

## Preventing or Reducing Opioid Abuse and Overdose: Selected Resources

Compiled by SAMHSA's Center for the Application of Prevention Technologies, this document includes a mix of tools developed by both Federal organizations and state prevention systems to support state-level planners in preventing or reducing heroin and other opioid abuse and its consequences. It was originally developed for practitioners working in the Northeast region of the U.S. but has relevance for practitioners throughout the country.

### OPIOID-SPECIFIC RESOURCES

Resource Title	Description of Resource	Organization that Developed Resource	Link
<b>Opioid Overdose Prevention Toolkit – Updated 2016</b>	This toolkit is designed to equip communities and local governments with material to develop policies and practices to help prevent opioid-related overdoses and deaths. The toolkit also addresses issues for first responders, treatment providers, and those recovering from opioid overdose.	Substance Abuse and Mental Health Services Administration	<a href="http://store.samhsa.gov/product/Opioid-Overdose-Prevention-Toolkit/SMA13-4742">http://store.samhsa.gov/product/Opioid-Overdose-Prevention-Toolkit/SMA13-4742</a>
<b>Maryland Opioid Overdose Prevention Plan</b>	The goal of this overdose prevention plan is to reduce unintentional, life-threatening poisonings related to the ingestion of opioids, including both illicit opioid drugs (i.e., heroin) and pharmaceutical opioid analgesics. The plan encompasses efforts to reduce poisonings related to the ingestion of opioids alone or in combination with other substances, as well as both fatal and non-fatal poisonings. The term “overdose” is used to describe poisonings that meet these criteria.
