This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2009

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age is expressed as the consumer's age at fiscal year end in all reports.
 Gender None
 Race Other race has been reported as Unknown. Though Pacific Islander is now being captured as a racial category, it is only captured at registration time. Due to very low counts (less than 50 individuals) it has been grouped into the Asian category.
 Overall See General Notes

State used Federal SED Definition? Yes

Note:
This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2009

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Texas

URS Table Number	General Notes
2, 3, 4, 5a, 5b, 6	About 15-20% of the Texas population is served in a managed care model called NorthSTAR. Many of the measures that excluded NorthSTAR prior to 2005 now have NorthSTAR included. NorthSTAR understates served count due to the lag in claim reporting. Clients served late in the year may not be represented when the reports are produced in November.
3	NorthSTAR is included in local hospital starting in 2005. NorthSTAR had significant late reporting of other hospitalizations in 2005 resulting in an under reporting of approximately 1000 to URS.
3	Starting in 2010, "Other Hospitalization" data is primarily collected from encounters directly reported from centers. There was an increase that corresponded with this change.
4	Consumers without a diagnosis primarily include those who only received a crisis or assessment service. Diagnoses are not required to perform crisis services. Diagnoses do not need recorded for consumers that are not eligible for ongoing services.
4	The federal domains are measured at admission and annually thereafter; the non-federal domains are measured quarterly.
4	In FY2008 the number served increased, in part, due to funding increases for crisis services and this pattern continued through FY2009. It is anticipated that funding for crisis services will continue into FY2010. Unlike admission to ongoing services, providers are not required to assess consumer's employment situation upon admission to crisis services. Therefore, the number of "not applicable" may be higher in FY2008 and beyond when compared to FY2007.
5a	A client is counted as Medicaid if they were eligible at any time in the year.
6	NorthSTAR is included in local hospital starting in 2005. NorthSTAR had significant late reporting of other hospitalizations in 2005 resulting in an under reporting of approximately 1000 to URS.
10	Includes NorthSTAR starting in 2008.
14a	DSHS operational definition of SMI/SED: consumers assessed to need or authorized for an RDM service package, consumers who received a crisis service or mental health hospitalization, and those with a mental health diagnostic assessment (past or present).
14b	DSHS operational definition of SMI/SED: consumers assessed to need or authorized for an RDM service package, consumers who received a crisis service or mental health hospitalization, and those with a mental health diagnostic assessment (past or present).
15	In FY2008 the number served increased, in part, due to funding increases for crisis services and this pattern continued through FY2009. It is anticipated that funding for crisis services will continue into FY2010. Unlike admission to ongoing services, providers are not required to assess consumer's living situation upon admission to crisis services. Therefore, the number of "not applicable" may be higher in FY2008 and beyond when compared to FY2007.
15	NorthSTAR included starting in 2005. Living situation is part of the community assessment and not will not generally be available for those in hospital.
16	The introduction of Resiliency and Disease Management (RDM) to the Texas mental health service delivery system brought with it an integration of supported employment services within the delivery of evidence-based mental health services, such as counseling, psychosocial rehabilitative services, and case management. This integration brought changes in the manner by which supported employment services were recorded within the mental health service delivery system. The decreasing provision frequency of supported employment services from FY2005-FY2006 is likely the after effect of this integration and recording change.
16	Therapeutic Foster care has been discontinued in Texas and should be removed from future counts.
16	Best Practice programs delivered via NorthSTAR included starting in 2005. Clients only served in the hospital have been removed from the client count. ACT was counted via authorized level of care starting in 2005. In 2004 it was counted from CARE service assignments. ACT alternative (a modified model for Rural service areas) is included in the ACT count.
16	Contractual fidelity measures for ACT services were introduced in late 2005. These likely contributed to a reduction in ACT service volumes.
16	NorthSTAR began providing Supported Employment services in 2010 which accounted for most of the increase from the previous year.

URS Table Number	General Notes
17	Illness Self Management is counted as those who received a psychosocial rehabilitation service (assignment or encounter) as it is a component of those services. Fidelity is measured for rehabilitation services but not the illness self management component specifically.
17	Clients only served in the hospital have been removed from the client count. SA is counted via SA diagnosis authorized for ACT or Rehabilitative Case Management Service Packages (3 and 4). The Service Package criteria began in 2005 but more accurately reflects the best practice guidelines
18	Includes NorthSTAR starting in 2005. Includes ANY new generation medicine (NGM). NorthSTAR counts NGM using state pharmacy data but has been unable to obtain permission to access federal pharmacy data for Medicare part D. This will reduce the scope and accuracy of NGM data, particularly in 2007 and beyond. Beginning in 2006, hospital NGM counts are generated off doctor's orders rather than administrative data.
18	The number of consumers receiving NGMs in FY2009 decreased due to a correction in the logic related to open medication orders at state hospitals.
