URS Table Number	General Notes
7, 7A, 8	The increases in expenditures in these tables are due to the increase in the FFY2018 CMHS award.
14A,14B,15A,16	Data in these SMI related tables jumped when compared to last year as our methodology in accounting for SMI has changed.
15	The increase in the total number of consumers in Jail/Correctional Facility is due to a marked increase in the number of new clients in one of our forensic facilities during our biannual survey period. This increase in new clients has a strong influence on our annualization process as new and recurring clients are weighted heavily in the algorithm.
17	This year we do not have the data to help inform the issue of Family Psychoeducation, our collection efforts related to this topic have been "on hold" for the duration of the period.
19A	The Mental Health population that we draw on has changed this year to include people seen by private practitioners supported by medicaid funding.
21	Psychiatric inpatient readmission data may be incomplete. For example, a readmission would not be included if it occurred after a person lost Medicaid eligibility, or if a person was hospitalized out of state or in the Veteran's Administration system.
