LIST OF TABLES

Trends in Substance Abuse Treatment Admissions Aged 12 and Older: 2005-2015

All Admissions

1.1	Admissions aged 12 and older, by Census region, Census division, and state or jurisdiction: Number, 2005-2015.....	48
1.2	Admissions aged 12 and older, by Census region, Census division, and state or jurisdiction: Admissions per 100,000 population, 2005-2015.....	50
1.3	Admissions aged 12 and older, adjusted for age, gender, and race/ethnicity, by Census region, Census division, and state or jurisdiction: Admissions per 100,000 population, 2005-2015	52

Selected Primary Substance

1.4a	Primary alcohol admissions aged 12 and older, by Census region, Census division, and state or jurisdiction: Number, 2005-2015.....	54
1.4b	Primary alcohol admissions aged 12 and older, by Census region, Census division, and state or jurisdiction: Admissions per 100,000 population, 2005-2015	56
1.5a	Primary marijuana admissions aged 12 and older, by Census region, Census division, and state or jurisdiction: Number, 2005-2015.....	58
1.5b	Primary marijuana admissions aged 12 and older, by Census region, Census division, and state or jurisdiction: Admissions per 100,000 population, 2005-2015.....	60
1.6a	Primary heroin admissions aged 12 and older, by Census region, Census division, and state or jurisdiction: Number, 2005-2015.....	62
1.6b	Primary heroin admissions aged 12 and older, by Census region, Census division, and state or jurisdiction: Admissions per 100,000 population, 2005-2015	64
1.7a	Primary cocaine admissions aged 12 and older, by Census region, Census division, and state or jurisdiction: Number, 2005-2015.....	66
1.7b	Primary cocaine admissions aged 12 and older, by Census region, Census division, and state or jurisdiction: Admissions per 100,000 population, 2005-2015	68
1.8a	Primary methamphetamine/amphetamine admissions aged 12 and older, by Census region, Census division, and state or jurisdiction: Number, 2005-2015.....	70
1.8b	Primary methamphetamine/amphetamine admissions aged 12 and older, by Census region, Census division, and state or jurisdiction: Admissions per 100,000 population, 2005-2015	72
1.9a	Primary non-heroin opiates/synthetics admissions aged 12 and older, by Census region, Census division, and state or jurisdiction: Number, 2005-2015.....	74

LIST OF TABLES (CONTINUED)

1.9b	Primary non-heroin opiates/synthetics admissions aged 12 and older, by Census region, Census division, and state or jurisdiction: Admissions per 100,000 population, 2005-2015	76
------	--	----

Substance Abuse Treatment Admissions Aged 12 and Older, by Primary Substance of Abuse: 2015

2.1a	Admissions aged 12 and older, by type of service at admission and Census region, Census division, and state or jurisdiction: Number, 2015	79
2.1b	Admissions aged 12 and older, by type of service at admission and Census region, Census division, and state or jurisdiction: Percent distribution, 2015	82
2.2	Admissions aged 12 and older, by primary substance of abuse and Census region, Census division, and state or jurisdiction: Number, 2015	85
2.3	Admissions aged 12 and older, by primary substance of abuse and Census region, Census division, and state or jurisdiction: Admissions per 100,000 population, 2015	87
2.4	Admissions aged 12 and older, adjusted for age, gender, and race/ethnicity, by primary substance of abuse and Census region, Census division, and state or jurisdiction: Admissions per 100,000 population, 2015	90

Characteristics of Substance Abuse Treatment Admissions Aged 12 and Older, by State or Jurisdiction and Primary Substance of Abuse: 2015

3.1a	Alabama admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	93
3.1b	Alabama admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015	94
3.2a	Alaska admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	95
3.2b	Alaska admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015	96
3.3a	Arizona admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	97
3.3b	Arizona admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015	98
3.4a	Arkansas admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	99
3.4b	Arkansas admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015	100

LIST OF TABLES (CONTINUED)

3.5a	California admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	101
3.5b	California admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	102
3.6a	Colorado admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	103
3.6b	Colorado admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	104
3.7a	Connecticut admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	105
3.7b	Connecticut admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	106
3.8a	Delaware admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	107
3.8b	Delaware admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	108
3.9a	District of Columbia admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	109
3.9b	District of Columbia admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	110
3.10a	Florida admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	111
3.10b	Florida admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	112
3.11a	Hawaii admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	113
3.11b	Hawaii admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	114
3.12a	Idaho admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	115
3.12b	Idaho admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	116
3.13a	Illinois admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	117

LIST OF TABLES (CONTINUED)

3.13b	Illinois admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	118
3.14a	Indiana admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	119
3.14b	Indiana admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	120
3.15a	Iowa admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	121
3.15b	Iowa admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	122
3.16a	Kentucky admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	123
3.16b	Kentucky admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	124
3.17a	Louisiana admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	125
3.17b	Louisiana admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	126
3.18a	Maine admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	127
3.18b	Maine admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	128
3.19a	Maryland admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	129
3.19b	Maryland admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	130
3.20a	Massachusetts admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	131
3.20b	Massachusetts admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	132
3.21a	Michigan admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	133
3.21b	Michigan admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	134

LIST OF TABLES (CONTINUED)

3.22a	Minnesota admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	135
3.22b	Minnesota admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	136
3.23a	Mississippi admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	137
3.23b	Mississippi admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	138
3.24a	Missouri admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	139
3.24b	Missouri admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	140
3.25a	Montana admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	141
3.25b	Montana admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	142
3.26a	Nebraska admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	143
3.26b	Nebraska admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	144
3.27a	Nevada admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	145
3.27b	Nevada admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	146
3.28a	New Hampshire admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	147
3.28b	New Hampshire admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	148
3.29a	New Jersey admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	149
3.29b	New Jersey admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	150
3.30a	New Mexico admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	151

LIST OF TABLES (CONTINUED)

3.30b	New Mexico admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015	152
3.31a	New York admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	153
3.31b	New York admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015	154
3.32a	North Carolina admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	155
3.32b	North Carolina admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015	156
3.33a	North Dakota admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	157
3.33b	North Dakota admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015	158
3.34a	Ohio admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	159
3.34b	Ohio admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	160
3.35a	Oklahoma admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	161
3.35b	Oklahoma admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015	162
3.36a	Puerto Rico admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	163
3.36b	Puerto Rico admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015	164
3.37a	Rhode Island admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	165
3.37b	Rhode Island admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015	166
3.38a	South Dakota admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015.....	167
3.38b	South Dakota admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015	168

LIST OF TABLES (CONTINUED)

3.39a	Tennessee admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	169
3.39b	Tennessee admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	170
3.40a	Texas admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Number, 2015	171
3.40b	Texas admissions aged 12 and older, by primary substance of abuse and gender, age at admission, and race/ethnicity: Percent distribution, 2015.....	172

57	West Virginia admissions aged 12 and older, by primary substance of abuse: 2005-2015	44
58	Wisconsin admissions aged 12 and older, by primary substance of abuse: 2005-2015	45
59	Wyoming admissions aged 12 and older, by primary substance of abuse: 2005-2015	45

HIGHLIGHTS

This report uses data from the Treatment Episode Data Set (TEDS) to examine treatment admission data in 2015, and trend data from 2005 to 2015, nationally, regionally (by four Census regions and nine Census divisions), and by state or jurisdiction. The report provides information on the demographic and substance abuse characteristics of admissions to treatment aged 12 and older for abuse of alcohol and/or drugs in facilities that report to individual state administrative data systems. It is important to note that values in charts, narrative lists, and percentage distributions are calculated using actual raw numbers and rounded for presentation in this report; calculations using rounded values may produce different results.

For 2015, a total of 1,537,025 admissions aged 12 and older were reported to TEDS by 45 states, the District of Columbia, and Puerto Rico (Georgia, Kansas, Oregon, Pennsylvania, and South Carolina did not report sufficient admissions for 2015 to be included in this report) [Table 1.1].

Trends in Substance Abuse Treatment Admissions Aged 12 and Older: 2005-2015

All Admissions

- Between 2005 and 2015, about 23 percent of all admissions reported were in the Middle Atlantic division [Table 1.1].
- The average rate of admissions was highest in the New England and Middle Atlantic divisions—1,530 and 980 per 100,000 population aged 12 and older, respectively, in 2015 [Table 1.2 and Figure 1].
- The U.S. population aged 12 and older grew about 10 percent between 2005 and 2015, but the number of annual treatment admissions was 19 percent lower in 2015 than in 2005 [Table 1.1]. The treatment admission rate in 2005 (756 per 100,000 population) was about 26 percent higher than the rate in 2015 (557 per 100,000 population aged 12 and older) [Table 1.2].

Alcohol

- The treatment admission rate for primary alcohol abuse was higher in 2005 (298 per 100,000) than in 2015, at 189 per 100,000 population aged 12 and older. The rate fluctuated between 2005 and 2015, but 2008 had the highest rate and 2015 had the lowest rate in this time period [Table 1.4b and Figure 2].
- Alcohol treatment admission rates were higher in 2005 than in 2015 in eight of the nine Census divisions. The rate was 14 percent lower in the New England division.
- From 2005 to 2015, alcohol treatment admission rates were generally higher in the New England, Middle Atlantic, Mountain, and West North Central than in other Census divisions.

Marijuana

- The treatment admission rate for primary marijuana abuse was 36 percent higher in 2005, at 121 per 100,000 population aged 12 and older, than in 2015 (77 per 100,000) [Table 1.5b and Figure 3].
- Marijuana admission rates were between 13 and 60 percent higher in 2005 than in 2015 in eight of the nine Census divisions. The New England division had a 14 percent increase from 2005 to 2015.
- From 2005 to 2015, marijuana treatment admission rates were consistently highest in the West North Central and Middle Atlantic divisions.

Heroin

- The treatment admission rate for primary heroin abuse was 40 percent lower in 2005, at 104 per 100,000 population aged 12 and older, than in 2015 (146 per 100,000) [Table 1.6b and Figure 4].
- Heroin treatment admission rates were between 8 and 833 percent lower in 2005 than in 2015 in all nine Census divisions.
- From 2005 to 2015, heroin treatment admission rates were consistently highest in the New England and Middle Atlantic divisions.

Cocaine

- The treatment admission rate for primary cocaine abuse was 75 percent higher in 2005, at 107 per 100,000 population aged 12 and older, than in 2015 (27 per 100,000) [Table 1.7b and Figure 5].
- Cocaine treatment admission rates were higher in 2005 than in 2015 in all nine Census divisions.
- From 2005 through 2015, cocaine treatment admission rates were consistently highest in the Middle Atlantic division.

Methamphetamine/amphetamines

- The treatment admission rate for methamphetamine/amphetamines was 28 percent higher in 2005, at 68 per 100,000 population aged 12 and older, than in 2015 (49 per 100,000). Methamphetamine/amphetamine treatment admission rates peaked in 2005 at 68 per 100,000, declined in every year through 2011, then increased from 2012 to 2014, and declined in 2015 [Table 1.8b and Figure 6].
- Methamphetamine/amphetamine treatment admission rates were higher in 2005 than in 2015 in five of the nine Census divisions.
- From 2005 to 2015, methamphetamine/amphetamine treatment admission rates were highest in the Pacific, West North Central, and Mountain divisions.

Opiates other than heroin

- The treatment admission rate for opiates other than heroin was 59 percent lower in 2005, at 29 per 100,000 population aged 12 and older, than in 2015 (45 per 100,000). Rates increased in every year from 2005 through 2011 and decreased from 2012 through 2015 [Table 1.9b and Figure 7].
- The treatment admission rates for opiates other than heroin increased between 2005 and 2015 in eight of the Census divisions. By contrast, treatment rates for opiates other than heroin decreased in the West South Central division between 2005 and 2015.
- From 2005 to 2015, treatment admission rates for opiates other than heroin were highest in the New England division.

Substance Abuse Treatment Admissions Aged 12 and Older: 2015

- In 2015, the treatment admission rate was higher for primary alcohol abuse than for any illicit drugs. The primary alcohol admission rate was 189 per 100,000 population (the rate for alcohol alone was 107 per 100,000 and the rate for alcohol with secondary drug abuse was 82 per 100,000). The highest rates for illicit drugs were for heroin (146 per 100,000) and marijuana (77 per 100,000) [Table 2.3].
- Treatment admission rates for 2015 were higher for primary alcohol abuse than for an illicit drug in six Census divisions, and in 36 of the 47 reporting states and jurisdictions. The primary illicit drug with the highest treatment admission rate varied by division: heroin in the New England, Middle Atlantic, East North Central, and South Atlantic divisions; methamphetamine/amphetamines in the West North Central, West South Central, Pacific, and Mountain divisions; and non-heroin opiates in the East South Central division.

CHAPTER 1

TRENDS IN SUBSTANCE ABUSE TREATMENT ADMISSIONS AGED 12 AND OLDER: 2005-2015

This report uses data from the Treatment Episode Data Set (TEDS) to examine treatment admission data in 2015, and trend data from 2005 to 2015, nationally, regionally (by four Census regions and nine Census divisions), and by state or jurisdiction. It is a companion to *Treatment Episode Data Set (TEDS): 2005-2015 National Admissions to Substance Abuse Treatment*. These reports provide information on the demographic and substance abuse characteristics of admissions to treatment aged 12 and older for abuse of alcohol and/or drugs in facilities that report to individual state administrative data systems. Data include records for admissions during calendar years 2005 through 2015 that were received and processed through November 1, 2016.¹

TEDS is an admission-based system, and TEDS admissions do not represent individuals. Thus, an individual admitted to treatment twice within a calendar year would be counted as two admissions.

TEDS does not include all admissions to substance abuse treatment. It includes admissions to facilities that are licensed or certified by the state substance abuse agency to provide substance abuse treatment (or are administratively tracked for other reasons). In general, facilities reporting TEDS data are those that receive state alcohol and/or drug agency funds (including federal block grant funds) for the provision of alcohol and/or drug treatment services. Additional information on the history and methodology of TEDS and this report as well as important issues related to state data collection systems are detailed in Appendix A.

This chapter details trends in the annual numbers and rates of admissions aged 12 and older for 2005 to 2015. Trend data are used to monitor changing patterns in substance abuse treatment admissions. These patterns reflect underlying changes in substance abuse in the population as well as changing priorities in the treatment/reporting system. TEDS data thus have important implications for resource allocation and program planning.

While the tables in this report present data by Census region and Census division (Figure 1), and by state or jurisdiction, it is important to note that comparisons between and across regions, divisions, and states should be made with caution. There are many factors (e.g., facilities included, clients included, ability to track multi-service episodes, services offered, and completeness and timeliness of reporting) that can affect comparability. See Appendix A for a full discussion.

¹ For researchers interested in more detailed analysis, TEDS public use files are available for online data analysis or download at the Substance Abuse and Mental Health Data Archive, which can be accessed at <https://datafiles.samhsa.gov>. Summary data for individual states that have submitted the full year of data are available online through the TEDS Quick Statistics website at <https://www.dasis.samhsa.gov/webt/newmapv1.htm>.

All Admissions

Table 1.1 presents the total number of treatment admissions aged 12 and older by Census region, Census division, and state or jurisdiction for 2005 through 2015.²

- For 2015, a total of 1,537,025 admissions aged 12 and older were reported to TEDS by 45 states, the District of Columbia, and Puerto Rico for a total of 47 reporting states or jurisdictions (Georgia, Kansas, Oregon, Pennsylvania, and South Carolina did not report sufficient admissions for 2015 to be included in this report).
- The number of treatment admissions aged 12 and older was 19 percent higher in 2005 than in 2015.
- From 2005 to 2015, about 23 percent of all admissions reported were in the Middle Atlantic division. The East North Central, South Atlantic, and Pacific divisions each reported roughly 13 to 15 percent of all admissions; the Mountain, New England, and West North Central

Figure 1. Census regions and Census divisions of the United States

² Data were not submitted or were incomplete for one or more years in some states or jurisdictions because of changes to their data collection systems: Alabama (2007), the District of Columbia (2005-2006 and 2008-2009), Georgia (2015), Kansas (2015), Mississippi (2009-2010), Oregon (2015), Pennsylvania (2015) and South Carolina (2014-2015).

divisions each reported about 8 to 10 percent of all admissions; and the East South Central and West South Central divisions each reported about 3 to 5 percent of all admissions.

Table 1.2 presents the treatment admission rates per 100,000 population aged 12 and older by Census region, Census division, and state or jurisdiction for 2005 through 2015.

- Between 2005 and 2015, the U.S. population aged 12 and older grew by about 10 percent,* but the number of annual treatment admissions was 19 percent lower in 2015 than in 2005 [Table 1.1]. The treatment admission rate in 2005 (756 per 100,000 population) was about 26 percent higher than the rate in 2015 (557 per 100,000 population aged 12 and older) [Table 1.2].
- Admission rates were highest in the New England and Middle Atlantic divisions. In New England, the rate was lowest in 2005, at 1,193 per 100,000 population aged 12 and older, and highest in 2014, at 1,568 per 100,000 population aged 12 and older. The rates in the Middle Atlantic division were at 1,307 per 100,000 in 2005 and 980 per 100,000 population aged 12 and older in 2015.
- In 2015, individual state admission rates varied from approximately 78 per 100,000 population to about 2,178 per 100,000. As noted above, there are many possible explanations for this variation (see Appendix A), and comparisons among states should be made with caution.

Table 1.3 presents the treatment admission rate adjusted for age, gender, and race/ethnicity to the U.S. population in 2010 by Census region, Census division, and state or jurisdiction for 2005 to 2015. Adjusted rates take into account the different admission rates among population subgroups and the different proportions of the subgroups in each division, state, or jurisdiction. The adjusted rates are the rates that would be observed if each division, state, or jurisdiction had the same distribution of subgroups as the standardized U.S. population in 2010.

For example, the 2015 unadjusted rates for Alaska and Iowa were similar (1,063 and 1,083 per 100,000 population aged 12 and older, respectively) [Table 1.2], but the adjusted rates were not (541 per 100,000 for Alaska and 1,234 per 100,000 for Iowa) [Table 1.3]. Alaska's adjusted rate was much lower than its unadjusted rate because Alaska had high admission rates in subgroups that were a large proportion of the state's population but represented relatively lower proportions of the U.S. population in 2010. In contrast, the population distribution in Iowa closely resembled the population distribution in the U.S.; therefore, Iowa's adjusted and unadjusted rates were similar. This example demonstrates that the difference between adjusted rates and unadjusted rates can vary depending on the state's population distribution.

* See the source in Table 1.3.

Selected Primary Substance

Six substance groups (alcohol, marijuana, heroin, cocaine, methamphetamine/amphetamines, and opiates other than heroin³) accounted for 96 percent of all TEDS admissions aged 12 and older in 2015.⁴

Tables 1.4a–1.9a present the numbers of admissions aged 12 and older by Census region, Census division, and state and jurisdiction from 2005 to 2015 for each of the selected primary substances.⁵

Tables 1.4b–1.9b present the admission rates per 100,000 population aged 12 and older by Census region, Census division, and state and jurisdiction from 2005 to 2015 for each of the selected primary substances.

The admission rates are mapped in Figures 2–7. The map categories are based on the median, 75th, 90th, and 99th percentiles of the range of 2005 admission rates for each substance. Each map shows about one state or jurisdiction in dark red (the 99th percentile and above), about five states or jurisdictions in light red (the 90th to 98th percentiles), about eight states or jurisdictions in orange (the 75th to 89th percentiles), about 12 states or jurisdictions in yellow (the 50th to 74th percentiles), and about 24 states or jurisdictions in tan (below the median 2005 U.S. rate). Cross-hatching indicates states or jurisdictions where no data or less than a full calendar year of data were submitted.

Alcohol

- The treatment admission rate for primary alcohol was higher in 2005 (298 per 100,000) than in 2015, at 189 per 100,000 population aged 12 and older. The rate fluctuated between 2005 and 2015, but 2008 had the highest rate and 2015 had the lowest rate in this time period [Table 1.4b and Figure 2].
- Alcohol treatment admission rates were higher in 2005 than in 2015 in eight of the nine Census divisions. The rate was 14 percent lower in the New England division.
- Alcohol treatment admission rates were higher in 2005 than in 2015 in 40 of the 46 states and jurisdictions reporting in both years and lower in 6 states and jurisdictions. Connecticut experienced a 49 percent increase from 500 per 100,000 in 2005 to 747 per 100,000 in 2015.
- From 2005 to 2015, alcohol treatment admission rates were generally highest in the New England, Middle Atlantic, Mountain, and West North Central divisions.

³ Opiates other than heroin include methadone, buprenorphine, codeine, hydrocodone, hydromorphone, meperidine, morphine, opium, oxycodone, pentazocine, propoxyphene, tramadol, and any other drug with morphine-like effects.

⁴ See: Substance Abuse and Mental Health Services Administration, Center for Behavioral Health Statistics and Quality. *Treatment Episode Data Set (TEDS): 2005-2015. National Admissions to Substance Abuse Treatment Services*. BHSIS Series S-95, HHS Publication No. (SMA) 17-4360. Rockville, MD: Substance Abuse and Mental Health Services Administration, 2015, Table 1.1b.

⁵ Admissions can report up to three substances of abuse and are referred to as primary, secondary, and tertiary in the order that they reported. These represent the substances that led to the treatment episode and are not necessarily a complete enumeration of all substances used at the time of admission. Most of the information in this report is based on an admission's primary or first mentioned substance of abuse unless otherwise specified. (See Appendix A for more details.)

Marijuana

- The treatment admission rate for primary marijuana abuse was 36 percent higher in 2005, at 121 per 100,000 population aged 12 and older, than in 2015 (77 per 100,000) [Table 1.5b and Figure 3].
- Marijuana admission rates were between 13 and 60 percent higher in 2005 than in 2015 in eight of the nine Census divisions. The New England division had a 14 percent increase from 2005 to 2015.
- Marijuana admission rates were higher in 2005 than in 2015 in 34 of the 44 states and jurisdictions reporting in both years and lower in 10 states and jurisdictions. The admission rates of Connecticut and North Carolina more than doubled between 2005 and 2015.
- From 2005 to 2015, marijuana treatment admission rates were consistently highest in the West North Central and Middle Atlantic divisions.

Heroin

- The treatment admission rate for primary heroin abuse was 40 percent lower in 2005, at 104 per 100,000 population aged 12 and older, than in 2015 (146 per 100,000) [Table 1.6b and Figure 4].
- Heroin treatment admission rates were between 8 and 833 percent lower in 2005 than in 2015 in all nine Census divisions.
- Heroin treatment admission rates were higher in 2005 than in 2015 in 3 of the 44 states and jurisdictions reporting in both years,⁶ and lower in 41 states and jurisdictions. Alaska, North Dakota, Kentucky, Wyoming, Arkansas, and Minnesota experienced the largest growth of heroin admissions from 2005 to 2015.
- From 2005 to 2015, heroin treatment admission rates were consistently highest in the New England and Middle Atlantic divisions.

Cocaine

- The treatment admission rate for primary cocaine abuse was 75 percent higher in 2005, at 107 per 100,000 population aged 12 and older, than in 2015 (27 per 100,000) [Table 1.7b and Figure 5].
- Cocaine treatment admission rates were between 42 and 81 percent higher in 2005 than in 2015 in the nine Census divisions.
- Cocaine admission rates were higher in 2005 than in 2015 in 45 of the 46 states and jurisdictions reporting in both years. Alaska's cocaine admissions rate was 32 percent lower in 2005, at 9 per 100,000, than in 2015 (12 per 100,000 population aged 12 and older).
- From 2005 to 2015, cocaine treatment admission rates were consistently highest in the Middle Atlantic division.

⁶ Tennessee reported all heroin admissions as *Opiates other than heroin* through June 2009. Tennessee began disaggregating heroin admissions from other opiates in July 2009 (Figures 4 and 7).

Methamphetamine/amphetamines

- The treatment admission rate for methamphetamine/amphetamines was 28 percent higher in 2005, at 68 per 100,000 population aged 12 and older, than in 2015 (49 per 100,000). Methamphetamine/amphetamine treatment admission rates peaked in 2005 at 68 per 100,000, declined in every year through 2011, then increased from 2012 to 2014, and declined in 2015. [Table 1.8b and Figure 6].
- Methamphetamine/amphetamine treatment rates were between 3 and 64 percent lower in 2005 than in 2015 in four of the nine Census divisions. In the remaining five divisions, the treatment admission rate was between 12 and 70 percent higher in 2005 than in 2015.
- Methamphetamine/amphetamine treatment admission rates were higher in 2005 than in 2015 in 23 of the 45 states and jurisdictions reporting in both years and lower in 21 states. The increase in admission rates between 2005 and 2015 was more than 100 percent for New York, North Carolina, and Tennessee.
- The Pacific division had the highest methamphetamine/amphetamine treatment admission rate from 2005 through 2012 (ranging from 131 to 222 per 100,000 population aged 12 and older), but the West North Central division had a higher rate in 2015 (156 per 100,000).

Opiates other than heroin

- The treatment admission rate for opiates other than heroin was 59 percent lower in 2005, at 29 per 100,000 population aged 12 and older, than in 2015 (45 per 100,000 population). Rates increased in every year from 2005 through 2011 and decreased from 2012 through 2015 [Table 1.9b and Figure 7].
- The treatment admission rates for opiates other than heroin were between 24 and 132 percent lower in 2005 than in 2015 in eight of the nine Census divisions.
- Treatment admission rates for opiates other than heroin were lower in 2005 than in 2015 in 40 of the 46 states reporting in both years. By contrast, from 2005 to 2015, Utah, Mississippi, Texas, Nevada, West Virginia, and Louisiana experienced decreases of 6, 6, 13, 24, 56, and 59 percent, respectively.
- From 2005 to 2015, treatment admission rates for opiates other than heroin were highest in the New England division. In 2005, the New England rate was 83 per 100,000 population aged 12 and older while the rates for the other divisions ranged from 15 per 100,000 population (Pacific) to 40 per 100,000 population (Middle Atlantic). In 2015, the New England rate was 103 per 100,000 population aged 12 and older while the rates for the other divisions ranged from 20 per 100,000 population (West South Central) to 66 per 100,000 population (East South Central).

CHAPTER 2

SUBSTANCE ABUSE TREATMENT ADMISSIONS AGED 12 AND OLDER, BY PRIMARY SUBSTANCE OF ABUSE: 2015

This chapter presents numbers of substance abuse treatment admissions aged 12 and older and admission rates from the Treatment Episode Data Set (TEDS) by Census region, Census division, and state or jurisdiction for admissions in 2015, according to primary substance of abuse.

As noted previously, comparisons between and across regions, divisions, and states or jurisdictions should be made with caution. There are many factors (e.g., facilities included, clients included, ability to track multi-service episodes, service type, and completeness and timeliness of reporting) that can affect comparability. See Appendix A for a full discussion.

Table 2.1b indicates the proportions of admissions in 2015 by service type according to Census region, Census division, and state or jurisdiction. A state's mix of service types (e.g., outpatient, detoxification, rehabilitation/residential, opioid therapy) can have a significant effect on its admission rates. There is higher client turnover and therefore more admissions in short-stay services such as detoxification than in long-stay services such as outpatient or long-term rehabilitation/residential treatment. Admission rates for individual substances of abuse may be affected as well (e.g., detoxification is more closely associated with alcohol, heroin, or tranquilizer use than with use of other substances).⁶

Table 2.2 presents the total number of treatment admissions aged 12 and older by primary substance of abuse, according to Census region, Census division, and state or jurisdiction for 2015.

Table 2.3 presents the treatment admission rates per 100,000 population aged 12 and older by primary substance of abuse, according to Census region, Census division, and state or jurisdiction for 2015.

- In 2015, the treatment admission rate was higher for primary alcohol abuse than for illicit drugs. The primary alcohol admission rate was 189 per 100,000 population (the rate for alcohol alone was 107 per 100,000 and the rate for alcohol with secondary drug abuse was 82 per 100,000). The highest rates for illicit drugs were for heroin (146 per 100,000) and marijuana (77 per 100,000).
- Treatment admission rates for 2015 were higher for primary alcohol abuse (alcohol alone and alcohol with secondary drug combined) than for illicit drugs in six of the nine Census divisions. The most common primary illicit drugs in each Census division were:
 - New England—heroin, marijuana, and opiates other than heroin
 - Middle Atlantic—heroin, marijuana, and opiates other than heroin

⁶ See: Substance Abuse and Mental Health Services Administration, Center for Behavioral Health Statistics and Quality. *Treatment Episode Data Set (TEDS): 2005-2015. National Admissions to Substance Abuse Treatment Services*. BHSIS Series S-95, HHS Publication No. (SMA) 17-4360. Rockville, MD: Substance Abuse and Mental Health Services Administration, 2016, Table 2.7a-b.

- East North Central—heroin, marijuana, and opiates other than heroin
- West North Central—methamphetamine/amphetamines, marijuana, and heroin
- South Atlantic—heroin, opiates other than heroin, and marijuana
- East South Central—opiates other than heroin, marijuana, and heroin
- West South Central—methamphetamine/amphetamines, marijuana, and heroin
- Mountain—methamphetamine/amphetamines, marijuana, and heroin
- Pacific—methamphetamine/amphetamines, heroin, and marijuana
- Treatment admission rates for 2015 were higher for primary alcohol abuse than for any of the major illicit drugs in 31 of the 47 reporting states and jurisdictions. The exceptions where an illicit drug admission rate was higher than the alcohol admission rate were: Alabama (marijuana); Arkansas, California, Hawaii, Idaho, and Oklahoma (methamphetamine/amphetamines); Connecticut, Kentucky, Maryland, Massachusetts, New Hampshire, New Jersey, and Ohio (heroin); Delaware and Louisiana (other/none specified); and Tennessee (opiates other than heroin).
- In the 31 states and jurisdictions where admission rates for primary alcohol abuse were higher than the rate for any illicit drug, the primary illicit drugs with the highest treatment admission rates were:
 - Marijuana—Indiana, Iowa, Mississippi, Missouri, North Carolina, North Dakota, South Dakota, Texas, and Virginia
 - Heroin—Alaska, District of Columbia, Illinois, Maine, Michigan, New York, Puerto Rico, Rhode Island, Vermont, Washington, and Wisconsin
 - Opiates other than heroin—Florida and West Virginia
 - Methamphetamine/amphetamines—Arizona, Colorado, Minnesota, Montana, Nebraska, Nevada, Utah, and Wyoming
 - Other/none specified—New Mexico

Table 2.4 presents the 2015 treatment admission rates by primary substance, adjusted for age, gender, and race/ethnicity to the U.S. population in 2010 by Census region, Census division, and state or jurisdiction. Adjusted rates take into account the different admission rates among population subgroups and the different proportions of the subgroups in each region, division, state, or jurisdiction. The adjusted rates are the rates that would be observed if each region, division, state, or jurisdiction had the same distribution of subgroups as the standardized U.S. population in 2010.

- Adjustment of the 2015 treatment admission rates for age, gender, and race/ethnicity did not change the relative ranking of alcohol and illicit drugs for the United States as a whole or for most of the Census divisions.
- Adjustment of the 2015 treatment admission rates for age, gender, and race/ethnicity did not change the relative ranking of alcohol and illicit drugs for most states. Of the 46 reporting states and jurisdictions (Puerto Rico is not included), 17 states' relative ranking of alcohol and illicit drugs changed after adjusting for population composition of admissions.

CHAPTER 3

CHARACTERISTICS OF SUBSTANCE ABUSE TREATMENT ADMISSIONS AGED 12 AND OLDER, BY STATE OR JURISDICTION AND PRIMARY SUBSTANCE OF ABUSE: 2015

This chapter presents data on the demographic characteristics of substance abuse treatment admissions aged 12 and older from the Treatment Episode Data Set (TEDS) by primary substance of abuse for individual states and jurisdictions.

As noted previously, comparisons between and across states and jurisdictions should be made with caution. There are many factors (e.g., facilities included, clients included, ability to track multi-service episodes, services offered, and completeness and timeliness of reporting) that can affect comparability. See Appendix A for a full discussion.

Tables 3.1a–3.47a present, for each state or jurisdiction reporting admissions to TEDS for 2015, the number of admissions aged 12 and older with selected demographic characteristics (gender, age group, and race/ethnicity) by primary substance of abuse.

Tables 3.1b–3.47b present, for each state or jurisdiction reporting admissions to TEDS for 2015, the percentage distribution of demographic characteristics (gender, age group, and race/ethnicity) by primary substance of abuse for admissions aged 12 and older.

Figures 8–59 depict, for each individual state or jurisdiction, the percentage distribution of admissions aged 12 and older for selected primary substances for 2005 through 2015.

-- Quantity is zero; ‡ No data, or less than a full calendar year of data, submitted; *n/c* Not collected. Tennessee began disaggregating heroin admissions from other opiates in July 2009. In this report, Tennessee's 2009 heroin admissions are included in the other opiates category since there is less than a full year of disaggregated heroin data.

¹ Admissions reported for Census regions and divisions will not sum to the total number of admissions because Puerto Rico is not included in any Census region or division.

NOTE: Based on administrative data reported to TEDS by all reporting states and jurisdictions. Comparisons among states should be made with caution.

-- Quantity is zero; ‡ No data, or less than a full calendar year of data, submitted.

¹ Admissions reported for Census regions and divisions will not sum to the total number of admissions because Puerto Rico is not included in any Census region or division.

² Tennessee included heroin admissions in other opiates through June 2009. In this report, Tennessee's 2009 heroin admissions are still included in the other opiates category since there is less than a full year of disaggregated heroin data.

NOTES: Based on administrative data reported to TEDS by all reporting states and jurisdictions. Comparisons among states should be made with caution. Non-heroin opiates/synthetics include codeine, hydrocodone, hydromorphone, meperidine, morphine, opium, oxycodone, pentazocine, propoxyphene, tramadol, and any other drug with morphine-like effects. Non-prescription use of methadone is not included.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 11.01.16.

- - Quantity is zero; ‡ No data, or less than a full calendar year of data, submitted; † Less than 1 per 100,000 population.

¹ Tennessee included heroin admissions in other opiates through June 2009. In this report, Tennessee's 2009 heroin admissions are still included in the other opiates category since there is less than a full year of disaggregated heroin data.

NOTES: Based on administrative data reported to TEDS by all reporting states and jurisdictions. Comparisons among states should be made with caution. Non-heroin opiates/synthetics include codeine, hydrocodone, hydromorphone, meperidine, morphine, opium, oxycodone, pentazocine, propoxyphene, tramadol, and any other drug with morphine-like effects. Non-prescription use of methadone is not included.

SOURCES: CBHSQ, SAMHSA, TEDS. Data received through 11.01.16. Population: U.S. Census Bureau, SC-EST2010-agesex-res, SC-EST2015-agesex-res, and SC-EST2015-ALLDATA6-ALL: Annual Estimates of the Resident Population by Single-Year of Age, Sex, Race and Hispanic origin for the U.S. and States: April 1, 2005 to July 1, 2015; SC-EST2015-agesex-res: Annual Estimates of the Resident Population by Single Year of Age and Sex for the U.S. and States: April 1, 2005 to July 1, 2015; PRC-EST2010-AGESEX-RES and PRC-EST2015-AGESEX-RES: Annual Estimates of the Resident Population by Single-Year of Age and Sex for Puerto Rico: April 1, 2005 to July 1, 2015; PEP_2015_PEPSYASEX: Annual Estimates of the Resident Population by Single Year of Age and Sex for Puerto Rico Commonwealth: April 1, 2005 to July 1, 2015.

-- Quantity is zero; ‡ No data, or less than a full calendar year of data, submitted.

¹ Ambulatory, detoxification, and rehabilitation/residential types of service exclude medication-assisted opioid therapy.

² Therapy with methadone or buprenorphine is part of client's treatment plan.

³ Admissions reported for Census regions and divisions will not sum to the total number of admissions because Puerto Rico is not included in any Census region or division.

NOTE: Based on administrative data reported to TEDS by all reporting states and jurisdictions. Comparisons among states should be made with caution.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 11.01.16.

APPENDIX A

ABOUT THE TREATMENT EPISODE DATA SET (TEDS)

Introduction

This report presents data from the Treatment Episode Data Set (TEDS) on the demographic and substance abuse characteristics of admissions to substance abuse treatment. The Center for Behavioral Health Statistics and Quality (CBHSQ), Substance Abuse and Mental Health Services Administration (SAMHSA), coordinates and manages collection of TEDS data from the states.

The TEDS is a compilation of client-level data routinely collected by the individual state administrative data systems to monitor their substance abuse treatment systems. Generally, facilities that are required to report to the State Substance Abuse Agency (SSA) are those that receive public funds and/or are licensed or certified by the SSA to provide substance abuse treatment (or are administratively tracked for other reasons).

The TEDS system comprises two major components, the Admissions Data Set and the Discharge Data Set. The TEDS Admissions Data Set includes client-level data on substance abuse treatment admissions from 1992 through the present. The TEDS Discharge Data Set can be linked at record level to admissions and includes information from clients discharged in 2000 and later. For both data sets, selected data items from the individual state data files are converted to a standardized format consistent across states. These standardized data constitute TEDS.

The TEDS Admissions Data System consists of a Minimum Data Set of items collected by all states and a Supplemental Data Set where individual data items are reported at the states' option.

The Minimum Data Set consists of 19 items that include:

- Demographic information
- Primary, secondary, and tertiary substances and the usual route of administration, frequency of use, and age at first use
- Source of referral to treatment
- Number of prior treatment episodes
- Service type, including planned use of medication-assisted opioid therapy

The Supplemental Data Set consists of 17 items that include psychiatric, social, and economic measures.

History

National-level data collection on admissions to substance abuse treatment was first mandated in 1972 under the Drug Abuse Office and Treatment Act, P.L. 92-255. This act initiated federal funding for drug treatment and rehabilitation and required reporting on clients entering drug (but not alcohol)

abuse treatment. The Client-Oriented Data Acquisition Process (CODAP) was developed to collect admission and discharge data directly from federally-funded drug treatment programs. (Programs for treatment of alcohol abuse were not included.) Reporting was mandatory for all such programs, and data were collected using a standard form. CODAP included all clients in federally-funded programs regardless of individual funding source. Reports were issued from 1973 to 1981 based on data from 1,800 to 2,000 programs, including some 200,000 annual admissions.

In 1981, collection of national-level data on admissions to substance abuse treatment was discontinued because of the introduction of the Alcohol, Drug Abuse, and Mental Health Services (ADMS) Block Grant. The Block Grant transferred federal funding from individual programs to the states for distribution, and it included no data reporting requirement. Participation in CODAP became voluntary; although several states submitted data through 1984, the data were in no way nationally representative.

In 1988, the Comprehensive Alcohol Abuse, Drug Abuse, and Mental Health Amendments (P.L. 100-690) established a revised Substance Abuse Prevention and Treatment (SAPT) Block Grant and mandated federal data collection on clients receiving treatment for either alcohol or drug abuse. The TEDS data collection effort represents the federal response to this mandate. TEDS began in 1989 with the issue of 3-year development grants to states.

State Data Collection Systems

TEDS is an exceptionally large and powerful data set that covers a significant proportion of all admissions to substance abuse treatment. TEDS is a compilation of data collected through the individual data collection systems of the State Substance Abuse Agencies (SSA) for substance abuse treatment. States have cooperated with the federal government in the data collection process, and substantial progress has been made toward developing a standardized data set. However, because each state system is unique and each state has unique powers and mandates, significant differences exist among state data collection systems. These differences are compounded by evolving health care payment systems, so state-to-state comparisons must be made with extreme caution.

The number and client mix of TEDS admissions do not represent the total national demand for substance abuse treatment or the prevalence of substance abuse in the general population.

States differ widely in the amount of public funding available for substance abuse treatment and in the constraints placed on the use of funds. States may be directed to target special populations such as pregnant women or adolescents. Where funds are limited, states may be compelled to exercise triage in admitting persons to treatment, admitting only those with the most “severe” problems. In states with higher funding levels, a larger proportion of the population in need of treatment may be admitted, including the less severely impaired.

States may include or exclude reporting by certain sectors of the treatment population, and these sectors may change over time. For example, treatment programs based in the criminal justice system may or may not be administered through the SSA. Detoxification facilities, which can generate large numbers of admissions, are not uniformly considered treatment facilities and are not uniformly reported by all states.

Appendix Table 1 presents key characteristics of state data collection systems for 2015. However, these characteristics can change as state substance abuse treatment systems change, and thus may be responsible for some year-to-year variation within states.

- *Facilities included.* The scope of facilities included in TEDS is affected by differences in state licensure, certification, and accreditation practices, and disbursement of public funds. Most SSAs require facilities that receive state/public funding (including Federal Block Grant funds) for the provision of alcohol and/or drug treatment services to report data to the SSA. Generally this funding is distributed by the SSA but may be distributed by another public agency.
 - Some SSAs regulate private facilities, methadone clinics, and/or individual practitioners and require them to report TEDS data. Others do not because of the difficulty in obtaining data from these facilities, although these facilities may report voluntarily.
 - Facilities operated by federal agencies (e.g., the Bureau of Prisons, the Department of Defense, and the Department of Veterans Affairs) generally do not report TEDS data to the SSA, although some facilities operated by the Indian Health Service are included.
 - Hospital-based substance abuse treatment facilities are frequently not licensed through the SSA and do not report TEDS data.
 - Correctional facilities (state prisons and local jails) are monitored by the SSA and report TEDS data in some states but not in others.
- The primary goal of TEDS is to monitor the characteristics of clients admitted to planned, continuing treatment regimens. Thus early intervention and crisis intervention programs that do not lead to enrollment in continued treatment are excluded from TEDS.
- *Clients included.* About 60 percent of states reported data on all admissions to all eligible facilities, although some reported only, or largely, admissions financed by public funds. TEDS is an admission-based system; therefore, TEDS admissions do not represent individuals. For example, an individual admitted to treatment twice within a calendar year would be counted as two admissions.
- *Ability to track multi-service episodes.* The goal for the TEDS system is to enumerate treatment episodes by distinguishing the initial admission of a client from his/her subsequent transfer to a different service type (e.g., from rehabilitation/residential treatment to outpatient) within a single continuous treatment episode. Thus TEDS records are ideally coded as admissions if they represent the initial treatment service in a treatment episode and as transfers if they represent a change in service type or a change in provider without an interruption in treatment.

This requires, however, that clients be assigned unique IDs that can be linked across providers; not all states are legally and/or technologically able to do this. Most states can identify transfers when there is a change in service type within the structure of a given provider. However, fewer can also identify a transfer involving a change of provider. Several states do not track transfers, but instead report as transfers those clients who are discharged and readmitted within a specified (state-specific) time period.

Because some admission records in fact may represent transfers, the number of admissions reported probably overestimates the number of treatment episodes. Some states reported a

limited data set on codependents of substance abusers entering treatment. On average, from 2005 to 2015, 89 percent of all records submitted were client admissions, 10 percent were client transfers, and 1 percent were codependents of substance abusers.

- *Services offered.* A state's mix of service types (e.g., outpatient, detoxification, rehabilitation/residential, opioid therapy) can have a significant effect on its admission rate. There is higher client turnover and therefore more admissions in short-stay services such as detoxification than in long-stay services such as outpatient or long-term residential treatment. Admission rates for individual substances of abuse may be affected as well (e.g., detoxification is more closely associated with alcohol or heroin use than with use of other substances).
- *Completeness and timeliness of reporting.* SAMHSA, in reporting TEDS data, must balance timeliness of reporting and completeness of the data set. There may be a time lag in the publication of SAMHSA's annual reports because preparation cannot begin until states have completed their data submission for that year. States in turn rely on individual facilities to report in a timely manner so they can submit TEDS data to SAMHSA at regular intervals.

Admissions from facilities that report late to the states will appear in a later data submission to SAMHSA, so the number of annual admissions in a report may be higher in subsequent reports. The number of additional admissions is small because of the time lag in issuing the report. Thus the percentage distributions will change very little in subsequent reports, although Census region-, Census division-, and state-level data may change somewhat more for states with reporting delays (this applies to state report only).

States continually review and improve their data collection and processing. When systematic errors are identified, states may revise or replace historical TEDS data files. While this process represents an improvement in the data system, the historical statistics in this report will differ slightly from those in earlier reports.

Appendix Tables 2 and 3 indicate the proportions of records by state or jurisdiction for which valid data were received for 2015. States are expected to report all variables in the Minimum Data Set (Appendix Table 2). Variables in the Supplemental Data Set are collected at the states' option (Appendix Table 3).

Report-Specific Considerations

- The report focuses on treatment admissions for substance abusers, so admissions for treatment as a codependent of a substance abuser are excluded. Records for identifiable transfers within a single treatment episode are also excluded.
- Records with partially complete data have been retained. Where records include missing or invalid data for a specific variable other than primary, secondary, or tertiary substance, those records are excluded from tabulations of that variable. For substance variables, missing or unknown responses were included in the category "Other." The total number of admissions on which a percentage distribution is based is reported in each table.
- Records with partially complete data have been retained. If a variable is coded with a value indicating the data were missing or miscoded, the record is excluded from tabulations of that

variable. The total number of records on which a percentage distribution is based is reported in each table.

- Variables in the Supplemental Data Set are not collected by all states. States that did not collect a specific variable are excluded from tabulations of that variable. The total number of admissions on which a percentage distribution is based is reported in each table.
- The *primary, secondary, and tertiary substances of abuse* reported to TEDS are those substances that led to the treatment episode and not necessarily a complete enumeration of all substances used at the time of admission.
- Primary alcohol admissions are classified as “Alcohol only” or “Alcohol with secondary drug abuse.” The latter indicates a primary alcohol admission with a specified secondary and/or tertiary drug. All other primary alcohol substances admissions are classified as “Alcohol only.”
- Cocaine admissions are classified according to usual route of administration as smoked and other route. Smoked cocaine primarily represents crack or rock cocaine, but it can also include cocaine hydrochloride (powder cocaine) when it is free-based. Non-smoked cocaine includes all cocaine admissions where cocaine is injected, inhaled, or taken orally; it also includes admissions where the route of administration is unknown or not collected. Thus the TEDS estimate of admissions for smoked cocaine is conservative.
- Methamphetamine/amphetamine admissions include admissions for both substances, but are primarily for methamphetamine. In 2015, methamphetamine constituted about 94 percent of combined methamphetamine/amphetamine admissions. Texas, which has large numbers of methamphetamine admissions, reported them as *Other amphetamines* until 2006.
- For this report, secondary and tertiary substances (see Appendix B) are grouped and referred to as secondary substances.
- Significant changes in the clients or facilities reported to TEDS by some states and jurisdictions can result in changes in the number of admissions large enough to influence trends.

Appendix Table 1. State data system reporting characteristics: 2015

State or jurisdiction	Facilities reporting TEDS data to the state SSA		Eligible clients	Change of service within episode	Change of provider within episode
	Facilities required to report to the state SSA ¹	Facilities reporting voluntarily to the state SSA			
Alabama	Facilities that receive state/public funding	None	All clients in facility	Admission	Admission
Alaska	Facilities that receive state/public funding	None	All clients in facility who receive substance abuse treatment services	Admission (for most providers) Transfer (for some providers)	Admission
Arizona	Facilities that receive state/public funding	None	State/public-funded clients only	<i>n/a</i> ²	<i>n/a</i> ²
Arkansas	Facilities that are licensed by state SSA	State Community Correction facilities Some private facilities	All clients in a licensed facility	Transfer	Admission
California	Facilities that receive state funding All licensed narcotic treatment facilities	None	All clients in facility except DUI	Transfer	Transfer
Colorado	State-licensed facilities Methadone facilities Community-based juvenile and adult justice treatment programs, except institutionally-based	None	All clients receiving substance abuse treatment services in facility	Admission	Admission
Connecticut	Facilities that receive state/public funding (including corrections) Facilities serving adults that are licensed by state Dept of Public Health Some facilities treating youth < 18 General hospitals funded by SSA	None	All clients in facility	Admission	Admission
Delaware	Facilities that receive state/public funding, excluding: - Child/youth services - Most Medicaid-funded services - Most criminal justice system services	None	State/public-funded clients only	Admission	Admission
Dist. of Columbia	Facilities that receive state/public funding	None	State/public-funded clients only	Transfer	Admission
Florida	Facilities that receive state/public funding	None	State/public-funded clients only	Transfer	Admission
Georgia	Facilities that receive SAPT/BG, state, and Medicaid funding through the state SSA (This includes Medicaid eligible aged blind, and disabled adults and youth. Medicaid individuals in Managed Care Plans are excluded.)	None	SSA funded clients with SA or co-occurring SA and mental disorders	<i>n/a</i> ³	Admission
Hawaii	Facilities that receive state/public funding	None	All clients in facility	Admission	Admission

-- Quantity is zero; ** Less than 1 percent; ‡ No data, or less than a full calendar year of data, submitted.

¹ Percentage of admissions reporting a specified primary substance.

⁴ Percentage of female admissions.

² Percentage of admissions reporting a specified secondary substance.

⁵ Percentage of admissions reporting employment status as "Not in labor force."

³ Percentage of admissions reporting a specified tertiary substance.

⁶ Percentage of admissions reporting referral source as "Court/criminal justice referral."

NOTES: Based on administrative data reported to TEDS by all reporting states and jurisdictions. Comparisons among states should be made with caution.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 11.01.16.

APPENDIX B

TEDS DATA ELEMENTS

TEDS MINIMUM DATA SET

AGE OF FIRST USE (OF PRIMARY, SECONDARY, AND TERTIARY SUBSTANCE)

For drugs other than alcohol, these fields identify the age at which the client first used the respective substance. For alcohol, these fields record the age of first intoxication.

- **0**—Indicates a newborn with a substance dependency problem
- **1-95**—Indicates the age at first use

CLIENT OR CODEPENDENT/COLLATERAL

Specifies whether the admission record is for a substance abuse treatment client, or a person being treated for his/her codependency or collateral relationship with a substance abuser.

- **Client**—Must meet all of the following criteria:
 - Has an alcohol or drug related problem
 - Has completed the screening and intake process
 - Has been formally admitted for treatment or recovery service in an alcohol or drug treatment unit
 - Has his or her own client record

A person is not a client if he or she has completed only a screening or intake process or has been placed on a waiting list.

- **Codependent/collateral**—Must meet all of the following criteria:
 - Has no alcohol or drug related problem
 - Is seeking services because of problems arising from his or her relationship with an alcohol or drug user
 - Has been formally admitted for service to a treatment unit
 - Has his or her own client record or has a record within a primary client record

GUIDELINES: Reporting of data for *Codependent/collaterals* is optional. If the state opts to report codependent/collateral clients, the mandatory fields are *State code*, *Provider identifier*, *Client identifier*, *Client transaction type*, *Codependent/collateral*, and *Date of admission*. Reporting of the

remaining fields in the TEDS Minimum and Supplemental Data Sets is optional. For all items not reported, the data field should be coded with the appropriate “Not collected” or “Not applicable” code.

If a substance abuse client with an existing record in TEDS becomes a codependent, a new client record should be submitted indicating that the client has been admitted as a codependent, and vice versa.

If a record does not include a value for this field, it is assumed to be a substance abuse client record.

DATE OF ADMISSION

The day when the client receives his or her first direct treatment or recovery service. For transfers, this is the date when client receives his or her first direct treatment after the transfer has occurred.

DEMOGRAPHICS

AGE

Identifies client’s age at admission. Derived from client’s date of birth and date of admission.

- **0**—Indicates a newborn with a substance dependency problem
- **1-95**—Indicates the age at admission

EDUCATION

Specifies the highest school grade (number of school years) completed by the client.

- **0**—Less than one grade completed
- **1-25**—Years of school (highest grade) completed. For General Equivalency Degree, use *12*.

GUIDELINES: States that use specific categories for designating education level should map their codes to a logical number of years of school completed. For Associate’s Degree, use *14*. For Bachelor’s Degree, use *16*.

EMPLOYMENT STATUS

Identifies the client’s employment status at the time of admission or transfer.

- **Full time**—Working 35 hours or more each week, including active duty members of the uniformed services
- **Part time**—Working fewer than 35 hours each week
- **Unemployed**—Looking for work during the past 30 days, or on layoff from a job
- **Not in labor force**—Not looking for work during the past 30 days, or a student, homemaker, disabled, retired, or an inmate of an institution. Clients in this category are further defined in the TEDS Supplemental Data Set item *Detailed not in labor force*.

GUIDELINES: Seasonal workers are coded in this category based on their employment status at admission.

ETHNICITY

Identifies client's specific Hispanic origin.

- **Cuban**—Of Cuban origin, regardless of race
- **Hispanic (specific origin not specified)**—Of Hispanic origin, but specific origin not known or not specified
- **Mexican**—Of Mexican origin, regardless of race
- **Not of Hispanic origin**
- **Other specific Hispanic**—Of known Central or South American or any other Spanish cultural origin (including Spain), other than Puerto Rican, Mexican, or Cuban, regardless of race
- **Puerto Rican**—Of Puerto Rican origin, regardless of race

GUIDELINES: If a state does not collect specific Hispanic detail, code *Ethnicity* for Hispanics as *Hispanic (specific origin not specified)*.

RACE

Specifies the client's race.

- **Alaska Native (Aleut, Eskimo, Indian)**—Origins in any of the original people of Alaska
- **American Indian (other than Alaska Native)**—Origins in any of the original people of North America and South America (including Central America) and who maintain cultural identification through tribal affiliation or community attachment
- **Asian or Pacific Islander**—Origins in any of the original people of the Far East, the Indian subcontinent, Southeast Asia, or the Pacific Islands
 - **Asian**—Origins in any of the original people of the Far East, the Indian subcontinent, or Southeast Asia, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Philippine Islands, Thailand, and Vietnam
 - **Native Hawaiian or other Pacific Islander**—Origins in any of the original people of Hawaii, Guam, Samoa, or other Pacific Islands
- **Black or African American**—Origins in any of the black racial groups of Africa
- **White**—Origins in any of the original people of Europe, North Africa, or the Middle East
- **Other single race**—Client is not classified in any category above or whose origin group, because of area custom, is regarded as a racial class distinct from the above categories
- **Two or more races**—For use when the state data system allows multiple race selection and more than one race is indicated

GUIDELINES: If a state does not distinguish between *American Indian* and *Alaska Native*, both should be coded as *American Indian*. If a state does not distinguish between *Asian* and *Native Hawaiian or other Pacific Islander*, both should be coded as *Asian or Pacific Islander*. For states that collect multiple races: a) when a single race is designated, the specific race code should be used; b) if the state collects a primary or preferred race along with additional races, the code for the primary/preferred race should be used; c) if the state uses a system such as an algorithm to select a single race when multiple races have been designated, the same system may be used to determine the race code for TEDS. When two or more races have been designated and neither (b) nor (c) above apply, the TEDS code for *Two or more races* should be used.

SEX

Identifies client's gender.

- Male
 - Female
-

FREQUENCY OF USE (OF PRIMARY, SECONDARY, AND TERTIARY SUBSTANCES)

These fields identify the frequency of use of the respective *Substance problems*.

- **No use in the past month**
- **1-3 times in the past month**
- **1-2 times in the past week**
- **3-6 times in the past week**
- **Daily**

MEDICATION-ASSISTED OPIOID THERAPY

Identifies whether the use of methadone or buprenorphine is part of the client's treatment plan.

- **Yes**
- **No**

NUMBER OF PRIOR TREATMENT EPISODES

Indicates the number of previous treatment episodes the client has received in any drug or alcohol program. Changes in service for the same episode (transfers) should *not* be counted as separate prior episodes.

- **0 previous episodes**
- **1 previous episode**
- **2 previous episodes**

- **3 previous episodes**
- **4 previous episodes**
- **5 or more previous episodes**

GUIDELINES: It is preferred that the number of prior treatments be a self-reporting field collected at the time of client intake. However, this data item may be derived from the state data system if the system has that capability and episodes can be counted for at least several years.

PRINCIPAL SOURCE OF REFERRAL

Describes the person or agency referring the client to the alcohol or drug abuse treatment program.

- **Alcohol/drug abuse care provider**—Any program, clinic, or other health care provider whose principal objective is treating clients with substance abuse problems, or a program whose activities are related to alcohol or other drug abuse prevention, education, or treatment
- **Court/criminal justice referral/DUI/DWI**—Any police official, judge, prosecutor, probation officer, or other person affiliated with a federal, state, or county judicial system. Includes referral by a court for DWI/DUI, clients referred in lieu of or for deferred prosecution, or during pretrial release, or before or after official adjudication. Includes clients on pre-parole, pre-release, work or home furlough, or TASC. Client need not be officially designated as “on parole.” Includes clients referred through civil commitment. Client referrals on this category are further defined in the TEDS Supplemental Data Set item *Detailed criminal justice referral*.
- **Employer/EAP**—A supervisor or an employee counselor
- **Individual (includes self-referral)**—Includes the client, a family member, friend, or any other individual who would not be included in any of the following categories; includes self-referral due to pending DWI/DUI
- **Other community referral**—Community or religious organization or any federal, state, or local agency that provides aid in the areas of poverty relief, unemployment, shelter, or social welfare. Self-help groups such as Alcoholics Anonymous (AA), Al-Anon, and Narcotics Anonymous (NA) are also included in this category. Defense attorneys are included in this category.
- **Other health care provider**—A physician, psychiatrist, or other licensed health care professional; or a general hospital, psychiatric hospital, mental health program, or nursing home
- **School (educational)**—A school principal, counselor, or teacher; or a student assistance program (SAP), the school system, or an educational agency

SUBSTANCE PROBLEM (PRIMARY, SECONDARY, OR TERTIARY)

These fields identify the client’s primary, secondary, and tertiary substance problems. Each *Substance problem* (primary, secondary, and tertiary) has associated fields for *Route of administration*, *Frequency of use*, *Age at first use*, and the TEDS Supplemental Data Set item *Detailed drug code*.

- **Alcohol**
- **Barbiturates**—Amobarbital, pentobarbital, phenobarbital, secobarbital, etc.
- **Benzodiazepines**—Includes alprazolam, chlordiazepoxide, clonazepam, clorazepate, diazepam, flunitrazepam, flurazepam, halazepam, lorazepam, oxazepam, prazepam, temazepam, triazolam, and other unspecified benzodiazepines
- **Cocaine/crack**
- **Heroin**
- **Inhalants**—Includes chloroform, ether, gasoline, glue, nitrous oxide, paint thinner, etc.
- **Marijuana/hashish**—Includes THC and any other *cannabis sativa* preparations
- **Methamphetamine**
- **Non-prescription methadone**
- **Other amphetamines**—Includes amphetamines, MDMA, phenmetrazine, and other unspecified amines and related drugs
- **Other hallucinogens**—Includes LSD, DMT, STP, hallucinogens, mescaline, peyote, psilocybin, etc.
- **Other non-barbiturate sedatives or hypnotics**—Includes chloral hydrate, ethchlorvynol, glutethimide, methaqualone, and other non-barbiturate sedatives or hypnotics
- **Other non-benzodiazepine tranquilizers**—Includes meprobamate and other non-benzodiazepine tranquilizers
- **Other opiates and synthetics**—Includes buprenorphine, codeine, hydrocodone, hydromorphone, meperidine, morphine, opium, oxycodone, pentazocine, propoxyphene, tramadol, and any other drug with morphine-like effects
- **Other stimulants**—Includes methylphenidate and any other stimulants
- **Over-the-counter medications**—Includes aspirin, cough syrup, diphenhydramine and other antihistamines, sleep aids, and any other legally obtained nonprescription medication
- **PCP**—Phencyclidine
- **Other**—Includes diphenylhydantoin/phenytoin, GHB/GBL, ketamine, etc.
- **None**

GUIDELINES: Substance problems are further defined in the TEDS Supplemental Data Set item *Detailed drug code*. For guidance on which specific substances to include in the substance categories, please refer to the detailed drug categories listed for *Detailed drug code*.

- *Substance problem and Route of administration:*

- For states that do collect *Detailed drug code*—Records may have duplicate *Substance problems* and identical *Route of administration* IF the corresponding *Detailed drug codes* are different or are “multiple” drug codes
- For states that do not collect *Detailed drug code*—A record may not have duplicate *Substance problems* with identical *Routes of administration*

TRANSACTION TYPE

Identifies whether a record is for an initial admission or a transfer/change in service. Note: Some states may use other terminology such as “initial admission” and “transfer admission” in place of “admission” and “transfer.”

- **A**—Admission
- **T**—Transfer/change in service

GUIDELINES: For TEDS, a treatment episode is defined as that period of service between the beginning of treatment for a drug or alcohol problem and the termination of services for the prescribed treatment plan. The episode includes one admission (when services begin) and at least one discharge (when services end). Within a treatment episode, a client may transfer to a different service, facility, provider, program, or location. Each admission and transfer record should have an associated discharge record.

When it is feasible for the state to identify transfers, they should be reported as transfers in admissions data submissions. When admissions and transfers cannot be differentiated in a state data system, such changes in service or facility should be reported to TEDS as admissions.

Data set considerations for transfers:

- All fields from the transfer record should be updated to reflect values at the time of transfer except the following fields, which must have the same values as in the associated (preceding) admission record: *Client ID*, *Codependent/collateral*, *Date of birth*, *Sex*, *Race*, and *Ethnicity*. If a field cannot be updated, it should be transmitted to TEDS with its value from the associated (preceding) admission record.
- *Date of admission* is defined as the date services begin after the transfer to another service or facility.

TYPE OF TREATMENT SERVICE

Describes the type of service and treatment setting in which the client is placed at the time of admission or transfer.

- **Ambulatory, detoxification**—Outpatient treatment services providing for safe withdrawal in an ambulatory setting (pharmacological or non-pharmacological)
- **Ambulatory, intensive outpatient**—As a minimum, the client must receive treatment lasting two or more hours per day for three or more days per week

- **Ambulatory, non-intensive outpatient**—Ambulatory treatment services including individual, family, and/or group services, and may include pharmacological therapies
- **Detoxification, 24-hour service, free-standing residential**—24-hour per day services in a non-hospital setting providing for safe withdrawal and transition to ongoing treatment
- **Detoxification, 24-hour service, hospital inpatient**—24-hour per day medical acute care services in a hospital setting for detoxification of persons with severe medical complications associated with withdrawal
- **Rehabilitation/residential, hospital (other than detoxification)**—24-hour per day medical care in a hospital facility in conjunction with treatment services for alcohol and other drug abuse and dependency
- **Rehabilitation/residential, short-term (30 days or fewer)**—Typically, 30 days or less of non-acute care in a setting with treatment services for alcohol and other drug abuse and dependency
- **Rehabilitation/residential, long-term (more than 30 days)**—Typically, more than 30 days of non-acute care in a setting with treatment services for alcohol and other drug abuse and dependency; this may include transitional living arrangements such as halfway houses

USUAL ROUTE OF ADMINISTRATION (OF PRIMARY, SECONDARY, AND TERTIARY SUBSTANCES)

These fields identify the usual route of administration of the respective *Substance problems*.

- **Inhalation**
- **Injection (IV or intramuscular)**
- **Oral**
- **Smoking**
- **Other**

TEDS SUPPLEMENTAL DATA SET

DAYS WAITING TO ENTER TREATMENT

Indicates the number of days from the first contact or request for service until the client was admitted and the first clinical service was provided.

- **0-996**—Number of days waiting

GUIDELINES: This item is intended to capture the number of days the client must wait to begin treatment because of program capacity, treatment availability, admissions requirements, or other program requirements. It should not include time delays caused by client unavailability or client failure to meet any requirement or obligation.

DETAILED CRIMINAL JUSTICE REFERRAL

This item gives more detailed information about those clients who are coded as “Court/criminal justice referral/DUI/DWI” in the TEDS Minimum Data Set item *Principal source of referral*.

- **Diversionary program** (e.g., TASC)
- **DUI/DWI**
- **Other court (not state or federal)**
- **Other recognized legal entity** (e.g., local law enforcement agency, corrections agency, youth services, review board/agency)
- **Prison**
- **Probation/parole**
- **State/federal court**
- **Other**
- **Not applicable**

DETAILED DRUG CODE (PRIMARY, SECONDARY, AND TERTIARY)

These fields identify, in greater detail, the drug problems recorded in the TEDS Minimum Data Set item *Substance problem*.

- **Aerosols**
- **Alcohol**

- **Alprazolam (Xanax)**
- **Amphetamines**
- **Anesthetics**
- **Chlordiazepoxide (Librium)**
- **Clonazepam (Klonopin, Rivotril)**
- **Clorazepate (Tranxene)**
- **Codeine**
- **Crack**
- **Diazepam (Valium)**
- **Diphenhydramine**
- **Diphenylhydantoin/phenytoin (Dilantin)**
- **Ethchlorvynol (Placidyl)**
- **Flunitrazepam (Rohypnol)**
- **Flurazepam (Dalmane)**
- **GHB/GBL (gamma-hydroxybutyrate, gamma-butyrolactone)**
- **Glutethimide (Doriden)**
- **Heroin**
- **Hydrocodone (Vicodin)**
- **Hydromorphone (Dilaudid)**
- **Ketamine (Special K)**
- **Lorazepam (Ativan)**
- **LSD**
- **Marijuana/hashish**
- **Meperidine (Demerol)**
- **Meprobamate (Miltown)**
- **Methadone (non-prescription)**
- **Methamphetamine/speed**
- **Methaqualone**
- **Methylenedioxymethamphetamine (MDMA, Ecstasy)**
- **Methylphenidate (Ritalin)**
- **Nitrites**

DETAILED NOT IN LABOR FORCE

This item gives more detailed information about those clients who are coded as “Not in labor force” in the TEDS Minimum Data Set item *Employment Status*.

- **Disabled**
- **Homemaker**
- **Inmate of institution** (prison or institution that keeps a person, otherwise able, from entering the labor force)
- **Retired**
- **Student**

- **Other**
- **Not applicable**

DSM CRITERIA DIAGNOSIS

The diagnosis of the substance abuse problem from the American Psychiatric Association's *Diagnostic and Statistical Manual of Mental Disorders*. DSM-IV is preferred, but use of the Third Edition or ICD codes is permissible.

EXPECTED/ACTUAL PRIMARY SOURCE OF PAYMENT

Identifies the primary source of payment for this treatment episode.

- **Blue Cross/Blue Shield**
- **Medicaid**
- **Medicare**
- **Other government payments**
- **Other health insurance companies**
- **Self-pay**
- **Worker's Compensation**
- **No charge (free, charity, special research, or teaching)**
- **Other**

FREQUENCY OF ATTENDANCE AT SELF-HELP PROGRAMS

This field records the number of times the client has attended a self-help program in the 30 days preceding the date of admission to treatment services.

- **No attendance in the past month**
- **1-3 times in the past month**
- **4-7 times in the past month**
- **8-15 times in the past month**
- **16-30 times in the past month**
- **Some attendance in the past month, but frequency unknown**

HEALTH INSURANCE

Specifies the client's health insurance (if any). The insurance may or may not cover alcohol or drug treatment.

- **Blue Cross/Blue Shield**
- **Health maintenance organization (HMO)**
- **Medicaid**
- **Medicare**
- **Private insurance** (other than Blue Cross/Blue Shield or an HMO)
- **Other** (e.g., TRICARE)
- **None**

LIVING ARRANGEMENTS

Specifies whether the client is homeless, living with parents, in a supervised setting, or living on his or her own.

- **Dependent living**—Clients living in a supervised setting such as a residential institution, halfway house, or group home, and children (under age 18) living with parents, relatives, or guardians, or in foster care
- **Homeless**—Clients with no fixed address; includes shelters
- **Independent living**—Clients living alone or with others without supervision

MARITAL STATUS

Describes the client's marital status. The following categories are compatible with the U.S. Census.

- **Divorced**
- **Never married**—Includes clients whose only marriage was annulled
- **Now married**—Includes those living together as married
- **Separated**—Includes those separated legally or otherwise absent from spouse because of marital discord
- **Widowed**

NUMBER OF ARRESTS IN 30 DAYS PRIOR TO ADMISSION

This field records the number of arrests in the 30 days preceding the date of admission to treatment services.

- **00-96**—Number of arrests

PREGNANT AT TIME OF ADMISSION

Specifies whether the client was pregnant at the time of admission.

- **Yes**
- **No**
- **Not applicable.** Use this code for male clients

PSYCHIATRIC PROBLEM IN ADDITION TO ALCOHOL OR DRUG PROBLEM

Identifies whether the client has a psychiatric problem in addition to his or her alcohol or drug use problem.

- **Yes**
- **No**

SOURCE OF INCOME SUPPORT

Identifies the client's principal source of financial support. For children under 18, this field indicates the parents' primary source of income/support.

- **Disability**
- **Public assistance**
- **Retirement/pension**
- **Wages/salary**
- **Other**
- **None**

VETERAN STATUS

Identifies whether the client has served in the uniformed services (Army, Navy, Air Force, Marines, Coast Guard, Public Health Service Commissioned Corps, Coast and Geodetic Survey, etc.).

- **Yes**
- **No**

APPENDIX C

LIST OF CONTRIBUTORS

This report was prepared for the Center for Behavioral Health Statistics and Quality (CBHSQ), Substance Abuse and Mental Health Services Administration, U.S. Department of Health and Human Services (HHS) under Contract No. HHSS283200700048I/HHSS28342001T.

Production of the report at SAMHSA was managed by Cathie Alderks. SAMHSA contributors and reviewers, listed alphabetically, include: Cathie Alderks, Herman Alvarado, Elizabeth Hoeffel, Heydy Juarez, Sharon Liu, and Nichele Waller.
