# LIST OF TABLES

## **Trends in Substance Abuse Treatment Admissions Aged 12 and Older: 2003-2013**

### *All Admissions*

1.1	Admissions aged 12 and older, by Census division and state or jurisdiction: Number, 2003-2013 .....	50
1.2	Admissions aged 12 and older, by Census division and state or jurisdiction: Admissions per 100,000 population, 2003-2013 .....	52
1.3	Admissions aged 12 and older, adjusted for age, gender, and race/ethnicity, by Census division and state or jurisdiction: Admissions per 100,000 population, 2003-2013 .....	54

### *Selected Primary Substance*

1.4a	Primary alcohol admissions aged 12 and older, by Census division and state or jurisdiction: Number, 2003-2013 .....	56
1.4b	Primary alcohol admissions aged 12 and older, by Census division and state or jurisdiction: Admissions per 100,000 population, 2003-2013 .....	58
1.5a	Primary marijuana admissions aged 12 and older, by Census division and state or jurisdiction: Number, 2003-2013 .....	60
1.5b	Primary marijuana admissions aged 12 and older, by Census division and state or jurisdiction: Admissions per 100,000 population, 2003-2013 .....	62
1.6a	Primary heroin admissions aged 12 and older, by Census division and state or jurisdiction: Number, 2003-2013 .....	64
1.6b	Primary heroin admissions aged 12 and older, by Census division and state or jurisdiction: Admissions per 100,000 population, 2003-2013 .....	66
1.7a	Primary cocaine admissions aged 12 and older, by Census division and state or jurisdiction: Number, 2003-2013 .....	68
1.7b	Primary cocaine admissions aged 12 and older, by Census division and state or jurisdiction: Admissions per 100,000 population, 2003-2013 .....	70
1.8a	Primary methamphetamine/amphetamine admissions aged 12 and older, by Census division and state or jurisdiction: Number, 2003-2013 .....	72
1.8b	Primary methamphetamine/amphetamine admissions aged 12 and older, by Census division and state or jurisdiction: Admissions per 100,000 population, 2003-2013 .....	74
1.9a	Primary non-heroin opiates/synthetics admissions aged 12 and older, by Census division and state or jurisdiction: Number, 2003-2013 .....	76
1.9b	Primary non-heroin opiates/synthetics admissions aged 12 and older, by Census division and state or jurisdiction: Admissions per 100,000 population, 2003-2013 .....	78

## LIST OF TABLES (CONTINUED)

### **Substance Abuse Treatment Admissions Aged 12 and Older, by Primary Substance of Abuse: 2013**

2.1	Admissions aged 12 and older, by type of service at admission and Census division and state or jurisdiction: Percent distribution, 2013 .....	80
2.2	Admissions aged 12 and older, by primary substance of abuse and Census division and state or jurisdiction: Number, 2013 .....	83
2.3	Admissions aged 12 and older, by primary substance of abuse and Census division and state or jurisdiction: Admissions per 100,000 population, 2013 .....	85
2.4	Admissions aged 12 and older, adjusted for, age, gender, and race/ethnicity, by primary substance of abuse and Census division and state or jurisdiction: Admissions per 100,00 population, 2013 .....	88

### **Characteristics of Substance Abuse Treatment Admissions Aged 12 and Older, by State or Jurisdiction and Primary Substance of Abuse: 2013**

3.1	Alabama admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	91
3.2	Alaska admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	92
3.3	Arizona admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	93
3.4	Arkansas admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	94
3.5	California admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	95
3.6	Colorado admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	96
3.7	Connecticut admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	97
3.8	Delaware admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	98
3.9	District of Columbia admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	99
3.10	Florida admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	100
3.11	Georgia admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	101

## LIST OF TABLES (CONTINUED)

3.12	Hawaii admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	102
3.13	Idaho admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	103
3.14	Illinois admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	104
3.15	Indiana admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	105
3.16	Iowa admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	106
3.17	Kansas admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	107
3.18	Kentucky admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	108
3.19	Louisiana admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	109
3.20	Maine admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	110
3.21	Maryland admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	111
3.22	Massachusetts admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	112
3.23	Michigan admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	113
3.24	Minnesota admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	114
3.25	Mississippi admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	115
3.26	Missouri admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	116
3.27	Montana admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	117
3.28	Nebraska admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	118

## LIST OF TABLES (CONTINUED)

3.29	Nevada admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	119
3.30	New Hampshire admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	120
3.31	New Jersey admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	121
3.32	New Mexico admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	122
3.33	New York admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	123
3.34	North Carolina admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	124
3.35	North Dakota admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	125
3.36	Ohio admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	126
3.37	Oklahoma admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	127
3.38	Oregon admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	128
3.39	Puerto Rico admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	129
3.40	Rhode Island admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	130
3.41	South Carolina admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	131
3.42	South Dakota admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	132
3.43	Tennessee admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	133
3.44	Texas admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	134
3.45	Utah admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	135

## LIST OF TABLES (CONTINUED)

3.46	Vermont admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	136
3.47	Virginia admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	137
3.48	Washington admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	138
3.49	West Virginia admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	139
3.50	Wisconsin admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	140
3.51	Wyoming admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2013 .....	141

59	Wyoming admissions aged 12 and older, by primary substance of abuse: 2003-2013 .....	47

## HIGHLIGHTS

This report uses data from the Treatment Episode Data Set (TEDS) to examine treatment admission data in 2013, and trend data from 2003 to 2013, nationally, regionally (by the nine Census divisions), and by state or jurisdiction. The report provides information on the demographic and substance abuse characteristics of admissions to treatment aged 12 and older for abuse of alcohol and/or drugs in facilities that report to individual state administrative data systems. It is important to note that values in charts, narrative lists, and percentage distributions are calculated using actual raw numbers and rounded for presentation in this report; calculations using rounded values may produce different results.

---

For 2013, a total of 1,683,451 substance abuse treatment admissions aged 12 and older were reported to TEDS by 49 states, the District of Columbia, and Puerto Rico (Pennsylvania, which is in the Middle Atlantic Census division, did not report admissions for 2013) [Table 1.1].

### **Trends in Substance Abuse Treatment Admissions Aged 12 and Older: 2003-2013**

#### *All Admissions*

- Between 2003 and 2013, across the nine Census divisions, about 22 percent of all admissions reported were in the Middle Atlantic division, and the average rate of admissions was highest in the New England and Middle Atlantic divisions—1,518 and 1,011 per 100,000 population aged 12 and older, respectively, in 2013 [Tables 1.1 and 1.2 and Figure 1].
- The U.S. population aged 12 and older grew about 9 percent between 2003 and 2013,\* but the number of annual treatment admissions was 10 percent lower in 2013 than in 2003 [Table 1.1]. The treatment admission rate in 2013 (625 per 100,000 population aged 12 and older) was about 18 percent lower than the rate in 2003 (760 per 100,000 population) [Table 1.2].

#### *Alcohol*

- The treatment admission rate for primary alcohol was 26 percent lower in 2013, at 234 per 100,000 population aged 12 and older, than in 2003 (316 per 100,000). The rate fluctuated between 2003 and 2013, but 2008 had the highest rate and 2013 had the lowest rate in this time period [Table 1.4b and Figure 2].
- Alcohol treatment admission rates were lower in 2013 than in 2003 in seven of the nine Census divisions; except in the New England and West North Central divisions.

---

\* See the source on page 53.

- From 2003 to 2013, alcohol treatment admission rates were highest in the New England, Middle Atlantic, Mountain, and West North Central divisions.

### *Marijuana*

- The treatment admission rate for primary marijuana was 12 percent lower in 2013, at 105 per 100,000 population aged 12 and older, than in 2003 (119 per 100,000) [Table 1.5b and Figure 3].
- Marijuana treatment admission rates were lower in 2013 than in 2003 in six of the nine divisions; they were higher in the Middle Atlantic, New England, and Mountain divisions.
- From 2003 to 2013, marijuana treatment admission rates were consistently highest in the West North Central and Middle Atlantic divisions.

### *Heroin*

- The treatment admission rate for primary heroin was 5 percent higher in 2013, at 118 per 100,000 population aged 12 and older, than in 2003 (112 per 100,000) [Table 1.6b and Figure 4].
- Heroin treatment admission rates were higher in 2013 than in 2003 in six of the nine Census divisions; they were lower in the Pacific, South Atlantic, and Middle Atlantic divisions.
- From 2003 to 2013, heroin treatment admission rates were consistently highest in the New England and Middle Atlantic divisions.

### *Cocaine*

- The treatment admission rate for primary cocaine was 63 percent lower in 2013, at 38 per 100,000 population aged 12 and older, than in 2003 (104 per 100,000) [Table 1.7b and Figure 5].
- Cocaine treatment admission rates were lower in 2013 than in 2003 in all nine Census divisions.
- From 2003 through 2013, cocaine treatment admission rates were consistently highest in the Middle Atlantic division.

### *Methamphetamine/amphetamines*

- The treatment admission rate for methamphetamine/amphetamines was 6 percent lower in 2013, at 51 per 100,000 population aged 12 and older, than in 2003 (54 per 100,000). Methamphetamine/amphetamine treatment admission rates peaked in 2005 at 69 per 100,000, then declined every year through 2011 and increased in 2012 and 2013 [Table 1.8b and Figure 6].
- Methamphetamine/amphetamine treatment admission rates were higher in 2013 than in 2003 in six of the nine Census divisions, the same in two divisions, and lower in one division (the Pacific division).
- From 2003 to 2013, methamphetamine/amphetamine treatment admission rates were highest in the Pacific division, followed by the West North Central and Mountain divisions.

### *Opiates other than heroin*

- The treatment admission rate for opiates other than heroin was 167 percent higher in 2013, at 57 per 100,000 population aged 12 and older, than in 2003 (21 per 100,000). Rates increased every year from 2003 through 2011 and decreased in 2012 and 2013 [Table 1.9b and Figure 7].
- The treatment admission rates for opiates other than heroin were higher in 2013 than in 2003 for all nine Census divisions.
- From 2003 to 2013, treatment admission rates for opiates other than heroin were highest in the New England division.

### **Substance Abuse Treatment Admissions Aged 12 and Older: 2013**

- In 2013, the treatment admission rate was higher for primary alcohol abuse than for any primary illicit drug. The primary alcohol admission rate was 234 per 100,000 population (the rate for alcohol alone was 132 per 100,000 and the rate for alcohol with secondary drug abuse was 103 per 100,000). The highest rates of treatment admissions for illicit drugs in 2013 were for heroin (118 per 100,000) and marijuana (105 per 100,000) [Table 2.3].
- Treatment admission rates for 2013 were higher for primary alcohol abuse than for an illicit drug in eight Census divisions, and in 43 of the 51 reporting states and jurisdictions. The primary illicit drug with the highest treatment admission rate varied by division: heroin in the New England and Middle Atlantic divisions, methamphetamine/amphetamines in the Pacific and Mountain divisions, non-heroin opiates in the East South Central division, and marijuana in the other four divisions [Table 2.3].

# CHAPTER 1

## TRENDS IN SUBSTANCE ABUSE TREATMENT ADMISSIONS AGED 12 AND OLDER: 2003-2013

This report uses data from the Treatment Episode Data Set (TEDS) to examine treatment admission data in 2013, and trend data from 2003 to 2013, nationally, regionally (by the nine Census divisions), and by state or jurisdiction. It is a companion to the report, *Treatment Episode Data Set (TEDS): 2003-2013 National Admissions to Substance Abuse Treatment*. These reports provide information on the demographic and substance abuse characteristics of admissions to treatment aged 12 and older for abuse of alcohol and/or drugs in facilities that report to individual state administrative data systems. Data include records for admissions during calendar years 2003 through 2013 that were received and processed through January 23, 2015.<sup>1</sup>

TEDS is an admission-based system, and TEDS admissions do not represent individuals. Thus, an individual admitted to treatment twice within a calendar year would be counted as two admissions.

TEDS does not include all admissions to substance abuse treatment. It includes admissions to facilities that are licensed or certified by the state substance abuse agency to provide substance abuse treatment (or are administratively tracked for other reasons). In general, facilities reporting TEDS data are those that receive state alcohol and/or drug agency funds (including Federal Block Grant funds) for the provision of alcohol and/or drug treatment services. Additional information on the history and methodology of TEDS and this report as well as important issues related to state data collection systems are detailed in Appendix A.

This chapter details trends in the annual numbers and rates of admissions aged 12 and older for 2003 to 2013. Trend data are used to monitor changing patterns in substance abuse treatment admissions. These patterns reflect underlying changes in substance abuse in the population as well as changing priorities in the treatment/reporting system. TEDS data thus have important implications for resource allocation and program planning.

While the tables in this report present data by Census division (Figure 1) and by state or jurisdiction, it is important to note that comparisons between and across divisions and states should be made with caution. There are many factors (e.g., facilities included, clients included, ability to track multi-service episodes, services offered, and completeness and timeliness of reporting) that can affect comparability. See Appendix A for a full discussion.

---

<sup>1</sup> For researchers interested in more detailed analysis, TEDS public use files are available for online data analysis or download at the Substance Abuse and Mental Health Data Archive, which can be accessed at <http://www.datafiles.samhsa.gov>.

Summary data for individual states that have submitted the full year of data are available online through the TEDS Quick Statistics website at <http://www.dasis.samhsa.gov/webt/NewMapv1.htm>.

## All Admissions

Table 1.1 presents the total number of treatment admissions aged 12 and older by Census division and state or jurisdiction for 2003 through 2013.<sup>2</sup>

- For 2013, a total of 1,683,451 admissions aged 12 and older were reported to TEDS by 49 states, the District of Columbia, and Puerto Rico (Pennsylvania, which is in the Middle Atlantic Census division, did not report admissions for 2013).
- The number of treatment admissions aged 12 and older was 10 percent lower in 2013 than in 2003.
- From 2003 to 2013, about 22 percent of all admissions reported were in the Middle Atlantic division. The East North Central, South Atlantic, and Pacific divisions each reported roughly 14 to 15 percent of all admissions; the Mountain, New England, and West North Central divisions each reported about 8 to 9 percent of all admissions; and the East South Central and West South Central divisions each reported about 3 to 5 percent of all admissions.

**Figure 1. Census regions and divisions of the United States**

<sup>2</sup> Data were not submitted or were incomplete for one or more years in some states or jurisdictions because of changes to their data collection systems: Alabama (2007), Alaska (2004-2006), Arkansas (2004), the District of Columbia (2004-2006 and 2009), Mississippi (2009), and Pennsylvania (2013).

Table 1.2 presents the treatment admission rates per 100,000 population aged 12 and older by Census division and state or jurisdiction for 2003 through 2013.

- Between 2003 and 2013, the U.S. population aged 12 and older grew by about 9 percent,\* but the number of annual treatment admissions was 10 percent lower in 2013 than in 2003 [Table 1.1]. The treatment admission rate in 2013 (625 per 100,000 population aged 12 and older) was about 18 percent lower than the rate in 2003 (760 per 100,000 population).
- Admission rates were highest in the New England and Middle Atlantic divisions. In New England, the rate was lowest in 2003, at 1,132 per 100,000 population aged 12 and older, and highest in 2013, at 1,518 per 100,000 population aged 12 and older. The rates in the Middle Atlantic division were at 1,274 in 2003 and 1,011 per 100,000 population aged 12 and older in 2013.
- In 2013, individual state admission rates (excluding Puerto Rico) varied from approximately 134 per 100,000 population to about 2,072 per 100,000. As noted above, there are many possible explanations for this variation (see Appendix A), and comparisons among states should be made with caution.

Table 1.3 presents the treatment admission rate adjusted for age, gender, and race/ethnicity to the U.S. population in 2000 by Census division and state or jurisdiction for 2003 to 2013. Adjusted rates take into account the different admission rates among population subgroups and the different proportions of the subgroups in each division, state, or jurisdiction. The adjusted rates are the rates that would be observed if each division, state, or jurisdiction had the same distribution of subgroups as the standardized U.S. population in 2000.

For example, the 2013 unadjusted rates for Alaska and Maryland were similar (1,090 and 1,024 per 100,000 population aged 12 and older, respectively; Table 1.2), but the adjusted rates were not (622 per 100,000 for Alaska and 1,025 per 100,000 for Maryland; Table 1.3). Alaska's adjusted rate was much lower than its unadjusted rate because Alaska had high admission rates in subgroups that were a large proportion of the state's population but represented relatively small proportions of the U.S. population in 2000. In contrast, the population distribution in Maryland closely resembled the population distribution in the U.S.; therefore, Maryland's adjusted and unadjusted rates were similar. This example demonstrates that the difference between adjusted rates and unadjusted rates can vary depending on the state's population distribution.

### **Selected Primary Substance**

Six substance groups (alcohol, marijuana, heroin, cocaine, methamphetamine/amphetamines, and opiates other than heroin<sup>3</sup>) accounted for 97 percent of all TEDS admissions aged 12 and older in 2013.<sup>4</sup>

Tables 1.4a–1.9a present the numbers of admissions aged 12 and older by Census division and by state and jurisdiction from 2003 to 2013 for each of the selected primary substances.

---

\* See the source on page 53.

<sup>3</sup> Opiates other than heroin include methadone, codeine, hydrocodone, hydromorphone, meperidine, morphine, opium, oxycodone, pentazocine, propoxyphene, tramadol, and any other drug with morphine-like effects.

<sup>4</sup> See: Substance Abuse and Mental Health Services Administration, Center for Behavioral Health Statistics and Quality. *Treatment Episode Data Set (TEDS): 2003–2013. National Admissions to Substance Abuse Treatment Services*. BHSIS Series S-75, HHS Publication No. (SMA) 15-4934. Rockville, MD: Substance Abuse and Mental Health Services Administration, 2015, Table 1.1b.

Tables 1.4b–1.9b present the admission rates per 100,000 aged 12 and older by Census division and by state and jurisdiction from 2003 to 2013 for each of the selected primary substances.

The admission rates are mapped in Figures 2–7. The map categories are based on the median, 75th, 90th, and 99th percentiles of the range of 2003 admission rates for each substance. Each map shows 1 in dark red (the 99th percentile and above), about 5 in light red (the 90th to 98th percentiles), about 8 states in orange (the 75th to 89th percentiles), about 12 in yellow (the 50th to 74th percentiles), and about 24 in tan (below the median 2003 U.S. rate). Cross-hatching indicate states or jurisdictions where no data or less than a full calendar year of data were submitted.

### *Alcohol*

- The treatment admission rate for primary alcohol was 26 percent lower in 2013, at 234 per 100,000 population aged 12 and older, than in 2003 (316 per 100,000). The rate fluctuated between 2003 and 2013, but 2008 had the highest rate and 2013 had the lowest rate in this time period [Table 1.4b and Figure 2].
- Alcohol treatment admission rates were between 3 and 54 percent lower in 2013 than in 2003 in seven of the Census divisions. The rate was 8 and 16 percent higher in the West North Central and New England divisions, respectively.
- Alcohol treatment admission rates were lower in 2013 than in 2003 in 36 of the 51 states and jurisdictions reporting in both years and higher in 15 states and jurisdictions. Nebraska experienced a 90 percent increase from 412 per 100,000 in 2003 to 780 per 100,000 in 2013.
- From 2003 to 2013, alcohol treatment admission rates were generally highest in the New England, Middle Atlantic, Mountain, and West North Central divisions.

### *Marijuana*

- The treatment admission rate for primary marijuana was 12 percent lower in 2013, at 105 per 100,000 population aged 12 and older, than in 2003 (119 per 100,000) [Table 1.5b and Figure 3].
- Marijuana admission rates were between 1 and 47 percent lower in 2013 than in 2003 in six of the nine Census divisions. The Mountain, New England, and Middle Atlantic divisions had 18, 17, and 2 percent increases, respectively, from 2003 to 2013.
- Marijuana admission rates were lower in 2013 than in 2003 in 32 of the 51 states and jurisdictions reporting in both years and higher in 19 states and jurisdictions. The admission rates of Arizona, North Carolina, and Puerto Rico were more than double from 2003 to 2013.
- From 2003 to 2013, marijuana treatment admission rates were consistently highest in the West North Central and Middle Atlantic divisions.

### *Heroin*

- The treatment admission rate for primary heroin was 5 percent higher in 2013, at 118 per 100,000 population aged 12 and older, than in 2003 (112 per 100,000) [Table 1.6b and Figure 4].
- Heroin treatment admission rates were between 22 and 634 percent higher in 2013 than in 2003 in six Census divisions (East South Central, West North Central, Mountain, West South Central,

New England, and East North Central). Rates were between 8 and 28 percent lower in 2013 than in 2003 in the other three divisions.

- Heroin treatment admission rates were higher in 2013 than in 2003 in 37 of the 50 states and jurisdictions reporting in both years,<sup>5</sup> lower in 11 states and jurisdictions, and the same in 2 states. Alaska, Nebraska, Kentucky, Wyoming, Arizona, Idaho, and Minnesota experienced the largest growth of heroin admissions from 2003 to 2013.
- From 2003 to 2013, heroin treatment admission rates were consistently highest in the New England and Middle Atlantic divisions.

### *Cocaine*

- The treatment admission rate for primary cocaine was 63 percent lower in 2013, at 38 per 100,000 population aged 12 and older, than in 2003 (104 per 100,000) [Table 1.7b and Figure 5].
- Cocaine treatment admission rates were between 24 and 73 percent lower in 2013 than in 2003 in the nine Census divisions.
- Cocaine admission rates were lower in 2013 than in 2003 in 49 of the 51 states and jurisdictions reporting in both years, the same in Arizona, and higher in Puerto Rico.
- From 2003 to 2013, cocaine treatment admission rates were consistently highest in the Middle Atlantic division.

### *Methamphetamine/amphetamines*

- The treatment admission rate for methamphetamine/amphetamines was 6 percent lower in 2013, at 51 per 100,000 population aged 12 and older, than in 2003 (54 per 100,000). Methamphetamine/amphetamine treatment admission rates peaked in 2005 at 69 per 100,000, then declined in every year through 2011 and increased in 2012 and 2013 [Table 1.8b and Figure 6].
- Methamphetamine/amphetamine treatment rates were between 5 and 60 percent higher in 2013 than in 2003 in six of the nine Census divisions. The rate was same for the East North Central and East South Central divisions. In the Pacific division, the treatment admission rate was 28 percent lower in 2013 than in 2003.
- Methamphetamine/amphetamine treatment admission rates were higher in 2013 than in 2003 in 32 of the 50 states and jurisdictions reporting in both years, lower in 16 states, and the same in 2 states. The increase in admission rates between 2003 and 2013 was more than 200 percent for Alaska, Rhode Island, and North Carolina, and more than 100 percent for New Hampshire, Tennessee, South Carolina, New Jersey, Arizona, Colorado, and Vermont.
- The Pacific division had the highest methamphetamine/amphetamine treatment admission rate from 2003 through 2012 (ranging from 132 to 223 per 100,000 population aged 12 and older), but the West North Central division had a higher rate in 2013 (145 per 100,000).

---

<sup>5</sup> Tennessee reported all heroin admissions as *Opiates other than heroin* through June 2009. Tennessee began disaggregating heroin admissions from other opiates in July 2009 (Figures 4 and 7).

### *Opiates other than heroin*

- The treatment admission rate for opiates other than heroin was 167 percent higher in 2013, at 57 per 100,000 population aged 12 and older, than in 2003 (21 per 100,000). Rates increased in every year from 2003 through 2011 and decreased in 2012 and 2013 [Table 1.9b and Figure 7].
- The treatment admission rates for opiates other than heroin were between 62 and 335 percent higher in 2013 than in 2003 in all nine Census divisions.
- Treatment admission rates for opiates other than heroin were higher in 2013 than in 2003 in the 50 states reporting in both years.
- From 2003 to 2013, treatment admission rates for opiates other than heroin were highest in the New England division. For each of those years, the New England rate was more than twice as high as the rates for most of the other divisions. In 2003, the New England rate was 59 per 100,000 population aged 12 and older while the rates for the other divisions ranged from 12 per 100,000 (Mountain) to 33 per 100,000 (East South Central). In 2013, the New England rate was 148 per 100,000 population aged 12 and older while the rates for the other divisions ranged from 27 per 100,000 (West South Central) to 80 per 100,000 (Middle Atlantic).

## CHAPTER 2

### SUBSTANCE ABUSE TREATMENT ADMISSIONS AGED 12 AND OLDER, BY PRIMARY SUBSTANCE OF ABUSE: 2013

This chapter presents numbers of substance abuse treatment admissions aged 12 and older and admission rates from the Treatment Episode Data Set (TEDS) by Census division and state or jurisdiction for admissions in 2013, according to primary substance of abuse.

As noted previously, comparisons between and across divisions and states should be made with caution. There are many factors (e.g., facilities included, clients included, ability to track multi-service episodes, service type, and completeness and timeliness of reporting) that can affect comparability. See Appendix A for a full discussion.

*Table 2.1* indicates the proportions of admissions in 2013 by service type according to Census division and state or jurisdiction. A state's mix of service types (e.g., outpatient, detoxification, rehabilitation/residential, opioid therapy) can have a significant effect on its admission rates. There is higher client turnover and therefore more admissions in short-stay services such as detoxification than in long-stay services such as outpatient or long-term rehabilitation/residential treatment. Admission rates for individual substances of abuse may be affected as well (e.g., detoxification is more closely associated with alcohol, heroin, or tranquilizer use than with use of other substances).<sup>1</sup>

*Table 2.2* presents the total number of treatment admissions aged 12 and older by primary substance of abuse, according to Census division and state or jurisdiction for 2013.

*Table 2.3* presents the treatment admission rates per 100,000 population aged 12 and older by primary substance of abuse, according to Census division and state or jurisdiction for 2013.

- In 2013, the treatment admission rate was higher for primary alcohol abuse than for illicit drugs. The primary alcohol admission rate was 234 per 100,000 population (the rate for alcohol alone was 132 per 100,000 and the rate for alcohol with secondary drug abuse was 103 per 100,000). The highest rates for illicit drugs were for heroin (118 per 100,000) and marijuana (105 per 100,000).
- Treatment admission rates for 2013 were higher for primary alcohol abuse than for illicit drugs in eight of the nine Census divisions. The most common primary illicit drugs in each Census division were:
  - New England—heroin, opiates other than heroin, and marijuana

---

<sup>1</sup> See: Substance Abuse and Mental Health Services Administration, Center for Behavioral Health Statistics and Quality. *Treatment Episode Data Set (TEDS): 2003-2013. National Admissions to Substance Abuse Treatment Services*. BHSIS Series S-75, HHS Publication No. (SMA) 15-4934. Rockville, MD: Substance Abuse and Mental Health Services Administration, 2015, Table 2.7.

- Middle Atlantic—heroin, marijuana, and cocaine
- East North Central—marijuana, heroin, and opiates other than heroin
- West North Central—marijuana, methamphetamine/amphetamines, and opiates other than heroin
- South Atlantic—marijuana, opiates other than heroin, and heroin
- East South Central—opiates other than heroin, marijuana, and heroin
- West South Central—marijuana, methamphetamine/amphetamines, and opiates other than heroin
- Mountain—methamphetamine/amphetamines, marijuana, and heroin
- Pacific—methamphetamine/amphetamines, marijuana, and heroin
- Treatment admission rates for 2013 were higher for primary alcohol abuse than for any of the major illicit drugs in 43 of the 51 reporting states and jurisdictions. The exceptions where an illicit drug admission rate was higher than the alcohol admission rate were California (methamphetamine/amphetamines), Delaware (heroin), Hawaii (methamphetamine/amphetamines), Maryland, Massachusetts, and New Jersey (heroin), Tennessee, and West Virginia (opiates other than heroin).
- In the 43 states and jurisdictions where admission rates for primary alcohol were higher than the rate for any illicit drug, the primary illicit drugs with the highest treatment admission rates were:
  - Marijuana—Alabama, Alaska, Georgia, Illinois, Indiana, Iowa, Kansas, Minnesota, Mississippi, Missouri, Montana, North Carolina, North Dakota, Ohio, Puerto Rico, South Carolina, South Dakota, Texas, Virginia, Washington, Wisconsin, and Wyoming
  - Heroin—Connecticut, District of Columbia, Michigan, New Hampshire, New York, and Rhode Island
  - Opiates other than heroin—Florida, Kentucky, Louisiana, Maine, and Vermont
  - Methamphetamine/amphetamines—Arizona, Arkansas, Colorado, Idaho, Nebraska, Nevada, Oklahoma, Oregon, and Utah
  - Other/none specified—New Mexico

*Table 2.4* presents the 2013 treatment admission rates by primary substance, adjusted for age, gender, and race/ethnicity to the U.S. population in 2000 by Census division and state or jurisdiction. Adjusted rates take into account the different admission rates among population subgroups and the different proportions of the subgroups in each division, state, or jurisdiction. The adjusted rates are the rates that would be observed if each division, state, or jurisdiction had the same distribution of subgroups as the standardized U.S. population in 2000.

- Adjustment of the 2013 treatment admission rates for age, gender, and race/ethnicity did not change the relative ranking of alcohol and illicit drugs for the United States as a whole or for most of the Census divisions.

- Adjustment of the 2013 treatment admission rates for age, gender, and race/ethnicity did not change the relative ranking of alcohol and illicit drugs for most states.

## CHAPTER 3

### CHARACTERISTICS OF SUBSTANCE ABUSE TREATMENT ADMISSIONS AGED 12 AND OLDER, BY STATE OR JURISDICTION AND PRIMARY SUBSTANCE OF ABUSE: 2013

This chapter presents data on the demographic characteristics of substance abuse treatment admissions aged 12 and older from the Treatment Episode Data Set (TEDS) by primary substance of abuse for individual states and jurisdictions.

As noted previously, comparisons between and across states and jurisdictions should be made with caution. There are many factors (e.g., facilities included, clients included, ability to track multi-service episodes, services offered, and completeness and timeliness of reporting) that can affect comparability. See Appendix A for a full discussion.

*Tables 3.1-3.51* present, for each state or jurisdiction reporting admissions to TEDS for 2013, the percentage distribution of demographic characteristics (gender, age group, and race/ethnicity) by primary substance of abuse for admissions aged 12 and older.

*Figures 8-59* depict, for each individual state or jurisdiction, the percentage distribution of admissions aged 12 and older for selected primary substances for 2003 through 2013.

-- Quantity is zero; ‡ No data, or less than a full calendar year of data, submitted.

<sup>1</sup> Tennessee included heroin admissions in other opiates through June 2009. In this report, Tennessee's 2009 heroin admissions are still included in the other opiates category since there is less than a full year of disaggregated heroin data.

NOTES: Based on administrative data reported to TEDS by all reporting states and jurisdictions. Comparisons among states should be made with caution. Non-heroin opiates/synthetics include codeine, hydrocodone, hydromorphone, meperidine, morphine, opium, oxycodone, pentazocine, propoxyphene, tramadol, and any other drug with morphine-like effects. Non-prescription use of methadone is not included.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 1.23.15.

## APPENDIX A

### ABOUT THE TREATMENT EPISODE DATA SET (TEDS)

#### Introduction

This report presents data from the Treatment Episode Data Set (TEDS) on the demographic and substance abuse characteristics of admissions to substance abuse treatment. The Center for Behavioral Health Statistics and Quality (CBHSQ), Substance Abuse and Mental Health Services Administration (SAMHSA), coordinates and manages collection of TEDS data from the states.

The TEDS is a compilation of client-level data routinely collected by the individual state administrative data systems to monitor their substance abuse treatment systems. Generally, facilities that are required to report to the state substance abuse agency (SSA) are those that receive public funds and/or are licensed or certified by the SSA to provide substance abuse treatment (or are administratively tracked for other reasons).

The TEDS system comprises two major components, the Admissions Data Set and the Discharge Data Set. The TEDS Admissions Data Set includes client-level data on substance abuse treatment admissions from 1992 through the present. The TEDS Discharge Data Set can be linked at record level to admissions, and includes information from clients discharged in 2000 and later. For both data sets, selected data items from the individual state data files are converted to a standardized format consistent across states. These standardized data constitute TEDS.

The TEDS Admissions Data System consists of a Minimum Data Set of items collected by all states and a Supplemental Data Set where individual data items are reported at the states' option.

The Minimum Data Set consists of 19 items that include:

- Demographic information
- Primary, secondary, and tertiary substances and the usual route of administration, frequency of use, and age at first use
- Source of referral to treatment
- Number of prior treatment episodes
- Service type, including planned use of medication-assisted opioid therapy

The Supplemental Data Set consists of 17 items that include psychiatric, social, and economic measures.

#### History

National-level data collection on admissions to substance abuse treatment was first mandated in 1972 under the Drug Abuse Office and Treatment Act, P.L. 92-255. This act initiated federal funding for drug treatment and rehabilitation, and required reporting on clients entering drug

(but not alcohol) abuse treatment. The Client-Oriented Data Acquisition Process (CODAP) was developed to collect admission and discharge data directly from federally-funded drug treatment programs. (Programs for treatment of alcohol abuse were not included.) Reporting was mandatory for all such programs, and data were collected using a standard form. CODAP included all clients in federally-funded programs regardless of individual funding source. Reports were issued from 1973 to 1981 based on data from 1,800 to 2,000 programs, including some 200,000 annual admissions.

In 1981, collection of national-level data on admissions to substance abuse treatment was discontinued because of the introduction of the Alcohol, Drug Abuse, and Mental Health Services (ADMS) Block Grant. The Block Grant transferred federal funding from individual programs to the states for distribution, and it included no data reporting requirement. Participation in CODAP became voluntary; although several states submitted data through 1984, the data were in no way nationally representative.

In 1988, the Comprehensive Alcohol Abuse, Drug Abuse, and Mental Health Amendments (P.L. 100-690) established a revised Substance Abuse Prevention and Treatment (SAPT) Block Grant and mandated federal data collection on clients receiving treatment for either alcohol or drug abuse. The TEDS data collection effort represents the federal response to this mandate. TEDS began in 1989 with the issue of 3-year development grants to states.

### **State Data Collection Systems**

TEDS is an exceptionally large and powerful data set that covers a significant proportion of all admissions to substance abuse treatment. TEDS is a compilation of data collected through the individual data collection systems of the state (SSA) for substance abuse treatment. States have cooperated with the federal government in the data collection process, and substantial progress has been made toward developing a standardized data set. However, because each state system is unique and each state has unique powers and mandates, significant differences exist among state data collection systems. These differences are compounded by evolving health care payment systems, so state-to-state comparisons must be made with extreme caution.

The number and client mix of TEDS admissions do not represent the total national demand for substance abuse treatment or the prevalence of substance abuse in the general population.

States differ widely in the amount of public funding available for substance abuse treatment and in the constraints placed on the use of funds. States may be directed to target special populations such as pregnant women or adolescents. Where funds are limited, states may be compelled to exercise triage in admitting persons to treatment, admitting only those with the most “severe” problems. In states with higher funding levels, a larger proportion of the population in need of treatment may be admitted, including the less severely impaired.

States may include or exclude reporting by certain sectors of the treatment population, and these sectors may change over time. For example, treatment programs based in the criminal justice system may or may not be administered through the state SSA. Detoxification facilities, which can generate large numbers of admissions, are not uniformly considered treatment facilities and are not uniformly reported by all states.

*Appendix Table 1* presents key characteristics of state data collection systems for 2013. However, these characteristics can change as state substance abuse treatment systems change, and thus may be responsible for some year-to-year variation within states.

- *Facilities included.* The scope of facilities included in TEDS is affected by differences in state licensure, certification, and accreditation practices, and disbursement of public funds. Most SSAs require facilities that receive state/public funding (including Federal Block Grant funds) for the provision of alcohol and/or drug treatment services to report data to the SSA. Generally this funding is distributed by the SSA but may be distributed by another public agency.
  - Some SSAs regulate private facilities, methadone clinics, and/or individual practitioners and require them to report TEDS data. Others do not because of the difficulty in obtaining data from these facilities, although these facilities may report voluntarily.
  - Facilities operated by federal agencies (e.g., the Bureau of Prisons, the Department of Defense, and the Department of Veterans Affairs) generally do not report TEDS data to the SSA, although some facilities operated by the Indian Health Service are included.
  - Hospital-based substance abuse treatment facilities are frequently not licensed through the SSA and do not report TEDS data.
  - Correctional facilities (state prisons and local jails) are monitored by the SSA and report TEDS data in some states but not in others.
- The primary goal of TEDS is to monitor the characteristics of clients admitted to planned, continuing treatment regimens. Thus early intervention and crisis intervention programs that do not lead to enrollment in continued treatment are excluded from TEDS.
- *Clients included.* About 60 percent of states reported data on all admissions to all eligible facilities, although some reported only, or largely, admissions financed by public funds. TEDS is an admission-based system; therefore, TEDS admissions do not represent individuals. For example, an individual admitted to treatment twice within a calendar year would be counted as two admissions.
- *Ability to track multi-service episodes.* The goal for the TEDS system is to enumerate treatment episodes by distinguishing the initial admission of a client from his/her subsequent transfer to a different service type (e.g., from rehabilitation/residential treatment to outpatient) within a single continuous treatment episode. Thus TEDS records are ideally coded as admissions if they represent the initial treatment service in a treatment episode and as transfers if they represent a change in service type or a change in provider without an interruption in treatment.

This requires, however, that clients be assigned unique IDs that can be linked across providers; not all states are legally and/or technologically able to do this. Most states can identify transfers when there is a change in service type within the structure of a given provider. However, fewer can also identify a transfer involving a change of provider. Several states do not track transfers, but instead report as transfers those clients who are discharged and readmitted within a specified (state-specific) time period.

Because some admission records in fact may represent transfers, the number of admissions reported probably overestimates the number of treatment episodes. Some states reported a

limited data set on codependents of substance abusers entering treatment. On average, from 2003 to 2013, 87 percent of all records submitted were client admissions, 12 percent were client transfers, and 1 percent were codependents of substance abusers.

- *Services offered.* A state's mix of service types (e.g., outpatient, detoxification, rehabilitation/residential, opioid therapy) can have a significant effect on its admission rate. There is higher client turnover and therefore more admissions in short-stay services such as detoxification than in long-stay services such as outpatient or long-term residential treatment. Admission rates for individual substances of abuse may be affected as well (e.g., detoxification is more closely associated with alcohol or heroin use than with use of other substances).
- *Completeness and timeliness of reporting.* SAMHSA, in reporting TEDS data, must balance timeliness of reporting and completeness of the data set. There may be a time lag in the publication of SAMHSA's annual reports because preparation cannot begin until states have completed their data submission for that year. States in turn rely on individual facilities to report in a timely manner so they can submit TEDS data to SAMHSA at regular intervals.

Admissions from facilities that report late to the states will appear in a later data submission to SAMHSA, so the number of annual admissions in a report may be higher in subsequent reports. The number of additional admissions is small because of the time lag in issuing the report. Thus the percentage distributions will change very little in subsequent reports, although Census division- and state-level data may change somewhat more for states with reporting delays (state report only).

States continually review and improve their data collection and processing. When systematic errors are identified, states may revise or replace historical TEDS data files. While this process represents an improvement in the data system, the historical statistics in this report will differ slightly from those in earlier reports.

*Appendix Tables 2 and 3* indicate the proportions of records by state or jurisdiction for which valid data were received for 2013. States are expected to report all variables in the Minimum Data Set (Appendix Table 2). Variables in the Supplemental Data Set are collected at the states' option (Appendix Table 3).

### **Report-Specific Considerations**

- The report focuses on treatment admissions for substance abusers, so admissions for treatment as a codependent of a substance abuser are excluded. Records for identifiable transfers within a single treatment episode are also excluded.
- Records with partially complete data have been retained. Where records include missing or invalid data for a specific variable other than primary, secondary, or tertiary substance, those records are excluded from tabulations of that variable. For substance variables, missing or unknown responses were included in the category "Other." The total number of admissions on which a percentage distribution is based is reported in each table.
- Records with partially complete data have been retained. If a variable is coded with a value indicating the data were missing or miscoded, the record is excluded from tabulations of that

variable. The total number of records on which a percentage distribution is based is reported in each table.

- Variables in the Supplemental Data Set are not collected by all states. States that did not collect a specific variable are excluded from tabulations of that variable. The total number of admissions on which a percentage distribution is based is reported in each table.
- The *primary, secondary, and tertiary substances of abuse* reported to TEDS are those substances that led to the treatment episode and not necessarily a complete enumeration of all substances used at the time of admission.
- Primary alcohol admissions are classified as “Alcohol only” or “Alcohol with secondary drug abuse.” The latter indicates a primary alcohol admission with a specified secondary and/or tertiary drug. All other primary alcohol substances admissions are classified as “Alcohol only.”
- Cocaine admissions are classified according to usual route of administration as smoked and other route. Smoked cocaine primarily represents crack or rock cocaine, but it can also include cocaine hydrochloride (powder cocaine) when it is free-based. Non-smoked cocaine includes all cocaine admissions where cocaine is injected, inhaled, or taken orally; it also includes admissions where the route of administration is unknown or not collected. Thus the TEDS estimate of admissions for smoked cocaine is conservative.
- Methamphetamine/amphetamine admissions include admissions for both substances, but are primarily for methamphetamine. In 2013, methamphetamine constituted about 94 percent of combined methamphetamine/amphetamine admissions. Oregon and Texas, states with large numbers of methamphetamine admissions, reported them as *Other amphetamines* until 2005 and 2006, respectively.
- For this report, secondary and tertiary substances (see Appendix B) are grouped and referred to as secondary substances.
- Significant changes in the clients or facilities reported to TEDS by some states and jurisdictions can result in changes in the number of admissions large enough to influence trends.

**Appendix Table 1. State data system reporting characteristics: 2013**

State or jurisdiction	Facilities reporting TEDS data to the state SSA		Eligible clients	Change of service within episode	Change of provider within episode
	Facilities required to report to the state SSA <sup>1</sup>	Facilities reporting voluntarily to the state SSA			
Alabama	Facilities that receive state/public funding	None	All clients in facility	Admission	Admission
Alaska	Facilities that receive state/public funding	None	All clients in facility who receive substance abuse treatment services	Admission(for most providers) Transfer(for some providers)	Admission
Arizona	Facilities that receive state/public funding	None	State/public-funded clients only	<i>n/a</i> <sup>2</sup>	<i>n/a</i> <sup>2</sup>
Arkansas	Facilities that are licensed by state SSA	State Community Correction facilities Some private facilities	All clients in a licensed facility	Transfer	Admission
California	Facilities that receive state funding All licensed narcotic treatment facilities	None	All clients in facility except DUI	Transfer	Transfer
Colorado	State-licensed facilities Methadone facilities Community-based juvenile and adult justice treatment programs, except institutionally-based	None	All clients receiving substance abuse treatment services in facility	Admission	Admission
Connecticut	Facilities that receive state/public funding (including corrections) Facilities serving adults that are licensed by state Dept of Public Health Some facilities treating youth < 18 General hospitals funded by SSA	None	All clients in facility	Admission	Admission
Delaware	Facilities that receive state/public funding, excluding: - Child/youth services - Most Medicaid-funded services - Most criminal justice system services	None	State/public-funded clients only	Admission	Admission
Dist. of Columbia	Facilities that receive state/public funding	None	State/public-funded clients only	Transfer	Admission
Florida	Facilities that receive state/public funding	None	All clients in facility	Transfer	Admission
Georgia	Facilities that receive SAPT/BG, state and Medicaid funding through the state SSA (This includes Medicaid eligible aged, blind, and disabled adults and youth. Medicaid individuals in Managed Care Plans are excluded.)	None	SSA funded clients with SA or co-occurring SA and MH disorders	<i>n/a</i> <sup>3</sup>	Admission
Hawaii	Facilities that receive state/public funding	None	All clients in facility	Admission	Admission

**Appendix Table 1. State data system reporting characteristics: 2013 (continued)**

State or jurisdiction	Facilities reporting TEDS data to the state SSA		Eligible clients	Change of service within episode	Change of provider within episode
	Facilities required to report to the state SSA <sup>1</sup>	Facilities reporting voluntarily to the state SSA			
Montana	Facilities that receive state/public funding Facilities that are licensed/certified by state SSA	None	All clients in facility except DUI clients	Transfer	Admission
Nebraska	Facilities that receive SSA-administered state/public funding	None	State/public-funded clients only	Admission	Admission
Nevada	Facilities that receive state/public funding	None	All clients in facility	Transfer	Transfer
New Hampshire	Facilities that receive state/public funding, methadone maintenance facilities	None	State/public-funded clients only	Transfer	Admission
New Jersey	Facilities that receive state/public funding Facilities that are licensed/certified by state SSA Facilities in state intoxicated driver program	Some private facilities and solo practitioners	All clients in facility	Admission	Admission
New Mexico	Facilities that receive SSA substance abuse funding	None	SSA funded clients with SA or co-occurring SA and MH disorders	Transfer	Transfer
New York	Facilities that receive state/public funding Facilities that are licensed/certified by state SSA	None	All clients in facility	Admission	Admission
North Carolina	Facilities that receive state/public funding	None	All clients in facility	Transfer	Transfer
North Dakota	Eight state Divisional service centers and other facilities receiving SAPT block grant funds One state hospital	Some private facilities	All clients in state Hospital and Regional Human Services Centers Small privates report only SAPT-funded clients	<i>n/a</i> <sup>3</sup>	Admission
Ohio	Facilities that receive state/public funding	None	State/public-funded clients only	Admission	Admission
Oklahoma	Facilities that receive state/public funding	None	State/public-funded clients only	Transfer	Admission
Oregon	Facilities that receive state/public funding or are required because they provide DUI or methadone treatment	None	All clients in facility	Admission	Admission
Pennsylvania	Licensed drug and alcohol treatment providers in Pennsylvania that receive federal, state or local funds from the Department of Drug and Alcohol Programs (Department) are required to report the treatment services they provide to the Department's Data System. Providers not receiving federal, state or local funds from the Department are not required to report to the Department, although some do so voluntarily. Therefore, the statistics generated from the Department should not be interpreted as a complete representation of all drug and alcohol treatment services in Pennsylvania.	Some, but not all, county prisons, hospitals, and private providers and solo practitioners	State/public-funded clients only are required; data on all clients are requested and received from some facilities	Transfer	Admission

*Continued. See notes at end of table.*

## APPENDIX B TEDS DATA ELEMENTS

### TEDS MINIMUM DATA SET

#### AGE OF FIRST USE (OF PRIMARY, SECONDARY, AND TERTIARY SUBSTANCE)

For drugs other than alcohol, these fields identify the age at which the client first used the respective substance. For alcohol, these fields record the age of first intoxication.

- **0**—Indicates a newborn with a substance dependency problem
- **1-96**—Indicates the age at first use

#### CLIENT OR CODEPENDENT/COLLATERAL

Specifies whether the admission record is for a substance abuse treatment client, or a person being treated for his/her codependency or collateral relationship with a substance abuser.

- **Client**—Must meet all of the following criteria:
  - Has an alcohol or drug related problem
  - Has completed the screening and intake process
  - Has been formally admitted for treatment or recovery service in an alcohol or drug treatment unit
  - Has his or her own client record

A person is not a client if he or she has completed only a screening or intake process or has been placed on a waiting list.

- **Codependent/collateral**—Must meet all of the following criteria:
  - Has no alcohol or drug related problem
  - Is seeking services because of problems arising from his or her relationship with an alcohol or drug user
  - Has been formally admitted for service to a treatment unit
  - Has his or her own client record or has a record within a primary client record

GUIDELINES: Reporting of data for *Codependent/collaterals* is optional. If the state opts to report codependent/collateral clients, the mandatory fields are *State code*, *Provider identifier*, *Client identifier*, *Client transaction type*, *Codependent/collateral*, and *Date of admission*. Reporting of the

remaining fields in the TEDS Minimum and Supplemental Data Sets is optional. For all items not reported, the data field should be coded with the appropriate “Not collected” or “Not applicable” code.

If a substance abuse client with an existing record in TEDS becomes a codependent, a new client record should be submitted indicating that the client has been admitted as a codependent, and vice versa.

If a record does not include a value for this field, it is assumed to be a substance abuse client record.

## **DATE OF ADMISSION**

The day when the client receives his or her first direct treatment or recovery service. For transfers, this is the date when client receives his or her first direct treatment after the transfer has occurred.

---

## ***DEMOGRAPHICS***

### ***AGE***

Identifies client’s age at admission. Derived from client’s date of birth and date of admission.

- **0**—Indicates a newborn with a substance dependency problem
- **1-96**—Indicates the age at admission

### ***EDUCATION***

Specifies the highest school grade (number of school years) completed by the client.

- **0**—Less than one grade completed
- **1-25**—Years of school (highest grade) completed. For General Equivalency Degree, use *12*.

GUIDELINES: States that use specific categories for designating education level should map their codes to a logical number of years of school completed. For Associate’s Degree, use *14*. For Bachelor’s Degree, use *16*.

### ***EMPLOYMENT STATUS***

Identifies the client’s employment status at the time of admission or transfer.

- **Full time**—Working 35 hours or more each week, including active duty members of the uniformed services
- **Part time**—Working fewer than 35 hours each week
- **Unemployed**—Looking for work during the past 30 days, or on layoff from a job
- **Not in labor force**—Not looking for work during the past 30 days, or a student, homemaker, disabled, retired, or an inmate of an institution. Clients in this category are further defined in the TEDS Supplemental Data Set item *Detailed not in labor force*.

GUIDELINES: Seasonal workers are coded in this category based on their employment status at admission.

### ***ETHNICITY***

Identifies client's specific Hispanic origin.

- **Cuban**—Of Cuban origin, regardless of race
- **Hispanic (specific origin not specified)**—Of Hispanic origin, but specific origin not known or not specified
- **Mexican**—Of Mexican origin, regardless of race
- **Not of Hispanic origin**
- **Other specific Hispanic**—Of known Central or South American or any other Spanish cultural origin (including Spain), other than Puerto Rican, Mexican, or Cuban, regardless of race
- **Puerto Rican**—Of Puerto Rican origin, regardless of race

GUIDELINES: If a state does not collect specific Hispanic detail, code *Ethnicity* for Hispanics as *Hispanic (specific origin not specified)*.

### ***RACE***

Specifies the client's race.

- **Alaska Native (Aleut, Eskimo, Indian)**—Origins in any of the original people of Alaska
- **American Indian (other than Alaska Native)**—Origins in any of the original people of North America and South America (including Central America) and who maintain cultural identification through tribal affiliation or community attachment
- **Asian or Pacific Islander**—Origins in any of the original people of the Far East, the Indian subcontinent, Southeast Asia, or the Pacific Islands
  - **Asian**—Origins in any of the original people of the Far East, the Indian subcontinent, or Southeast Asia, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Philippine Islands, Thailand, and Vietnam
  - **Native Hawaiian or other Pacific Islander**—Origins in any of the original people of Hawaii, Guam, Samoa, or other Pacific Islands
- **Black or African American**—Origins in any of the black racial groups of Africa
- **White**—Origins in any of the original people of Europe, North Africa, or the Middle East
- **Other single race**—Client is not classified in any category above or whose origin group, because of area custom, is regarded as a racial class distinct from the above categories

- **Two or more races**—For use when the state data system allows multiple race selection and more than one race is indicated

GUIDELINES: If a state does not distinguish between *American Indian* and *Alaska Native*, both should be coded as *American Indian*. If a state does not distinguish between *Asian* and *Native Hawaiian or other Pacific Islander*, both should be coded as *Asian or Pacific Islander*. For states that collect multiple races: a) when a single race is designated, the specific race code should be used; b) if the state collects a primary or preferred race along with additional races, the code for the primary/preferred race should be used; c) if the state uses a system such as an algorithm to select a single race when multiple races have been designated, the same system may be used to determine the race code for TEDS. When two or more races have been designated and neither (b) nor (c) above apply, the TEDS code for *Two or more races* should be used.

### **SEX**

Identifies client's gender.

- Male
  - Female
- 

### **FREQUENCY OF USE (OF PRIMARY, SECONDARY, AND TERTIARY SUBSTANCES)**

These fields identify the frequency of use of the respective *Substance problems*.

- **No use in the past month**
- **1-3 times in the past month**
- **1-2 times in the past week**
- **3-6 times in the past week**
- **Daily**

### **MEDICATION-ASSISTED OPIOID THERAPY**

Identifies whether the use of methadone or buprenorphine is part of the client's treatment plan.

- **Yes**
- **No**

### **NUMBER OF PRIOR TREATMENT EPISODES**

Indicates the number of previous treatment episodes the client has received in any drug or alcohol program. Changes in service for the same episode (transfers) should *not* be counted as separate prior episodes.

- **0 previous episodes**
- **1 previous episode**

- **2 previous episodes**
- **3 previous episodes**
- **4 previous episodes**
- **5 or more previous episodes**

GUIDELINES: It is preferred that the number of prior treatments be a self-reporting field collected at the time of client intake. However, this data item may be derived from the state data system if the system has that capability and episodes can be counted for at least several years.

## PRINCIPAL SOURCE OF REFERRAL

Describes the person or agency referring the client to the alcohol or drug abuse treatment program.

- **Alcohol/drug abuse care provider**—Any program, clinic, or other health care provider whose principal objective is treating clients with substance abuse problems, or a program whose activities are related to alcohol or other drug abuse prevention, education, or treatment
- **Court/criminal justice referral/DUI/DWI**—Any police official, judge, prosecutor, probation officer, or other person affiliated with a federal, state, or county judicial system. Includes referral by a court for DWI/DUI, clients referred in lieu of or for deferred prosecution, or during pretrial release, or before or after official adjudication. Includes clients on pre-parole, pre-release, work or home furlough, or TASC. Client need not be officially designated as “on parole.” Includes clients referred through civil commitment. Client referrals on this category are further defined in the TEDS Supplemental Data Set item *Detailed criminal justice referral*.
- **Employer/EAP**—A supervisor or an employee counselor
- **Individual (includes self-referral)**—Includes the client, a family member, friend, or any other individual who would not be included in any of the following categories; includes self-referral due to pending DWI/DUI
- **Other community referral**—Community or religious organization or any federal, state, or local agency that provides aid in the areas of poverty relief, unemployment, shelter, or social welfare. Self-help groups such as Alcoholics Anonymous (AA), Al-Anon, and Narcotics Anonymous (NA) are also included in this category. Defense attorneys are included in this category.
- **Other health care provider**—A physician, psychiatrist, or other licensed health care professional; or a general hospital, psychiatric hospital, mental health program, or nursing home
- **School (educational)**—A school principal, counselor, or teacher; or a student assistance program (SAP), the school system, or an educational agency

## SUBSTANCE PROBLEM (PRIMARY, SECONDARY, OR TERTIARY)

These fields identify the client’s primary, secondary, and tertiary substance problems. Each *Substance problem* (primary, secondary, and tertiary) has associated fields for *Route of administration*, *Frequency of use*, *Age at first use*, and the TEDS Supplemental Data Set item *Detailed drug code*.

- **Alcohol**
- **Barbiturates**—Amobarbital, pentobarbital, phenobarbital, secobarbital, etc.
- **Benzodiazepines**—Includes alprazolam, chlordiazepoxide, clonazepam, clorazepate, diazepam, flunitrazepam, flurazepam, halazepam, lorazepam, oxazepam, prazepam, temazepam, triazolam, and other unspecified benzodiazepines
- **Cocaine/crack**
- **Heroin**
- **Inhalants**—Includes chloroform, ether, gasoline, glue, nitrous oxide, paint thinner, etc.
- **Marijuana/hashish**—Includes THC and any other *cannabis sativa* preparations
- **Methamphetamine**
- **Non-prescription methadone**
- **Other amphetamines**—Includes amphetamines, MDMA, phenmetrazine, and other unspecified amines and related drugs
- **Other hallucinogens**—Includes LSD, DMT, STP, hallucinogens, mescaline, peyote, psilocybin, etc.
- **Other non-barbiturate sedatives or hypnotics**—Includes chloral hydrate, ethchlorvynol, glutethimide, methaqualone, and other non-barbiturate sedatives or hypnotics
- **Other non-benzodiazepine tranquilizers**—Includes meprobamate and other non-benzodiazepine tranquilizers
- **Other opiates and synthetics**—Includes buprenorphine, codeine, hydrocodone, hydromorphone, meperidine, morphine, opium, oxycodone, pentazocine, propoxyphene, tramadol, and any other drug with morphine-like effects
- **Other stimulants**—Includes methylphenidate and any other stimulants
- **Over-the-counter medications**—Includes aspirin, cough syrup, diphenhydramine and other antihistamines, sleep aids, and any other legally obtained nonprescription medication
- **PCP**—Phencyclidine
- **Other**—Includes diphenylhydantoin/phenytoin, GHB/GBL, ketamine, etc.
- **None**

GUIDELINES: Substance problems are further defined in the TEDS Supplemental Data Set item *Detailed drug code*. For guidance on which specific substances to include in the substance categories, please refer to the detailed drug categories listed for *Detailed drug code*.

- *Substance problem and Route of administration:*

- For states that do collect *Detailed drug code*—Records may have duplicate *Substance problems* and identical *Route of administration* IF the corresponding *Detailed drug codes* are different or are “multiple” drug codes
- For states that do not collect *Detailed drug code*—A record may not have duplicate *Substance problems* with identical *Routes of administration*

## TRANSACTION TYPE

Identifies whether a record is for an initial admission or a transfer/change in service. Note: Some states may use other terminology such as “initial admission” and “transfer admission” in place of “admission” and “transfer.”

- **A**—Admission
- **T**—Transfer/change in service

GUIDELINES: For TEDS, a treatment episode is defined as that period of service between the beginning of treatment for a drug or alcohol problem and the termination of services for the prescribed treatment plan. The episode includes one admission (when services begin) and at least one discharge (when services end). Within a treatment episode, a client may transfer to a different service, facility, provider, program, or location. Each admission and transfer record should have an associated discharge record.

When it is feasible for the state to identify transfers, they should be reported as transfers in admissions data submissions. When admissions and transfers cannot be differentiated in a state data system, such changes in service or facility should be reported to TEDS as admissions.

Data set considerations for transfers:

- All fields from the transfer record should be updated to reflect values at the time of transfer except the following fields, which must have the same values as in the associated (preceding) admission record: *Client ID*, *Codependent/collateral*, *Date of birth*, *Sex*, *Race*, and *Ethnicity*. If a field cannot be updated, it should be transmitted to TEDS with its value from the associated (preceding) admission record.
- *Date of admission* is defined as the date services begin after the transfer to another service or facility.

## TYPE OF SERVICE

Describes the type of service and treatment setting in which the client is placed at the time of admission or transfer.

- **Ambulatory, detoxification**—Outpatient treatment services providing for safe withdrawal in an ambulatory setting (pharmacological or non-pharmacological)
- **Ambulatory, intensive outpatient**—As a minimum, the client must receive treatment lasting two or more hours per day for three or more days per week
- **Ambulatory, non-intensive outpatient**—Ambulatory treatment services including individual, family, and/or group services, and may include pharmacological therapies
- **Detoxification, 24-hour service, free-standing residential**—24-hour per day services in a non-hospital setting providing for safe withdrawal and transition to ongoing treatment
- **Detoxification, 24-hour service, hospital inpatient**—24-hour per day medical acute care services in a hospital setting for detoxification of persons with severe medical complications associated with withdrawal
- **Rehabilitation/residential, hospital (other than detoxification)**—24-hour per day medical care in a hospital facility in conjunction with treatment services for alcohol and other drug abuse and dependency
- **Rehabilitation/residential, short-term (30 days or fewer)**—Typically, 30 days or less of non-acute care in a setting with treatment services for alcohol and other drug abuse and dependency
- **Rehabilitation/residential, long-term (more than 30 days)**—Typically, more than 30 days of non-acute care in a setting with treatment services for alcohol and other drug abuse and dependency; this may include transitional living arrangements such as halfway houses

## USUAL ROUTE OF ADMINISTRATION (OF PRIMARY, SECONDARY, AND TERTIARY SUBSTANCES)

These fields identify the usual route of administration of the respective *Substance problems*.

- **Inhalation**
- **Injection (IV or intramuscular)**
- **Oral**
- **Smoking**
- **Other**

# TEDS SUPPLEMENTAL DATA SET

## DAYS WAITING TO ENTER TREATMENT

Indicates the number of days from the first contact or request for service until the client was admitted and the first clinical service was provided.

- **0-996**—Number of days waiting

GUIDELINES: This item is intended to capture the number of days the client must wait to begin treatment because of program capacity, treatment availability, admissions requirements, or other program requirements. It should not include time delays caused by client unavailability or client failure to meet any requirement or obligation.

## DETAILED CRIMINAL JUSTICE REFERRAL

This item gives more detailed information about those clients who are coded as “Court/criminal justice referral/DUI/DWI” in the TEDS Minimum Data Set item *Principal source of referral*.

- **Diversionary program** (e.g., TASC)
- **DUI/DWI**
- **Other court (not state or federal)**
- **Other recognized legal entity** (e.g., local law enforcement agency, corrections agency, youth services, review board/agency)
- **Prison**
- **Probation/parole**
- **State/federal court**
- **Other**
- **Not applicable**

## DETAILED DRUG CODE (PRIMARY, SECONDARY, AND TERTIARY)

These fields identify, in greater detail, the drug problems recorded in the TEDS Minimum Data Set item *Substance problem*.

- **Aerosols**
- **Alcohol**

- **Alprazolam** (Xanax)
- **Amphetamine**
- **Anesthetics**
- **Chlordiazepoxide** (Librium)
- **Clonazepam** (Klonopin, Rivotril)
- **Clorazepate** (Tranxene)
- **Codeine**
- **Crack**
- **Diazepam** (Valium)
- **Diphenhydramine**
- **Diphenylhydantoin/phenytoin** (Dilantin)
- **Ethchlorvynol** (Placidyl)
- **Flunitrazepam** (Rohypnol)
- **Flurazepam** (Dalmane)
- **GHB/GBL** (gamma-hydroxybutyrate, gamma-butyrolactone)
- **Glutethimide** (Doriden)
- **Heroin**
- **Hydrocodone** (Vicodin)
- **Hydromorphone** (Dilaudid)
- **Ketamine** (Special K)
- **Lorazepam** (Ativan)
- **LSD**
- **Marijuana/hashish**
- **Meperidine** (Demerol)
- **Meprobamate** (Miltown)
- **Methadone (non-prescription)**
- **Methamphetamine/speed**
- **Methaqualone**
- **Methylenedioxymethamphetamine** (MDMA, Ecstasy)
- **Methylphenidate** (Ritalin)
- **Nitrites**

#### **DETAILED “NOT IN LABOR FORCE”**

This item gives more detailed information about those clients who are coded as “Not in labor force” in the TEDS Minimum Data Set item *Employment Status*.

- **Disabled**
- **Homemaker**
- **Inmate of institution** (prison or institution that keeps a person, otherwise able, from entering the labor force)
- **Retired**
- **Student**

- **Other**
- **Not applicable**

### **DSM CRITERIA DIAGNOSIS**

The diagnosis of the substance abuse problem from the American Psychiatric Association's *Diagnostic and Statistical Manual of Mental Disorders*. DSM-IV is preferred, but use of the Third Edition or ICD codes is permissible.

### **EXPECTED/ACTUAL PRIMARY SOURCE OF PAYMENT**

Identifies the primary source of payment for this treatment episode.

- **Blue Cross/Blue Shield**
- **Medicaid**
- **Medicare**
- **Other government payments**
- **Other health insurance companies**
- **Self-pay**
- **Worker's Compensation**
- **No charge (free, charity, special research, or teaching)**
- **Other**

### **FREQUENCY OF ATTENDANCE AT SELF-HELP PROGRAMS**

This field records the number of times the client has attended a self-help program in the 30 days preceding the date of admission to treatment services.

- **No attendance in the past month**
- **1-3 times in the past month**
- **4-7 times in the past month**
- **8-15 times in the past month**
- **16-30 times in the past month**
- **Some attendance in the past month, but frequency unknown**

### **HEALTH INSURANCE**

Specifies the client's health insurance (if any). The insurance may or may not cover alcohol or drug treatment.

- **Blue Cross/Blue Shield**
- **Health maintenance organization (HMO)**
- **Medicaid**
- **Medicare**
- **Private insurance** (other than Blue Cross/Blue Shield or an HMO)
- **Other** (e.g., TRICARE)
- **None**

### **LIVING ARRANGEMENTS**

Specifies whether the client is homeless, living with parents, in a supervised setting, or living on his or her own.

- **Dependent living**—Clients living in a supervised setting such as a residential institution, halfway house, or group home, and children (under age 18) living with parents, relatives, or guardians, or in foster care
- **Homeless**—Clients with no fixed address; includes shelters
- **Independent living**—Clients living alone or with others without supervision

### **MARITAL STATUS**

Describes the client's marital status. The following categories are compatible with the U.S. Census.

- **Divorced**
- **Never married**—Includes clients whose only marriage was annulled
- **Now married**—Includes those living together as married
- **Separated**—Includes those separated legally or otherwise absent from spouse because of marital discord
- **Widowed**

### **NUMBER OF ARRESTS IN 30 DAYS PRIOR TO ADMISSION**

This field records the number of arrests in the 30 days preceding the date of admission to treatment services.

- **00-96**—Number of arrests

## **PREGNANT AT TIME OF ADMISSION**

Specifies whether the client was pregnant at the time of admission.

- **Yes**
- **No**
- **Not applicable.** Use this code for male clients

## **PSYCHIATRIC PROBLEM IN ADDITION TO ALCOHOL OR DRUG PROBLEM**

Identifies whether the client has a psychiatric problem in addition to his or her alcohol or drug use problem.

- **Yes**
- **No**

## **SOURCE OF INCOME SUPPORT**

Identifies the client's principal source of financial support. For children under 18, this field indicates the parents' primary source of income/support.

- **Disability**
- **Public assistance**
- **Retirement/pension**
- **Wages/salary**
- **Other**
- **None**

## **VETERAN STATUS**

Identifies whether the client has served in the uniformed services (Army, Navy, Air Force, Marines, Coast Guard, Public Health Service Commissioned Corps, Coast and Geodetic Survey, etc.).

- **Yes**
- **No**

At Synectics, Parth Thakore, Sarbajit Sinha, Hongwei Zhang, and Doren Walker were responsible for the content, analysis, and writing of the report.
