*Low precision; no estimate reported.

NOTE: Some 2010 estimates may differ from previously published estimates due to updates (see Section B.3 in Appendix B of the *Results from the 2011 National Survey on Drug Use and Health: Mental Health Findings*).

NOTE: Any Mental Illness (AMI) is defined as having a diagnosable mental, behavioral, or emotional disorder, other than a developmental or substance use disorder that met the criteria found in the 4th edition of the *Diagnostic and Statistical Manual of Mental Disorders (DSM-IV)*. Estimates for AMI presented in this table may differ from previously published AMI estimates because of revised estimation procedures. For details on the methodology, see the NSDUH short report titled *Revised Estimates of Mental Illness from the National Survey on Drug Use and Health* at <http://samhsa.gov/data/default.aspx>.

^a Difference between estimate and 2011 estimate is statistically significant at the 0.05 level.

^b Difference between estimate and 2011 estimate is statistically significant at the 0.01 level.

¹ Estimates in the Total column are for all persons aged 18 or older, including those with unknown parole/supervised release status.

² Respondents were asked if they were on parole, supervised release, or other conditional release from prison during the past year.
