered by 24 percent of all facilities and was received by 6 percent of all clients in treatment.

- Hospital inpatient care was offered by 6 percent of all facilities and was received by 1 percent of all clients in treatment.

Diagnosed Co-occurring Mental and Substance Use Disorders—March 29, 2019

Among clients in treatment, 55 percent were diagnosed with co-occurring substance use and mental disorders. In facilities operated by the Department of Defense, less than half of clients in treatment were diagnosed with co-occurring substance use and mental disorders (45 percent); however, facilities operated by the Department of Veterans Affairs reported the highest proportion of clients in treatment with diagnosed co-occurring substance use and mental disorders—73 percent—the highest among all types of facility operation [Table 5.4].

Facility Size and Utilization Rates—March 29, 2019

- Facilities with OTPs had a median of 261 clients. Outpatient facilities with OTPs had a median of 284 clients, while residential (non-hospital) facilities with OTPs had a median of 35 clients. Hospital inpatient facilities with OTPs had a median of 20 clients [Table 4.3].
- The median number of outpatient clients for OTPs that offered methadone or buprenorphine maintenance or naltrexone treatment varied by facility operation. For facilities with OTPs operated by private non-profit organizations, the median was 289 clients; at outpatient facilities with OTPs operated by private for-profit organizations, the median was 260 clients; for local, county, and community government-operated outpatient facilities with OTPs, the median was 261 clients; for state government-operated outpatient facilities with OTPs, the median was 239 clients; for federally operated outpatient facilities with OTPs, the median was 110 clients; and for tribal government-operated outpatient facilities with OTPs, the median was 190 clients [Table 4.3].
- Facilities without OTPs (non-OTPs) reported a median of 35 clients. Outpatient facilities had a median of 40 clients, while residential (non-hospital) facilities had a median of 17 clients, and hospital inpatient facilities had a median of 12 clients [Table 4.4].
- The median number of outpatient clients for non-OTP facilities that offered buprenorphine maintenance or naltrexone treatment varied by facility operation. Among all non-OTP facilities that offered methadone/buprenorphine maintenance or naltrexone treatment, there was a median of 20 clients; for private non-profit facilities, the median was 17 clients; for private for-profit facilities, the median was 22 clients; for local, county, or community government-operated facilities, the median was 17 clients; for state government-operated facilities, the median was 37 clients; for federal government-operated facilities, the median was 30 clients; and for tribal government-operated facilities, the median was 18 clients [Table 4.4].
- Of all residential (non-hospital) beds designated for substance abuse treatment, 95 percent were in use. Of all hospital inpatient beds designated for substance abuse treatment, 87 percent were in use [Tables 4.6 and 4.7].

Medication-Assisted Opioid Treatment—March 29, 2019

- OTPs were available in 1,691 facilities (11 percent of all facilities) in 2019 [Table 2.4].
- Private for-profit organizations operated 61 percent of facilities with OTPs [Table 4.24b].
- Of clients who were in OTPs that dispensed methadone, 61 percent were in facilities operated by private for-profit organizations [Table 5.6b].

Chapter 1
Description of the National Survey of Substance Abuse Treatment Services (N-SSATS)

The 2019 National Survey of Substance Abuse Treatment Services (N-SSATS) was conducted between March and December 2019, with a reference date of March 29, 2019. It is the 42nd in a series of national surveys begun in the 1970s. The surveys were designed to collect data on the location, characteristics, and use of alcohol and drug abuse treatment facilities and services throughout the 50 states, the District of Columbia, and other jurisdictions.[3] The Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services, plans and directs the N-SSATS. This report presents tabular information and highlights from the 2019 N-SSATS. It is important to note that percentages in charts, narrative lists, and percentage distributions in tables may not add to 100 percent due to rounding.

N-SSATS is designed to collect information from all facilities in the United States, both public and private, that provide substance abuse treatment.[4] (Additional information on N-SSATS, its history, and changes in the survey and survey universe over time is provided in Appendix A.) N-SSATS provides a mechanism for quantifying the dynamic characteristics and composition of the U.S. substance abuse treatment delivery system. N-SSATS collects multipurpose data that can be used to:

- assist SAMHSA and state and local governments in assessing the nature and extent of services provided in state-supported and other substance abuse treatment facilities and in forecasting substance abuse treatment resource requirements;
- update SAMHSA's Inventory of Behavioral Health Services (I-BHS), which includes all known drug and alcohol abuse treatment facilities, both public and private (see Appendix A);
- analyze substance abuse treatment services trends and conduct comparative analyses for the nation, regions, and states;
- generate the National Directory of Drug and Alcohol Abuse Treatment Facilities, a compendium of facilities approved by state substance abuse agencies for the provision of substance abuse treatment; and
- update the information in SAMHSA's Behavioral Health Treatment Services Locator, a searchable database of facilities that provide treatment. The Treatment Services Locator is available on the Internet at: https://findtreatment.samhsa.gov

[3] The jurisdictions include the territory of Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Commonwealth of Puerto Rico, and the Virgin Islands of the United States.

[4] In this report, entities responding to N-SSATS are referred to as "facilities." As discussed later in the report, a "facility" may be a program-level, clinic-level, or multi-site respondent.

Data Collection Procedures for the 2019 N-SSATS

Field period and reference date

The survey reference date for the 2019 N-SSATS was March 29, 2019. The field period was from March 29, 2019, through December 17, 2019.

Survey universe

The 2019 N-SSATS facility universe totaled 19,795 facilities, including all 17,421 active treatment facilities on SAMHSA's I-BHS at a point four weeks before the survey reference date and 2,374 facilities that were added by state substance abuse agencies or otherwise discovered during the data collection period.

Content

The 2019 N-SSATS questionnaire contained 37 numbered questions (see Appendix B for the paper version of the questionnaire). Topics included:

- facility identification information;
- operating entity;
- primary focus;
- type of care provided, i.e.
    - outpatient treatment services (regular outpatient treatment, intensive outpatient treatment, day treatment or partial hospitalization, detoxification, methadone/buprenorphine maintenance or naltrexone treatment),
    - residential (non-hospital) treatment services (long-term—more than 30 days, short-term—30 days or fewer, detoxification), and
    - hospital inpatient treatment services (inpatient treatment, inpatient detoxification);
- services offered (assessment and pre-treatment services, medical services, recovery support services, education and counseling services, pharmacotherapies, testing, transitional services, ancillary services, and other services);
- clinical/therapeutic approaches;
- special programs or groups provided for specific client types;
- provision of treatment services in sign language and/or in languages other than English;
- detoxification from alcohol, benzodiazepines, opioids, cocaine, methamphetamines, or other drugs, and routine use of medication during detoxification;
- client outreach (outreach to persons in the community who may need treatment);
- licensure, certification, or accreditation agencies or organizations;

- payment options accepted, including use of a sliding fee scale and/or treatment at no charge or minimal payment;
- receipt of government funding;
- smoking policy;
- manner in which opioid dependence is treated, the operation of an opioid treatment program (OTP) certified by SAMHSA offering maintenance and/or detoxification, and medications used;
- number of clients in treatment on March 29, 2019 (total clients; clients by type of treatment; total clients under the age of 18 years; and clients who were receiving methadone, buprenorphine, or naltrexone);
- percentage of clients in treatment on March 29, 2019, for abuse of both alcohol and drugs, alcohol abuse only, and drug abuse only;
- percentage of clients in treatment on March 29, 2019, with diagnosed co-occurring mental and substance use disorders;
- number of beds designated for residential (non-hospital) and hospital inpatient substance abuse treatment on March 29, 2019;
- whether the facility is a Federally Qualified Health Center (FQHC);
- manner in which alcohol use disorder is treated and medications used;
- number of clients in treatment on March 29, 2019, who received medication for alcohol use disorder, medications used, and the type of care provided; and
- for Veterans Affairs (VA) facilities, suicide prevention-related services offered, suicide prevention interventions used, standardized suicide screening and evaluation tools used or made available, the number of clients identified for high risk of suicide, and the types of care provided to such clients.

Data collection

There were three modes of data collection employed: a secure web-based questionnaire, a paper questionnaire sent by mail, and a telephone interview. About five weeks before the survey reference date of March 29, 2019, letters were mailed to all facilities to announce the survey. The letters also served to update records with new address information received from the U.S. Postal Service. During the last week of March 2019, a data collection packet (including the SAMHSA cover letter, state-specific letter of endorsement, state profile, information on completing the survey on the web, and a sheet of frequently asked questions) was mailed to each facility. To ease the burden on respondents, many of the data items that typically do not change from year to year were prefilled in the web-based questionnaire for those facilities that had completed the 2018 survey. Respondents could also request a paper questionnaire be sent to them.

During the data collection phase, contract personnel were available to answer facilities' questions concerning the survey. Support for facilities completing the questionnaire on the web was also available by e-mail. About three weeks after the initial data collection packet mailing, thank you/

reminder letters were sent to all facilities. Approximately nine weeks after the initial packet mailing, non-responding facilities were mailed a second packet. About one week after the second packet mailing, non-respondents received a reminder telephone call. A third packet containing a hard copy questionnaire was mailed about nine weeks after the second packet mailing. Those facilities that had not completed the survey by June 7, 2019, received reminder calls and were asked to complete the survey by computer-assisted telephone interview (CATI).

Quality assurance

The web questionnaire was programmed to be self-editing; that is, respondents were prompted to complete missing responses and to confirm or correct inconsistent responses.

All mail questionnaires were reviewed manually for consistency and for missing data. Calls were made to facilities to resolve unclear responses and to obtain missing data. After data entry, automated quality assurance reviews were conducted. The reviews incorporated the rules used in manual editing, plus consistency checks and checks for data outliers not readily identified by manual review.

Item non-response was minimized through editing and extensive follow-up. The item response rate for the 2019 N-SSATS averaged more than 99 percent across 329 separate items. Appendix C details item response rates and imputation procedures.

Facility status and response rate

Table 1.1 presents a summary of response rate information. There were 19,795 facilities in the survey universe. Of these facilities, 1,987 facilities (10 percent) were found to be ineligible for the survey because they had closed or did not provide substance abuse treatment or detoxification. Of the remaining 17,808 facilities, 16,275 facilities (91 percent) completed the survey and 15,961 (90 percent) were included in this report.

Table 1.1. N-SSATS facilities, by status and mode of response: 2019

	Number	*Percent*
Total facilities in universe	**19,795**	**100.0**
Closed/ineligible	1,987	10.0
Eligible	17,808	90.0
Total eligible	**17,808**	**100.0**
Non-respondents	1,533	8.6
Respondents	16,275	91.4
Excluded from report[1]	213	1.2
Roll-ups[2]	101	0.6
Included in report	15,961	89.6
Mode of response	**15,961**	**100.0**
Internet	14,338	89.8
Telephone	1,450	9.1
Mail	173	1.1

[1] Facilities excluded from the report included 125 non-treatment halfway houses, 55 solo practices not approved by the state agency for inclusion, and 33 facilities that treated incarcerated clients only.

[2] Facilities whose client counts were included in or "rolled into" other facilities' counts and whose facility characteristics were not reported separately.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2019.

Facility Selection for the 2019 N-SSATS Report

Table 1.1. The N-SSATS questionnaire is deliberately sent to some facilities that are excluded from this report, as explained below. For this cycle, 213 of the 16,275 questionnaire respondents provided information but were deemed out of the scope of this report and excluded from the analyses presented here. The excluded facilities and reasons for exclusion fell into three categories:

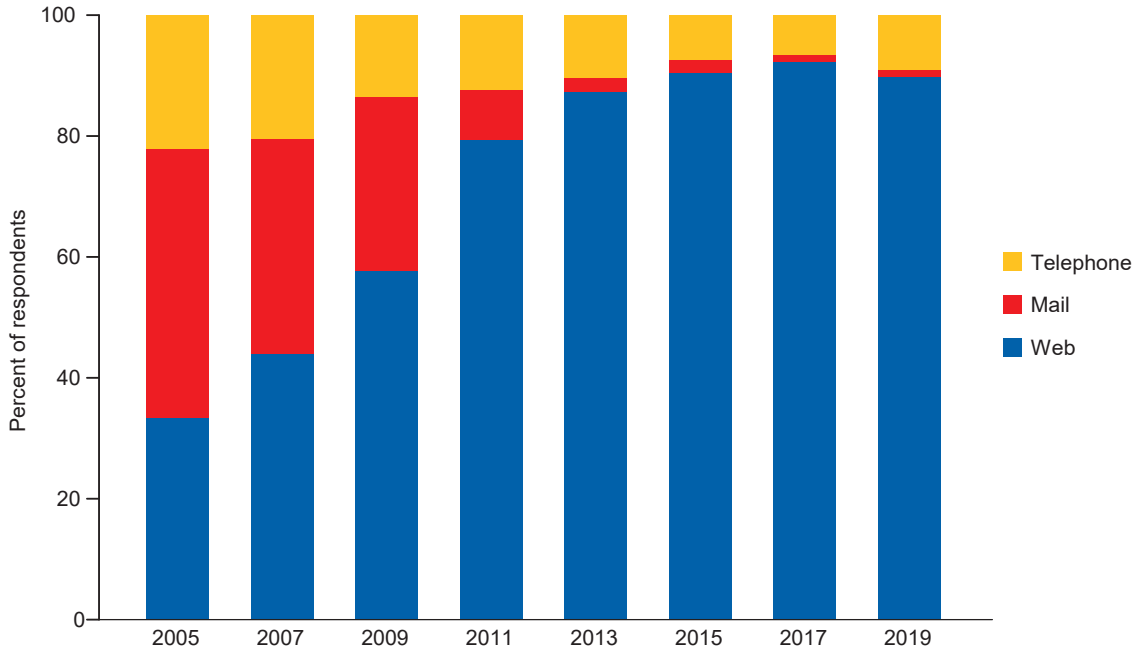
- 125 facilities were halfway houses that did not provide substance abuse treatment. These facilities were included in the survey so that they could be listed in the Directory and SAMHSA's Behavioral Health Treatment Services Locator.
- 55 facilities were solo practitioners. I-BHS and N-SSATS are designed to include facilities rather than individuals. Solo practitioners are listed and surveyed only if a state substance abuse agency explicitly requests that they be included in the survey. The excluded solo practitioners were not identified for inclusion by a state substance abuse agency.
- 33 facilities were jails, prisons, or other organizations that treated incarcerated clients exclusively.

In addition to the facilities that were excluded from the report, there were 101 facilities whose client counts were included in or "rolled into" other facilities' counts and whose facility characteristics were not reported separately. After the exclusion of 213 out-of-scope facilities and the roll-up of 101 facilities, 15,961 eligible respondent facilities remained to be included in the 2019 N-SSATS report.

Survey Response Mode

Figure 1. The proportion of facilities using the web survey to respond to N-SSATS has increased steadily since the option was introduced in 2002. The percentage of facilities responding via the web increased from 33 percent in 2005 to 90 percent in 2019. Mail response declined from 45 percent in 2005 to 1 percent in 2019. Telephone response, which represents follow-up of facilities that had not responded by mail or web, also declined, from 22 percent in 2005 to 9 percent in 2019.

Figure 1. Survey response mode: Percent, 2005–2019



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2005–2019.

Data Considerations and Limitations

As with any data collection effort, certain procedural considerations and data limitations must be taken into account when interpreting data from the 2019 N-SSATS. Some general issues are listed below; other considerations are detailed in Appendix A. Considerations and limitations of specific data items are discussed where the data are presented.

- N-SSATS attempts to obtain responses from all known treatment facilities, but it is a voluntary survey. There was no adjustment for the 9 percent facility non-response.
- N-SSATS is a point-prevalence survey. It provides information on the substance abuse treatment system and its clients on the reference date. Client counts reported do not represent annual totals. Rather, N-SSATS provides a "snapshot" of substance abuse treatment facilities and clients on an average day.

- Multiple responses were allowed for certain variables (e.g., services provided and specialized programs). Tabulations of these variables include the total number of facilities reporting each response.

Organization of the Report

The balance of this report is organized into the following chapters.

- Chapter 2 presents trends in facility characteristics for 2009 to 2019.
- Chapter 3 presents trends in client characteristics for 2009 to 2019.
- Chapter 4 describes key characteristics of facilities and the programs and services they provided in 2019.
- Chapter 5 describes key characteristics of clients in substance abuse treatment on March 29, 2019.
- Chapter 6 presents state-level detail for many of the tables presented in Chapters 4 and 5.
- Appendix A provides additional information on N-SSATS, its history, and changes in the survey and survey universe over time.
- Appendix B contains the 2019 N-SSATS mail survey questionnaire.
- Appendix C contains information on item response and imputation.

Terminology

The majority of tables in the report are organized by facility operation and type of care. Therefore, it is important to define these terms.

Facility operation indicates the type of entity responsible for the operation of the facility:

- private for-profit
- private non-profit
- government
  - local, county, or community
  - state
  - federal (Department of Veterans Affairs, Department of Defense, Indian Health Service, other)
  - tribal

Clients in treatment were defined as:

- hospital inpatient or residential (non-hospital) clients who received substance abuse treatment services at the facility on March 29, 2019; and
- outpatient clients who were seen at the facility for a substance abuse treatment or detoxification service at least once during the month of March 2019, and who were still enrolled in treatment on March 29, 2019.

Type of care indicates the services the facility offers:

- outpatient
  - regular outpatient
  - intensive outpatient
  - outpatient day treatment or partial hospitalization
  - outpatient detoxification
  - outpatient methadone/buprenorphine maintenance or naltrexone treatment
- residential (non-hospital)
  - short-term (30 days or less)
  - long-term (more than 30 days)
  - detoxification
- hospital inpatient
  - inpatient detoxification
  - inpatient treatment

Chapter 2
Trends in Facility Characteristics

This chapter presents trends in facility characteristics for 2009 to 2019.

Number of Facilities

Table 2.1. The total number of substance abuse treatment facilities remained stable between 2009 and 2017 but increased from 2017 to 2019. There was considerable turnover from year to year in the individual facilities that responded to the survey: Between 82 and 91 percent of the facilities that responded to a survey had also responded to the previous year's survey. Between 9 and 14 percent of the facilities from year to year closed, were no longer providing substance abuse treatment, or did not respond to the current year's survey.

In 2019, there was a net increase of 1,152 facilities that responded to the survey and were included in the N-SSATS report, up from 14,809 facilities in 2018. Of the 15,961 facilities that responded to the 2019 survey and were included in this report, 82 percent had also responded to the 2018 survey, and 18 percent were new to the 2019 survey or did not respond in 2018. Of the facilities that responded in 2018, 12 percent had closed, were no longer providing substance abuse treatment, or did not respond in 2019.

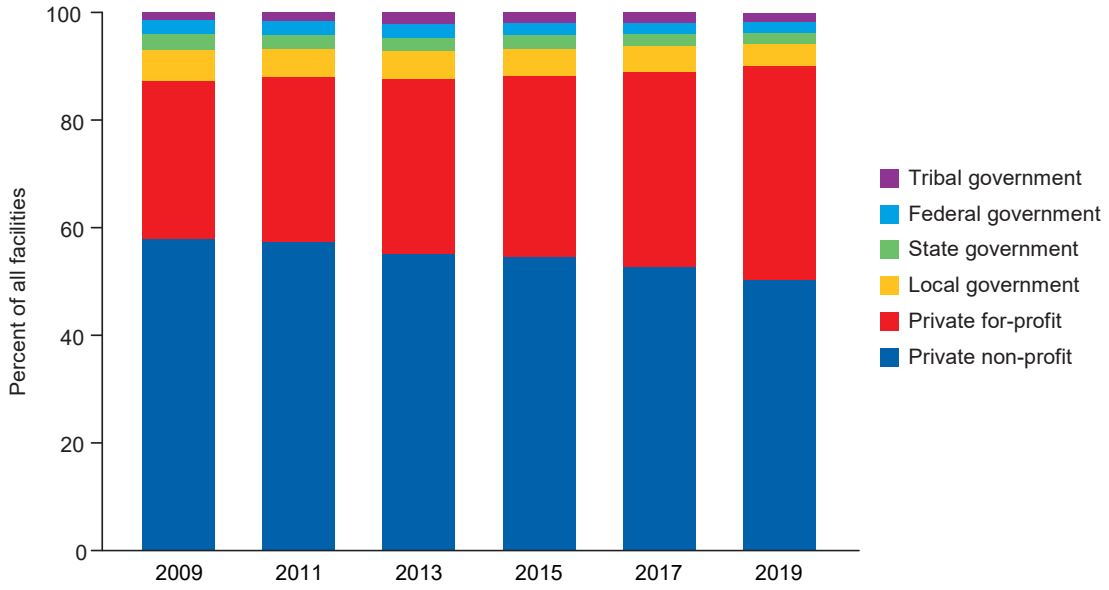
Facility Operation

Table 2.2 and Figure 2. The operational structure of the substance abuse treatment system (i.e., the types of entities responsible for operating facilities) had some notable changes between 2009 and 2019.

- Private non-profit organizations operated 58 percent of all facilities in 2009, decreasing to 50 percent in 2019.
- Private for-profit organizations operated 29 percent of facilities in 2009, increasing to 40 percent of facilities in 2019.
- Local, county, or community governments operated 6 percent of facilities in 2009, decreasing to 4 percent in 2019.
- State governments operated 3 percent of facilities in 2009, decreasing to 2 percent in 2019.
- The federal government operated 2 to 3 percent of facilities each year between 2009 and 2019.[5]
- Tribal governments operated 1 to 2 percent of facilities each year between 2009 and 2019.

[5] Data for the federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other unspecified federal agencies) are detailed in the tables.

Figure 2. Facility operation: Percent, 2009–2019



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2009–2019.

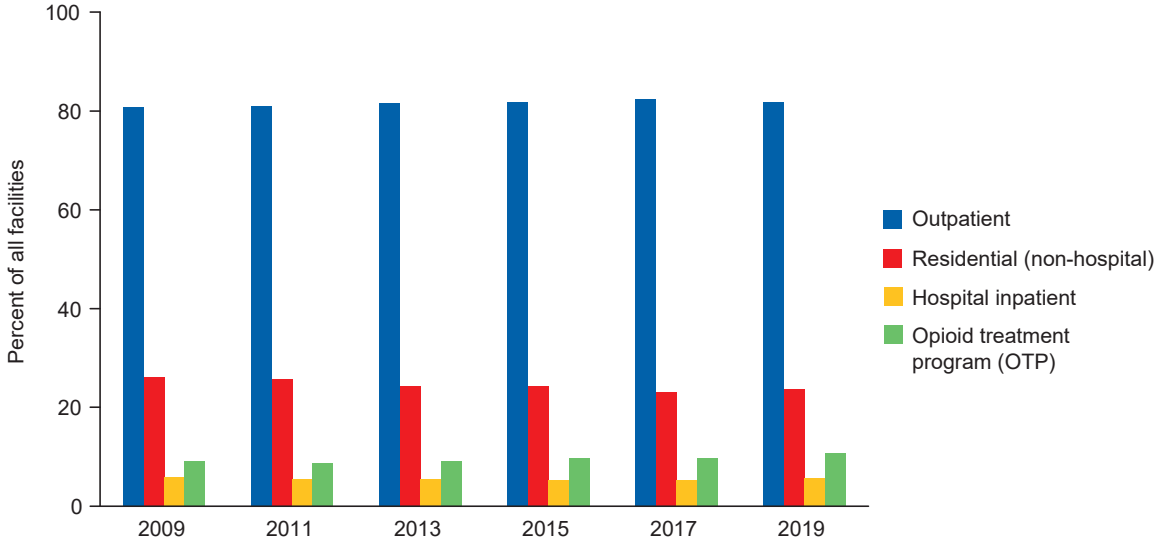
Type of Care Offered[6]

Table 2.3 and Figure 3. The proportions of facilities that offered outpatient and hospital inpatient care were stable between 2009 and 2019, while the proportion that offered residential (non-hospital) care declined between 2009 and 2019. OTPs, certified by SAMHSA, provide MAT with methadone, buprenorphine, and naltrexone. Facilities with OTPs can be associated with any type of care. Facilities with OTPs made up 9 to 11 percent of all facilities between 2009 and 2019 [Table 2.4].

- Outpatient treatment was provided by 81 to 82 percent of facilities during this period [Table 2.3].
- Residential (non-hospital) treatment was provided by 26 percent of facilities in 2009, decreasing to 24 percent of facilities in 2019.
- Hospital inpatient treatment was provided by 5 to 6 percent of facilities during this time period.
- Outpatient treatment was provided by 90 to 93 percent of facilities with OTPs between 2009 and 2019.
- Residential (non-hospital) treatment was provided by 8 to 10 percent of facilities with OTPs between 2009 and 2019.
- Hospital inpatient treatment was provided by 7 to 12 percent of facilities with OTPs between 2009 and 2019.

[6] Facilities can offer more than one type of care.

Figure 3. Facilities by type of care offered and facilities with opioid treatment programs: Percent, 2009–2019



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2009–2019.

Facilities That Use MAT

Table 2.4. MAT includes the use of methadone or buprenorphine for the treatment of opioid use disorder (OUD) and the use of naltrexone for relapse prevention in OUD. Methadone for OUD is available only at the OTPs that are certified by SAMHSA's Center for Substance Abuse Treatment.[7] Buprenorphine may be prescribed by physicians or other authorized medical practitioners (physicians, physician assistants, and nurse practitioners) who have received Drug Addiction Treatment Act of 2000 (DATA 2000) specific training and received a waiver to prescribe the medication for treatment of OUD; some of these authorized medical practitioners are affiliated with facilities (either OTPs or other). All medical practitioners with prescribing privileges can prescribe injectable naltrexone.

- The proportion of OTPs that provided methadone-only treatment decreased from 51 percent of all facilities with OTPs in 2009 to 21 percent of all facilities with OTPs in 2019.
- The proportion of OTPs that provided only methadone and buprenorphine treatment decreased from 45 percent of all facilities with OTPs in 2009 to 38 percent in 2019. Between 2011 and 2019, the proportion of facilities with OTPs that offered methadone, buprenorphine, and injectable naltrexone increased from 10 percent to 32 percent; over the same period, the proportion of facilities that offered only buprenorphine and injectable naltrexone increased from less than 1 percent to 5 percent.[8]
- The proportion of facilities (either OTP or non-OTP) that provided any buprenorphine services increased from 17 percent of all facilities in 2009 to 41 percent of all facilities in 2019.

[7] For more information on CSAT and the certifying process, see https://www.samhsa.gov/medication-assisted-treatment/certification-opioid-treatment-programs.

[8] The question on extended-release injectable naltrexone (for example, Vivitrol®) was first added to the N-SSATS questionnaire in 2011.

- The percentage of all facilities that provided any extended-release injectable naltrexone treatment increased from 8 percent in 2011 to 35 percent in 2019.

Chapter 3
Trends in Client Characteristics

This chapter presents trends in client characteristics for 2009 to 2019.

Number of Clients

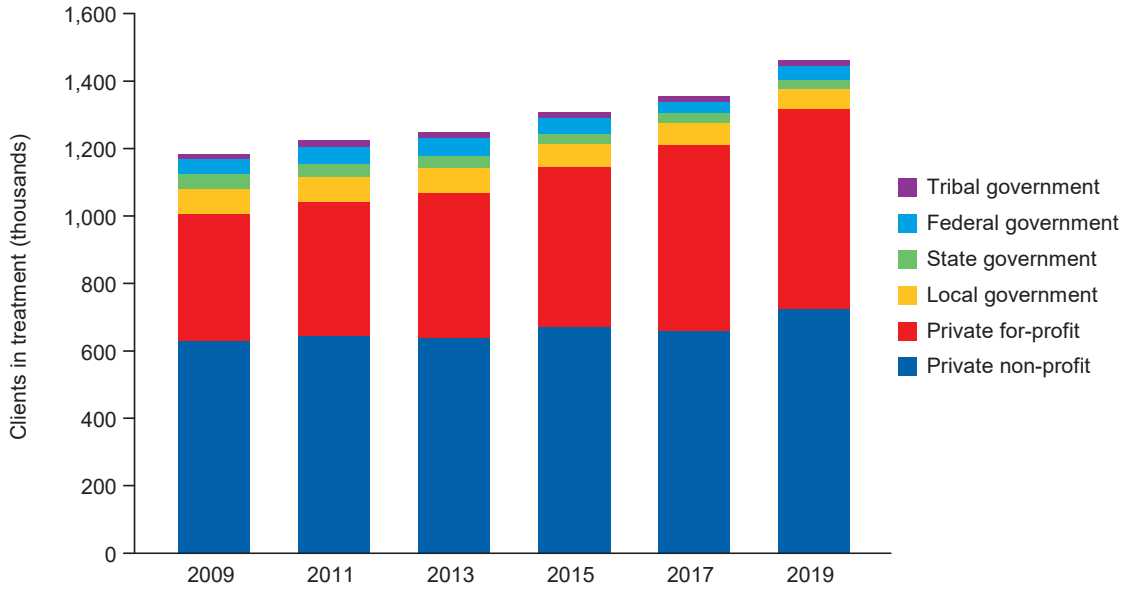
Table 3.1. The number of clients in treatment on the survey reference date increased by from 1,182,077 in 2009 to 1,460,706 in 2019.

Facility Operation

Table 3.1 and Figure 4. Within the categories of facility operation, the proportions of clients in treatment demonstrated some changes between 2009 and 2019.

- Private non-profit facilities treated 53 percent of clients in 2009, decreasing to 50 percent in 2019. (The number of clients in private non-profit facilities increased from 630,579 in 2009 to 726,238 in 2019.)
- Private for-profit facilities treated 32 percent of clients in 2009, increasing to 40 percent in 2019. (The number of clients in private for-profit facilities increased from 375,256 in 2009 to 591,442 in 2019.)

Figure 4. Clients in treatment, by facility operation: Number (thousands), 2009–2019



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2009–2019.

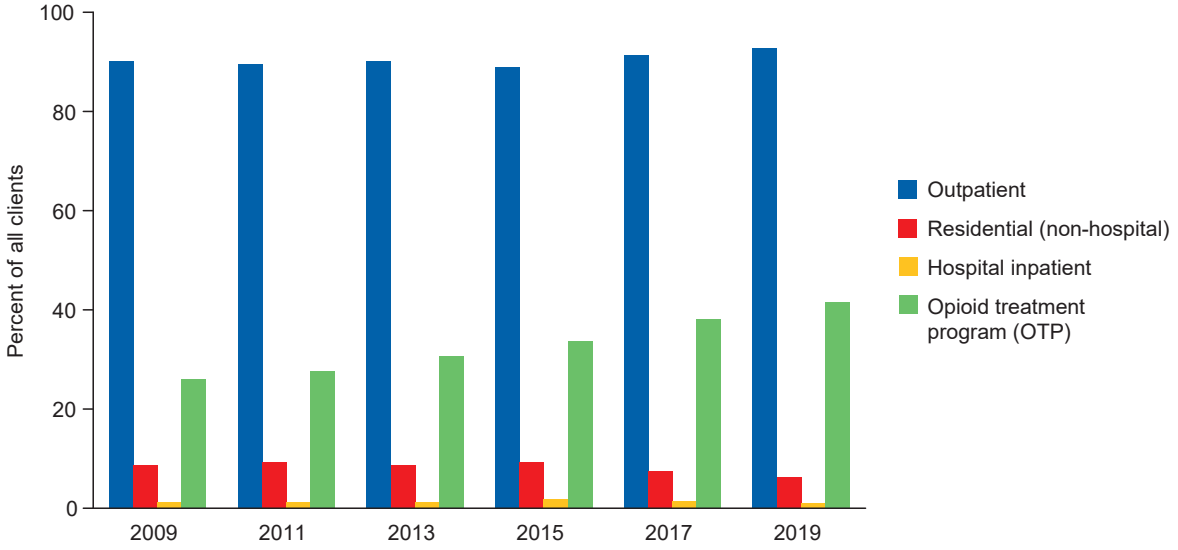
- Local, county, or community government-operated facilities treated 6 percent of clients in 2009, decreasing to 4 percent in 2019. (The number of clients in local government-operated facilities decreased from 75,126 in 2009 to 59,708 in 2019.)
- State government-operated facilities treated 4 percent of clients in 2009, decreasing to 2 percent in 2019. (The number of clients in state government-operated facilities decreased from 42,761 in 2009 to 27,081 in 2019.)
- Federal government-operated facilities treated 4 percent of clients in 2009, decreasing to 3 percent in 2019. (The number of clients in federal government-operated facilities decreased from 46,282 in 2009 to 41,848 in 2019.)[9]
- Tribal government-operated facilities treated 1 percent of clients both in 2009 and in 2019. (The number of clients in tribal government-operated facilities increased from 12,073 in 2009 to 14,389 in 2019.)

Type of Care Received

Table 3.2 and Figure 5. The proportions of clients in treatment for the major types of care—outpatient, residential (non-hospital), and hospital inpatient—were relatively stable between 2009 and 2019.

- Clients in outpatient treatment comprised between 89 and 93 percent of all clients each year. (The number of outpatient clients increased from 1,064,562 in 2009 to 1,355,024 in 2019.)
- Clients in residential (non-hospital) treatment comprised between 6 and 9 percent of all clients each year. (The number of residential [non-hospital] clients decreased from 103,174 in 2009 to 91,592 in 2019.)

Figure 5. Clients in treatment, by type of care received: Percent, 2009–2019



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2009–2019.

[9] Data for the federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other unspecified federal agencies) are detailed in the tables.

- Clients in hospital inpatient treatment comprised between 1 and 2 percent of all clients each year. (The number of hospital inpatient clients decreased from 14,341 in 2009 to 14,090 in 2019.)

Clients Receiving MAT

Table 3.2. Clients who were receiving methadone, buprenorphine, or naltrexone could be in any type of care—outpatient, residential (non-hospital), or hospital inpatient. Clients could receive methadone for OUD only in OTPs certified by SAMHSA to provide MAT with methadone and buprenorphine. However, clients could receive buprenorphine or naltrexone in any type of facility.

- The proportion of all clients who were receiving methadone increased from 24 percent in 2009 to 28 percent in 2019. (The number of clients who were receiving methadone increased from 283,177 in 2009 to 408,550 in 2019.)
- The proportion of clients who were receiving buprenorphine increased from 2 percent in 2009 to 12 percent in 2019. (The number of clients who were receiving buprenorphine increased from 24,173 in 2009 to 168,428 in 2019.)[10]
- The number of clients who were receiving naltrexone was 30,394 in 2019 (2 percent of all clients).[11]

Substance Abuse Problem Treated

Table 3.3. The proportion of clients in treatment for the three broad categories of substance abuse problems—both alcohol and drug abuse, drug abuse alone, and alcohol abuse alone—demonstrated some changes between 2009 and 2019.

- The percentage of clients in treatment for both drug and alcohol abuse decreased from 46 percent in 2009 to 33 percent in 2019. (The number of clients in treatment for both drug and alcohol abuse was 517,887 in 2009 and 476,065 in 2019.)
- The percentage of clients in treatment for drug abuse alone increased from 39 percent in 2009 to 51 percent in 2019. (The number of clients in treatment for drug abuse alone increased from 441,128 in 2009 to 743,828 in 2019.)
- The percentage of all clients in treatment for alcohol abuse alone decreased from 19 percent in 2009 to 14 percent in 2019. (The number of clients in treatment for alcohol abuse alone decreased from 220,373 in 2009 to 205,402 in 2019.)

---

[10] Individual physicians, physician assistants, and nurse practitioners can receive special authorization from the U.S. Department of Health and Human Services that allows them to prescribe buprenorphine for the treatment of opioid use disorder. These practitioners may prescribe buprenorphine to patients in an office setting or to patients at substance abuse treatment facilities. Only clients who received buprenorphine through a facility affiliated with an authorized practitioner are included in this report; it does not include clients who received buprenorphine through an independent DATA 2000-waivered practitioner.

[11] In the 2017 and 2019 surveys, facilities reported client counts of those receiving naltrexone for opioid use disorder. In the 2011, 2013, and 2015 surveys, the reported counts of clients receiving naltrexone were limited to those receiving extended-release injectable naltrexone (Vivitrol®). This report does not include those who received naltrexone through other sources.

- The percentage of clients in treatment for diagnosed co-occurring mental and substance use disorders increased from 40 percent in 2009 to 48 percent in 2019. (The number of clients in treatment for diagnosed co-occurring mental and substance use disorders increased from 456,567 in 2009 to 702,914 in 2019.)

Clients Under the Age of 18 Years in Treatment

Table 3.4. The proportion of all clients who were under the age of 18 years declined from 84,326 in 2009 to 59,854 in 2019.

- Of all clients under the age of 18 years, between 87 and 90 percent were in outpatient treatment from 2009 to 2019. (The number of outpatient clients under the age of 18 years decreased from 74,623 in 2009 to 53,636 in 2019.)
- Of all clients under the age of 18 years, between 9 and 12 percent were in residential (non-hospital) treatment from 2009 to 2019. (The number of residential [non-hospital] clients under the age of 18 years decreased from 8,947 in 2009 to 5,468 in 2019.)
- Of all clients under the age of 18 years, between 1 and 2 percent were in hospital inpatient treatment from 2009 to 2019. (The number of hospital inpatient clients under the age of 18 years decreased from 756 in 2009 to 750 in 2019.)
- The proportion of clients under the age of 18 years in treatment facilities with special programs or groups for adolescents decreased from 81 percent in 2009 to 74 percent in 2019. (The number of clients under the age of 18 years in treatment facilities with special programs or groups for adolescents decreased from 68,448 in 2009 to 43,996 in 2019.)

Chapter 4
Facility Characteristics and Services

This chapter outlines key characteristics of facilities and programs in 2019.

Facility Operation and Type of Care

Table 2.2. Facilities were asked to designate the type of entity responsible for the operation of the facility.

- Private organizations were the most common type of entity responsible for facility operation, with private non-profit organizations making up the largest share of facilities at 50 percent and private for-profit organizations making up the second largest share of facilities at 40 percent.
- Government entities were responsible for facility operation in the remaining 10 percent of facilities; local, county, or community governments accounted for 4 percent; state governments made up 2 percent; the federal government comprised another 2 percent; and tribal governments also comprised 2 percent.[12]

Table 4.1b. Type of care offered consists of three broad categories (outpatient, residential [non-hospital], and hospital inpatient), each with several subcategories. A facility could offer more than one type of care. The proportions of all facilities that offered the different types of care were:[13]

- A majority (82 percent) offered some form of outpatient treatment. Regular outpatient treatment was the most common form of care offered and was offered at 76 percent of facilities. Intensive outpatient treatment was offered at slightly less than half of facilities (46 percent). Outpatient methadone/buprenorphine maintenance or naltrexone treatment was offered at a third of facilities (33 percent). Outpatient day treatment or partial hospitalization and outpatient detoxification were offered at 14 and 11 percent of facilities, respectively.
- Residential (non-hospital) treatments were offered in slightly less than a quarter of facilities (24 percent). Long-term treatment (more than 30 days) was the most common type of residential treatment with 19 percent of facilities offering this type of service, followed by short-term treatment (30 days of fewer) which was offered in 15 percent of facilities, and residential detoxification which was offered in 9 percent of facilities.
- Hospital inpatient treatment was offered in a significantly smaller percentage of facilities than outpatient and residential (non-hospital) treatment, with only 6 percent of facilities offering hospital inpatient care. Inpatient detoxification was offered in 5 percent of facilities, and inpatient treatment was offered in 4 percent of facilities.

Approximately three quarters (77 percent) of private non-profit facilities provided outpatient care and about one third (29 percent) provided residential (non-hospital) care. In contrast,

[12] Data for the federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other unspecified federal agencies) are detailed in the tables.

[13] Facility percentages sum to more than 100 percent, because a facility could provide more than one type of care.

87 percent of private for-profit facilities provided outpatient care and 18 percent provided residential (non-hospital) care.

Substance Abuse Treatment

Table 4.2. Facilities were asked to estimate the proportions of clients in treatment for both alcohol and drug abuse, for alcohol abuse only, and for drug abuse only. They were also asked to estimate the proportion of clients with diagnosed co-occurring mental and substance use disorders. On March 29, 2019:

- About nine out of every 10 facilities (88 percent) had clients in treatment for both alcohol and drug abuse, 87 percent had clients in treatment for drug abuse only, and 77 percent had clients in treatment for alcohol abuse only.
- Most facilities (89 percent) had clients in treatment with diagnosed co-occurring mental and substance use disorders.

Facility Size

Facilities with OTPs

Table 4.3. Facility size is defined by the number of clients in substance abuse treatment on the survey reference date. Facilities with OTPs reported a median of 261 clients in substance abuse treatment on March 29, 2019.

The median number of clients, by facility operation, ranged from 219 clients in facilities with OTPs operated by state governments to 525 clients in facilities with OTPs operated by tribal governments.

- On March 29, 2019, the median number of clients for facilities with OTPs that offered any outpatient treatment was 284. For facilities that offered outpatient methadone/buprenorphine maintenance or naltrexone treatment, the median was 261 clients. For facilities that offered regular outpatient care, the median number of clients was 60. Facilities with intensive outpatient treatment, facilities with outpatient day treatment or partial hospitalization, and facilities with outpatient detoxification had median client numbers of 20, 11, and five, respectively.
- Facilities with OTPs that offered any residential (non-hospital) treatment had a median of 35 clients on March 29, 2019. Facilities with OTPs that offered long-term treatment (more than 30 days) reported a median of 36 clients.[14] Facilities with OTPs that offered short-term treatment (30 days or fewer) had a median of 29 clients. At facilities with OTPs that offered residential detoxification, the median number of clients was 15.
- Facilities with OTPs that offered hospital inpatient treatment had a median of 20 clients on March 29, 2019. Facilities with OTPs that offered inpatient treatment reported a median of 20 clients, while facilities with OTPs that offered inpatient detoxification treatment reported a median of 15 clients.

[14] The median number of clients for the main categories of type of care (outpatient, residential, and hospital inpatient) can be greater than the median for any of the subcategories, because a facility can provide more than one subcategory of the main types of care. The median for each category or subcategory is computed separately excluding facilities that did not have client counts with respect to that category or subcategory.

Facilities without OTPs

Table 4.4. Facility size is defined by the number of clients in substance abuse treatment on the survey reference date. The median number of clients in substance abuse treatment at a facility without an OTP (a non-OTP facility) on March 29, 2019, was 35 clients.

The median number of clients in facilities without an OTP ranged, by facility operation, from 28 clients in tribal government-operated facilities to 68 clients in facilities operated by the federal government.

- On March 29, 2019, the median number of clients for facilities without OTPs that offered any outpatient treatment was 40 clients. For non-OTP facilities that offered outpatient methadone/buprenorphine maintenance or naltrexone treatment, the median was 20 clients. Non-OTP facilities that offered regular outpatient care reported a median of 30 clients; non-OTP facilities with intensive outpatient treatment reported a median of 15 clients; non-OTP facilities with outpatient day treatment or partial hospitalization reported a median of 10 clients; and non-OTP facilities with outpatient detoxification reported a median of five clients.
- Non-OTP facilities that offered any residential (non-hospital) treatment had a median of 17 clients on March 29, 2019. Non-OTP facilities that offered long-term treatment (more than 30 days), had a median of 15 clients, and non-OTP facilities that offered short-term treatment (30 days or fewer) reported a median of 12 clients. Facilities without OTPs that offered residential detoxification reported a median of five clients.
- Facilities without OTPs that offered hospital inpatient treatment had a median of 12 clients on March 29, 2019. Facilities without OTPs that offered inpatient treatment reported a median of 11 clients, while facilities without OTPs that offered inpatient detoxification treatment had a median of six clients.

Tables 4.5a–c. Facilities were sorted into five size groups based on the total number of clients in treatment on March 29, 2019: fewer than 15 clients, 15–29 clients, 30–59 clients, 60–119 clients, and 120 or more clients.

Table 4.5a. Outpatient facilities operated by the federal government reported client counts within the largest size class in greater proportion than outpatient facilities operated by other entities—35 percent of federally operated facilities had 120 or more clients in treatment on March 29, 2019, compared with 28 percent of all outpatient facilities.

Table 4.5b. Residential (non-hospital) facilities operated by tribal governments and by private for-profit organizations reported client counts within the smallest size class in greater proportion than residential (non-hospital) facilities operated by other entities: 62 percent and 57 percent, respectively, had fewer than 15 clients in treatment on March 29, 2019, compared with 43 percent of all residential (non-hospital) facilities.

Table 4.5c. Inpatient facilities operated by the federal government reported client counts within the smallest size class in greater proportion than inpatient facilities operated by other entities—77 percent had fewer than 15 clients in treatment on March 29, 2019, compared with 59 percent of all inpatient facilities.

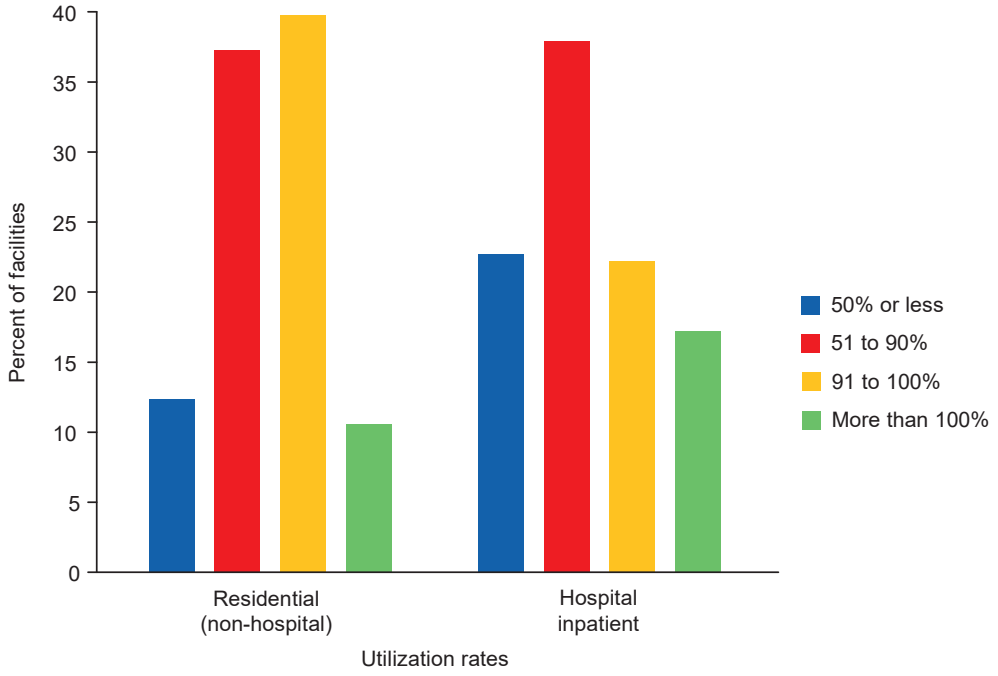
Facility Capacity and Utilization Rates

Facilities were asked to report the number of residential (non-hospital) and hospital inpatient beds designated for substance abuse treatment. Utilization rates were calculated by dividing the number of residential (non-hospital) or hospital inpatient clients by the number of residential (non-hospital) or hospital inpatient designated beds. Because substance abuse treatment clients may also occupy non-designated beds, utilization rates could be more than 100 percent.

Table 4.6. There were 2,710 facilities that reported having 88,447 residential (non-hospital) beds designated for substance abuse treatment on March 29, 2019. The utilization rate was 95 percent, and ranged from 79 percent in facilities operated by local, county, or community governments to 176 percent in facilities operated by tribal governments.[15]

Table 4.7. There were 459 facilities that reported having 13,023 hospital inpatient beds designated for substance abuse treatment on March 29, 2019. The utilization rate was 87 percent, and ranged from 79 percent in facilities operated by private non-profit organizations to 176 percent in facilities operated by the federal government.[16]

Figure 6. Residential (non-hospital) and hospital inpatient utilization rates: March 29, 2019



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2019.

[15] Residential (non-hospital) utilization rates are based on a subset of 2,710 facilities that reported for themselves alone and that reported numbers greater than zero for both designated beds and clients.

[16] Hospital inpatient utilization rates are based on a subset of 459 facilities that reported for themselves alone and that reported numbers greater than zero for both designated beds and clients.

Tables 4.6–4.7 and Figure 6 show the distribution of facility-level utilization rates for residential (non-hospital) beds and for hospital inpatient beds. Facilities with hospital inpatient beds (87 percent) had generally lower utilization rates than facilities with residential (non-hospital) beds (95 percent). Of facilities with residential (non-hospital) beds, 40 percent had utilization rates of between 91 and 100 percent; 11 percent had utilization rates above 100 percent. Of facilities with hospital inpatient beds, 22 percent had utilization rates between 91 and 100 percent, while 17 percent had utilization rates above 100 percent.

Services Provided

Table 4.8a. Facilities were asked about the types of services they provided. Services were grouped into the nine broad categories shown below.

Assessment and pre-treatment services were offered by 99 percent of all facilities.

- Screening for substance abuse was provided by 97 percent of all facilities.
- Comprehensive substance abuse assessment or diagnosis was provided by 94 percent of all facilities.
- Screening for mental disorders was provided by 77 percent of all facilities.
- Screening for tobacco use was provided by 72 percent of all facilities.
- Outreach to persons in the community who may need treatment was provided by 64 percent of all facilities. By contrast, 84 percent of tribal government-operated facilities offered outreach services.
- Comprehensive mental health assessment or diagnosis was provided by 56 percent of all facilities.
- Interim services for clients when immediate admission was not possible were provided by 48 percent of all facilities. By contrast, 75 percent of federal government-operated and 74 percent of tribal government-operated facilities offered interim services.
- A professional interventionist/educational consultant was provided by 18 percent of all facilities.

Testing services were provided by 91 percent of all facilities.

- Drug or alcohol urine screening was provided by 88 percent of all facilities.
- Breathalyzer or other blood alcohol testing was provided by 64 percent of all facilities. By contrast, 82 percent of federal government-operated facilities provided breathalyzer or other blood alcohol testing.
- Testing for hepatitis B (HBV), hepatitis C (HCV), HIV, STDs, and TB was provided by between 26 and 42 percent of all facilities.
- Drug and alcohol oral fluid testing was provided by 26 percent of all facilities.
- Testing for metabolic syndrome was provided by 8 percent of all facilities.

Medical services were provided by 10 percent of facilities.

- Vaccination services for hepatitis A (HAV) and hepatitis B (HBV) were provided by 10 percent and 9 percent, respectively, of all facilities.

Transitional services were provided by 99 percent of all facilities.

- Discharge planning was provided by 95 percent of all facilities.
- Aftercare/continuing care was provided by 87 percent of all facilities.
- Outcome follow-up after discharge was provided by 68 percent of all facilities.
- Naloxone and overdose education were provided by 50 percent of all facilities.

Recovery support services were provided by 88 percent of facilities.

- Mentoring/peer support and assistance in locating housing for clients were each provided by 61 percent of all facilities.
- Assistance with obtaining social services was provided by 66 percent of all facilities.
- Self-help groups were provided by 49 percent of all facilities.
- Employment counseling or training for clients was provided by 43 percent of all facilities.
- Recovery coach services were provided by 23 percent of all facilities.

Education and counseling services were provided by more than 99 percent of all facilities.

- Substance abuse education and individual counseling were each provided by 97 percent of all facilities.
- Group counseling was provided by 93 percent of all facilities.
- Family counseling was provided by 81 percent of all facilities.
- Marital/couples counseling was provided by 60 percent of all facilities.
- HIV or AIDS education, counseling, or support was provided by 58 percent of all facilities.
- Smoking/tobacco cessation counseling and health education other than HIV/AIDS or hepatitis were provided by 57 percent of all facilities.
- Hepatitis education, counseling, or support was provided by 53 percent of all facilities.
- Vocational training or educational support was provided by 16 percent of all facilities.

Ancillary services were provided by 96 percent of all facilities.

- Case management services were provided by 83 percent of all facilities.
- Social skills development was provided by 75 percent of all facilities.
- Mental health services were provided by 70 percent of all facilities.
- Transportation assistance to treatment was provided by 46 percent of all facilities.
- Domestic violence services were provided by 38 percent of all facilities.

- Early intervention for HIV was provided by 23 percent of all facilities.
- Acupuncture and child care for clients' children were each provided by 6 percent of all facilities.
- Residential beds for clients' children were provided by 3 percent of all facilities.

"Other" services were provided by 42 percent of all facilities.[17]

- Treatment for other non-substance addiction disorders was provided by 35 percent of all facilities.
- Treatment for gambling disorders was provided by 26 percent of all facilities.
- Treatment for Internet use disorder was provided by 15 percent of all facilities.

At least one pharmacotherapy was provided by 65 percent of all facilities; rates were higher in federal government-operated facilities (87 percent).

- Medications for psychiatric disorders were the most frequently available pharmacotherapies, and were provided in 49 percent of all facilities.
- Buprenorphine (with or without naloxone, as sub-dermal implant, or extended-release injectable) was provided by 41 percent of all facilities.
- Naltrexone (oral or extended-release injectable) was provided by 35 to 36 percent of all facilities.
- Nicotine replacement was provided by 32 percent of all facilities.
- Non-nicotine medications for smoking cessation were provided by 27 percent of all facilities.
- Acamprosate (Campral®) was provided by 24 percent of all facilities.
- Disulfiram (Antabuse®) and clonidine were each provided by 23 percent of all facilities.
- Methadone was provided by 10 percent of all facilities.
- Medications for hepatitis C were provided by 9 percent of all facilities.
- Medications for HIV treatment were provided by 8 percent of all facilities.
- Lofexidine was provided by 4 percent of all facilities.

Clinical/Therapeutic Approaches

Table 4.10. Facilities were asked to indicate if they used any of 15 specific clinical/therapeutic approaches frequently.

- The approaches that facilities most commonly reported using frequently were substance abuse counseling (98 percent), relapse prevention (96 percent), cognitive behavioral therapy (94 percent), and motivational interviewing (93 percent).
- A majority of facilities reported frequently using trauma-related counseling (82 percent), brief intervention (82 percent), anger management (81 percent), 12-step facilitation (68 percent),

[17] "Other" services consist of treatment for gambling disorder, Internet use disorder, or any other non-substance use addiction disorder.

contingency management/motivational incentives (55 percent), and dialectical behavior therapy (59 percent).

- Less than half of facilities reported "frequently" using rational emotive behavioral therapy (43 percent), matrix model (45 percent), telemedicine/telehealth (27 percent), and community reinforcement plus vouchers (11 percent).

MAT for Opioid Use Disorder

Table 4.11b. Facilities were asked about whether they treated opioid use disorder (OUD) and how MAT was used in the treatment they provided for OUD. In response, facilities reported the following:

- Overall, 89 percent of facilities reported that they treat OUD.
- The proportion of facilities which reported that they did not use MAT, nor accept clients using MAT to treat OUD, was 9 percent.
- Almost half of facilities (49 percent) reported that they accepted clients using MAT, but that the medications originated from or were prescribed by another entity. The most common source for medications when they originated from or were prescribed by another entity was the client's personal provider (38 percent).
- The proportion of facilities that reported having a federally certified OTP was 11 percent.
- The proportion of facilities which reported that they administered naltrexone to treat OUD was 34 percent, and the proportion which reported that they prescribed buprenorphine was 33 percent.

Table 4.12. Facilities that used MAT for OUD were asked whether they offered the following medication services and to estimate the percentage of clients on MAT that received them.

- A majority of facilities that use MAT for OUD reported that they did not offer the following services: detoxification from opioids of abuse with lofexidine or clonidine (83 percent), detoxification from opioids of abuse with methadone or buprenorphine (69 percent), and maintenance services with medically supervised withdrawal (or taper) after a period of stabilization (52 percent).
- Among facilities that use MAT for OUD, 34 percent of facilities reported that more than two thirds of their clients received methadone or buprenorphine. Additionally, 59 percent of facilities reported that at least some of their clients received relapse prevention with naltrexone.

Treatment of Alcohol Use Disorder

Tables 4.13 and 4.14b. Facilities were asked whether and how they treat alcohol use disorder (AUD). Overall, 90 percent of facilities treated AUD. The proportion of facilities that reported treating AUD without MAT was 19 percent. A third of facilities (33 percent) reported that they administer or prescribe disulfiram, naltrexone, or acamprosate; 48 percent of facilities reported that they treat clients with MAT using medications that originate elsewhere. When clients were treated with medications that originate elsewhere, the most common source was the client's personal provider (40 percent); a business, contractual, or formal referral relationship with a prescribing entity (13 percent); or a prescribing entity in same network (10 percent).

Programs or Groups for Specific Client Types

Table 4.15b. Facilities were asked about the provision of substance use treatment programs or groups specifically tailored for categories of clients. Overall, 81 percent of facilities offered at least one substance use treatment program or group specifically tailored for a category of client. The proportions of facilities that provided specifically tailored substance use treatment programs or groups were:

- Many facilities offered programs or groups for clients in specific demographic groups. Programs for adult women and programs for adult men were provided by 49 percent and 47 percent of facilities, respectively. Programs for young adults, programs for pregnant or postpartum women, programs for adolescents, and programs for seniors or older adults were provided by 31 percent, 24 percent, 24 percent, and 23 percent of facilities, respectively.
- Facilities offered programs for clients with a variety of co-occurring conditions. Programs for clients with co-occurring mental and substance use disorders were provided by 53 percent of facilities. Programs for clients with co-occurring pain and substance use were provided by 19 percent of facilities. Programs for clients with HIV or AIDS were provided by 20 percent of facilities.
- Some facilities offered programs for clients who have experienced trauma. Programs for clients who have experienced trauma were provided by 43 percent of facilities. Programs for clients who have experienced intimate partner violence or domestic violence were provided by 28 percent of facilities. Programs for clients who have experienced sexual abuse were provided by 28 percent of facilities.
- Some facilities offered specifically tailored programs or groups for current or former members of the military or their families. Programs for active duty military were provided by 12 percent of facilities, and programs for members of military families were provided by 14 percent of facilities. Programs for veterans were provided by 22 percent of facilities.
- Specifically tailored programs or groups for criminal justice clients (other than DUI/DWI)[18] were provided by 36 percent of facilities, and programs for clients arrested for DUI or DWI were provided by 24 percent of facilities.
- Specifically tailored programs or groups for lesbian, gay, bisexual, or transgender (LGBT) clients were provided by 23 percent of facilities.

Treatment Services in Sign Language for the Deaf and Hard-of-Hearing and in Languages Other Than English

Table 4.16b. Facilities were asked about the provision of substance abuse treatment services in sign language for the deaf and hard-of-hearing. They were also asked if treatment was provided in languages other than English, if this treatment was provided by a staff counselor or by an on-call interpreter, and in what languages staff counselors provided treatment.

- Substance abuse treatment services in sign language for the deaf and hard-of-hearing were provided in 35 percent of all facilities. Facilities operated by local, county, or community governments

[18] Facilities treating incarcerated persons only were excluded from this report; see Chapter 1.

and by state governments most frequently reported that they offer these services (68 and 56 percent, respectively).

- Substance abuse treatment services in languages other than English were provided in 53 percent of all facilities, ranging from 33 percent of tribal government-operated facilities to 82 percent of local, county, or community government-operated facilities.
- Of facilities that provided treatment services in languages other than English, 23 percent used only staff counselors who spoke other languages; another 25 percent of facilities used both staff counselors and on-call interpreters.
- In facilities where staff counselors provided treatment services in languages other than English, Spanish was the most frequently spoken language (94 percent of those facilities). Treatment services in American Indian/Alaska Native languages were provided by 2 percent of all facilities where staff counselors provided treatment services in languages other than English. A majority of tribal government-operated facilities and most Indian Health Service-operated facilities where staff counselors provided treatment services in languages other than English offered services in American Indian/Alaska Native languages (83 and 80 percent, respectively).

Detoxification Services

Table 4.17. Facilities that provided detoxification services were asked to indicate whether they detoxified clients from specified substances, and whether medication was routinely used during detoxification. The number of facilities that provided any type of substance detoxification services was 3,508 from a total of 15,961 facilities.

Of the 3,508 facilities that offered detoxification, the proportions that offered detoxification from the following specific substances were: 95 percent for opioids, 71 percent for alcohol, 66 percent for benzodiazepines, 60 percent for cocaine, 60 percent for methamphetamines, and 14 percent for other substances. Medications were routinely used during detoxification in 90 percent of the facilities providing detoxification services.

Client Outreach

Table 4.18. Facilities were asked if they provided outreach to persons who may need treatment. Outreach to persons in the community who may need treatment was provided by 64 percent of all facilities and by 84 percent of tribal government-operated facilities.

Facility Licensing, Certification, or Accreditation

Facilities were asked to report licensure, certification, or accreditation by specified agencies or organizations. These included the state substance abuse agency; state mental health department; state department of health; hospital licensing authority; the Joint Commission; CARF; NCQA; COA; HFAP; and other national organizations or federal, state, or local agencies.[19]

Table 4.19b. Overall, 94 percent of all facilities reported that they were licensed, certified, or accredited by one or more agencies or organizations.

[19] CARF: Commission on Accreditation of Rehabilitation Facilities; NCQA: National Committee for Quality Assurance; COA: Council on Accreditation; and HFAP: Healthcare Facilities Accreditation Program.

The proportions of facilities reporting that they were licensed, certified, or accredited by specified agencies or organizations were 78 percent by a state substance abuse agency; 47 percent by a state department of health; 40 percent by a state mental health department; 29 percent by CARF; 23 percent by the Joint Commission; 5 percent by a hospital licensing authority; 4 percent by COA; 2 percent by NCQA; 1 percent by HFAP; and 4 percent by other national organizations or federal, state, or local agencies.

Table 4.20b. Facility licensing, certification, or accreditation was associated with the type of care offered. State substance abuse agencies licensed, certified, or accredited 79 percent of facilities that offered residential (non-hospital) treatment, 78 percent of facilities that offered outpatient treatment, and 59 percent of facilities that offered hospital inpatient treatment.

State mental health departments licensed, certified, or accredited 43 percent of facilities that offered outpatient treatment, 37 percent of hospital inpatient facilities, and 29 percent of residential (non-hospital) facilities.

Federally Qualified Health Centers

Table 4.21. Facilities were asked to indicate whether they were a Federally Qualified Health Center (FQHC). Of all 15,961 facilities included in the report, 1,427 facilities were Federally Qualified Health Centers. Most FQHCs provided outpatient care (89 percent). Residential (non-hospital) care and inpatient hospital care were provided by a smaller proportion of FQHCs—15 percent and 4 percent, respectively.

Payment Options

Table 4.22b. Facilities were asked to indicate whether they accepted specified types of payment or insurance for substance abuse treatment. They were also asked about the use of a sliding fee scale and if they offered treatment at no charge or minimal payment to clients who could not pay.

- The mostly commonly accepted payment types were cash or self-payment (90 percent), private health insurance (73 percent), and Medicaid (68 percent).
- A minority of facilities reported that they accept a state-financed health insurance plan other than Medicaid (49 percent), federal military insurance (38 percent), Medicare (37 percent), and IHS/Tribal/Urban funds (12 percent).[20]

A smaller proportion of facilities operated by federal and tribal governments reported that they accept cash or self-payment (43 and 42 percent, respectively) than did facilities operated by any other entity. Facilities operated by private for-profit organizations and by the federal government less frequently reported that they accept Medicaid, or a state-financed health insurance plan other than Medicaid, than facilities operated by any other entity.

A larger proportion of facilities operated by the Indian Health Service reported that they accept ITU (IHS/Tribal/Urban) funds (84 percent) than did facilities operated by any other entity.[20]

[20] Through a contract, tribes can receive the money that the Indian Health Service (IHS) would have used to provide direct health services for tribal members. Tribes can use these funds to provide directly, or through another entity, a broad range of health services. This option was part of P.L. 93-638 and is commonly known as "638 contracting."

Use of a sliding fee scale was reported by 58 percent of all facilities, ranging from 22 percent of facilities operated by tribal governments to 80 percent of facilities operated by local, county, or community governments.

Treatment at no charge or minimal payment for persons who cannot afford to pay was offered by 45 percent of all facilities, ranging from 21 percent of facilities operated by private for-profit organizations to 81 percent of facilities operated by tribal governments.

Facility Funding

Table 4.23. Facilities were asked if they receive federal, state, or local government funds or grants to support their substance abuse treatment programs.

Overall, 52 percent of facilities reported receiving government funds to support substance abuse treatment programs. The proportions were highest in facilities operated by tribal governments and by local, county, or community governments (88 percent each). Of facilities operated by private non-profit organizations, 72 percent reported that they receive public funds, whereas 18 percent of facilities operated by private for-profit organizations reported receiving public funds.

Facilities Using MAT

OTPs are certified by SAMHSA to provide MAT in the treatment of OUD. Currently, methadone and buprenorphine are the only opioid medications approved for the treatment of OUD. Injectable naltrexone is approved for relapse prevention in OUD. Only OTPs may use methadone for the treatment of OUD. Facilities with DATA 2000-waivered practitioners may prescribe buprenorphine. Any authorized personnel (physicians, physician assistants, etc.) may prescribe or administer injectable naltrexone.

Table 4.24a. There were 7,770 facilities that offered any type of MAT, of which 1,691 facilities had OTPs, 6,497 facilities offered buprenorphine for MAT, and 5,594 facilities offered injectable naltrexone for MAT.

- Of the 1,691 facilities with OTPs, 349 facilities provided methadone only; 647 facilities provided methadone and buprenorphine; 536 facilities provided methadone, buprenorphine, and injectable naltrexone; and 50 facilities provided methadone and injectable naltrexone.
- There were 6,497 facilities that offered buprenorphine. Among OTP facilities that offered buprenorphine, 647 facilities offered methadone and buprenorphine; 536 facilities offered methadone, buprenorphine, and injectable naltrexone; 86 facilities offered buprenorphine and injectable naltrexone; and 20 facilities that offered buprenorphine only. Among non-OTP facilities, there were 1,160 facilities that offered buprenorphine and 4,048 facilities that offered buprenorphine and injectable naltrexone.
- There were 5,594 facilities that offered injectable naltrexone. Among OTP facilities, 536 facilities offered methadone, buprenorphine, and injectable naltrexone; 50 facilities offered methadone and injectable naltrexone; 86 facilities offered buprenorphine and injectable naltrexone; and three facilities offered injectable naltrexone only. Among non-OTP facilities, 4,048 facilities offered buprenorphine and injectable naltrexone, while 871 facilities offered injectable naltrexone.

Table 4.24b. The majority of facilities with OTPs that offered methadone only were operated by private for-profit organizations (65 percent). In contrast, facilities with OTPs operated by private non-profit organizations accounted for the majority of facilities that offered methadone and injectable naltrexone (82 percent).

- Of all facilities that offered buprenorphine, 90 percent were operated by either private non-profit or private for-profit organizations (45 percent each). Federal government-operated facilities represented 4 percent of all facilities that offered buprenorphine, while local, county, or community government-operated facilities represented 3 percent.
- Of all facilities that offered injectable naltrexone, 89 percent were operated by either private non-profit or private for-profit organizations (49 percent and 40 percent each); 4 percent were operated by the federal government; and 4 percent were operated by local, county, or community governments.

Table 4.24b. Private for-profit organizations operated 61 percent of facilities with OTPs, and private non-profit organizations operated 32 percent of facilities with OTPs.

Table 4.25b. Most facilities with OTPs offered outpatient treatment (91 percent). Of facilities with OTPs, 89 percent offered outpatient methadone/buprenorphine maintenance or injectable naltrexone treatment and 42 percent offered outpatient detoxification.

Tables 4.20b and 4.26b. A larger proportion of facilities with OTPs than all facilities, combined, reported being licensed, certified, or accredited by a state department of health (63 vs. 47 percent), the Joint Commission (29 vs. 23 percent), CARF (67 vs. 29 percent), or a state substance abuse agency (89 vs. 78 percent).

Facility Smoking Policy

Table 4.27. Of the 15,933 facilities that responded to the question about smoking policies, 59 percent permitted smoking in designated outdoor areas, whereas 34 percent of facilities did not permit smoking anywhere outside or within any building.

Suicide Prevention-Related Services in Veterans Affairs Facilities

Table 4.28. Veterans Affairs (VA) facilities were asked what types of suicide prevention-related services they offered.

Among VA facilities, 90 percent provided evidence-based suicide prevention interventions, 95 percent provided suicide risk screening, and 95 percent provided suicide risk evaluation. All VA facilities reported offering suicide prevention-related services.

Chapter 5
Client Characteristics

This chapter describes key characteristics of the 1,460,706 clients in substance abuse treatment on March 29, 2019 [Table 5.1a]. Clients in treatment were defined as: (1) hospital inpatient and residential (non-hospital) clients receiving substance abuse treatment services on March 29, 2019, and (2) outpatient clients who were seen at the facility for substance abuse treatment or detoxification service at least once during the month of March 2019, and who were still enrolled in treatment on March 29, 2019.

Facility Operation and Type of Care

Table 5.1c. Facilities were asked to designate the type of entity responsible for the operation of the facility. On March 29, 2019, 50 percent of all clients were receiving treatment in facilities operated by private non-profit organizations and 40 percent were receiving treatment in facilities operated by private for-profit organizations. The remaining clients were receiving treatment in facilities operated by local, county, or community government (4 percent); the federal government (3 percent); state government (2 percent); or a tribal government (1 percent).

The majority of clients in outpatient methadone/buprenorphine maintenance or naltrexone treatment (60 percent) were in facilities operated by private for-profit organizations.

Table 5.1b. Facilities were asked how many clients in treatment on March 29, 2019, received specified subcategories of type of care within three broad categories.

- On March 29, 2019, 93 percent of clients were receiving outpatient treatment, with 44 percent receiving regular outpatient treatment, 37 percent receiving outpatient methadone/buprenorphine maintenance or naltrexone treatment, 9 percent receiving intensive outpatient treatment, 1 percent receiving outpatient detoxification, and 1 percent receiving outpatient day treatment/partial hospitalization.
- On March 29, 2019, 6 percent of clients were receiving residential (non-hospital) treatment, with 3 percent receiving long-term treatment (more than 30 days), 2 percent receiving short-term treatment (30 days or fewer), and 1 percent receiving residential detoxification services.
- On March 29, 2019, 1 percent of clients were receiving hospital inpatient care, with 1 percent receiving hospital inpatient treatment and less than 1 percent receiving hospital inpatient detoxification.

Clients in Federally Qualified Health Centers

Table 5.2. FQHCs reported 144,854 clients in treatment on March 29, 2019. FQHC clients were reported in three broad types of care:

- Outpatient treatment accounted for 96 percent of FQHC clients, with 49 percent receiving regular outpatient, 35 percent receiving outpatient methadone/buprenorphine maintenance or

naltrexone treatment, 11 percent receiving intensive outpatient treatment, 1 percent receiving outpatient detoxification, and 1 percent receiving outpatient day treatment/partial hospitalization.

- Residential (non-hospital) treatment accounted for 3 percent of FQHC clients, with 2 percent receiving long-term treatment (more than 30 days), 1 percent receiving short-term treatment (30 days or fewer), and less than 1 percent receiving residential detoxification services.
- Hospital inpatient treatment accounted for less than 1 percent of FQHC clients.

Clients at High Risk of Suicide at VA Facilities[21]

Table 5.3. VA facilities were asked about the number of clients in treatment on March 29, 2019, at high risk of suicide. Across all reporting VA facilities, the total number of clients at high risk of suicide in each type of care was as follows: 3,118 clients in outpatient treatment, 629 clients in hospital inpatient treatment, and 510 clients in residential (non-hospital) treatment.

Substance Abuse Treatment

Table 5.4. Facilities were asked to estimate the proportions of clients in treatment on March 29, 2019, by substance abuse problem treated (alcohol abuse only, drug abuse only, or both alcohol and drug abuse).

On March 29, 2019, 52 percent of clients were in treatment for drug abuse only, 33 percent were in treatment for both alcohol and drug abuse, and 14 percent were in treatment for alcohol abuse only.

By facility operation, the largest proportion of clients in treatment for abuse of both alcohol and drugs was in tribal government-operated facilities (52 percent). For abuse of drugs only, the largest proportion of clients was in facilities operated by private for-profit organizations (65 percent); for abuse of alcohol only, the largest proportion was in federal government-operated facilities (31 percent).

Clients Under the Age of 18 Years in Treatment

Table 5.5. Facilities were asked how many clients in treatment on March 29, 2019, were under the age of 18 years.

There were 59,854 clients under the age of 18 years in substance abuse treatment on March 29, 2019, of the total 1,460,706 clients in treatment on that date.

Of the 59,854 clients under the age of 18 years, 53,636 clients (90 percent) were in outpatient treatment, while 5,468 clients (9 percent) were in residential (non-hospital) treatment, and 750 clients (1 percent) were in hospital inpatient treatment.

Clients Receiving MAT for OUD

Tables 5.6a–b. Facilities were asked how many clients in treatment on March 29, 2019, received MAT for OUD for detoxification or maintenance purposes. MAT includes the use of methadone

[21] Data for the federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other federal agencies specified by respondents) are detailed in the tables.

and buprenorphine for the treatment of OUD, and the use of naltrexone for relapse prevention in OUD. Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of OUD; some of these practitioners are affiliated with facilities (either OTPs or other). All physicians or approved medical personnel with prescribing privileges can prescribe naltrexone.[22]

- Of the total 1,460,706 clients in treatment, 447,086 received MAT in OTP facilities.
- There were 408,550 clients receiving methadone in OTP facilities. Of the clients receiving methadone, 250,661 clients (61 percent) were provided treatment at facilities with OTPs operated by private for-profit organizations, and 134,413 clients (33 percent) were provided treatment at facilities with OTPs operated by private non-profit organizations.
- There were 35,549 clients receiving buprenorphine in facilities with OTPs and 132,879 clients receiving buprenorphine in facilities that did not have OTPs.
    - Of the clients receiving buprenorphine in facilities with OTPs, 22,124 clients (62 percent) were provided treatment at facilities with OTPs operated by private for-profit organizations, and 9,571 clients (27 percent) were provided treatment at non-OTP facilities operated by private non-profit organizations.
    - Of the clients receiving buprenorphine in non-OTP facilities, 76,709 clients (58 percent) were provided treatment at non-OTP facilities operated by private for-profit organizations, and 44,683 clients (34 percent) were provided treatment at non-OTP facilities operated by private non-profit organizations.
- There were 2,987 clients receiving naltrexone in facilities with OTPs for OUD and 27,407 clients receiving naltrexone in non-OTP facilities.
    - Of the clients receiving naltrexone in OTPs, 1,454 clients (49 percent) were provided treatment at facilities with OTPs operated by private for-profit organizations, and 1,007 clients (34 percent) were provided treatment at facilities with OTPs operated by private non-profit organizations.
    - Of the clients receiving naltrexone in non-OTP facilities, 15,795 clients (58 percent) were provided treatment at non-OTP facilities operated by private non-profit organizations, and 8,711 clients (32 percent) were provided treatment at non-OTP facilities operated by private for-profit organizations.

Clients Receiving MAT for Alcohol Use Disorder

Table 5.7. Facilities that offered MAT for alcohol use disorder were asked how many clients in treatment on March 29, 2019, received disulfiram (Antabuse®), naltrexone, or acamprosate for alcohol use disorder. By type of care, the total numbers of clients on March 29, 2019, that received each medication were as follows:

[22] Only clients who received buprenorphine through a facility affiliated with an authorized practitioner are included in this report; it does not include clients who received buprenorphine through an independent DATA 2000-waivered practitioner. This report also does not include clients who received naltrexone through other sources.

- Among clients who received outpatient treatment, 3,532 clients received disulfiram (Antabuse®), 20,813 clients received naltrexone, and 3,702 clients received acamprosate (Campral®).
- Among clients who received residential (non-hospital) treatment, 483 clients received disulfiram (Antabuse®), 2,983 clients received naltrexone, and 746 clients received acamprosate (Campral®).
- For clients who received hospital inpatient treatment, 594 clients received disulfiram (Antabuse®), 969 clients received naltrexone, and 361 clients received acamprosate (Campral®).

Chapter 6
State Data

This chapter breaks down data presented in earlier chapters by state or jurisdiction. The Chapter 6 tables correspond thematically to many of the tables presented in Chapters 4 and 5. Note that facilities operated by federal agencies are included in the states in which the facilities are located, although these facilities may have clients from other states.

Table 6.1 details the 2019 N-SSATS response rate.

Tables 6.2a–b present data on facilities and clients in treatment by state or jurisdiction for 2009 to 2019.

Tables 6.3a through 6.33 present facility data for 2019.

Tables 6.34a through 6.42 present client data for 2019.

Tables 6.41 and 6.42 present the number of clients aged 18 years or older in treatment—according to substance abuse problem and receipt of medication-assisted opioid treatment, respectively—per 100,000 population, by state or jurisdiction.

Survey Response

Table 6.1. The overall response rate for the survey was 91 percent. Response rates in 35 states or jurisdictions equaled or surpassed the overall rate.

Trends

Tables 6.2a–b. California and New York had the largest numbers of both facilities and clients in treatment for every odd year from 2007 through 2019.[23] On March 29, 2019, California had 11 percent of all facilities and 7 percent of all clients, and New York had 6 percent of all facilities and 8 percent of all clients.

In terms of total numbers of facilities in every odd year from 2009 through 2019, Illinois and Florida ranked either third or fourth. Michigan, North Carolina, Pennsylvania, Texas, and Washington have also consistently ranked within the top 10.

In terms of total numbers of clients in every odd year from 2009 through 2019, Pennsylvania has ranked either third or fourth. Florida, Illinois, Massachusetts, and Maryland have also consistently ranked within the top 10.

[23] Since 2013, the full N-SSATS questionnaire has alternated with an abbreviated version, fielded in even-numbered years, that does not collect client counts. Therefore, this report draws only on client counts collected in odd-numbered years between 2009 and 2019.

Clients in Treatment per 100,000 Population Aged 18 Years and Older

Table 6.41 and Figures 7–8. Among those 18 years and older, there were 529 clients in treatment per 100,000 population on March 29, 2019. The ratio was highest for clients in treatment for drug abuse only (280 per 100,000 population), followed by both alcohol and drug abuse (174 per 100,000 population) and alcohol abuse only (75 per 100,000 population). Figure 7 maps each state or jurisdiction's ratio of clients in treatment per 100,000 population by quartile in 2019. There are between 12 and 13 states in each quartile. Figure 8 maps the ratios of clients in treatment per 100,000 population for each state or jurisdiction by quartile in 2009. It has been included in this section for comparison.

[1] Numbers of facilities sum to more than the total and percentages sum to more than 100, because a facility could provide more than one type of care.

[2] Only those facilities that have opioid treatment programs certified by the Substance Abuse and Mental Health Services Administration are included.

NOTES: Survey reference dates were March 31 for 2009, 2011, 2015, and 2017; and March 29 for 2013 and 2019. See Appendix A for changes in the survey base, methods, and instruments that affect analysis of trends over time. Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

n/a Not applicable.

Injectable naltrexone = extended-release injectable naltrexone; MAT = medication assisted treatment.

[1] Any MAT type for all facilities providing medication-assisted opioid therapy includes all facilities providing buprenorphine or injectable naltrexone and OTP facilities providing methadone, buprenorphine, or injectable naltrexone.

[2] Buprenorphine includes buprenorphine with and without naloxone, buprenorphine sub-dermal implant, and extended-release injectable buprenorphine.

[3] The numbers in this category will not sum to the number of all facilities with OTPs because naltrexone only is not included due to the differences in the question asked over the time period.

NOTES: Survey reference dates were March 31 for 2009, 2011, 2015, and 2017; and March 29 for 2013 and 2019. See Appendix A for changes in the survey base, methods, and instruments that affect analysis of trends over time. Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who received or were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility. Percentages may not sum to 100 percent because of rounding.

- - Quantity is zero.

[1] Percentages sum to more than 100 percent, because a facility could provide more than one type of care.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who received or were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2019.

- - Quantity is zero.

Injectable naltrexone = extended-release injectable naltrexone.

[1] Buprenorphine total is not the sum of buprenorphine with and without naloxone and sub-dermal implant, because a facility can provide one or more forms of buprenorphine.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

Clonidine	3,742	299	520	2,923	23.4	17.7	14.2	27.6

- - Quantity is zero.

DUI/DWI = driving under the influence/driving while intoxicated or impaired; Injectable naltrexone = extended-release injectable naltrexone.

[1] Buprenorphine total is not the sum of buprenorphine with and without naloxone and sub-dermal implant, because a facility can provide one or more forms of buprenorphine.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

Table 4.9b. Services provided, by type of care: Column percent, 2019 (continued)

Services	*Total*	*Type of care*						
		Outpatient only	*Hospital inpatient only*	*Residential (non-hospital) only*	*Outpatient and hospital inpatient*	*Outpatient and residential (non-hospital)*	*Residential (non-hospital) and hospital inpatient*	*All three types of care*
Pharmacotherapies	65.3	62.0	99.7	64.1	100.0	76.0	96.2	97.4
Disulfiram (Antabuse®)	23.3	20.6	45.2	21.6	64.8	30.2	45.8	60.2
Naltrexone (oral)	35.8	30.9	59.4	38.9	81.6	50.5	79.4	85.7
Naltrexone (extended-release, injectable, for example, Vivitrol®)	35.0	30.9	44.2	37.2	71.6	50.9	71.8	83.7
Acamprosate (Campral®)	24.3	20.5	50.3	24.7	73.6	33.5	57.3	70.9
Nicotine replacement	32.4	22.8	93.2	47.2	90.4	55.8	77.9	88.3
Non-nicotine smoking/tobacco cessation medications (for example, bupropion, varenicline)	26.6	22.2	49.7	29.1	72.8	39.2	58.8	68.9
Medications for psychiatric disorders	48.6	43.4	88.4	51.3	95.0	63.9	90.1	92.9
Methadone	9.9	12.0	20.3	1.5	8.0	3.0	13.0	9.2
Buprenorphine[1]	40.7	36.9	70.0	40.3	84.7	49.5	88.5	88.3
Buprenorphine with naloxone (for example, Suboxone®, Bunavail®, Zubsolv®, Cassipa®)	38.7	35.3	59.0	38.5	78.2	47.5	82.4	85.7
Buprenorphine without naloxone	27.0	24.1	51.6	26.3	57.9	33.6	68.7	63.3
Buprenorphine sub-dermal implant (Probuphine®)	3.4	2.7	3.5	4.2	3.4	6.8	4.6	12.8
Buprenorphine (extended-release, injectable, for example, Sublocade®)	10.3	9.4	8.4	10.3	16.5	15.2	17.6	28.1
Medications for HIV treatment (for example, antiretroviral medications such as tenofovir, efavirenz, emtricitabine, atazanavir, and lamivudine)	8.2	4.1	36.8	15.1	29.1	14.8	26.7	37.8
Medications for hepatitis C (HCV) treatment (for example, sofosbuvir, ledipasvir, interferon, peginterferon, ribavirin)	8.9	5.4	28.7	15.0	25.7	15.6	29.0	38.3
Lofexidine	4.1	2.9	8.4	5.7	8.4	7.3	12.2	15.8
Clonidine	23.4	17.2	73.2	29.7	74.7	35.1	74.0	73.0

- - Quantity is zero.

Injectable naltrexone = extended-release injectable naltrexone.

[1] Buprenorphine total is not the sum of buprenorphine with and without naloxone and sub-dermal implant, because a facility can provide one or more forms of buprenorphine.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

Injectable naltrexone = extended-release injectable naltrexone; MAT = medication assisted treatment.

[1] Includes all facilities (OTP and non-OTP) providing methadone, buprenorphine, or injectable naltrexone.

[2] Buprenorphine includes buprenorphine with and without naloxone, buprenorphine sub-dermal implant, and extended-release injectable buprenorphine.

[3] Facilities that have opioid treatment programs certified by the Substance Abuse and Mental Health Services Administration.

[4] Includes facilities providing buprenorphine or injectable naltrexone.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who received or were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility. Percentages may not sum to 100 percent due to rounding.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2019.

- - Quantity is zero.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] A facility was ineligible if it had closed or was not providing substance abuse treatment or detoxification.

[3] Response rate calculated as total respondents divided by total eligible.

[4] Of 16,275 total respondents, this report excludes 213 facilities deemed out of scope for this report (125 non-treatment halfway houses, 55 solo practices not approved by the state agency for inclusion, and 33 facilities that treated incarcerated clients only). See Chapter 1 for details.

[5] Mode of response for the 15,961 facilities included in the report.

[6] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

NOTE: Percentages may not sum to 100 percent because of rounding.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Excludes clients in facilities that did not respond to the question about clients under the age of 18 years (in 2009, 346 total clients reported by five facilities; in 2011, 1,417 total clients reported by nine facilities; in 2013, 2,520 clients reported by 19 facilities; in 2015, 41 clients reported by one facility; in 2017, 62 clients reported by two facilities; and in 2019, 4,684 clients reported by 37 facilities).

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

NOTES: Values in Table 6.3b are calculated by dividing the corresponding cells of Table 6.3a by those from Table 6.2a. Survey reference dates were: March 31 for 2009, 2011, 2015, and 2017; and March 29 for 2013 and 2019. See Appendix A for changes in the survey base, methods, and instruments that affect analysis of trends over time.

- - Quantity is zero.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Percentages sum to more than 100 percent, because a facility could offer more than one assessment and pre-treatment service.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2019.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Percentages sum to more than 100 percent, because a facility could offer more than one education and counseling service.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

- - Quantity is zero.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Percentages sum to more than 100 percent, because a facility could offer more than one pharmacotherapy.

[3] Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2019.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Number of facilities sums to more than the total column, and percentages sum to more than 100 percent, because a facility could offer more than one ancillary service.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

- - Quantity is zero; ‡ No facilities in this category.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Of 1,691 OTP facilities, 232 facilities (14 percent) whose client counts were reported by another facility were not asked to respond to these questions. Of the remaining 1,459 OTP facilities, 29 facilities (2 percent) that included client counts for other facilities were excluded from tabulations for this table, and thus, tabulations are based on 1,430 OTP facilities that reported client counts for their facility alone.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] For facilities offering residential (non-hospital) services, the number of designated beds, overall utilization rate, and designated beds per facility are based on 2,710 facilities (88,447 designated beds and 83,877 clients) that reported offering residential (non-hospital) services and reported both designated beds and clients for their facility alone.

[3] For facilities offering hospital inpatient services, the number of designated beds, overall utilization rate, and designated beds per facility are based on 459 facilities (13,023 designated beds and 11,344 clients) that reported offering hospital inpatient services and which reported both designated beds and clients for their facility alone.

[4] Utilization rates may be more than 100 percent, because the substance abuse treatment clients may also occupy non-designated beds.

[5] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

- - Quantity is zero.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Number of facilities sums to more than the total column, because a facility could use more than one clinical/therapeutic approach.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

- - Quantity is zero.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Percentages sum to more than 100 percent, because a facility could use more than one clinical/therapeutic approach.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2019.

Other jurisdictions[3]	12	91.7	41.7	66.7	16.7	25.0	41.7	50.0	58.3	66.7	- -	8.3

- - Quantity is zero.

DUI/DWI = driving under the influence/driving while intoxicated or impaired; LGBT = lesbian, gay, bisexual, or transgender.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Number of facilities sums to more than the total column, because a facility could offer special programs or groups for more than one client type.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

- - Quantity is zero.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Number of facilities based on facilities where language services are provided by staff counselors only and by both staff counselors and on-call interpreters.

[3] Facilities that offered substance use treatment services in any language other than English but which did not have a valid response to language provider were classified as providing services by an on-call interpreter only.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

- - Quantity is zero.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Number of facilities sums to more than the total column, and percentages sum to more than 100 percent, because a facility could provide detoxification for more than one substance.

[3] Of 15,961 facilities, 3,508 facilities (22 percent) offered detoxification services.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

- - Quantity is zero.

Injectable naltrexone = extended-release injectable naltrexone; MAT = medication assisted treatment.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Any MAT type for all facilities providing medication-assisted opioid therapy includes all facilities (OTP and non-OTP) providing methadone, buprenorphine, or injectable naltrexone.

[3] Facilities that have opioid treatment programs certified by the Substance Abuse and Mental Health Services Administration.

[4] Any MAT type for non-OTP facilities includes facilities providing buprenorphine or injectable naltrexone.

[5] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

- - Quantity is zero; ‡ No facilities in this category.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Facilities that have opioid treatment programs certified by the Substance Abuse and Mental Health Services Administration.

[3] Number of facilities sum to more than the total column because a facility could provide more than one type of care.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Of 15,961 facilities, 28 facilities (less than 1 percent) did not respond to the question. Percentages are based on the remaining 15,933 facilities.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

NOTE: Percentages may not sum to 100 percent because of rounding.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. These tables include only clients who receive or are prescribed buprenorphine through physicians, physician assistants, and nurse practitioners affiliated with a substance abuse treatment facility, they do not include clients who receive or are prescribed buprenorphine through an independent DATA 2000-waivered physician, physician assistant, and nurse practitioner.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

NOTES: Percentages may not sum to 100 percent because of rounding. Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

- - Quantity is zero; ‡ No facilities in this category.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. These tables include only clients who receive or are prescribed buprenorphine through physicians, physician assistants, and nurse practitioners affiliated with a substance abuse treatment facility, they do not include clients who receive or are prescribed buprenorphine through an independent DATA 2000-waivered physician, physician assistant, and nurse practitioner.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Of 1,460,706 clients, 35,412 clients (2 percent) reported by the 522 facilities that did not respond to the substance abuse problem question (question 34) were excluded.

[3] Of 1,460,706 clients, 59,417 clients (4 percent) reported by the 632 facilities that did not respond to the co-occurring disorders question (question 35) and 116,465 clients (8 percent) reported by the 1,153 facilities that did respond to the co-occurring disorders question, but which reported no clients with a mental disorder, were excluded.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

NOTE: Numbers and percentages may not sum to totals because of rounding.

MAT = medication assisted treatment.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Includes clients receiving methadone, buprenorphine, or naltrexone.

[3] Includes clients receiving buprenorphine or naltrexone.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] There were 37 facilities reporting 4,684 total clients that did not respond to the question about clients under the age of 18 years.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

NOTE: Percentages may not sum to 100 percent because of rounding.

MAT = medication assisted treatment.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Includes clients receiving methadone, buprenorphine, or naltrexone.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, and the Virgin Islands of the United States.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who received or were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

Appendix A
N-SSATS Background

Survey History

N-SSATS has evolved from national survey efforts begun in the 1970s by the National Institute on Drug Abuse (NIDA) to measure the scope and use of drug abuse treatment services in the United States. The sixth of these surveys, conducted in 1976, introduced the data elements and format that have formed the core of subsequent surveys. These include organizational focus, service orientation, services available, clients in treatment by type of care, and hospital inpatient/residential capacity. The 1976 survey, called the National Drug Abuse Treatment Utilization Survey, was repeated in 1977 and 1978.

In 1979, the National Institute on Alcohol Abuse and Alcoholism (NIAAA) became a cosponsor of the survey, alcoholism treatment facilities were added, and the study was renamed the National Drug and Alcoholism Treatment Utilization Survey. This survey was repeated in 1980 and 1982. In 1984, a one-page version called the National Alcoholism and Drug Abuse Program Inventory was used. In 1987, the full version of the survey was reinstated and renamed the National Drug and Alcoholism Treatment Unit Survey (NDATUS). NDATUS was conducted annually from 1989 to 1993.

In 1992, with the creation of SAMHSA, responsibility for conducting the survey shifted to SAMHSA's Office of Applied Studies (now the Center for Behavioral Health Statistics and Quality). The survey was redesigned, and it was conducted annually as the Uniform Facility Data Set (UFDS) survey from 1995 to 1998. During these years, the survey was conducted by mail with telephone follow-up of non-respondents. The 1999 survey year was a transition year during which the survey was redesigned and an abbreviated telephone survey of treatment facilities was conducted. In 2000, a redesigned full mail survey was reinstated with telephone follow-up; it was renamed the National Survey of Substance Abuse Treatment Services (N-SSATS). The reference date for the annual survey had always been the end of September or beginning of October. After the 2000 survey, the reference date was changed to the end of March, and no survey was conducted during 2001.

In 2000, the use of an Internet-based questionnaire was tested; beginning in 2002, all facilities were offered the opportunity to respond via the Internet.

Since 2013, the full N-SSATS questionnaire (with client counts) has alternated with an abbreviated version of the questionnaire. The full questionnaire, fielded in odd-numbered years, collects data on programs and clients; in alternate (even-numbered) years, an abbreviated N-SSATS questionnaire collects the program information needed to update the substance abuse section of the Behavioral Health Treatment Services Locator and collects information on other facility-related topics.

N-SSATS in the Context of the Behavioral Health Services Information System (BHSIS)

N-SSATS is one of the components of SAMHSA's Behavioral Health Services Information System (BHSIS). The core of BHSIS is the Inventory of Behavioral Health Services (I-BHS), a continuously

updated, comprehensive listing of all known substance abuse treatment facilities and mental health treatment facilities. The other substance abuse component of BHSIS is the Treatment Episode Data Set (TEDS), a client-level database of admissions to and discharges from substance abuse treatment. Together, the components provide national- and state-level information on the numbers and characteristics of individuals admitted to alcohol and drug treatment programs and describe the facilities that deliver care to those individuals.

I-BHS is the list frame for N-SSATS. Facilities in I-BHS fall into two general categories and are distinguished by the relationship of the facility to its state substance abuse agency. These categories are described below.

Treatment facilities approved by state substance abuse agencies

The largest group of facilities (17,087 in 2019) includes facilities that are licensed, certified, or otherwise approved by the state substance abuse agency to provide substance abuse treatment. State BHSIS representatives maintain this segment of I-BHS by reporting new facilities, closures, and address changes to SAMHSA. Some facilities are not licensed, certified, or otherwise approved by the state agency. Some private for-profit facilities fall into this category. The approved facility group also includes programs operated by federal agencies—the Department of Veterans Affairs (VA), the Department of Defense, the Indian Health Service—and opioid treatment programs certified by SAMHSA. I-BHS records for federally operated facilities are updated annually through lists provided by these agencies.

Treatment facilities not approved by state substance abuse agencies

This group of facilities (2,708 in 2019) represents the SAMHSA effort since the mid-1990s to make I-BHS as comprehensive as possible by including treatment facilities that state substance abuse agencies, for a variety of reasons, do not fund, license, or certify. Many of these facilities are private for-profit, small group practices, or hospital-based programs. Most of them are identified through periodic screening of alternative source databases. (See *Special efforts to improve survey coverage*.) State substance abuse agencies are given the opportunity to review these facilities and to add them to the state agency-approved list, if appropriate.

Survey Coverage

The use of I-BHS as the list frame for N-SSATS imposes certain constraints related to the unit of response and the scope of facilities included. In addition, the expansion of I-BHS in recent years to provide a more complete enumeration of substance abuse treatment facilities means that year-to-year comparisons of the numbers of facilities reporting to N-SSATS must be interpreted with caution.

Unit of response

N-SSATS is designed to collect data from each physical location where treatment services are provided. Accordingly, SAMHSA requests that state substance abuse agencies use the point of delivery of service (i.e., physical location) as the defining factor for a facility. Because of the different state administrative systems, however, there are some inconsistencies in implementation. For example, in some states, multiple treatment programs (e.g., detoxification, residential, and outpatient) at the same address and under the same management have separate state licenses. These

are treated as separate by the state substance abuse agency, and are given separate I-BHS ID numbers. In other states, multiple sites are included as a single entity under a parent or administrative unit. In many of these cases, individual sites can report services data in N-SSATS, but client data are available only at a higher administrative level. Beginning in 1995, efforts have been made to identify facility networks and to eliminate duplicate reporting by networks. For most facilities, reporting levels remain consistent from year to year. However, beginning in 1998, an emphasis was placed on collecting minimum information from all physical locations, and this resulted in an increase in the number of facilities.

Special efforts to improve survey coverage

The great majority of treatment facilities in I-BHS are administratively monitored by state substance abuse agencies. Therefore, the scope of facilities included in I-BHS is affected by differences in state systems of licensure, certification, accreditation, and the disbursement of public funds. For example, some state substance abuse agencies regulate private facilities and individual practitioners while others do not. In some states, hospital-based substance abuse treatment facilities are not licensed through the state substance abuse agency.

To address these differences, SAMHSA conducted a large-scale effort during 1995 and 1996 to identify substance abuse treatment facilities that, for a variety of reasons, were not on the inventory. About 15 source lists were examined, and facilities not on the inventory were contacted to ascertain whether or not they provided substance abuse treatment. As expected, this yielded a number of hospital-based and small private facilities that were not on the inventory. (These facilities were surveyed in 1995 and 1996, but they were not included in the published results of the survey until 1997.) Analysis of the results of this effort led to similar but more targeted updates before subsequent surveys. Potential new facilities are identified using data from infoUSA (formerly the American Business Index), the annual American Hospital Association survey, and SAMHSA's National Mental Health Services Survey, the source lists that yielded the most new facilities in 1995 and 1996. Survey participants, who are asked to report all of the treatment facilities in their administrative networks, also identify additional facilities during the survey itself. All newly identified facilities are initially included as not approved by the state substance abuse agency. State substance abuse agencies are given the opportunity to review these facilities and to add them to the state agency-approved list, if appropriate.

Expansion of survey coverage to include all sites within networks at which treatment was provided yielded a net increase of about 2,600 facilities between 1997 and 1998. These additions were not necessarily new facilities, but were facilities not previously included in the survey as separate sites. Between 2009 and 2019, the number of facilities eligible for inclusion in this report varied between 13,513 and 15,961. The total number is deceptive, however. There was significant turnover as facilities closed and others opened (see Table 2.1).

Data collection

Until 1996, state substance abuse agencies distributed and collected the facility survey forms. Beginning in 1996, data collection was centralized; since that time, SAMHSA has mailed survey forms directly to and collected forms directly from the facilities and has conducted follow-up telephone interviews with the facility director or his/her designee. In 2000, SAMHSA introduced

an online trial web version of the questionnaire for a few facilities in addition to the hard copy questionnaire. The web version of the questionnaire was fully implemented in 2002. The proportion of facilities using the web survey to respond to N-SSATS has increased steadily since its full inception in 2002.

Non-response

Beginning in 1992, SAMHSA expanded efforts to obtain information from non-responding facilities. A representative sample of non-respondents was contacted and administered an abbreviated version of the survey instrument via telephone. In 1993 and later years, this effort was extended to all non-responding facilities. In 1997, a series of measures was introduced to enhance the survey response rate. These included advance notification and improved methods for updating address and contact information. Between 2004 and 2018, use of these methods and intensive telephone follow-up resulted in an annual follow-up rate (i.e., facilities in the sample either completed the survey or were determined to be closed or otherwise ineligible) of 92 to 96 percent. In 2019, the final response rate, counting eligible facilities, was 91 percent.

Exclusions

In 1997, facilities offering only DUI/DWI programs were excluded; these facilities were reinstated in 1998.

Facilities operated by the Bureau of Prisons (BOP) were excluded from the 1997 survey and subsequent surveys because SAMHSA conducted a separate survey of correctional facilities.[24] During that survey, it was discovered that jails, prisons, and other organizations treating incarcerated persons only were poorly enumerated on the inventory. Beginning in 1999, these facilities were identified during the survey and excluded from analyses and public use data files.

I-BHS and N-SSATS are designed to include specialty substance abuse treatment facilities rather than individuals. Solo practitioners are listed on I-BHS and surveyed in N-SSATS only if the state substance abuse agency explicitly requests that they be included.

Beginning in 2000, halfway houses that did not provide substance abuse treatment were included on the inventory and in N-SSATS so that they could be listed in the *National Directory of Drug and Alcohol Abuse Treatment Facilities* (formerly the *National Directory of Drug and Alcohol Abuse Treatment Programs*) and on the Behavioral Health Treatment Services Locator (https://findtreatment.samhsa.gov). These facilities are excluded from analyses and public use data files.

Changes in Survey Content

Table A1 shows the major content areas for the survey from 1998 to 2019. Since 1992, SAMHSA has made adjustments each year to the survey design, both to minimize non-response and to include areas of emerging interest. For example, questions on the number of clients in treatment receiving buprenorphine were added in 2004. Questions about clinical/therapeutic methods, standard practices,

[24] SAMHSA, Office of Applied Studies. Substance Abuse Treatment in Adult and Juvenile Correctional Facilities: *Findings from the Uniform Facility Data Set 1997 Survey of Correctional Facilities*. Drug and Alcohol Services Information System Series: S-9. DHHS Publication No. (SMA) 00-3380. Rockville, MD, 2000.

and Access to Recovery grants were added in 2007. Questions about facility smoking policy were added in 2011; questions about outpatient facility operating capacity were modified in 2012; questions about injectable naltrexone (Vivitrol®) as a pharmacotherapy were added in 2011; questions about work activity and means to accomplish them, as well as the question asking for client counts of those prescribed extended-release injectable naltrexone (Vivitrol®), were added in 2013; and in 2017, the questions asking for client counts of those prescribed Vivitrol® were changed to request client counts of those receiving naltrexone for opioid use disorder.

There have also been changes within content areas. For example, in response to concerns about over-reporting of programs or groups for specific client types, the survey question was revised in 2003 to distinguish between those facilities that accepted specific client types and those facilities that offered specially designed programs or groups for that client type. As a result, the number and proportion of facilities offering programs or groups for each of the specified client types decreased. Surveys from 2003 and later are believed to more accurately represent the number and proportions of facilities providing programs or groups for the specified client types. In addition, over time, more categories have been added to the specific client types (e.g., persons who have experienced trauma, active duty military, and members of military families in 2012 and young adults, persons who have experienced sexual abuse, and persons who have experienced intimate partner violence, domestic violence in 2013). Because of the increase in client types, the question was split in 2013. The portion asking if specific client types were served was limited to adolescents, adult women, and adult men. In addition, programs or groups were described as "specifically tailored." In 2014, the first part of the question was revised again to collect another level of detail (i.e., the age range of males and females served, if any). The client types of adolescents, adult women, and adult men were added back to the second part of the question.

Since 2013, the full N-SSATS questionnaire (with client counts) has alternated with an abbreviated version of the questionnaire. This abbreviated questionnaire, first introduced in 2014, collects the facility, program, and services information that are needed to update the Behavioral Health Treatment Services Locator. It omits Section B, which includes the client counts. Other changes to the 2014 questionnaire included reinstatement of the "primary focus" question, which had been dropped from the 2013 questionnaire; in addition, the question asking if a facility operates an opioid treatment program (OTP) was revised: The informational bullets describing OTPs were reworded, and the response categories were more explicit about whether or not the facility operates an OTP, as well as whether or not methadone and/or buprenorphine are used. In 2015, the OTP question was again revised to ask facilities how they treat opioid addiction; the response categories were even more specific about how they used, or did not use, methadone, buprenorphine, or extended-release injectable naltrexone (Vivitrol®) and whether or not the facility was a federally certified OTP. In 2017, reference to Vivitrol® was deleted, and the question referred simply to naltrexone.

Changes in the 2019 survey

In 2019, the question regarding services offered was revised by including three new categories (medical services, recovery support services, and education and counseling services), regrouping items from previous iterations of the survey, and adding new response options.

The 2019 questionnaire also introduced new questions about the sources of medication-assisted therapy (MAT) for opioid use disorder (OUD), as well as the estimated percentages of clients

receiving these medication services. Section B of the 2019 survey was further enhanced with questions about the number of clients who received specific medications for alcohol use disorder (AUD) in each service setting.

An addendum to the 2019 questionnaire was also sent to VA facilities for purposes of collecting information about suicide prevention-related services offered.

n/a Not applicable.

ATR = Access to Recovery; LAAM = levo-alpha acetyl methadol.

[1] Injectable naltrexone = extended-release injectable naltrexone.

NOTES: An "X" indicates the presence of a feature in the given survey years. The years 2004–2005, 2007–2008, and 2009–2010 are grouped together, because the survey features for those years that are combined were identical.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Uniform Facility Data Set (UFDS), 1998–1999; National Survey of Substance Abuse Treatment Services (N-SSATS), 2000, 2002–2019.

Appendix B
2019 N-SSATS Questionnaire

This appendix contains the hard copy version of the 2019 N-SSATS questionnaire. Facilities also had the option of responding to the questionnaire on the Internet. For those facilities that had not completed the survey after extensive follow-up efforts (see Chapter 1), the questionnaire was administered by computer-assisted telephone interview (CATI).

Of the responding eligible treatment facilities included in this report, 90 percent completed the questionnaire on the Internet, 9 percent completed it by CATI, and 1 percent completed it by mail [Table 1.1 and Figure 1].

Text versions of the Internet and CATI surveys are not included here because they are computer programs that contain complex skip patterns, are difficult to read, and are extremely long in text format.

OMB No. 0930-0106

APPROVAL EXPIRES: 09/30/2020

National Survey of Substance Abuse Treatment Services (N-SSATS)

March 29, 2019

Substance Abuse and Mental Health Services Administration (SAMHSA)
U.S. Department of Health and Human Services (HHS)

PLEASE REVIEW THE FACILITY INFORMATION PRINTED ABOVE.
CROSS OUT ERRORS AND ENTER CORRECT OR MISSING INFORMATION.

CHECK ONE

- ☐ Information is complete and correct, no changes needed
- ☐ All missing or incorrect information has been corrected

PLEASE READ THIS ENTIRE PAGE BEFORE COMPLETING THE QUESTIONNAIRE

Would you prefer to complete this questionnaire online? See the pink flyer enclosed in your survey packet for the Internet address and your unique user ID and password. You can log on and off the website as often as needed to complete the questionnaire. When you log on again, the program will take you to the next unanswered question. If you need more information, call the N-SSATS helpline at 1-888-324-8337.

INSTRUCTIONS

- Most of the questions in this survey ask about "this facility." By "this facility" we mean the specific treatment facility or program whose name and location are printed on the front cover. If you have any questions about how the term "this facility" applies to your facility, please call 1-888-324-8337.
- Please answer ONLY for the specific facility or program whose name and location are printed on the front cover, unless otherwise specified in the questionnaire.
- If the questionnaire has not been completed online, return the completed questionnaire in the envelope provided. Please keep a copy for your records.
- For additional information about this survey and definitions of some of the terms used, please visit our website at **https://info.nssats.com**.
- If you have any questions or need additional blank surveys, contact:

MATHEMATICA POLICY RESEARCH
1-888-324-8337
NSSATSWeb@mathematica-mpr.com

IMPORTANT INFORMATION

* **Asterisked questions**. Information from asterisked (*) questions may be published in SAMHSA's online Behavioral Health Treatment Services Locator (found at **https://findtreatment.samhsa.gov**), in SAMHSA's *National Directory of Drug and Alcohol Abuse Treatment Programs*, and other publicly-available listings, unless you designate otherwise in question 28, page 10 of this questionnaire.

Mapping feature in online Locator. Complete and accurate name and address information is needed for SAMHSA's online Behavioral Health Treatment Services Locator so it can correctly map the facility location.

Eligibility for online Locator and *Directory*. Only facilities designated as eligible by their state substance abuse office and that complete this questionnaire will be listed as substance abuse facilities in the online Locator and *Directory*. Your state N-SSATS representative can tell you if your facility is eligible to be listed in the online Locator and *Directory*. For the name and telephone number of your state representative, call the N-SSATS helpline at 1-888-324-8337.

SECTION A: FACILITY CHARACTERISTICS

Section A asks about characteristics of individual facilities and should be completed for this facility only, that is, the treatment facility or program at the location listed on the front cover.

***1. Which of the following substance abuse services are offered by this facility at this location, that is, the location listed on the front cover?**

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. **Intake, assessment, or referral**	1 ☐	0 ☐
2. **Detoxification**	1 ☐	0 ☐
3. **Substance use treatment** *(services that focus on initiating and maintaining an individual's recovery from substance abuse and on averting relapse)*	1 ☐	0 ☐
4. **Treatment for co-occurring serious mental illness (SMI)/serious emotional disturbance (SED) and substance use disorders**	1 ☐	0 ☐
5. **Any other substance abuse services**	1 ☐	0 ☐

1a. To which of the following clients does this facility, at this location, offer mental health treatment services *(interventions such as therapy or psychotropic medication that treat a person's mental health problem or condition, reduce symptoms, and improve behavioral functioning and outcomes)*?

MARK ALL THAT APPLY

1 ☐ Substance abuse clients

2 ☐ Clients other than substance abuse clients

3 ☐ No clients are offered mental health treatment services

2. Is this facility a jail, prison, or other organization that provides treatment exclusively for incarcerated persons or juvenile detainees?

1 ☐ Yes → **SKIP TO Q.37 (PAGE 14)**

0 ☐ No

3. Did you answer "yes" to detoxification in option 2 of question 1 above?

1 ☐ Yes → **SKIP TO Q.3a (TOP OF NEXT COLUMN)**

0 ☐ No → **SKIP TO Q.4 (NEXT COLUMN)**

***3a. Does this facility detoxify clients from . . .**

MARK ALL THAT APPLY

1 ☐ Alcohol

2 ☐ Benzodiazepines

3 ☐ Cocaine

4 ☐ Methamphetamines

5 ☐ Opioids

6 ☐ Other *(Specify: _____)*

***3b. Does this facility routinely use medications during detoxification?**

1 ☐ Yes

0 ☐ No

→ **SKIP TO Q.5 (BELOW)**

4. Did you answer "yes" to substance use treatment in option 3 of question 1?

1 ☐ Yes

0 ☐ No → **SKIP TO Q.25 (PAGE 10)**

5. Is this facility a solo practice, meaning, an office with only one independent practitioner or counselor?

1 ☐ Yes

0 ☐ No

***6. Is this facility a Federally Qualified Health Center (FQHC)?**

- *FQHCs include: (1) all organizations that receive grants under Section 330 of the Public Health Service Act; and (2) other organizations that do not receive grants, but have met the requirements to receive grants under Section 330 according to the U.S. Department of Health and Human Services.*
- *For a complete definition of a FQHC, go to: https://info.nssats.com*

1 ☐ Yes

0 ☐ No

d ☐ Don't know

7. What is the primary focus of this facility at this location, that is, the location listed on the front cover?

MARK ONE ONLY

1 ☐ Substance use treatment services

2 ☐ Mental health services

3 ☐ Mix of mental health and substance use treatment services *(neither is primary)*

4 ☐ General health care

5 ☐ Other *(Specify: _____)*

***8. Is this facility operated by . . .**

MARK ONE ONLY

1 ☐ A private for-profit organization
2 ☐ A private non-profit organization
3 ☐ State government
4 ☐ Local, county, or community government
5 ☐ Tribal government

→ **SKIP TO Q.9 (BELOW)**

6 ☐ Federal Government

***8a. Which Federal Government agency?**

MARK ONE ONLY

1 ☐ Department of Veterans Affairs
2 ☐ Department of Defense
3 ☐ Indian Health Service
4 ☐ Other *(Specify: _____)*

***9. Does this facility offer HOSPITAL INPATIENT substance abuse services at this location, that is, the location listed on the front cover?**

1 ☐ Yes
0 ☐ No → **SKIP TO Q.10 (BELOW)**

***9a. Which of the following HOSPITAL INPATIENT services are offered at this facility?**

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. Hospital inpatient detoxification (similar to ASAM Levels IV-D and III.7-D, *medically managed or monitored inpatient detoxification)*	1 ☐	0 ☐
2. Hospital inpatient treatment (similar to ASAM Levels IV and III.7, *medically managed or monitored intensive inpatient treatment)*	1 ☐	0 ☐

NOTE: ASAM is the American Society of Addiction Medicine.
For more information on ASAM please go to https://info.nssats.com.

***10. Does this facility offer RESIDENTIAL (non-hospital) substance abuse services at this location, that is, the location listed on the front cover?**

1 ☐ Yes → **SKIP TO Q.10a (TOP OF NEXT COLUMN)**
0 ☐ No → **SKIP TO Q.11 (NEXT COLUMN)**

***10a. Which of the following RESIDENTIAL services are offered at this facility?**

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. Residential detoxification (similar to ASAM Level III.2-D, *clinically managed residential detoxification or social detoxification)*	1 ☐	0 ☐
2. Residential short-term treatment (similar to ASAM Level III.5, *clinically managed high-intensity residential treatment, typically 30 days or less)*	1 ☐	0 ☐
3. Residential long-term treatment (similar to ASAM Levels III.3 and III.1, *clinically managed medium- or low-intensity residential treatment, typically more than 30 days)*	1 ☐	0 ☐

***11. Does this facility offer OUTPATIENT substance abuse services at this location, that is, the location listed on the front cover?**

1 ☐ Yes
0 ☐ No → **SKIP TO Q.12 (TOP OF NEXT PAGE)**

***11a. Which of the following OUTPATIENT services are offered at this facility?**

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. Outpatient detoxification (similar to ASAM Levels I-D and II-D, *ambulatory detoxification)*	1 ☐	0 ☐
2. Outpatient methadone/ buprenorphine maintenance or naltrexone treatment	1 ☐	0 ☐
3. Outpatient day treatment or partial hospitalization (similar to ASAM Level II.5, *20 or more hours per week)*	1 ☐	0 ☐
4. Intensive outpatient treatment (similar to ASAM Level II.1, *9 or more hours per week)*	1 ☐	0 ☐
5. Regular outpatient treatment (similar to ASAM Level I, *outpatient treatment, non-intensive)*	1 ☐	0 ☐

***12. Which of the following services are offered by this facility <u>at this location</u>, that is, the location listed on the front cover?**

MARK ALL THAT APPLY

Assessment and Pre-Treatment Services

1 ☐ Screening for substance abuse
2 ☐ Screening for mental disorders
3 ☐ Comprehensive substance abuse assessment or diagnosis
4 ☐ Comprehensive mental health assessment or diagnosis *(for example, psychological or psychiatric evaluation and testing)*
5 ☐ Screening for tobacco use
6 ☐ Outreach to persons in the community who may need treatment
7 ☐ Interim services for clients when immediate admission is not possible
8 ☐ Professional interventionist/educational consultant
9 ☐ We do not offer any of these assessment and pre-treatment services

Testing *(include tests performed at this location, even if specimen is sent to an outside source for chemical analysis.)*

10 ☐ Drug and alcohol oral fluid testing
11 ☐ Breathalyzer or other blood alcohol testing
12 ☐ Drug or alcohol urine screening
13 ☐ Testing for Hepatitis B *(HBV)*
14 ☐ Testing for Hepatitis C *(HCV)*
15 ☐ HIV testing
16 ☐ STD testing
17 ☐ TB screening
18 ☐ Testing for metabolic syndrome
19 ☐ We do not offer any of these testing services

Medical Services

20 ☐ Hepatitis A *(HAV)* vaccination
21 ☐ Hepatitis B *(HBV)* vaccination
22 ☐ We do not offer any of these medical services

Transitional Services

23 ☐ Discharge planning
24 ☐ Aftercare/continuing care
25 ☐ Naloxone and overdose education
26 ☐ Outcome follow-up after discharge
27 ☐ We do not offer any of these transitional services

Recovery Support Services

28 ☐ Mentoring/peer support
29 ☐ Self-help groups *(for example, AA, NA, SMART Recovery)*
30 ☐ Assistance in locating housing for clients
31 ☐ Employment counseling or training for clients
32 ☐ Assistance with obtaining social services *(for example, Medicaid, WIC, SSI, SSDI)*
33 ☐ Recovery coach
34 ☐ We do not offer any of these recovery support services

Education and Counseling Services

35 ☐ HIV or AIDS education, counseling, or support
36 ☐ Hepatitis education, counseling, or support
37 ☐ Health education other than HIV/AIDS or Hepatitis
38 ☐ Substance abuse education
39 ☐ Smoking/tobacco cessation counseling
40 ☐ Individual counseling
41 ☐ Group counseling
42 ☐ Family counseling
43 ☐ Marital/couples counseling
44 ☐ Vocational training or educational support *(for example, high school coursework, GED preparation, etc.)*
45 ☐ We do not offer any of these education and counseling services

Ancillary Services

46 ☐ Case management services
47 ☐ Social skills development
48 ☐ Child care for clients' children
49 ☐ Domestic violence—family or partner violence services *(physical, sexual, and emotional abuse)*
50 ☐ Early intervention for HIV
51 ☐ Transportation assistance to treatment
52 ☐ Mental health services
53 ☐ Acupuncture
54 ☐ Residential beds for clients' children
55 ☐ We do not offer any of these ancillary services

Other Services

56 ☐ Treatment for gambling disorder
57 ☐ Treatment for Internet use disorder
58 ☐ Treatment for other addiction disorder *(non-substance abuse)*
59 ☐ We do not offer any of these other services

***12. (continued)**

Pharmacotherapies

60 ☐ Disulfiram *(Antabuse®)*

61 ☐ Naltrexone *(oral)*

62 ☐ Naltrexone *(extended-release, injectable, for example, Vivitrol®)*

63 ☐ Acamprosate *(Campral®)*

64 ☐ Nicotine replacement

65 ☐ Non-nicotine smoking/tobacco cessation medications *(for example, bupropion, varenicline)*

66 ☐ Medications for psychiatric disorders

67 ☐ Methadone

68 ☐ Buprenorphine with naloxone *(for example, Suboxone®, Bunavail®, Zubsolv®, Cassipa®)*

69 ☐ Buprenorphine without naloxone

70 ☐ Buprenorphine sub-dermal implant *(Probuphine®)*

71 ☐ Buprenorphine *(extended-release, injectable, for example, Sublocade®)*

72 ☐ Medications for HIV treatment *(for example, antiretroviral medications such as tenofovir, efavirenz, emtricitabine, atazanavir, and lamivudine)*

73 ☐ Medications for Hepatitis C *(HCV)* treatment *(for example, sofosbuvir, ledipasvir, interferon, peginterferon, ribavirin)*

74 ☐ Lofexidine

75 ☐ Clonidine

76 ☐ We do not offer any of these pharmacotherapy services

***13. Facilities may treat a range of substance use disorders. The next series of questions focuses only on how this facility treats opioid use disorder.**

How does this facility treat opioid use disorder?

- *Medication assisted treatment (MAT) includes the use of methadone, buprenorphine and/or naltrexone for the treatment of opioid use disorder. For this question, MAT refers to any or all of these medications unless specified.*

MARK ALL THAT APPLY

1 ☐ This facility does not treat opioid use disorder.

2 ☐ This facility uses methadone or buprenorphine for pain management, emergency cases, or research purposes. It is NOT a federally-certified Opioid Treatment Program *(OTP)*.

3 ☐ This facility treats opioid use disorder, but it does not use medication assisted treatment *(MAT)*, nor does it accept clients using MAT to treat opioid use disorder.

→ **SKIP TO Q.14 (TOP OF PAGE 6)**

4 ☐ This facility accepts clients using MAT, but the medications originate from or are prescribed by another entity. *(The medications may or may not be stored/delivered/monitored onsite.)* → **SKIP TO Q.13a (TOP OF NEXT PAGE)**

5 ☐ This facility administers naltrexone to treat opioid use disorder. Naltrexone use is authorized through any medical staff who have prescribing privileges.

6 ☐ This facility prescribes buprenorphine to treat opioid use disorder. Buprenorphine use is authorized through a DATA 2000 waivered physician, physician assistant, or nurse practitioner.

7 ☐ This facility is a federally-certified Opioid Treatment Program *(OTP)*. *(Most OTPs administer/dispense methadone; some only use buprenorphine.)*

→ **SKIP TO Q.13b (NEXT PAGE)**

***13a. For those clients using MAT, but whose medications originate from or are prescribed by another entity, from where do these clients obtain their medications?**

MARK ALL THAT APPLY

1 ☐ The prescribing entity is in our network.

2 ☐ There is a business, contractual, or formal referral relationship with the prescribing entity.

3 ☐ The client obtains their prescription/medication from their personal physician/health care provider.

4 ☐ Other *(Specify: _____)*

***13b. Does this facility serve <u>only</u> opioid use disorder clients?**

1 ☐ Yes

0 ☐ No

***13c. Which of the following medication services does this program provide?**

MARK ALL THAT APPLY

1 ☐ Maintenance services with methadone or buprenorphine

2 ☐ Maintenance services with medically-supervised withdrawal (or taper) after a period of stabilization

3 ☐ Detoxification from opioids of abuse with methadone or buprenorphine

4 ☐ Detoxification from opioids of abuse with lofexidine or clonidine

5 ☐ Relapse prevention with naltrexone

6 ☐ Other *(Specify: _____)*

7 ☐ We do not offer any of these medication services

13d. Approximately what percent of clients on MAT receive the following medication services for opioid use disorder?

	MARK ONE BOX FOR EACH SERVICE			
SERVICE	NOT OFFERED	33% OR LESS	34% TO 67%	MORE THAN 67%
1. Maintenance services with methadone or buprenorphine	1 ☐	2 ☐	3 ☐	4 ☐
2. Maintenance services with medically-supervised withdrawal (or taper) after a period of stabilization	1 ☐	2 ☐	3 ☐	4 ☐
3. Detoxification from opioids of abuse with methadone or buprenorphine	1 ☐	2 ☐	3 ☐	4 ☐
4. Detoxification from opioids of abuse with lofexidine or clonidine	1 ☐	2 ☐	3 ☐	4 ☐
5. Relapse prevention with naltrexone	1 ☐	2 ☐	3 ☐	4 ☐
6. Enter the Other *Specify* value(s) from 13c here: _____ _____	1 ☐	2 ☐	3 ☐	4 ☐

***14. Facilities may treat a range of substance use disorders. The next series of questions focuses only on how this facility treats alcohol use disorder.**

How does this facility treat alcohol use disorder?

- *These medications have been approved by the FDA to treat alcohol use disorder: naltrexone, acamprosate, and disulfiram. For this question, MAT refers to any or all of these three medications.*

MARK ALL THAT APPLY

1 ☐ This facility does not treat alcohol use disorder. → **SKIP TO Q.15 (BELOW)**

2 ☐ This facility treats alcohol use disorder, but it does not use medication assisted treatment (MAT) for alcohol use disorder, nor does it accept clients using MAT to treat alcohol use disorder. → **SKIP TO Q.14b (BELOW)**

3 ☐ This facility accepts clients using MAT for alcohol use disorder, but the medications originate from or are prescribed by another entity.

4 ☐ This facility administers/prescribes at least one of disulfiram *(Antabuse®)*, naltrexone, and/or acamprosate *(Campral®)* for alcohol use disorder. → **SKIP TO Q.14b (BELOW)**

***14a. For those clients using MAT for alcohol use disorder, but whose medications originate from or are prescribed by another entity, from where do these clients obtain their medications?**

MARK ALL THAT APPLY

1 ☐ The prescribing entity is in our network.

2 ☐ There is a business, contractual, or formal referral relationship with the prescribing entity.

3 ☐ The client obtains their prescription/medication from their personal physician/health care provider.

4 ☐ Other *(Specify: _____)*

***14b. Does this facility serve only alcohol use disorder clients?**

1 ☐ Yes

0 ☐ No

***15. Which of the following clinical/therapeutic approaches listed below are used frequently at this facility?**

MARK ALL THAT APPLY

1 ☐ Substance abuse counseling

2 ☐ 12-step facilitation

3 ☐ Brief intervention

4 ☐ Cognitive behavioral therapy

5 ☐ Dialectical behavior therapy

6 ☐ Contingency management/motivational incentives

7 ☐ Motivational interviewing

8 ☐ Trauma-related counseling

9 ☐ Anger management

10 ☐ Matrix Model

11 ☐ Community reinforcement plus vouchers

12 ☐ Rational emotive behavioral therapy *(REBT)*

13 ☐ Relapse prevention

14 ☐ Telemedicine/telehealth *(including Internet, Web, mobile, and desktop programs)*

15 ☐ Other treatment approach *(Specify: _____)*

16 ☐ We do not use any of these clinical/therapeutic approaches

***16. Does this facility, at this location, offer a specially designed program or group intended exclusively for DUI/DWI or other drunk driver offenders?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.17 (BELOW)**

***16a. Does this facility serve only DUI/DWI clients?**

1 ☐ Yes

0 ☐ No

***17. Does this facility provide substance use treatment services in sign language at this location for the deaf and hard of hearing *(for example, American Sign Language, Signed English, or Cued Speech)*?**

- *Mark "yes" if either a staff counselor or an on-call interpreter provides this service.*

1 ☐ Yes

0 ☐ No

***18. Does this facility provide substance use treatment services in a language other than English at this location?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.19 (TOP OF NEXT PAGE)**

18a. At this facility, who provides substance use treatment services in a language other than English?

MARK ONE ONLY

1 ☐ Staff counselor who speaks a language other than English

2 ☐ On-call interpreter *(in person or by phone)* brought in when needed → **SKIP TO Q.19 (TOP OF NEXT PAGE)**

3 ☐ BOTH staff counselor and on-call interpreter

***18a1. Do staff counselors provide substance use treatment in Spanish at this facility?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.18b (TOP OF NEXT COLUMN)**

18a2. Do staff counselors at this facility provide substance use treatment in any other languages?

1 ☐ Yes → **SKIP TO Q.18b (TOP OF NEXT COLUMN)**

0 ☐ No → **SKIP TO Q.19 (TOP OF NEXT PAGE)**

***18b. In what other languages do staff counselors provide substance use treatment at this facility?**

- *Do not count languages provided only by on-call interpreters.*

MARK ALL THAT APPLY

American Indian or Alaska Native:

1 ☐ Hopi

2 ☐ Lakota

3 ☐ Navajo

4 ☐ Ojibwa

5 ☐ Yupik

6 ☐ Other American Indian or Alaska Native language

(Specify: _____)

(Specify: _____)

***19. Individuals seeking substance use treatment can vary by age, gender or other characteristics. Which categories of individuals listed below are served by this facility, at this location?**

- **Indicate only the highest or lowest age the facility would accept. *Do not indicate* the highest or lowest age currently receiving services in the facility.**

TYPE OF CLIENT	MARK "YES" OR "NO" FOR EACH CATEGORY SERVED BY THIS FACILITY		IF SERVED, WHAT IS THE LOWEST AGE SERVED		IF SERVED, WHAT IS THE HIGHEST AGE SERVED	
1. Female	1 ☐ Yes	0 ☐ No	|__|__| YEARS	0 ☐ No minimum age	|__|__| YEARS	0 ☐ No maximum age
2. Male	1 ☐ Yes	0 ☐ No	|__|__| YEARS	0 ☐ No minimum age	|__|__| YEARS	0 ☐ No maximum age

***19a. Many facilities have clients in one or more of the following categories. For which client categories does this facility at this location offer a substance use treatment program or group specifically tailored for clients in that category? If this facility treats clients in any of these categories but does not have a specifically tailored program or group for them, do not mark the box for that category.**

MARK ALL THAT APPLY

1 ☐ Adolescents
2 ☐ Young adults
3 ☐ Adult women
4 ☐ Pregnant/postpartum women
5 ☐ Adult men
6 ☐ Seniors or older adults
7 ☐ Lesbian, gay, bisexual, transgender *(LGBT)* clients
8 ☐ Veterans
9 ☐ Active duty military
10 ☐ Members of military families
11 ☐ Criminal justice clients *(other than DUI/DWI)*
12 ☐ Clients with co-occurring mental and substance use disorders
13 ☐ Clients with co-occurring pain and substance use
14 ☐ Clients with HIV or AIDS
15 ☐ Clients who have experienced sexual abuse
16 ☐ Clients who have experienced intimate partner violence, domestic violence
17 ☐ Clients who have experienced trauma
18 ☐ Specifically tailored programs or groups for any other types of clients
(Specify: _____)
19 ☐ No specifically tailored programs or groups are offered

***20. Does this facility use a sliding fee scale?**

- *Sliding fee scales are based on income and other factors.*

1 ☐ Yes

0 ☐ No → **SKIP TO Q.21 (BELOW)**

20a. Do you want the availability of a sliding fee scale published in SAMHSA's online Locator and *Directory*?

- *The online Locator and Directory will explain that potential clients should call the facility for information on eligibility.*

1 ☐ Yes

0 ☐ No

***21. Does this facility offer treatment at no charge or minimal payment (for example, $1) to clients who cannot afford to pay?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.22 (BELOW)**

21a. Do you want the availability of treatment at no charge or minimal payment (for example, $1) for eligible clients published in SAMHSA's online Locator and *Directory*?

- *The online Locator and Directory will explain that potential clients should call the facility for information on eligibility.*

1 ☐ Yes

0 ☐ No

***22. Does this facility receive any funding or grants from the Federal Government, or state, county or local governments, to support its substance use treatment programs?**

- *Do not include Medicare, Medicaid, or federal military insurance. These forms of client payments are included in Q.23.*

1 ☐ Yes

0 ☐ No

d ☐ Don't know

***23. Which of the following types of client payments or insurance are accepted by this facility for substance use treatment?**

MARK ALL THAT APPLY

1 ☐ No payment accepted *(free treatment for ALL clients)*

2 ☐ Cash or self-payment

3 ☐ Medicare

4 ☐ Medicaid

5 ☐ State-financed health insurance plan other than Medicaid

6 ☐ Federal military insurance *(e.g., TRICARE)*

7 ☐ Private health insurance

8 ☐ IHS/Tribal/Urban *(ITU)* funds

9 ☐ Healthcare Facilities Accreditation Program *(HFAP)*

10 ☐ Other national organization or federal, state, or local agency

(Specify: _____)

28. If eligible, does this facility want to be listed in SAMHSA's online Behavioral Health Treatment Services Locator and Substance Abuse Directory? *(See inside front cover for eligibility information)*

- *The Locator can be found at https://findtreatment.samhsa.gov*
- *The Directory will be available at https://www.samhsa.gov/data/substance-abuse-facilities-data-nssats*

1 ☐ Yes

0 ☐ No → **SKIP TO Q.29 (BELOW)**

28a. Does this facility want the street address and/or mailing address to be listed in SAMHSA's online Behavioral Health Treatment Services Locator and Substance Abuse Directory?

MARK ALL THAT APPLY

1 ☐ Publish the street address

2 ☐ Publish the mailing address

3 ☐ Do not publish either address

28b. To increase public awareness of behavioral health services, SAMHSA may be sharing facility information with large commercially available Internet search engines (such as Google, Bing, Yahoo!, etc.), businesses (such as any .com, .org, .edu, etc.) or individuals asking for this information for any purpose. Do you want your facility information shared?

- *Information to be shared would be: facility name, location address, telephone number, website address, and all **asterisked** items in the questionnaire.*

1 ☐ Yes

0 ☐ No

29. Did you answer "yes" to either detoxification in option 2 or substance use treatment in option 3 of question 1?

1 ☐ Yes → **SKIP TO Q.30 (TOP OF NEXT PAGE)**

0 ☐ No → **SKIP TO Q.37 (PAGE 14)**

SECTION B: REPORTING CLIENT COUNTS

30. Questions 31 through 36 ask about the number of clients in treatment. If possible, report clients for this facility only. However, we realize that is not always possible. Please indicate whether the clients you report will be for . . .

MARK ONE ONLY

1 ☐ Only this facility → **SKIP TO Q.31 (TOP OF NEXT COLUMN)**

2 ☐ This facility plus others

3 ☐ Another facility will report this facility's client counts → **SKIP TO Q.37 (PAGE 14)**

30a. How many facilities will be included in your client counts?

THIS FACILITY	1
+ ADDITIONAL FACILITIES	
TOTAL FACILITIES[α]	

[α]For Section B, please include all of these facilities in the client counts that you report in questions 31 through 36.

30b. To avoid double-counting clients, we need to know which facilities are included in your counts. How will you report this information to us?

MARK ONE ONLY

1 ☐ By listing the names and location addresses of these additional facilities in the "Additional Facilities Included in Client Counts" section on page 15 of this questionnaire or attaching a sheet of paper to this questionnaire

2 ☐ Please call me for a list of the additional facilities included in these counts

HOSPITAL INPATIENT CLIENT COUNTS

31. On March 29, 2019, did any patients receive HOSPITAL INPATIENT substance abuse services at this facility?

1 ☐ Yes

0 ☐ No → **SKIP TO Q.32 (NEXT PAGE)**

31a. On March 29, 2019, how many patients received the following HOSPITAL INPATIENT substance abuse services at this facility?

- ***COUNT*** *a patient in* ***one service only****, even if the patient received both services.*
- ***DO NOT*** *count family members, friends, or other non-treatment patients.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Hospital inpatient detoxification (similar to ASAM Levels IV-D and III.7-D, *medically managed or monitored inpatient detoxification)* _____

2. Hospital inpatient treatment (similar to ASAM Levels IV and III.7, *medically managed or monitored intensive inpatient treatment)* _____

HOSPITAL INPATIENT TOTAL BOX ☐

NOTE: ASAM is the American Society of Addiction Medicine. For more information on ASAM please go to https://info.nssats.com.

31b. How many of the patients from the HOSPITAL INPATIENT TOTAL BOX were under the age of 18?

ENTER A NUMBER (IF NONE, ENTER "0")

Number under age 18 _____

31c. How many of the patients from the HOSPITAL INPATIENT TOTAL BOX received:

- *Include patients who received these drugs for detoxification, maintenance, or relapse prevention for opioid use disorder.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Methadone dispensed at this facility for opioid use disorder _____
2. Buprenorphine dispensed or prescribed at this facility for opioid use disorder _____
3. Naltrexone administered at this facility for opioid use disorder _____

31d. How many of the patients from the HOSPITAL INPATIENT TOTAL BOX received:

- *Include patients who received these medications for alcohol use disorder.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Disulfiram *(Antabuse®)* dispensed or prescribed at this facility for alcohol use disorder _____
2. Naltrexone dispensed or prescribed at this facility for alcohol use disorder _____
3. Acamprosate *(Campral®)* dispensed or prescribed at this facility for alcohol use disorder _____

31e. On March 29, 2019, how many hospital inpatient beds were specifically designated for substance use treatment?

ENTER A NUMBER (IF NONE, ENTER "0")

Number of beds _____

RESIDENTIAL (NON-HOSPITAL) CLIENT COUNTS

32. On March 29, 2019, did any clients receive RESIDENTIAL (non-hospital) substance abuse services at this facility?

1 ☐ Yes

0 ☐ No → **SKIP TO Q.33 (TOP OF NEXT PAGE)**

32a. On March 29, 2019, how many clients received the following RESIDENTIAL substance abuse services at this facility?

- ***COUNT** a client in **one service only**, even if the client received multiple services.*
- ***DO NOT** count family members, friends, or other non-treatment clients.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Residential detoxification _____
   (similar to ASAM Level III.2-D, *clinically managed residential detoxification or social detoxification)*
2. Residential short-term treatment _____
   (similar to ASAM Level III.5, *clinically managed high-intensity residential treatment, typically 30 days or less)*
3. Residential long-term treatment _____
   (similar to ASAM Levels III.3 and III.1, *clinically managed medium- or low-intensity residential treatment, typically more than 30 days)*

RESIDENTIAL TOTAL BOX ☐

32b. How many of the clients from the RESIDENTIAL TOTAL BOX were under the age of 18?

ENTER A NUMBER (IF NONE, ENTER "0")

Number under age 18 _____

32c. How many of the clients from the RESIDENTIAL TOTAL BOX received:

- *Include clients who received these drugs for detoxification, maintenance, or relapse prevention for opioid use disorder.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Methadone dispensed at this facility for opioid use disorder _____
2. Buprenorphine dispensed or prescribed at this facility for opioid use disorder _____
3. Naltrexone administered at this facility for opioid use disorder _____

32d. How many of the clients from the RESIDENTIAL TOTAL BOX received:

- *Include clients who received these medications for alcohol use disorder.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Disulfiram *(Antabuse®)* dispensed or prescribed at this facility for alcohol use disorder _____
2. Naltrexone dispensed or prescribed at this facility for alcohol use disorder _____
3. Acamprosate *(Campral®)* dispensed or prescribed at this facility for alcohol use disorder _____

32e. On March 29, 2019, how many residential beds were specifically designated for substance use treatment?

ENTER A NUMBER (IF NONE, ENTER "0")

Number of beds _____

OUTPATIENT CLIENT COUNTS

33. During the month of March 2019, did any clients receive OUTPATIENT substance abuse services at this facility?

1 ☐ Yes

0 ☐ No → **SKIP TO Q.34 (TOP OF NEXT PAGE)**

33a. As of March 29, 2019, how many active clients were receiving each of the following OUTPATIENT substance abuse services at this facility?

☞ *An active client is a client who received treatment in March **AND** was still enrolled in treatment on March 29, 2019.*

- ***COUNT** a client in **one service only**, even if the client received multiple services.*
- ***DO NOT** count family members, friends, or other non-treatment clients.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Outpatient detoxification (similar to ASAM Levels I-D and II-D, *ambulatory detoxification)* _____
2. Outpatient methadone/ buprenorphine maintenance or naltrexone treatment *(count methadone/buprenorphine/ naltrexone clients on this line only)* _____
3. Outpatient day treatment or partial hospitalization (similar to ASAM Level II.5, *20 or more hours per week)* _____
4. Intensive outpatient treatment (similar to ASAM Level II.1, *9 or more hours per week)* _____
5. Regular outpatient treatment (similar to ASAM Level I, *outpatient treatment, non-intensive)* _____

OUTPATIENT TOTAL BOX ☐

33b. How many of the clients from the OUTPATIENT TOTAL BOX were under the age of 18?

ENTER A NUMBER (IF NONE, ENTER "0")

Number under age 18 _____

33c. How many of the clients from the OUTPATIENT TOTAL BOX received:

- *Include clients who received these drugs for detoxification, maintenance, or relapse prevention for opioid use disorder.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Methadone dispensed at this facility for opioid use disorder _____
2. Buprenorphine dispensed or prescribed at this facility for opioid use disorder _____
3. Naltrexone administered at this facility for opioid use disorder _____

33d. How many of the clients from the OUTPATIENT TOTAL BOX received:

- *Include clients who received these medications for alcohol use disorder.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Disulfiram *(Antabuse®)* dispensed or prescribed at this facility for alcohol use disorder _____
2. Naltrexone dispensed or prescribed at this facility for alcohol use disorder _____
3. Acamprosate *(Campral®)* dispensed or prescribed at this facility for alcohol use disorder _____

ALL SUBSTANCE ABUSE TREATMENT SETTINGS

Including Hospital Inpatient,
Residential (non-hospital) and/or Outpatient

34. This question asks you to categorize the substance use treatment clients at this facility into three groups: clients in treatment for (1) abuse of both alcohol and substances other than alcohol; (2) abuse only of alcohol; or (3) abuse only of substances other than alcohol.

Enter the percent of clients on March 29, 2019, who were in each of these three groups:

Clients in treatment for abuse of:

1. BOTH alcohol and substances other than alcohol _____%
2. ONLY alcohol _____%
3. ONLY substances other than alcohol _____%

TOTAL 100 %

35. Approximately what percent of the substance use treatment clients enrolled at this facility on March 29, 2019, had a diagnosed co-occurring mental and substance use disorder?

PERCENT OF CLIENTS (IF NONE, ENTER "0") %

36. Using the most recent 12-month period for which you have data, approximately how many substance use treatment ADMISSIONS did this facility have?

- **OUTPATIENT CLIENTS:** *Count admissions into treatment, not individual treatment visits. Consider an admission to be the initiation of a treatment program or course of treatment. Count any re-admission as an admission.*
- **IF THIS IS A MENTAL HEALTH FACILITY:** *Count all admissions in which clients received substance use treatment, even if substance abuse was their secondary diagnosis.*

NUMBER OF SUBSTANCE USE TREATMENT ADMISSIONS IN A 12-MONTH PERIOD

37. Who was primarily responsible for completing this form? ***This information will only be used if we need to contact you about your responses. It will not be published.***

ANY ADDITIONAL COMMENTS

PLEDGE TO RESPONDENTS: The information you provide will be protected to the fullest extent allowable under the Public Health Service Act (42 USC 290aa(p)). This law permits the public release of identifiable information about an establishment only with the consent of that establishment and limits the use of the information to the purposes for which it was supplied. With the explicit consent of treatment facilities, information provided in response to survey questions marked with an asterisk may be published in SAMHSA's online Behavioral Health Treatment Services Locator, the *National Directory of Drug and Alcohol Abuse Treatment Programs*, and other publicly-available listings. Responses to non-asterisked questions will be published with no direct link to individual treatment facilities.

Thank you for your participation. Please return this questionnaire in the envelope provided.
If you no longer have the envelope, please mail this questionnaire to:

MATHEMATICA POLICY RESEARCH

Princeton, NJ 08543-2393

Public Burden Statement: An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this project is 0930-0106. Public reporting burden for this collection of information is estimated to average 40 minutes per respondent, per year, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to SAMHSA Reports Clearance Officer, 5600 Fishers Lane, Room 15E57-B, Rockville, Maryland 20857.

Addendum for Substance Abuse
Veterans Administration Facilities
March 29, 2019

Please answer the following questions for your Veteran Administration facility.

VA1. Which of the following <u>suicide-related services</u> are offered at this facility?

MARK ALL THAT APPLY

1 ☐ Evidence based suicide prevention interventions *(interventions such as psychotherapies, medications, and/or public health strategies specifically aimed at decreasing rates of suicide)*

2 ☐ Suicide risk screening → **SKIP TO VA3 (TOP OF PAGE 2)**

3 ☐ Suicide risk evaluation → **SKIP TO VA4 (PAGE 2)**

4 ☐ We do not offer any of these suicide-related services → **SKIP TO VA5 (PAGE 2)**

VA2. Which of the following evidence-based suicide prevention interventions are used at this facility?

- *Evidence-based suicide prevention interventions may include psychotherapies, medications, and/or public health strategies specifically aimed at decreasing rates of suicide.*

MARK ALL THAT APPLY

1 ☐ Cognitive Therapy for Suicide Prevention *(CBT-SP)*

2 ☐ Cognitive Behavioral Therapy *(CBT)*

3 ☐ Dialectic Behavioral Therapy *(DBT)*

4 ☐ Problem Solving Therapy *(PST)*

5 ☐ Safety Planning/Crisis Response Planning

6 ☐ Ketamine Infusions

7 ☐ Lithium Treatment

8 ☐ Clozapine Treatment

9 ☐ Caring Communications

10 ☐ Home Support

11 ☐ World Health Organization-Brief Intervention and Contact *(WHO-BIC)*

12 ☐ Gate Keeper Training

13 ☐ Lethal Means Safety Counseling

14 ☐ Other *(Specify: _____)*

VA3. Which of the following <u>standardized suicide screening tools</u> are used or made available at this facility?

MARK ALL THAT APPLY

1 ☐ Columbia-Suicide Severity Rating Scale *(C-SSRS)* Screener
2 ☐ Patient Health Questionnaire *(PHQ-9)* Item 9
3 ☐ Other *(Specify: _____)*
4 ☐ We do not use standardized suicide screening tools

VA4. Which of the following <u>standardized suicide evaluation tools</u> are used or made available at this facility?

MARK ALL THAT APPLY

1 ☐ Columbia-Suicide Severity Rating Scale *(C-SSRS)*
2 ☐ The Mini International Neuropsychiatric Interview *(MINI)*
3 ☐ VA Comprehensive Suicide Risk Evaluation *(CSRE)*
4 ☐ Suicide Assessment Five-step Evaluation and Triage *(SAFE-T)*
5 ☐ Other *(Specify: _____)*
6 ☐ We do not use standardized suicide evaluation tools

VA5. How many of the substance use inpatients that you reported in the HOSPITAL INPATIENT TOTAL BOX were identified as being at high risk of suicide?

- *The HOSPITAL INPATIENT TOTAL BOX can be found at question 31a on page 11 of the survey.*

ENTER A NUMBER (IF NONE, ENTER "0")

_____

VA6. How many of the substance use residential clients that you reported in the RESIDENTIAL TOTAL BOX were identified as being at high risk of suicide?

- *The RESIDENTIAL TOTAL BOX can be found at question 32a on page 12 of the survey.*

ENTER A NUMBER (IF NONE, ENTER "0")

_____

VA7. How many of the substance use outpatient clients that you reported in the OUTPATIENT TOTAL BOX were identified as being at high risk of suicide?

- *The OUTPATIENT TOTAL BOX can be found at question 33a on page 13 of the survey.*

ENTER A NUMBER (IF NONE, ENTER "0")

Appendix C
Item Response for 2019 N-SSATS

This appendix contains Table C1, a list of item response rates for questions from the N-SSATS 2019 questionnaire. Item non-response was minimized through careful editing and extensive follow-up.

The item response rate for the 2019 N-SSATS averaged 99 percent across 329 separate response categories.

Item non-response was 10 percent or more for only five of 329 separate response categories.

When available, client values and admissions values from up to five previous surveys were used to impute the missing counts. If historical data were not available, the average client value, stratified by state and facility operation, was used to impute the missing client counts. If a facility were unique in its state and facility operation category, values were imputed using average values for the state only. Missing client counts were imputed for each type of service (i.e., hospital inpatient detoxification, hospital inpatient treatment, residential [non-hospital] detoxification, etc.) and summed to the larger service type totals (total hospital inpatient clients, total residential [non-hospital] clients, and total outpatient clients), and finally to total clients. For 2019, 54 imputations were done involving 12 facilities.

Several facilities report client counts for themselves (parent) as well as for other facilities (children) within their family of substance abuse treatment facilities. Instead of reporting only the aggregate client count, we attempted to disaggregate and redistribute or unroll the parent facilities' total client count wherever possible to reflect the number of clients served by each facility within the family of facilities. Client counts reported by a parent facility were distributed among its children facilities based on the type of facilities and types of clients indicated by the family of facilities. Therefore, numbers reported may be an actual number reported by the facility itself or they may be an unrolled estimate based on the unrolling procedures. All totals sum to the actual reported numbers. For hospital inpatient care, 18 facilities and 148 clients were unrolled. For outpatient care, 1,436 facilities and 173,623 clients were unrolled. For residential care, 221 facilities and 4,086 clients were unrolled.

Table C1. Item response rates, by question number and description: 2019

Question number	Description	Response rate (%)
Q1-1	Facility offers intake, assessment, or referral	99.9
Q1-2	Facility offers detoxification	100.0
Q1-3	Facility offers substance use treatment	100.0
Q1-4	Facility offers treatment for co-occurring serious mental illness (SMI)/ serious emotional disturbance (SED) and substance use disorders	100.0
Q1-5	Facility offers any other substance use services	99.7
Q1a-1	Facility offers mental health treatment services to substance abuse clients	100.0
Q1a-2	Facility offers mental health treatment services to clients other than substance abuse clients	100.0
Q1a-3	No clients offered mental health treatment services	100.0
Q2	Facility is a jail, prison, or other organization that exclusively treats incarcerated persons or juvenile detainees	100.0
Q3a-1	Facility offers detoxification from alcohol	99.0
Q3a-2	Facility offers detoxification from benzodiazepines	99.0
Q3a-3	Facility offers detoxification from cocaine	99.0
Q3a-4	Facility offers detoxification from methamphetamines	99.0
Q3a-5	Facility offers detoxification from opioids	99.0
Q3a-6	Facility offers detoxification from other substances	100.0
Q3b	Facility routinely uses medications during detoxification	98.8
Q5	Facility is a solo practice	99.8
Q6	Facility is a Federally Qualified Health Center (FQHC)	77.0
Q7	Primary focus of facility is substance use treatment services/mental health services/mix of mental health and substance use treatment services (neither is primary)/general health care/other	99.9
Q8	Facility operation/ownership	100.0
Q8a	Federal government agency operation/ownership	100.0
Q9	Facility offers hospital inpatient substance abuse services	100.0
Q9a-1	Facility offers hospital inpatient detoxification	100.0
Q9a-2	Facility offers hospital inpatient treatment	100.0
Q10	Facility offers residential (non-hospital) substance abuse services	100.0
Q10a-1	Facility offers residential detoxification	100.0
Q10a-2	Facility offers residential short-term treatment	100.0
Q10a-3	Facility offers residential long-term treatment	100.0
Q11	Facility offers outpatient services	100.0
Q11a-1	Facility offers outpatient detoxification	100.0
Q11a-2	Facility offers outpatient methadone/buprenorphine maintenance or naltrexone treatment	100.0
Q11a-3	Facility offers outpatient day treatment or partial hospitalization	100.0
Q11a-4	Facility offers intensive outpatient treatment	100.0
Q11a-5	Facility offers regular outpatient treatment	100.0

Question number	Description	Response rate (%)
Q12-1	Facility offers screening for substance abuse	100.0
Q12-2	Facility offers screening for mental disorders	100.0
Q12-3	Facility offers comprehensive substance abuse assessment or diagnosis	100.0
Q12-4	Facility offers comprehensive mental health assessment or diagnosis (for example, psychological or psychiatric evaluation and testing)	100.0
Q12-5	Facility offers screening for tobacco use	100.0
Q12-6	Facility offers outreach to persons in the community who may need treatment	100.0
Q12-7	Facility offers interim services for clients when immediate admission is not possible	100.0
Q12-8	Facility offers professional interventionist/educational consultant	100.0
Q12-9	Facility does not offer any of these assessment and pre-treatment services	100.0
Q12-10	Facility offers drug and alcohol oral fluid testing	100.0
Q12-11	Facility offers breathalyzer or other blood alcohol testing	100.0
Q12-12	Facility offers drug or alcohol urine screening	100.0
Q12-13	Facility offers testing for hepatitis B (HBV)	100.0
Q12-14	Facility offers testing for hepatitis C (HCV)	100.0
Q12-15	Facility offers HIV testing	100.0
Q12-16	Facility offers STD testing	100.0
Q12-17	Facility offers TB screening	100.0
Q12-18	Facility offers testing for metabolic syndrome	100.0
Q12-19	Facility does not offer any of these testing services	100.0
Q12-20	Facility offers hepatitis A (HAV) vaccination	100.0
Q12-21	Facility offers hepatitis B (HBV) vaccination	100.0
Q12-22	Facility does not offer any of these medical services	100.0
Q12-23	Facility offers discharge planning	100.0
Q12-24	Facility offers aftercare/continuing care	100.0
Q12-25	Facility offers naloxone and overdose education	100.0
Q12-26	Facility offers outcome follow-up after discharge	100.0
Q12-27	Facility does not offer any of these transitional services	100.0
Q12-28	Facility offers mentoring/peer support	100.0
Q12-29	Facility offers self-help groups (for example, AA, NA, SMART Recovery)	100.0
Q12-30	Facility offers assistance in locating housing for clients	100.0
Q12-31	Facility offers employment counseling or training for clients	100.0
Q12-32	Facility offers assistance with obtaining social services (for example, Medicaid, WIC, SSI, SSDI)	100.0
Q12-33	Facility offers recovery coach	100.0
Q12-34	Facility does not offer any of these recovery support services	100.0
Q12-35	Facility offers HIV or AIDS education, counseling, or support	100.0
Q12-36	Facility offers hepatitis education, counseling, or support	100.0

Question number	Description	Response rate (%)
Q12-37	Facility offers health education other than HIV/AIDS or hepatitis	100.0
Q12-38	Facility offers substance abuse education	100.0
Q12-39	Facility offers smoking/tobacco cessation counseling	100.0
Q12-40	Facility offers individual counseling	100.0
Q12-41	Facility offers group counseling	100.0
Q12-42	Facility offers family counseling	100.0
Q12-43	Facility offers marital/couples counseling	100.0
Q12-44	Facility offers vocational training or educational support (for example, high school coursework, GED preparation, etc.)	100.0
Q12-45	Facility does not offer any of these education and counseling services	100.0
Q12-46	Facility offers case management services	100.0
Q12-47	Facility offers social skills development	100.0
Q12-48	Facility offers childcare for clients' children	100.0
Q12-49	Facility offers domestic violence—family or partner violence—services (physical, sexual, and emotional abuse)	100.0
Q12-50	Facility offers early intervention HIV	100.0
Q12-51	Facility offers transportation assistance to treatment	100.0
Q12-52	Facility offers mental health services	100.0
Q12-53	Facility offers acupuncture	100.0
Q12-54	Facility offers residential beds for clients' children	100.0
Q12-55	Facility does not offer any of these ancillary services	100.0
Q12-56	Facility offers treatment for gambling disorder	100.0
Q12-57	Facility offers treatment for Internet use disorder	100.0
Q12-58	Facility offers treatment for other addiction disorder (non-substance abuse)	100.0
Q12-59	Facility does not offer any of these other services	100.0
Q12-60	Pharmacotherapies — disulfiram (Antabuse®)	100.0
Q12-61	Pharmacotherapies — naltrexone (oral)	100.0
Q12-62	Pharmacotherapies — naltrexone (extended-release, injectable, for example, Vivitrol®)	100.0
Q12-63	Pharmacotherapies — acamprosate (Campral®)	100.0
Q12-64	Pharmacotherapies — nicotine replacement	100.0
Q12-65	Pharmacotherapies — non-nicotine smoking/tobacco cessation medications (for example, bupropion, varenicline)	100.0
Q12-66	Pharmacotherapies — medications for psychiatric disorders	100.0
Q12-67	Pharmacotherapies — methadone	100.0
Q12-68	Pharmacotherapies — buprenorphine with naloxone (for example, Suboxone®, Bunavail®, Zubsolv®, Cassipa®)	100.0
Q12-69	Pharmacotherapies — buprenorphine without naloxone	100.0
Q12-70	Pharmacotherapies — buprenorphine sub-dermal implant (Probuphine®)	100.0

Question number	Description	Response rate (%)
Q12-71	Pharmacotherapies — buprenorphine (extended-release, injectable, for example, Sublocade®)	100.0
Q12-72	Pharmacotherapies — medications for HIV treatment (for example, antiretroviral medications such as tenofovir, efavirenz, emtricitabine, atazanavir, and lamivudine)	100.0
Q12-73	Pharmacotherapies — medications for hepatitis C (HCV) treatment (for example, sofosbuvir, ledipasvir, interferon, peginterferon, ribavirin)	100.0
Q12-74	Pharmacotherapies — lofexidine	100.0
Q12-75	Pharmacotherapies — clonidine	100.0
Q12-76	Does not offer any of these pharmacotherapy services	100.0
Q13-1	Does not treat opioid use disorder	100.0
Q13-2	Uses methadone or buprenorphine for pain management, emergency cases, or research purposes	100.0
Q13-3	Treats opioid use disorder, but it does not use medication-assisted treatment (MAT), nor does it accept clients using MAT to treat opioid use disorder	100.0
Q13-4	Accepts clients using MAT, but the medications originate from or are prescribed by another entity	100.0
Q13-5	Administers naltrexone to treat opioid use disorder	100.0
Q13-6	Prescribes buprenorphine to treat opioid use disorder through a DATA 2000-waivered provider	100.0
Q13-7	Federally certified opioid treatment program (OTP)	100.0
Q13a-1	Prescribing entity (of MAT for OUD) in network	99.9
Q13a-2	Business, contractual, or formal referral relationship with prescribing entity (of MAT for OUD)	99.9
Q13a-3	Client obtains their prescription/medication (of MAT for OUD) from their personal physician/health care provider	99.9
Q13a-4	Clients using MAT for OUD obtain medications from other entity	100.0
Q13b	Facility serves only opioid use disorder clients	100.0
Q13c-1	Provides maintenance services with methadone or buprenorphine	99.9
Q13c-2	Provides maintenance services with medically supervised withdrawal (or taper) after a period of stabilization	99.9
Q13c-3	Provides detoxification from opioids of abuse with methadone or buprenorphine	99.9
Q13c-4	Provides detoxification from opioids of abuse with lofexidine or clonidine	99.9
Q13c-5	Provides relapse prevention with naltrexone	99.9
Q13c-6	Provides other medication services	100.0
Q13c-7	Does not offer any of these medication services	99.9
Q13d-1	Approximate percentage of clients on MAT for OUD who receive maintenance services with methadone or buprenorphine	99.9
Q13d-2	Approximate percentage of clients on MAT for OUD who receive maintenance services with medically supervised withdrawal (or taper) after a period of stabilization	99.9

Question number	Description	Response rate (%)
Q13d-3	Approximate percentage of clients on MAT for OUD who receive detoxification from opioids of abuse with methadone or buprenorphine	99.9
Q13d-4	Approximate percentage of clients on MAT for OUD who receive detoxification from opioids of abuse with lofexidine or clonidine	99.8
Q13d-5	Approximate percentage of clients on MAT for OUD who receive relapse prevention with naltrexone	99.9
Q13d-6	Approximate percentage of clients on MAT for OUD who receive other medication services	100.0
Q14-1	Facility does not treat alcohol use disorder	100.0
Q14-2	Facility treats alcohol use disorder, but does not use medication-assisted treatment (MAT) for alcohol use disorder, nor does it accept clients using MAT to treat alcohol use disorder	100.0
Q14-3	Facility accepts clients using MAT for alcohol use disorder, but the medications originate from or are prescribed by another entity	100.0
Q14-4	Facility administers/prescribes at least one of disulfiram (Antabuse®), naltrexone, and/or acamprosate (Campral®) for alcohol use disorder	100.0
Q14a-1	Prescribing entity (of MAT for AUD) in network	100.0
Q14a-2	Business, contractual, or formal referral relationship with the prescribing entity (of MAT for AUD)	100.0
Q14a-3	Client obtains their prescription/medication for AUD from their personal physician/health care provider	100.0
Q14a-4	Clients using MAT for AUD obtain medications from other entity	100.0
Q14b	Facility serves only alcohol use disorder clients	100.0
Q15-1	Substance abuse counseling used frequently	99.9
Q15-2	12-step facilitation used frequently	99.9
Q15-3	Brief intervention used frequently	99.9
Q15-4	Cognitive behavioral therapy used frequently	99.9
Q15-5	Dialectical behavior therapy used frequently	99.9
Q15-6	Contingency management/motivational incentives used frequently	99.9
Q15-7	Motivational interviewing used frequently	99.9
Q15-8	Trauma-related counseling used frequently	99.9
Q15-9	Anger management used frequently	99.9
Q15-10	Matrix Model used frequently	99.9
Q15-11	Community reinforcement plus vouchers used frequently	99.9
Q15-12	Rational emotive behavioral therapy (REBT) used frequently	99.9
Q15-13	Relapse prevention used frequently	99.9
Q15-14	Telemedicine/telehealth used frequently (including Internet, Web, mobile, and desktop programs)	99.9
Q15-15	Other treatment approach used frequently	100.0
Q15-16	None of these clinical/therapeutic approaches used frequently	99.9
Q16	Offers specially designed program or group intended exclusively for DUI/DWI or other drunk driver offenders	99.8
Q16a	Facility serves only DUI/DWI clients	99.8

Question number	Description	Response rate (%)
Q17	Facility provides substance use treatment services in sign language for the deaf and hard-of-hearing	99.8
Q18	Facility provides substance use treatment services in a language other than English	99.9
Q18a	Who provides substance use treatment services in a language other than English?	99.9
Q18a-1	Staff counselors provide substance use treatment in Spanish	100.0
Q18a-2	Staff counselors provide substance use treatment in any other languages	100.0
Q18b-1	Staff counselors provide substance use treatment in Hopi	100.0
Q18b-2	Staff counselors provide substance use treatment in Lakota	100.0
Q18b-3	Staff counselors provide substance use treatment in Navajo	100.0
Q18b-4	Staff counselors provide substance use treatment in Ojibwa	100.0
Q18b-5	Staff counselors provide substance use treatment in Yupik	100.0
Q18b-6	Staff counselors provide substance use treatment in other American Indian/Alaska Native language	100.0
Q18b-7	Staff counselors provide substance use treatment in Arabic	100.0
Q18b-8	Staff counselors provide substance use treatment in any Chinese language	100.0
Q18b-9	Staff counselors provide substance use treatment in Creole	100.0
Q18b-10	Staff counselors provide substance use treatment in Farsi	100.0
Q18b-11	Staff counselors provide substance use treatment in French	100.0
Q18b-12	Staff counselors provide substance use treatment in German	100.0
Q18b-13	Staff counselors provide substance use treatment in Greek	100.0
Q18b-14	Staff counselors provide substance use treatment in Hebrew	100.0
Q18b-15	Staff counselors provide substance use treatment in Hindi	100.0
Q18b-16	Staff counselors provide substance use treatment in Hmong	100.0
Q18b-17	Staff counselors provide substance use treatment in Italian	100.0
Q18b-18	Staff counselors provide substance use treatment in Japanese	100.0
Q18b-19	Staff counselors provide substance use treatment in Korean	100.0
Q18b-20	Staff counselors provide substance use treatment in Polish	100.0
Q18b-21	Staff counselors provide substance use treatment in Portuguese	100.0
Q18b-22	Staff counselors provide substance use treatment in Russian	100.0
Q18b-23	Staff counselors provide substance use treatment in Tagalog	100.0
Q18b-24	Staff counselors provide substance use treatment in Vietnamese	100.0
Q18b-25	Staff counselors provide substance use treatment in any other language	100.0
Q19-1	Females are served by this facility	100.0
Q19-1	Lowest age of females served	100.0
Q19-1	No minimum age of females served	100.0
Q19-1	Highest age of females served	100.0
Q19-1	No maximum age of females served	100.0
Q19-2	Males are served by this facility	100.0

Question number	Description	Response rate (%)
Q19-2	Lowest age of males served	100.0
Q19-2	No minimum age of males served	100.0
Q19-2	Highest age of males served	99.9
Q19-2	No maximum age of males served	100.0
Q19a-1	Facility offers program or group specifically tailored for adolescents	99.9
Q19a-2	Facility offers program or group specifically tailored for young adults	99.9
Q19a-3	Facility offers program or group specifically tailored for adult women	99.9
Q19a-4	Facility offers program or group specifically tailored for pregnant/ postpartum women	99.9
Q19a-5	Facility offers program or group specifically tailored for adult men	99.9
Q19a-6	Facility offers program or group specifically tailored for seniors or older adults	99.9
Q19a-7	Facility offers program or group specifically tailored for lesbian/gay/ bisexual/transgender (LGBT) clients	99.9
Q19a-8	Facility offers program or group specifically tailored for veterans	99.9
Q19a-9	Facility offers program or group specifically tailored for active duty military	99.9
Q19a-10	Facility offers program or group specifically tailored for members of military families	99.9
Q19a-11	Facility offers program or group specifically tailored for criminal justice clients (other than DUI/DWI)	99.9
Q19a-12	Facility offers program or group specifically tailored for clients with co-occurring mental and substance use disorders	99.9
Q19a-13	Facility offers program or group specifically tailored for clients with co-occurring pain and substance use	99.9
Q19a-14	Facility offers program or group specifically tailored for clients with HIV or AIDS	99.9
Q19a-15	Facility offers program or group specifically tailored for clients who have experienced sexual abuse	99.9
Q19a-16	Facility offers program or group specifically tailored for clients who have experienced intimate partner violence, domestic violence	99.9
Q19a-17	Facility offers program or group specifically tailored for clients who have experienced trauma	99.9
Q19a-18	Facility offers program or group specifically tailored for any other types of clients	100.0
Q19a-19	No specifically tailored programs or groups are offered	99.9
Q20	Facility uses a sliding fee scale	99.8
Q20a	Availability of sliding fee scale included in online Locator/Directory	100.0
Q21	Facility offers treatment at no charge or minimal payment	99.7
Q21a	Availability of treatment at no charge or minimal payment included in online Locator/Directory	100.0
Q22	Facility receives federal, state, county, or local government funding or grants to support its substance use treatment programs	96.1
Q23-1	Facility does not accept payment (free treatment for all clients)	99.4

Question number	Description	Response rate (%)
Q23-2	Facility accepts cash or self-payment	99.4
Q23-3	Facility accepts Medicare payments	99.4
Q23-4	Facility accepts Medicaid payments	99.4
Q23-5	Facility accepts state-financed health insurance plan other than Medicaid	99.4
Q23-6	Facility accepts federal military insurance	99.4
Q23-7	Facility accepts private health insurance	99.4
Q23-8	Facility accepts Indian Health Service/Tribal/Urban (ITU funds)	99.4
Q23-9	Facility accepts other types of client payments or insurance	100.0
Q24	Facility is a hospital, is located in a hospital, or is operated by a hospital	99.7
Q24a	Type of hospital	99.9
Q25	Facility operates transitional housing, halfway house, or sober home for substance abuse clients	100.0
Q26	Facility smoking policy	99.8
Q27-1	Licensed, certified, or accredited by state substance abuse agency	99.8
Q27-2	Licensed, certified, or accredited by state mental health department	99.8
Q27-3	Licensed, certified, or accredited by state health department	99.8
Q27-4	Licensed, certified, or accredited by hospital licensing authority	99.8
Q27-5	Accredited by the Joint Commission	99.8
Q27-6	Accredited by Commission on Accreditation of Rehabilitation Facilities (CARF)	99.8
Q27-7	Accredited by National Committee for Quality Assurance (NCQA)	99.8
Q27-8	Accredited by Council on Accreditation (COA)	99.8
Q27-9	Accredited by Healthcare Facilities Accreditation Program (HFAP)	99.8
Q27-10	Licensed, certified, or accredited by another national organization or federal, state, or local agency	100.0
Q28	Facility wants to be listed in SAMHSA's online Behavioral Health Treatment Services Locator and in the National Directory of Drug and Alcohol Abuse Treatment Facilities	99.8
Q28a-1	Facility wants street address listed in the Locator/Directory	100.0
Q28a-2	Facility wants mailing address listed in the Locator/Directory	100.0
Q28a-3	Facility does not want either address listed in the Locator/Directory	100.0
Q28b	Facility wants selected information shared with Internet search engines	100.0
Q30	Client counts for only this facility, this facility plus others, none	100.0
Q30a	Total number of facilities included in reported client counts	100.0
Q31	Any patients received hospital inpatient substance abuse services on March 29, 2019	100.0
Q31a	Total number of hospital inpatient clients	100.0
Q31a-1	Number of hospital inpatient detoxification clients	99.9
Q31a-2	Number of hospital inpatient treatment clients	100.0
Q31b	Number of hospital inpatient clients under 18 years old	100.0

Question number	Description	Response rate (%)
Q31c-1	Number of hospital inpatients who received methadone dispensed at this facility for OUD	99.7
Q31c-2	Number of hospital inpatients who received buprenorphine dispensed or prescribed at this facility for OUD	99.6
Q31c-3	Number of hospital inpatients who received naltrexone administered at this facility for OUD	99.9
Q31d-1	Number of hospital inpatients who received disulfiram (Antabuse®) dispensed or prescribed at this facility for AUD	99.0
Q31d-2	Number of hospital inpatients who received naltrexone dispensed or prescribed at this facility for AUD	99.4
Q31d-3	Number of hospital inpatients who received acamprosate (Campral®) dispensed or prescribed at this facility for AUD	98.6
Q31e	Number of hospital inpatient beds specifically designated for substance use treatment	87.7
Q32	Any clients received residential (non-hospital) substance abuse services on March 29, 2019	100.0
Q32a	Total number of residential clients	100.0
Q32a-1	Number of residential detoxification clients	100.0
Q32a-2	Number of residential short-term treatment clients	100.0
Q32a-3	Number of residential long-term treatment clients	100.0
Q32b	Number of residential clients under 18 years old	99.8
Q32c-1	Number of residential clients who received methadone dispensed at this facility for OUD	99.8
Q32c-2	Number of residential clients who received buprenorphine dispensed or prescribed at this facility for OUD	99.6
Q32c-3	Number of residential clients who received naltrexone administered at this facility for OUD	99.3
Q32d-1	Number of residential clients who received disulfiram (Antabuse®) dispensed or prescribed at this facility for AUD	99.1
Q32d-2	Number of residential clients who received naltrexone dispensed or prescribed at this facility for AUD	99.1
Q32d-3	Number of residential clients who received acamprosate (Campral®) dispensed or prescribed at this facility for AUD	99.0
Q32e	Number of residential beds specifically designated for substance use treatment	95.5
Q33	Any clients received outpatient substance abuse services during March 2019	100.0
Q33a	Total number of active clients receiving outpatient substance abuse services as of March 29, 2019	100.0
Q33a-1	Number of outpatient detoxification clients	100.0
Q33a-2	Number of outpatient methadone/buprenorphine maintenance or naltrexone treatment clients	100.0
Q33a-3	Number of outpatient day treatment or partial hospitalization clients	100.0
Q33a-4	Number of intensive outpatient treatment clients	100.0

Question number	Description	Response rate (%)
Q33a-5	Number of regular outpatient treatment clients	100.0
Q33b	Number of outpatient clients under 18 years old	99.6
Q33c-1	Number of outpatient clients who received methadone dispensed at this facility for OUD	99.9
Q33c-2	Number of outpatient clients who received buprenorphine dispensed or prescribed at this facility for OUD	99.7
Q33c-3	Number of outpatient clients who received naltrexone administered at this facility for OUD	99.6
Q33d-1	Number of outpatient clients who received disulfiram (Antabuse®) dispensed or prescribed at this facility for AUD	99.3
Q33d-2	Number of outpatient clients who received naltrexone dispensed or prescribed at this facility for AUD	99.2
Q33d-3	Number of outpatient clients who received acamprosate (Campral®) dispensed or prescribed at this facility for AUD	99.3
Q34-1	Percent of clients in treatment on March 29, 2019, for treatment of abuse of both alcohol and substances other than alcohol	95.8
Q34-2	Percent of clients in treatment on March 29, 2019, for treatment of abuse only of alcohol	95.8
Q34-3	Percent of clients in treatment on March 29, 2019, for treatment of abuse only of substances other than alcohol	95.8
Q35	Estimated percent of substance use treatment clients enrolled on March 29, 2019, who had a diagnosed co-occurring mental and substance use disorder	94.9
Q36	Estimated total number of admissions for substance use treatment in the most recent 12-month period for which data is available	96.4
QVA1-1	VA facility offers evidence-based suicide prevention interventions	97.8
QVA1-2	VA facility offers suicide risk screening	97.8
QVA1-3	VA facility offers suicide risk evaluation	97.8
QVA1-4	VA facility does not offer any of these suicide prevention-related services	97.8
QVA2-1	VA facility uses cognitive therapy for suicide prevention (CBT-SP)	100.0
QVA2-2	VA facility uses cognitive behavioral therapy (CBT)	100.0
QVA2-3	VA facility uses dialectic behavioral therapy (DBT)	100.0
QVA2-4	VA facility uses problem solving therapy (PST)	100.0
QVA2-5	VA facility uses safety planning/crisis response planning	100.0
QVA2-6	VA facility uses ketamine infusions	100.0
QVA2-7	VA facility uses lithium treatment	100.0
QVA2-8	VA facility uses clozapine treatment	100.0
QVA2-9	VA facility uses caring communications	100.0
QVA2-10	VA facility uses home support	100.0
QVA2-11	VA facility uses World Health Organization—Brief Intervention and Contact (WHO-BIC)	100.0
QVA2-12	VA facility uses gate keeper training	100.0
QVA2-13	VA facility uses lethal means safety counseling	100.0

Question number	Description	Response rate (%)
QVA2-14	VA facility uses other evidence-based suicide prevention interventions	100.0
QVA3-1	VA facility uses or makes available the Columbia–Suicide Severity Rating Scale (C–SSRS) Screener	100.0
QVA3-2	VA facility uses or makes available Patient Health Questionnaire (PHQ-9) Item 9	100.0
QVA3-3	VA facility uses or makes available other standardized suicide risk screening tools	100.0
QVA4-1	VA facility uses or makes available the Columbia–Suicide Severity Rating Scale (C–SSRS)	100.0
QVA4-2	VA facility uses or makes available the Mini International Neuropsychiatric Interview (MINI)	100.0
QVA4-3	VA facility uses or makes available the VA Comprehensive Suicide Risk Evaluation (CSRE)	100.0
QVA4-4	VA facility uses or makes available the Suicide Assessment Five-Step Evaluation and Triage (SAFE-T)	100.0
QVA4-5	VA facility uses or makes available other standardized suicide risk evaluation tools	100.0
QVA5	Number of VA facility's hospital inpatient clients identified as being at high risk of suicide	82.5
QVA6	Number of VA facility's residential clients identified as being at high risk of suicide	87.3
QVA7	Number of VA facility's outpatient clients identified as being at high risk of suicide	85.6

AA = Alcoholics Anonymous; AUD = alcohol use disorder; DUI/DWI = driving under the influence/driving while intoxicated or impaired; MAT = medication-assisted therapy; NA = Narcotics Anonymous; OUD = opioid use disorder; PTSD = post-traumatic stress disorder; TBI = traumatic brain injury; SED = serious emotional disturbance; SMART = Self-Management and Recovery Training; SMI = serious mental illness; VA = Veterans Affairs.
