# Introduction to the 2011 National Survey on Drug Use and Health

## Introduction

This codebook provides documentation for the 2011 National Survey on Drug Use and Health (NSDUH) data file. Prior to 2002, the survey was called the National Household Survey on Drug Abuse (NHSDA). NSDUH is sponsored by the Center for Behavioral Health Statistics and Quality (CBHSQ, formerly the Office of Applied Studies) within the Substance Abuse and Mental Health Services Administration (SAMHSA) and is conducted by RTI International, Research Triangle Park, North Carolina.<sup>1</sup>

For each variable in the 2011 data file, the codebook provides the variable name, a description of the variable, value codes and their meanings, and an unweighted univariate frequency distribution. Most of the variables originated directly as interview items. For a subset of variables created from more than one variable, the source variables and recoding specifications are provided. In addition, case identification, sampling, and data collection variables are included in the file and documented in the codebook. The variable names in this codebook are the variable names used in the dataset.

To a great extent, variable names indicate the meaning of each variable. As much as possible, variables are named consistently across surveys when the content of questions was identical or similar, or the specifications for created variables were not altered. When a variable does not have the same name across years, this is an indication that differences may exist. In such situations, analysts are advised to examine the codebook documentation in detail before conducting any analysis, particularly those that involve the following:

- analyses performed in prior years that are being replicated in the current year,
- comparison of data across multiple years, or
- use of pooled data from multiple years.

Documentation of the reasons for changing a variable's name can be found in comments above the specific variables and in corresponding appendix files within the codebook (if applicable). Typically, variable changes are documented the year they occur and in the following year if there are comparability issues to consider. However, the most current version of the documentation may not always describe relevant changes from prior years. Therefore, analysts who are doing a multiyear trend analysis are especially advised to examine documentation for all years of interest to identify any changes over time that may affect the analysis of interest. An analysis of trends is not recommended when using data where the impact of the questionnaire or methodological changes is confounded with true changes in the

---

<sup>1</sup> RTI International is a registered trademark and a trade name of Research Triangle Institute.

phenomenon being measured. If the change is considered minor and the likely impact on trend data would be minimal, then comparisons between years may be appropriate.

*Analysts also are encouraged to refer to the instrument specifications for the 2011 survey in conjunction with their review of the codebook. The specifications for the 2011 survey provide detailed information about the logic governing how respondents were routed through the questions in the interview and any changes to the instrument relative to the 2010 survey. The 2011 specifications may be found on the SAMHSA website at <https://www.samhsa.gov/data/>.*

## **Overview of NSDUH**

The 2011 NSDUH is the 31st in a series, the primary purpose of which is to measure the prevalence and correlates of drug use in the United States. This survey series provides information about the use of illicit drugs, alcohol, and tobacco among members of the noninstitutionalized U.S. civilian population aged 12 or older. Surveys have been conducted periodically since 1971, with the most recent ones in 1979, 1982, 1985, 1988, and 1990 through 2011. Currently, public use files are available for surveys from 1979 onward.

In 1999, the survey underwent a major redesign. The method of data collection was changed from a paper questionnaire administration to a computer-assisted administration. In addition, the sample design was changed from a strictly national design to a State-based sampling plan. These important changes have a major impact on the data produced from the survey. *Because of the differences in methodology and impact of the new design on data collection, only limited comparisons can be made between data from the redesigned surveys (1999 onward) and data obtained from surveys prior to 1999. Also, because of survey improvements made in 2002, the 2011 data in this file should not be compared with data collected in 2001 or earlier to assess changes over time. However, there should be no problem with comparisons between 2002 and data from subsequent data files, including this one, for measures that are comparable across the years being analyzed.*

Prior to 1999, the survey was conducted using paper-and-pencil interviewing (PAPI) methods for an interview lasting about an hour. The PAPI instrumentation consisted of a questionnaire booklet completed by an interviewer and a set of individual answer sheets completed by a respondent. All substance use questions and other sensitive questions appeared on the answer sheets, so the interviewer was unaware of the respondent's answers. Less sensitive questions concerning demographics, occupational status, household size, and composition were asked aloud by the interviewer and recorded in the questionnaire booklet.

Since 1999, the interview has been carried out using computer-assisted interviewing (CAI) methods. The survey uses a combination of computer-assisted personal interviewing (CAPI) conducted by an interviewer and audio computer-assisted self-interviewing (ACASI). For the most part, questions previously administered by an interviewer in the PAPI format are now administered by an interviewer using CAPI. Questions previously administered in the PAPI format using self-administered answer sheets are now administered using ACASI. Use of ACASI is designed to provide respondents with a highly private and confidential means of responding to questions and to increase the level of honest reporting of illicit drug use and other sensitive behaviors.

A key feature of the CAI instrument is a core and supplement structure. A core set of questions critical for basic trend measurement of prevalence estimates remains in the survey every year and comprises the first part of the interview. Supplemental questions, or modules, that can be revised, dropped, or added from year to year make up the remainder of the interview. The core consists of initial demographic items and questions pertaining to the use of tobacco, alcohol, marijuana, cocaine, crack cocaine, heroin, hallucinogens, inhalants, pain relievers, tranquilizers, stimulants, and sedatives. Supplemental items include the remaining ACASI sections and demographic questions. It should be mentioned that some of the supplemental portions of the questionnaire have remained in the survey, relatively unchanged, every year (e.g., current health insurance coverage, income). Since 1988, additional information also has been gathered about crack cocaine and about sharing needles for the injection of drugs. In addition, the consequences of using various drugs have been given considerable attention since 1985.

The target population for the 2011 survey was the same as has been defined since the 1991 survey: the civilian, noninstitutionalized population of the United States (including civilians living on military bases) who were 12 years of age or older at the time of the survey. Before 1991, the sample was drawn from the household population of the contiguous 48 States. Residents of Alaska and Hawaii were added to the sample population in 1991, as were residents of noninstitutional group quarters (e.g., college dormitories, group homes, civilians dwelling on military installations) and persons with no permanent residence (homeless people in shelters and residents of single rooms in hotels). In addition, six special-interest metropolitan statistical areas (MSAs) were oversampled in 1991. The 1992 and 1993 surveys retained the oversampling of the six MSAs and also were designed to provide quarterly as well as annual estimates.

Since 1999, the survey sample has employed a 50-State design with an independent, multistage area probability sample for each of the 50 States and the District of Columbia. In 2011, an oversample was included to help in measuring and reporting on the impact that the April 2010 Deepwater Horizon oil spill had on substance use and mental health along the gulf coast. To that end, the target sample was expanded by 2,000 cases in four Gulf Coast States (Alabama, Florida, Louisiana, and Mississippi). The eight States with the largest population (which together account for 48 percent of the total U.S. population aged 12 or older) were designated as large sample States (California, Florida, Illinois, Michigan, New York, Ohio, Pennsylvania, and Texas) with a pre-oversample target sample size of 3,600 (in the case of Florida), while the remaining 42 States and the District of Columbia had pre-oversample target sample sizes of 900. The design also oversampled youths and young adults, so that each State's sample was approximately equally distributed among three major age groups: 12 to 17 years, 18 to 25 years, and 26 years or older.

Although the design of the 2011 survey is similar to the design of the 1999 through 2001 surveys, there are important methodological differences since 2002 that affect the 2011 estimates. As noted above, the survey's name was changed from the National Household Survey on Drug Abuse (NHSDA) to the National Survey on Drug Use and Health (NSDUH) in 2002. In addition to the survey's name change, each NSDUH respondent since 2002 has been given an incentive of \$30. These changes have resulted in an improvement in the survey response rate. The changes also affected respondents' reporting of many critical items that are the basis of prevalence measures reported by the survey each year. Further, the data could have been affected

by improved data collection quality control procedures that were introduced in the survey beginning in 2001. In addition, new population data from the 2000 decennial census became available for use in NSDUH sample weighting procedures, resulting in another discontinuity between estimates since 2002 and those prior to 2002. *Analyses of the effects of each of these factors on NSDUH estimates have shown that the 2011 data in this data file should not be compared with 2001 and earlier data to assess changes over time. As noted above, however, comparisons may be made between 2002 and surveys in subsequent years, including this one.*

A description of the 2011 survey, including more detailed information on sample issues, can be found in the following NSDUH documents released in 2012:

- Center for Behavioral Health Statistics and Quality. (2012). *Results from the 2011 National Survey on Drug Use and Health: Summary of national findings* (HHS Publication No. SMA 12-4713, NSDUH Series H-44). Rockville, MD: Substance Abuse and Mental Health Services Administration.
- Center for Behavioral Health Statistics and Quality. (2012). *Results from the 2011 National Survey on Drug Use and Health: Detailed tables*. Rockville, MD: Substance Abuse and Mental Health Services Administration.
- Center for Behavioral Health Statistics and Quality. (2012). *Results from the 2011 National Survey on Drug Use and Health: Mental health detailed tables*. Rockville, MD: Substance Abuse and Mental Health Services Administration.
- Center for Behavioral Health Statistics and Quality. (2012). *Results from the 2011 National Survey on Drug Use and Health: Mental health findings* (HHS Publication No. SMA 12-4725, NSDUH Series H-45). Rockville, MD: Substance Abuse and Mental Health Services Administration.

These documents present in tabular, graphical, and narrative bullet formats some key 2011 findings on drug use prevalence by age and major demographic variables.

## **Questionnaire Changes for 2011**

There were minor changes to the NSDUH instrument in 2011 relative to 2010. Changes to the instrument in 2011 were as follows:

- In the core demographics section, the possessive form of "United States" was added to question QD10 about current military status so that this question asked, "Are you currently on active duty in the United States' armed forces, in a reserves component, or now separated or retired from either reserves or active duty?"
- In the household roster section, a "hard error" was changed to allow the interviewer to list one person in the household on the roster, despite two respondents being selected for the interview. The interviewer was asked to write a note explaining the discrepancy.

- In the health insurance section, the definition of TRICARE, CHAMPUS, and CHAMPVA was placed in parentheses, so that interviewers could choose to read this definition if the respondent had trouble answering the question.
- In the income section, the introduction to the question about total personal income was edited to remove the phrase "and then I will ask about your family income" because it was not determined at that point whether respondents would be asked about family income. For the same reason, the introduction to the question about total family income was edited to remove reference to the number of questions that respondents would receive about total family income.

The 2011 specifications may be found on the SAMHSA website (for details, see this codebook's Introduction).

## **Strengths and Limitations of NSDUH**

NSDUH is the only study that annually produces estimates of drug use among civilian members of the noninstitutionalized population in the United States. The survey is an appropriate technique for estimating prevalence estimates for use of different drugs because most drug use would not ordinarily come to the attention of administrative, medical, or correctional authorities and therefore would not be included in official statistics. In-person interviews with a large national probability sample seem to be the best way to estimate drug use in virtually the entire population of the United States.

The redesign of the survey in 1999 also yielded improvements. With the expanded sample design, the precision of the estimates at the national level improved substantially. The CAI methodology made data collection and processing more efficient and improved data quality.

Although NSDUH is useful for many purposes, it has certain limitations. First, the data are self-reports of drug use, and their value depends on respondents' truthfulness and memory. Although some experimental studies have established the validity of self-reported data in similar contexts and NSDUH procedures were designed to encourage honesty and recall, some underreporting and overreporting may take place.

Second, the survey is cross-sectional rather than longitudinal. That is, individuals were interviewed only once and were not followed for additional interviews in subsequent years. Each year's survey, therefore, provides an overview of the prevalence of drug use at a specific point in time rather than a view of how drug use changes over time for specific individuals.

Third, because the target population of the survey is defined as the noninstitutionalized civilian population of the United States, a small proportion (slightly less than 2 percent) of the population is excluded. The subpopulations excluded are members of the active-duty military and persons in institutional group quarters (e.g., hospitals, prisons, nursing homes, treatment centers). If the drug use of these groups differs from that of the noninstitutionalized civilian population, NSDUH may provide slightly inaccurate estimates of drug use in the total

population. This may be particularly true for prevalence estimates for rarely used drugs, such as heroin.

## Survey Methodology

Like the 1999 to 2010 surveys, the 2011 survey was conducted using CAI methods. This survey also allows for improved State estimates based on minimum sample sizes per State. The main study target sample size of 67,500 allows SAMHSA to continue reporting adequately precise demographic subgroup estimates at the national level without needing to oversample specially targeted demographics, as was required in the past. In 2011, an oversample was included to help in measuring and reporting on the impact that the April 2010 Deepwater Horizon oil spill had on substance use and mental health along the gulf coast. To that end, the target sample was expanded by 2,000 cases in four Gulf Coast States (Alabama, Florida, Louisiana, and Mississippi), resulting in a total targeted national sample size of 69,500. The achieved sample size for the 2011 survey, including the Gulf Coast Oversample (GCO), was 70,109 persons.

A coordinated sample design was developed for the 2005 through 2009 NSDUHs. The 2010 and 2011 NSDUHs are extensions of the 5-year sample design. Although there is no overlap with the 1999 through 2004 samples, the coordinated design for 2005 through 2009 facilitated a 50 percent overlap in second-stage units (area segments [see below]) between each 2 successive years from 2005 through 2009.<sup>2</sup> This design was intended to increase the precision of estimates in year-to-year trend analyses because of the expected positive correlation resulting from the overlapping sample between successive survey years. The 2010 and 2011 NSDUHs continue the 50 percent overlap by retaining half of the second-stage units from the previous year. Those segments not retained are considered "retired" from use.

The 2011 design allows for computation of estimates by State in all 50 States plus the District of Columbia. States may therefore be viewed as the first level of stratification as well as a reporting variable. Eight States, referred to as the large sample States, had a pre-oversample target sample size of 3,600 respondents per State for the 2011 survey. This sample size was considered adequate to support direct State estimates. The remaining 43 States (which include the District of Columbia) had a pre-oversample target sample size of 900 respondents per State in the 2011 survey. In these 43 States, adequate data were available to support reliable State estimates based on small area estimation (SAE) methodology.

The 2011 GCO was attained by supplementing the NSDUH sample with 89 segments in GCO-designated counties and parishes in Alabama, Florida, Louisiana, and Mississippi. These 89 segments were retired from use in the 2009 and 2010 surveys. For more details on the GCO, see the *2011 NSDUH Methodological Resource Book*.<sup>3</sup>

---

<sup>2</sup> In segments used in 2 successive years, only addresses not sampled in the first year may be included in the second year's sample.

<sup>3</sup> Center for Behavioral Health Statistics and Quality. (2013). *2011 National Survey on Drug Use and Health: Methodological resource book*. Rockville, MD: Substance Abuse and Mental Health Services Administration.

## Stratification and Selection of Primary and Secondary Sampling Units (Census Tracts and Area Segments)

Within each State, sampling strata called State sampling regions (SSRs) were formed. Based on a composite size measure, States were partitioned geographically into roughly equally sized regions. In other words, regions were formed such that each area yielded, in expectation, roughly the same number of interviews during each data collection period. The eight large sample States were divided into 48 SSRs each; the remaining States were divided into 12 SSRs each. Therefore, the partitioning of the United States resulted in the formation of a total of 900 SSRs.

Unlike the 1999 through 2004 surveys, the first stage of selection for the 2005 through 2011 NSDUHs was census tracts. The first stage of selection began with the construction of an area sample frame that contained one record for each census tract in the United States. If necessary, census tracts were aggregated within SSRs until each tract<sup>4</sup> had, at a minimum, 150 dwelling units<sup>5</sup> in urban areas and 100 dwelling units in rural areas.<sup>6</sup> These census tracts served as the primary sampling units (PSUs) for the coordinated 5-year sample.

Before selecting census tracts, additional implicit stratification was achieved by sorting the first-stage sampling units by a CBSA/SES<sup>7</sup> (core-based statistical area/socioeconomic status) indicator<sup>8</sup> and by the percentage of the population who are non-Hispanic and white. From this well-ordered sample frame, 48 census tracts per SSR were selected with probabilities proportionate to a composite size measure and with minimum replacement.

Because census tracts generally exceed the minimum dwelling unit requirement, one smaller geographic area was selected within each sampled census tract. For this second stage of sampling, each selected census tract was partitioned into small geographic areas composed of adjacent census blocks. These geographic clusters of blocks are referred to as *segments* and are the secondary sampling units (SSUs) for the coordinated sample design. A sample *dwelling unit* in NSDUH refers to either a housing unit or a group quarters listing unit, such as a dormitory room or a shelter bed. To support the overlapping sample design and any special supplemental samples or field tests that SAMHSA might wish to conduct, segments were formed to contain a minimum of 150 dwelling units in urban areas and 100 dwelling units in rural areas.

---

<sup>4</sup> For the remainder of the discussion, first-stage sampling units are referred to as "census tracts" even though each first-stage sampling unit contains one or more census tracts.

<sup>5</sup> Dwelling unit counts were obtained from the 2000 decennial census data supplemented with revised population counts from Nielsen Claritas.

<sup>6</sup> The basis for the differing minimum dwelling unit requirement in urban and rural areas is that it is more difficult to meet the requirement in rural areas, and a total of 100 dwelling units is sufficient to support one field test and two main study samples.

<sup>7</sup> CBSAs include metropolitan and micropolitan statistical areas, as defined in the following reference: Office of Management and Budget. (2003, June 6). *OMB Bulletin No. 03-04: Revised definitions of metropolitan statistical areas, new definitions of micropolitan statistical areas and combined statistical areas, and guidance on uses of the statistical definitions of these areas*. Washington, DC: The White House.

<sup>8</sup> Four categories are defined as (1) CBSA/low SES, (2) CBSA/high SES, (3) non-CBSA/low SES, and (4) non-CBSA/high SES.

One segment was selected within each sampled census tract with probability proportionate to size. The 48 selected segments then were randomly assigned to a survey year and quarter of data collection.

## **Selection of Dwelling Units**

The sample design required an approximately equal number of persons in three age groups: 12 to 17 years, 18 to 25 years, and 26 years or older. To improve the precision of the estimates, the sample allocation process targeted five age groups: 12 to 17 years, 18 to 25 years, 26 to 34 years, 35 to 49 years, and 50 years or older. The allocation among the three age groups in the 26 years or older group was done in such a way as to increase precision while maintaining approximately the same sample size as the 12 to 17 and 18 to 25 age groups. The size measures used in selecting the area segments were coordinated with the dwelling unit and person selection process so that a nearly self-weighting sample could be achieved in each of the five age groups. Departures from the self-weighting objective occurred for several reasons, including the following:

- advance projections on the number of dwelling units did not accurately reflect the current housing inventory;
- maximum dwelling unit sample sizes were preset to control the interviewer workload and to allow unused addresses to be available for the next year's survey; and
- the person selection probabilities were constrained so that no more than two persons could be selected per dwelling unit.

An iterative sample allocation process was followed to adjust for these additional constraints. In addition, the dwelling unit sample allocation in each area segment was adjusted to allow for dwelling unit eligibility, for screening nonresponse, and for person nonresponse.

In advance of the survey period, specially trained listers had visited each area segment and listed all addresses for housing units and eligible group quarters units in a prescribed order. Systematic sampling was used to select the allocated sample of addresses from each segment.<sup>9</sup>

## **Selection of Persons**

During each quarterly survey, field interviewers visited each sample address to determine dwelling unit eligibility, to list all eligible persons at the address, to select the sample of persons to be interviewed, and to conduct interviews. In addition, the interviewers followed special "half-open" interval procedures to identify any new (since the time of listing) housing units or any dwelling units missed during the advance listing process. Any new or missed dwelling units

---

<sup>9</sup> This had the effect of creating noncompact clusters (selection from a list), which differ from compact clusters in that not all units within the cluster are included in the sample. Although compact cluster designs are less costly and more stable, a noncompact cluster design was used because it provides for greater heterogeneity of dwellings within the sample. Also, social interaction (contagion) among neighboring dwellings is sometimes introduced with compact clusters. See Kish, L. (1965). *Survey sampling*. New York, NY: John Wiley.

following immediately after a sample dwelling unit and up to, but not including, the next initially listed address in the prescribed order of listing also were included in the sample.

The interviewers used a handheld computer to record the results of the dwelling unit screening process and to select the sample of respondents. They recorded the results of each call, the final eligibility status of the dwelling unit, and information on new and missed dwelling units. If a sample address was an eligible occupied dwelling unit, they also conducted a screening interview to identify and roster all survey-eligible persons residing at the address. When the roster was complete, the computer was programmed to select the sample of persons to be interviewed using parameters specified for that area segment and a random number specified for that address.

Data collection progress was monitored during each quarterly survey by State. Small reserve samples were held back each quarter so that the assigned sample size could be adjusted if necessary during the course of data collection.

## **Sample Design Variables**

The sample for the 2011 NSDUH was selected using a multistage, deeply stratified sample design. The variables on this data file represent each stage of sample selection:

- Stage 1: The 2011 CAI design includes a sample from each of the 50 States plus the District of Columbia. SSRs were formed within each State based on composite size measures, roughly geographically partitioning the State into equally sized regions. A sample of 48 census tracts was selected within each SSR. Census tracts are considered the PSU and can be identified using the STATE, SSREGION, and SEGID<sup>10</sup> variables. Only eight census tracts per SSR were used for the 2011 sample (except in the SSRs receiving the Gulf Coast supplement).
- Stage 2: The second stage of sampling consisted of partitioning the selected census tracts into smaller geographic areas, called "segments." Segments are defined by joining contiguous census blocks within each selected census tract and are similar to the units selected at the first stage of selection for the 1999 through 2004 surveys. Segments can be identified on this data file using the SEGID variable.
- Stage 3: After census tracts and segments were selected, the third stage of selection consisted of selected dwelling units within each segment. The dwelling unit selection rate was based on the State to which a particular segment belonged. State classification was utilized for computation of eligibility, screener and interview response rates, and expected person yield per dwelling unit. State classifications can be identified with the STATE variable. Dwelling units can be identified with the ENCCASE variable.
- Stage 4: At the last stage of selection, individuals were selected within screened dwelling units based on the age group composition of the dwelling unit residents. The person-level variable used to determine the selection included AGE. This data file contains one record representing each responding selected person from stage 4.

---

<sup>10</sup> One segment was selected from each sampled census tract, so both the census tract and the segment can be identified by the SEGID variable.

A more detailed explanation of the sample design and sample selection procedures at each stage of the design appears in the *2011 NSDUH Methodological Resource Book*.<sup>11</sup>

## Data Collection and Response Rates

The fieldwork for the 2011 NSDUH was directed by RTI staff members. RTI maintained a field staff of approximately 700 field interviewers to collect the data.

A total final sample of 70,109 CAI interviews was obtained for the 2011 survey. Strategies for ensuring high rates of participation resulted in a weighted screening response rate of 86.98 percent and a weighted interview response rate for the CAI of 74.38 percent.

Throughout the course of the study, respondent anonymity and the privacy of responses were protected by separating identifying information from survey responses. Respondents were assured that their identities and responses would be handled in strict compliance with Federal law. As discussed above, the questionnaire itself and the interviewing procedures were designed to enhance the privacy of responses, especially during segments of the interview in which questions of a sensitive nature were posed. Answers to sensitive questions were gathered using ACASI. During the ACASI portions of the interview, respondents listened to prerecorded questions through headphones and entered their responses directly into a computer without interviewers knowing how they were answering. At the conclusion of the ACASI section, the interview returned to the CAPI mode with the interviewer completing the questionnaire. Each respondent who completed a full interview was given a \$30 cash payment as a token of appreciation for his or her time.

## Sample Weights

The estimates yielded by NSDUH are based on sample survey data rather than on complete data for the entire population. This means that the data must be weighted to obtain unbiased estimates for survey outcomes in the population represented by the 2011 NSDUH. The "final analysis weight" of the  $i^{\text{th}}$  respondent, say  $w_i$ , can be interpreted as the number of sampling units in the NSDUH target population represented by the  $i^{\text{th}}$  respondent. The sum of the weights over all respondents is used to estimate the size of the total target population:

$$\sum_i w_i = \text{estimated size of target population,}$$

where the summation is over all of the respondents in the 2011 NSDUH.

Similar to the 2010 NSDUH, three sets of analysis weights at the person level, questionnaire dwelling unit (QDU) level, and person pair level were developed for the 2011 NSDUH. The person-level, QDU-level, and person pair-level analysis weights shared the same first 10 weight components at the screening dwelling unit (SDU) level. In addition to the 10 common weight components, QDU-level and person pair-level analysis weights had several specific weight components, and the final weights are the product of all of the weight components. As in the 2010 NSDUH, all of the adults in the 2011 NSDUH sample received the

---

<sup>11</sup> See footnote 3.

World Health Organization Disability Assessment Schedule (WHODAS) questions. Therefore, there was no need to have a separate adult mental health weight in the 2011 NSDUH because the person-level analysis weight could be used to produce the adult mental health estimates.

### **Person-Level Analysis Weights**

The person-level analysis weights (ANALWT) are the product of 15 weight components.<sup>12</sup> Each weight component accounts for either a selection probability at a selection stage or an adjustment factor adjusting for nonresponse, coverage, or extreme weights. The sum of the weight over all of the respondents on the data file represents an estimate of the total number of people in the target population. In view of the use of weights as expansion factors in forming estimates, the weights can be interpreted as representing the total number of target population persons that each record on the file represents. For variance estimation, suitable software, such as SUDAAN®, should be used to take the sample design into account.<sup>13</sup> Unlike in the 2010 NSDUH where the population estimates used in the poststratification were derived from the 2000 census, 2011 NSDUH used 2010 census-based population estimates in the poststratification adjustment.

### **QDU-Level Analysis Weights**

The QDU-level analysis weights (DUANALWT) are the product of 15 weight components and can be used to produce household-level estimates. DUANALWT shares the same first 10 weight components as for ANALWT and has 5 DUANALWT specific components.<sup>14</sup> It is important to note that if two people were interviewed in a dwelling unit, both records of the data file will have the same QDU-level weight. Therefore, the person-level file must be subset down to a dwelling unit-level file before any estimates can be made.

### **Person Pair-Level Analysis Weights**

The person pair-level analysis weights (PRANALWT) are the product of 15 weight components and can be used to produce pair-level estimates. For example, one might be interested in estimating the proportion of 12- to 17-year-old past month alcohol users living with a parent who used alcohol in the past month. As in the case of QDU-level file, the person-level file must be subset down to the person pair-level file before any estimates can be made. PRANALWT shares the same first 10 weight components as for ANALWT and has 5 PRANALWT specific components.<sup>15</sup>

---

<sup>12</sup> Starting with the 2011 NSDUH, the year-specific indicator in the variable names of weight components has been removed. For example, weight component 1 was called YR10WT1 in the 2010 NSDUH and YR09WT1 in the 2009 NSDUH, and it is named WT1 in the 2011 NSDUH.

<sup>13</sup> In SUDAAN, the sample design is specified using the NEST statement. See the following reference: RTI International. (2008). *SUDAAN® language manual, Release 10.0*. Research Triangle Park, NC: Author.

<sup>14</sup> Starting with the 2011 NSDUH, the year-specific indicator in the names of five DUANALWT specific components has been removed. For example, weight component 11 was called DU10WT11 in the 2010 NSDUH and DU09WT11 in the 2009 NSDUH, and it is named DUWT11 in the 2011 NSDUH.

<sup>15</sup> Starting with the 2011 NSDUH, the year-specific indicator in the names of five PRANALWT specific components has been removed. For example, weight component 11 was called PR10WT11 in the 2010 NSDUH and PR09WT11 in the 2009 NSDUH, and it is named PRWT11 in the 2011 NSDUH.

Details of the weight components and the sample weighting procedures appear in the *2011 NSDUH Methodological Resource Book*.<sup>16</sup>

## Organization of the Data File

The overall organization of the file is shown in the Table of Contents of this document. Edited data from core drug modules make up the first portion of the file. Edited data from the noncore self-administered modules and demographic questions are in later sections. Variables from the noncore section contain missing data; see the section on Standard Code Conventions for a description of the codes given to different types of missing data. For each edited variable, the number of observations assigned a given missing data code is shown in the entry for that variable.

Imputation-revised drug use variables, as well as selected recoded versions of these variables, are included for core drug use variables. These imputed and recoded drug use variables are in separate sections following the edited core drug use variables. The recoded drug use variables include indicators for lifetime, past year, and past month substance use. The imputation-revised core drug use variables served as the starting point for the recoded core drug use variables. Imputation-revised core and noncore demographic variables also are included toward the end of the codebook. Missing values for all imputation-revised variables from the core drug modules have been imputed using the statistical imputation procedures described below. Imputation indicators are provided for each variable so that users may easily determine whether an observation contains data from the questionnaire or an imputed value. *Where imputed or recoded variables are provided, users are encouraged to use them to produce estimates rather than raw or edited variables from the interview.*

Edited variables from self-administered noncore modules comprise the next major section in the codebook. Intermixed between the noncore and core sections of the codebook are sections of recoded variables. The edited and/or imputed variables are used as source variables for the recoded variables. For example, edited variables from the section of the interview pertaining to symptoms of dependence or abuse (Substance Dependence and Abuse section in this codebook) were used to create recoded summary measures of dependence. Unlike variables in the core sections, however, imputation for missing data generally was not done prior to the recoding of noncore variables. Consequently, noncore recoded variables may still have missing values. The missing data codes contained in the source variables and defined in the Standard Code Conventions section of this codebook introduction are recoded to the standard missing code (.) for recoded variables. It is intended that cases containing these missing codes be excluded from an analysis.

Within the recoded sections of the codebook, detailed information is provided in the variable documentation about how levels of source variables are used to define recoded variables. Note that for recoded variables that include other-specify data or logically assigned data (as defined in the Standard Code Conventions section of this introduction), values may be listed in the documentation that do not exist for the current survey year. Because of fluctuations in the data, source variable values may not exist consistently across years. However, to aid in

---

<sup>16</sup> See footnote 3.

cross-year analyses, all possible source variable values have been retained in the documentation. For example, a recoded variable may document a "Yes" using both source variable values of 1 = Yes and 3 = Logically Assigned Yes, even if the 3 is not applicable for the current survey year. To alert users, notes have been placed at the top of recoded sections that contain variables that include source values even if they do not apply to the current survey year.

In many instances, the codebook itself also indicates in parentheses the question names that were most relevant for creating an edited variable. In particular, an important feature of the transition to CAI in 1999 was that respondents could be routed to different versions of a question based on prior information from the interview. As much as possible, the codebook shows key source variables that were used in creating edited, imputed, or recoded variables. For example, respondents who initiated use of a drug within 1 year of their current age were asked more detailed questions about the year and month in which they first used that drug. Depending on their age, date of birth, and interview date, respondents could be routed to one of three possible questions to identify the year in which they first used a drug (e.g., CG04a, CG04b, or CG04c for cigarettes). Similarly, respondents could be routed to one of two possible questions to determine the month in which they first used a drug (e.g., CG04c and CG04d for cigarettes). To facilitate analysis, therefore, responses from these multiple year-of-first-use and month-of-first-use questions were combined into one single year-of-first-use variable and one single month-of-first-use variable for each drug, as shown for the variables CIGYFU and CIGMFU. For the most complete information about the logic for asking questions in the interview, however, data file users should refer to the questionnaire (for details, see this codebook's Introduction).

## Usable Cases

A key step in the data processing procedures established the minimum item response requirements in order for cases to be retained for weighting and further analysis (i.e., "usable" cases). These procedures were designed to eliminate cases with unacceptable levels of item nonresponse (i.e., missing data), thereby retaining cases with lower levels of missing data and reducing the amount of statistical imputation needed for any given record.

The usable case criteria established for CAI were based on the completeness of information that respondents provided about their lifetime use or nonuse of different drugs. In CAI, respondents were asked more detailed questions about different drugs only if they reported lifetime use of that drug (or lifetime use of one or more drugs within a broader category, such as hallucinogens) on an initial "gate" question.<sup>17</sup> Consequently, whether a CAI respondent was a lifetime user or nonuser of the drugs of interest could be readily determined by reviewing the respondent's answers to the "gate" question on lifetime use of that drug (or category of drugs).

---

<sup>17</sup> In all modules except those pertaining to hallucinogens, inhalants, pain relievers, tranquilizers, stimulants, and sedatives, the logic for asking more detailed questions about use of that drug was based on the answer to a single "yes/no" question (e.g., "Have you ever, even once, used marijuana or hashish?"). In the hallucinogens through sedatives modules, the logic for asking more detailed questions about use of that category of drugs was based on respondents' answers to multiple "yes/no" questions about the lifetime use or nonuse of specific drugs within that category (e.g., lifetime use or nonuse of the specific hallucinogens LSD, PCP, peyote, mescaline, psilocybin/mushrooms, Ecstasy [MDMA], or "any other" hallucinogen).

The requirements for a CAI record to be considered usable are noted as follows:

1. The lifetime cigarette question (i.e., "Have you ever smoked part or all of a cigarette?") had to have been answered as "yes" or "no." This requirement was set so that lifetime use or nonuse would be fully defined for at least one substance. Consequently, data about lifetime use or nonuse of cigarettes could be used in subsequent statistical imputations for other drugs where lifetime use or nonuse was undefined.
2. Responses to questions on at least nine (9) of the following additional drugs had to contain information about lifetime use or nonuse: (a) chewing tobacco, (b) snuff, (c) cigars, (d) alcohol, (e) marijuana, (f) cocaine (in any form), (g) heroin, (h) hallucinogens, (i) inhalants, (j) pain relievers, (k) tranquilizers, (l) stimulants, and (m) sedatives. Crack cocaine was not included in the usable case rule because the logic for asking about crack cocaine was dependent upon the respondent having answered the lifetime cocaine question as "yes." Although the CAI instrument also asked about pipe tobacco, this was not included in the usable case rule because there was only one other question about pipe tobacco in addition to the lifetime pipe tobacco use question.<sup>18</sup>

The interview also included follow-up probes for respondents who initially refused to answer a gate question or an entire series of gate questions. Follow-up probes were included in the following modules that were relevant to the usable case rule: cigarettes, chewing tobacco, snuff, cigars, alcohol, marijuana, cocaine, heroin, specific hallucinogens (i.e., LSD, PCP, and Ecstasy [MDMA]), the specific stimulant methamphetamine, and any use of inhalants, pain relievers, tranquilizers, stimulants, or sedatives (if respondents refused all lifetime use questions about these latter five drug categories). If respondents changed their initial refusal to a response of "yes" or "no," they were considered to have provided usable data to that drug's gate information.

For the hallucinogens through sedatives sections, respondents reported about use or nonuse of specific drugs within that category. For these sections, the requirement for reporting of lifetime use or nonuse was considered to have been satisfied if at least one lead lifetime question in the series was answered as "yes" or "no" (e.g., if at least one question in the hallucinogens series was answered as "yes" or "no" for hallucinogens). Similarly, in the inhalants, pain relievers, tranquilizers, stimulants, and sedatives sections, if respondents initially refused to answer all gate questions for a given drug but subsequently answered that drug's follow-up probe as "yes" or "no," they were considered to have satisfied the reporting requirement for that drug.

In addition, the CAI program terminated interviews during the initial demographics questions if respondents were ineligible for the survey (i.e., under age 12 or on active duty in the U.S. military). These ineligible cases by definition did not meet the usable case criteria because the interviews were terminated before the respondents were asked the first cigarette use question.

---

<sup>18</sup> For a more detailed discussion of the development of the usable case requirements, see the following reference: Kroutil, L., & Myers, L. (2002). Development of editing rules for CAI substance use data. In J. Gfroerer, J. Eyerman, & J. Chromy (Eds.), *Redesigning an ongoing national household survey: Methodological issues* (HHS Publication No. SMA 03-3768, pp. 85-109). Rockville, MD: Substance Abuse and Mental Health Services Administration, Office of Applied Studies.

## Logical Editing

For selected key variables, response data were reviewed to identify and address inconsistent data among related variables or to replace missing data with nonmissing values. The routing logic in the CAI instrument reduced the opportunities for respondents to give inconsistent answers by skipping respondents past questions that did not apply to them. The occurrence of inconsistent data was reduced further through the use of consistency checks built into the CAI program that prompted respondents to resolve inconsistencies between related items. Nevertheless, there still were limited situations in which respondents could answer one question in a manner that was inconsistent with their answer to a previous question.

Logical editing was the first step in processing many of the variables on the file. This procedure used data within a respondent's record to identify and address inconsistencies among related variables within a given module of the interview (e.g., within the hallucinogens section). As part of this procedure, variables were identified that had been legitimately skipped because the condition(s) for asking the questions did not apply.

As a general principle, responses from one module (e.g., hallucinogens) were not used to edit variables in another module (e.g., inhalants).<sup>19</sup> For this reason, data in one module may not be completely consistent with data in other modules. Subsequent discussion about editing in this section focuses on key drug use variables.

### Editing Procedure for Drug Use Variables

Logical editing and processing of drug use variables in the tobacco through the sedatives modules first involved identifying whether respondents had ever used or never used the drug of interest. That included situations in which respondents initially refused to answer a question about their lifetime use of a drug but then changed their answer to "yes" or "no" on follow-up. If respondents did not provide sufficient information about their use or nonuse of a particular drug (or drug category), their final status was assigned through statistical imputation procedures. If values pertaining to lifetime use or nonuse of a given drug were changed through the editing procedures, this editing was indicated through special codes that indicated that a response was logically inferred; documentation for these codes includes the phrase "LOGICALLY ASSIGNED." In the hallucinogens, inhalants, pain relievers, tranquilizers, stimulants, and sedatives modules, for example, respondents who did not report lifetime use of a specific drug (e.g., LSD) but specified use of it as "some other drug" were logically inferred to be lifetime users of that drug. In the psychotherapeutics modules (i.e., pain relievers, tranquilizers, stimulants, and sedatives), respondents whose only reported lifetime use involved over-the-counter medications were logically inferred to have never used that particular prescription-type psychotherapeutic drug.

---

<sup>19</sup> One exception to the principle of not editing across modules involved situations in which responses in one module governed whether respondents were asked questions in another module. For example, if respondents reported never using heroin, they were not asked questions in the noncore substance treatment module about treatment for heroin. Consequently, codes could be assigned to indicate that the respondents skipped out of the heroin treatment data because they had never used it.

After lifetime use or nonuse of a given drug had been determined, edits of the variables that established when respondents last used a drug of interest were probably the most critical. These edited recency-of-use variables were the precursors for the final, imputed measures that established the prevalence of use in the past 30 days, past 12 months, and lifetime.

The interview included follow-up probes for respondents who were lifetime users of a given drug but did not know or refused to report when they last used it. Respondents who initially did not know when they last used a drug were asked to give their "best guess" of when they last used it. Respondents who initially refused to report when they last used a drug were asked to reconsider answering the question. If respondents changed their initial answer of "don't know" or "refused" in response to these probes, the editing procedures incorporated data from these probes into the final, edited recency-of-use variables. For example, if respondents initially refused to report when they last used a drug but then reported last using it more than 30 days ago but within the past 12 months, their edited recency indicated use in that period, in the absence of any information that was inconsistent with what they reported in the probe (see below).

Situations were identified and flagged in which there were potential inconsistencies between a respondent's answer to a drug's recency question (or the answer in a follow-up probe) and other data in that module. For example, it would be inconsistent for a respondent to report last using a drug "more than 12 months ago" but also to report having first used it at his or her current age. These inconsistencies then were addressed by statistically imputing final values for the affected recency variable and the other variable(s) where the data were inconsistent with the respondent's original answer to the recency question.

Again, if values pertaining to the period when respondents last used a drug were changed through the editing procedures, special codes were assigned to indicate that these edits had been done. The documentation for these codes included the phrase "LOGICALLY ASSIGNED." For example, a code of 8 in a drug's recency-of-use variable means "Used at some point in the past 12 months LOGICALLY ASSIGNED." Specifically, if a respondent reported using a drug more than 30 days ago but within the past 12 months but other data suggested that the respondent may have used the drug more recently, this code of 8 indicated that at least it could be inferred that the respondent was a user in the past 12 months (and potentially more recently). Similarly, a code of 9 ("Used at some point in lifetime LOGICALLY ASSIGNED") indicated that the respondent was potentially a user in any period that was asked about for that particular drug, including the past 30 days. In particular, respondents were assigned a code of 9 if they initially answered "don't know" or "refused" to a drug's recency question and continued on follow-up to answer "don't know" or "refused" regarding when they last used it.

### **Standard Code Conventions**

Generally, the following codes have the same (or consistent) meanings across all variables. Exceptions are noted in the documentation for individual variables.

- |                         |   |   |
|-------------------------|---|---|
| 91 or 991 or 9991, etc. | = | NEVER USED [DRUG(s) OF INTEREST]              |
| 93 or 993 or 9993, etc. | = | USED [DRUG] BUT NOT IN THE PERIOD OF INTEREST |

94 or 994 or 9994, etc.	=	DON'T KNOW
97 or 997 or 9997, etc.	=	REFUSED
98 or 998 or 9998, etc.	=	BLANK (i.e., not answered; not asked the question)
99 or 999 or 9999, etc.	=	LEGITIMATE SKIP

The following analogous codes also were assigned as part of the logical editing process:

81 (or 981, 9981, etc.)	=	NEVER USED [DRUG(s) OF INTEREST] Logically assigned
83 (or 983, 9983, etc.)	=	USED [DRUG] BUT NOT IN THE PERIOD OF INTEREST Logically assigned
85 (or 985, 9985, etc.)	=	BAD DATA Logically assigned (i.e., usually inconsistent with other data)
89 (or 989, or 9989, etc.)	=	LEGITIMATE SKIP Logically assigned

The codes of 81, 83, 85, and 89 were given values in the 80s to signify that existing values were overwritten during editing. For example, if a respondent was somehow routed into the youth experiences module but that respondent was subsequently classified as being 18 or older, any answers that the respondent gave in the youth experiences module were overwritten with codes of 89 (or 989, etc.). These codes signify that this adult respondent logically was not eligible to be asked the youth experiences questions.

Codes of 85 (or 985, etc.), 94 (or 994, etc.), 97 (or 997, etc.), and 98 (or 998, etc.) are codes for missing data. In particular, codes of 98 (i.e., blank) could occur in the data for the following reasons:

- the respondent broke off the interview before reaching a particular question or section;
- the CAI program allowed the respondent to hit the ENTER key without providing a response (typically, in situations where respondents were asked to specify something, such as the name of some other drug that they had used); or
- the CAI program skipped the respondent past a question, but there was some uncertainty as to whether the skipped question applied or did not apply to the respondent (e.g., if subsequent questions about a drug were skipped because the respondent did not know whether he or she ever used that drug).

## Statistical Imputation

Statistical imputation refers to the substitution of acceptable estimated values for missing values. These imputed values cannot be directly distinguished from nonimputed values. Using statistical imputation, missing data were replaced with nonmissing values for selected variables. These variables can be identified in the codebook by their labels, within which can be found the words "IMPUTATION REVISED." In addition, most imputation-revised variables have names with the prefix "IR." (The imputation-revised employment status variable EMPSTATY is an

exception to this rule. Also, although no missing data are possible for gender, the "IR" prefix for IRSEX is maintained for continuity with past years.) Associated indicator variables tell the user which values are imputed and which ones are not. These indicator variables have the words "IMPUTATION INDICATOR" in their labels and are identified with the prefix "II." For some imputation-revised variables, additional imputation indicators are available, identified with the prefix "II2," giving more details about the source of the imputed or logically assigned value. In most cases, the imputation-revised variable can be traced to a specific question in the questionnaire. However, the imputation-revised variable occasionally corresponds to an edited variable that was derived from several questions in the questionnaire.

With the 2011 survey, the core drug use variables are recency of use, frequency of use in the past 12 months, frequency of use in the past 30 days, and age at first use. Age of first daily cigarette use and binge drinking frequency<sup>20</sup> in the past 30 days are also core drug use variables. Imputation of missing values in these core drug use variables was accomplished using an imputation procedure developed specifically for the survey in 1999 and called predictive mean neighborhood (PMN). PMN is a combination of model-assisted and nearest neighbor hot-deck imputation methods. The PMN method also was used in the 2011 survey to impute missing values in the core demographic, employment status, immigrant status, income, insurance, and roster-derived household composition variables, as well as variables associated with responding pairs. One group of variables for which the PMN method was not used is nicotine dependence. Instead, a weighted least squares regression was used to obtain continuous predicted means, which in turn were used directly as imputed values for this set of variables. More details on the methods used for imputation can be found in the *2011 NSDUH Methodological Resource Book*.<sup>21</sup>

For all imputation-revised variables except those associated with nicotine dependence, the levels within the variables are limited to the valid responses in the interview itself. If neither editing nor imputation was required for any of these variables, the levels for the edited and imputation-revised variables are the same, with each level corresponding to a valid interview response. If an edited variable has a logically assigned value for which no imputation was required, that logically assigned value was converted to the associated valid interview response in the imputation-revised variable. Finally, levels in the edited variable that do not correspond to a valid interview response indicate that the information available for that respondent was incomplete and, consequently, imputation was required. In the imputation-revised variable, these levels were replaced by imputed values corresponding to valid interview responses, which were made consistent with any preexisting information related to that variable. Examples of levels indicating incomplete information include "bad data," "don't know," and "refused." Also, in the case of recency of use, some levels in the edited variable describe a more general recency than was designated from a valid interview response, which, in the imputation-revised variable, were replaced by imputed values consistent with the general recency level.

---

<sup>20</sup> Binge alcohol use is defined as drinking five or more drinks on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days. Heavy alcohol use is defined as drinking five or more drinks on the same occasion on each of 5 or more days in the past 30 days; all heavy alcohol users are also binge alcohol users.

<sup>21</sup> See footnote 3.

## Imputation Indicators

For each variable that includes imputed values, concomitant indicator variables distinguish imputed from nonimputed values. These associated variables have names nearly identical to the imputation-revised variables, except that the IR prefix was replaced by an II or an II2. In general, the imputation indicator variables with the II prefix have three levels:

- 1 = From interview
- 2 = Logically assigned
- 3 = Statistically imputed.

These levels indicate whether the imputation-revised variable's value originated from interview responses, was logically assigned in the editing process, or was imputed. In some cases, the skip logic inherent in the CAI prevented a respondent from answering certain questions due to his or her responses to previous questions. For the drug use variables, if a respondent had been skipped out of a question, the response in the imputation-revised variables is coded as "never used" or is coded to indicate that the respondent had not used in the relevant time period. For other variables where this occurred, the imputation-revised variable has a level with a label indicating a legitimate skip. The imputation indicators associated with these variables also have an additional level, which likewise has a label indicating a legitimate skip. Typically, this level is given as 9 (= Legitimate skip), often with an accompanying explanation for the skip.

The variables that have an additional set of imputation indicators, as denoted by the prefix "II2," are IRHOGRP4, EMPSTAT4, EMPSTATY, and the recency and frequency of drug use variables. For IRHOGRP4, the II2 variable is simply a more detailed description of the sources of information for these variables. For EMPSTAT4 and EMPSTATY, the II2 variables provide more details about the constraints on imputed values, where the legitimate skip levels are equivalent to those given by the II variables. The drug use II2 variables are a result of the implementation of the flag-and-impute editing procedures on the recency-of-use data. Greater details on these editing procedures are given in the logical editing and processing section in this report. With these editing procedures, inconsistent responses in the recency-of-use variables were replaced by more general, consistent responses. Subsequently, the specific responses then were imputed. If the response from a recency-of-use variable was considered partially known, such as past year use of a given drug with the more specific recency unknown, imputed values had to be limited to what was consistent with this incomplete information. The types of partial information available for a given variable are as follows:

- 8 = Used at some point in the past 12 months LOGICALLY ASSIGNED
- 9 = Used at some point in lifetime LOGICALLY ASSIGNED
- 14 = Used more than 12 months ago LOGICALLY ASSIGNED
- 19 = Used more than 30 days ago LOGICALLY ASSIGNED
- 29 = Used more than 30 days ago but in the past 3 years LOGICALLY ASSIGNED
- 39 = Used within the past 3 years LOGICALLY ASSIGNED.

The last four levels (14, 19, 29, and 39) are for tobacco product use only. In the imputation indicator for drug use variables, level 3 indicates statistical imputation, but no detail is given regarding any available partial information. The II2 variable breaks out the II level 3 into the following levels:

- 3 = Statistically imputed data - lifetime use imputed
- 4 = Statistically imputed data - edited recency = 9
- 5 = Statistically imputed data - edited recency = 8
- 6 = Statistically imputed data - edited recency = 19
- 7 = Statistically imputed data - edited recency = 14
- 8 = Statistically imputed data - edited recency = 29
- 9 = Statistically imputed data - edited recency = 39.

### **Constraints and Consistency**

The imputation of missing values in the core demographics and drug use variables was subject to numerous constraints to ensure that imputed values would be consistent with preexisting, nonmissing values. For multivariate analyses, the imputation-revised variables should be used as long as these variables all come from the core section of the interview. On the other hand, no attempt was made to ensure consistency between the imputation-revised core and noncore variables. Therefore, for analyses of relationships requiring imputation-revised variables from both the core and noncore sections of the interview, simultaneous use of these variables may not be appropriate.

### **Statistical Significance of Differences**

Due to the 2002 NSDUH methodology changes, the 2002 data constitute a new baseline for tracking trends in substance use and other measures. *As noted previously, it is not considered appropriate to make comparisons of the 2002 through 2011 CAI estimates with 2001 and earlier NHSDA estimates to assess changes in substance use over time. If comparisons such as these are made, it is recommended that they be interpreted with caution.* For a more detailed description of the changes to the 2002 NSDUH methodology, see Appendix C of the *Results from the 2002 National Survey on Drug Use and Health: National Findings*.<sup>22</sup>

Customarily, the observed difference between estimates is evaluated in terms of its statistical significance. Statistical significance is based on the *p* value of the test statistic and refers to the probability that a difference as large as that observed would occur due to random variability in the estimates if there were no difference in the prevalence estimates for the population groups being compared. The significance of observed differences is generally reported at the 0.05 and 0.01 levels when the *p* value is defined as less than or equal to the designated significance level.

---

<sup>22</sup> Office of Applied Studies. (2003). *Results from the 2002 National Survey on Drug Use and Health: National findings* (HHS Publication No. SMA 03-3836, NSDUH Series H-22). Rockville, MD: Substance Abuse and Mental Health Services Administration.

When comparing prevalence estimates, one can test the null hypothesis (no difference between prevalence estimates) against the alternative hypothesis (there is a difference in prevalence estimates) using the standard difference in proportions test expressed as

$$Z = \frac{\hat{p}_1 - \hat{p}_2}{\sqrt{\text{var}(\hat{p}_1) + \text{var}(\hat{p}_2) - 2\text{cov}(\hat{p}_1, \hat{p}_2)}},$$

where  $\hat{p}_1$  = first prevalence estimate,  $\hat{p}_2$  = second prevalence estimate,  $\text{var}(\hat{p}_1)$  = variance of first prevalence estimate,  $\text{var}(\hat{p}_2)$  = variance of second prevalence estimate, and  $\text{cov}(\hat{p}_1, \hat{p}_2)$  = covariance between  $\hat{p}_1$  and  $\hat{p}_2$ . Note that the first and second prevalence estimates may take the form of prevalence estimates from two different survey years (e.g., 2010 and 2011, respectively), prevalence estimates from sets of combined survey data (e.g., 2008-2009 annual averages and 2010-2011 annual averages, respectively), or prevalence estimates for populations of interest within a single survey year.

Under the null hypothesis,  $Z$  is asymptotically distributed as a normal random variable. Therefore, calculated values of  $Z$  can be referred to the unit normal distribution to determine the corresponding probability level (i.e.,  $p$  value). Because the covariance term between the two estimates is not necessarily zero, SUDAAN<sup>23</sup> may be used to compute estimates of  $Z$  along with the associated  $p$  values such that the covariance term is calculated by taking the sample design into account. A similar procedure and formula for  $Z$  is used for testing between the estimated totals.

When comparing population subgroups defined by three or more levels of a categorical variable, log-linear chi-square tests of independence of the subgroup and the prevalence variables should be conducted first to control the error level for multiple comparisons. If Shah's Wald  $F$  test (transformed from the standard Wald chi-square and computed in SUDAAN) indicates overall significant differences, the significance of each particular pairwise comparison of interest should be tested using SUDAAN analytic procedures to properly account for the sample design.<sup>24</sup>

If SUDAAN is not available to compute the significance testing, using published estimates can provide similar testing results. When comparing prevalence rates shown with standard errors (SEs),  $t$  tests that assume independence for the difference of proportions can be performed and usually will provide the same results as tests performed in SUDAAN. However, where the  $p$  value is close to the predetermined level of significance, results may differ for two reasons: (1) the covariance term is included in the SUDAAN tests, whereas it is not included in  $t$  tests that assume independence; and (2) the reduced number of significant digits shown in the published estimates may cause rounding errors in the  $t$  tests assuming independence.

Although not generated in all NSDUH publications, some publications do include sampling error in the form of 95 percent confidence intervals (CIs). CIs for NSDUH are computed using degrees of freedom ( $df$ ) and critical values of the  $t$ -distribution, which will

---

<sup>23</sup> See footnote 13.

<sup>24</sup> See footnote 13.

change dependent on which sample of data is being analyzed. For more information about computing CIs and *df*, see Sections 8 and 6, respectively, in the 2011 statistical inference report.<sup>25</sup> In terms of testing for differences between prevalence rates shown with 95 percent CIs, it is important to note that two overlapping 95 percent CIs do not imply that their rates are statistically equivalent at the 5 percent level of significance.<sup>26</sup>

## Use of Sample Weights and Sample Design Variables

Data file users who wish to analyze data from multiple survey years including 2011 (e.g., 2002 through 2011<sup>27</sup>) should first sort the combined data by the sample design variables VESTR (variance estimation [pseudo] stratum) and VEREP (variance estimation [pseudo] replicate within stratum). These variables then are specified in a software package, such as SUDAAN, to automatically account for the 50 percent overlap between successive years when estimating variances and SEs. The final person-level analysis weight on the data file should be used when analyzing data for any single year or when comparing estimates between years within a combined file containing data from multiple years. However, estimation of the annual average number of persons who have engaged in a particular behavior based upon pooled data from multiple years requires adjustment to the analysis weights. These adjusted weights would be created as the final weight divided by the number of years of combined data (e.g., the person-level weight divided by 10 for estimates based upon the combined 2002 through 2011 data).

If a data file user is interested in generating estimates using some combination of quarter-level data, a sample weight can be created using the person-level analysis weight as follows:

$$\begin{aligned} \text{New Weight} &= (4/q) * \text{Person-Level Analysis Weight} && \text{If the record represents a respondent in one of the quarters of interest} \\ &= 0 && \text{Otherwise, ...} \end{aligned}$$

where  $q$  = total number of quarters in the domain of interest.

For example, if one is interested in generating estimates for the first quarter of 2011, an appropriate sample weight would be constructed as follows:

$$\begin{aligned} \text{New Weight} &= (4/1) * \text{Person-Level Analysis Weight} && \text{If the record represents a respondent in quarter 1} \\ &= 0 && \text{If the record represents a respondent in quarters 2, 3, or 4.} \end{aligned}$$

---

<sup>25</sup> See footnote 3.

<sup>26</sup> For additional information, see the following reference: Payton, M. E., Greenstone, M. H., & Schenker, N. (2003). Overlapping confidence intervals or standard error intervals: What do they mean in terms of statistical significance? *Journal of Insect Science*, 3, 34. <https://doi.org/10.1673/031.003.3401>. Also see the following reference for further details: Schenker, N., & Gentleman, J. F. (2001, August). On judging the significance of differences by examining the overlap between confidence intervals. *American Statistician*, 55(3), 182-186. <https://doi.org/10.1198/000313001317097960>

<sup>27</sup> Changes in the sample design are accounted for in the sample design variables. Therefore, it is appropriate to combine 2002 through 2010 data with 2011 and onward.

If one is interested in generating estimates for the first half of 2011 (quarters 1 and 2), an appropriate sample weight would be constructed as follows:

$$\begin{aligned} \text{New Weight} &= (4/2) * \text{Person-Level Analysis Weight} && \text{If the record represents a respondent in quarters 1 or 2} \\ &= 0 && \text{If the record represents a respondent in quarters 3 or 4.} \end{aligned}$$

In years when a split-sample design is implemented, a special weight is developed for the split samples. When analysis with pooled data from multiple years is conducted, analysts should check the documents for that specific year on how to use the analysis weights in order to use a proper analysis weight for the pooled data analysis.

For example, in the 2004 NSDUH, adult respondents aged 18 or older were split approximately evenly, where respondents in sample A were administered the full adult mental health module as it had been administered in 2002 and 2003, and respondents in sample B were administered a short version of the adult mental health module in addition to the adult depression module as it was administered in 2005, 2006, and 2007. Thus, analyses using 2004 data from either the adult mental health module (renamed to the psychological distress module in 2005, 2006, and 2007) or the adult depression module need to be conducted using a different weight variable. For 2004, analyses that include the adult mental health variables for major depressive episode (MDE) and/or unadjusted serious psychological distress (SPD) should involve the following: (1) Select either sample A or sample B by using the ADLTSAMP variable (ADLTSAMP = 1 corresponds to sample A, and ADLTSAMP = 2 corresponds to sample B) to restrict the analysis to the appropriate half samples; and (2) when combining 2004 adult half-sample data with data for survey years that have comparably defined adult mental health variables, the weight variable (SPD analysis weight for 2004 and the person-level analysis weight for the other years in the analysis) should be divided by the total number of years in the analysis.

## **New and Corrected Data Since Last Release**

Since the release of the previous version of the 2011 Final Analytic Data File and Codebook on December 19, 2014, a number of variables have been added (see [Table 1](#)).

**Table 1. Variables Added to the 2011 Final Analytic Data File and Codebook**

Module	Variable Added	Label
RECODED DRUG USE	CIG1PACK	SMKED 1+ PCK OF CIGS PER DAY AMNG DLY SMKERS (1/0)
RECODED DRUG USE	MTHFSTYR	PAST YEAR INIT USED METHAMPHETAMINE FIRST
RECODED SUBSTANCE TREATMENT	TXALNOIL	RCVD TRMT ANY LOC FOR ALC BUT NOT ILL - PST YR
RECODED SUBSTANCE TREATMENT	TXILNOAL	RCVD TRMT ANY LOC FOR ILL DRG BUT NOT ALC - PST YR
RECODED SUBSTANCE TREATMENT	SPCALNIL	RCVD TRMT AT SPEC FAC FOR ALC NOT ILL DRG - PST YR
RECODED SUBSTANCE TREATMENT	SPCILNAL	RCVD TRMT AT SPEC FAC FOR ILL DRG NOT ALC - PST YR
RECODED ADULT MENTAL HEALTH TREATMENT	AMHSVNO	NUM OF TYPES OF MNT HLTH TRT SRVCS RCVD IN PST YR
RECODED ADULT MENTAL HEALTH TREATMENT	AMHTXAND	PERCEIVED UNMET NEED AND RECEIPT OF MH TRT
RECODED MENTAL HEALTH	LMMIYRU	LMMI IND (1/0) BASED ON REVISED PREDICTED SMI PROB
RECODED MENTAL HEALTH	LMMIADAU	LMMI AND DRUG/ALCOHOL DEP OR ABUSE (1/0)
RECODED YOUTH MENTAL HEALTH TREATMENT	ANYSEDMF	YTH RCVD SPEC MH AND ED, MED, OR FOST SRVC IN PY
RECODED ADOLESCENT DEPRESSION	YMDEADA	YOUTH: PAST YEAR MDE AND SUB DEP OR ABUSE
RECODED ADOLESCENT DEPRESSION	YMDEIMDA	YOUTH: PY MDE W/ SEV IMPAIRMT AND SUB DEP OR ABUSE

The codebook section titled Selected Unedited Variables has been dropped. It was determined that the raw variables contained in this section provided no analytic value because edited versions exist on the data file. Additionally, the appendix titled Recoded Mental Health Module Variable Documentation has been renamed as Recoded Mental Health.

## Contact Person

For additional information about the file documented in this codebook, please contact the following person at SAMHSA:

## IDENTIFICATION

### **IDENTIFICATION**

The following variable, QUESTID, is a unique record identifier within a particular study year. The IDs may be repeated in other study years, so analysts should always consider the interview date (INTDATE) when using the QUESTID.

QUESTID            Len : 7    RESPONDENT IDENTIFICATION

The following variable, FILEDATE, represents the date the SAS data file was created.

FILEDATE           Len : 10    CREATION DATE OF THE DATA FILE

ENCSEG            Len : 6    SEGMENT IDENTIFICATION NUMBER (ENCRYPTED)

ENCCASE           Len : 10    HOUSEHOLD LEVEL IDENTIFICATION NUMBER (ENCRYPTED)

## TOBACCO

### SELF-ADMINISTERED SUBSTANCE USE SECTIONS

#### TOBACCO

These questions are about your use of tobacco products. This includes cigarettes, chewing tobacco, snuff, cigars, and pipe tobacco. The first questions are about cigarettes only.

Have you ever smoked part or all of a cigarette?

(CG01, CGREF1)

CIGEVER

Len : 1 EVER SMOKED A CIGARETTE

1 = Yes .....  
2 = No .....

If one of your best friends offered you a cigarette, would you smoke it?

(CG02)

CIGOFRSM

Len : 2 IF BEST FRIEND OFFERED, WOULD YOU SMOKE CIG

1 = Definitely Yes .....  
2 = Probably Yes .....  
3 = Probably Not .....  
4 = Definitely Not .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
99 = LEGITIMATE SKIP .....

At any time during the next 12 months do you think you will smoke a cigarette?

(CG03)

CIGWILYR

Len : 2 DO YOU THINK YOU'LL SMOKE CIG IN NEXT 12 MOS

1 = Definitely Yes .....  
2 = Probably Yes .....  
3 = Probably Not .....  
4 = Definitely Not .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
99 = LEGITIMATE SKIP .....

How old were you the first time you smoked part or all of a cigarette?

(CG04)

CIGTRY

Len : 3 AGE WHEN FIRST SMOKED A CIGARETTE

RANGE = 1 - 66 .....  
985 = BAD DATA Logically assigned .....  
991 = NEVER USED CIGARETTES .....  
994 = DON'T KNOW .....  
997 = REFUSED .....

Did you first smoke part or all of a cigarette in [CURRENT YEAR - 1] or [CURRENT YEAR]?

Did you first smoke part or all of a cigarette in [CURRENT YEAR - 2] or [CURRENT YEAR - 1]?

In what month in [CURRENT YEAR] did you first smoke part or all of a cigarette?

(CG04A, CG04B, CG04C)

CIGYFU

Len : 4 YEAR OF FIRST CIGARETTE USE - RECODE

RANGE = 2009 - 2011 .....  
9985 = BAD DATA Logically assigned .....  
9989 = LEGITIMATE SKIP Logically assn (CIGTRY<AGE-1) .....  
9991 = NEVER USED CIGARETTES .....  
9994 = DON'T KNOW .....  
9997 = REFUSED .....  
9998 = BLANK (NO ANSWER) .....  
9999 = LEGITIMATE SKIP (CIGTRY<AGE-1) .....

## TOBACCO

In what month in [CURRENT YEAR] did you first smoke part or all of a cigarette?

In what month in [YEAR FROM CG04a or CG04b] did you first smoke part or all of a cigarette?

(CG04C, CG04D)

CIGMFU

Len : 2 MONTH OF FIRST CIGARETTE USE - RECODE

1 = January .....  
 2 = February .....  
 3 = March .....  
 4 = April .....  
 5 = May .....  
 6 = June .....  
 7 = July .....

## TOBACCO

NOTE: Prior to 2004, the question corresponding to CIG30MEN asked whether respondents smoked menthol or regular cigarettes most often. In 2004, the question was changed to the yes/no question shown below, but the variable name stayed as CIG30MEN. This change in question content does not affect trend comparisons for 2004 onward. However, data in CIG30MEN for 2004 onward are not likely to be comparable with data in CIG30MEN for 2002 and 2003.

Were the cigarettes you smoked during the past 30 days menthol?

(CGMENTH1, CGMENTH2)

CIG30MEN Len : 2 MENTHOL OR REG CIG SMOKED MOST PAST 30 DAYS

- 1 = Yes .....
- 2 = No .....

## TOBACCO

Have you smoked at least 100 cigarettes in your entire life?

(CG16A)

CIG100LF

Len : 2 HAVE YOU SMOKED 100 CIGS IN YOUR LIFE

1 = Yes .....  
 2 = No .....  
 3 = Yes LOGICALLY ASSIGNED .....  
 5 = Yes LOGICALLY ASSIGNED (from skip pattern).....  
 91 = NEVER USED CIGARETTES .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....

These next questions are about your use of snuff, sometimes called dip. Snuff is a finely ground form of tobacco that usually comes in a container called a tin. You can use snuff by placing a pinch or dip in your mouth between your lip and gum or between your cheek and gum. Snuff can also be inhaled through the nose. Snuff is sold in both loose form or in ready-to-use packets.

Have you ever used snuff, even once?

NOTE: This variable incorporates the value from a probe question that was asked when the respondent answered REFUSED to this question.

(CG25, CGREF3)

SNFEVER

Len : 2 EVER USED SNUFF

1 = Yes .....  
 2 = No .....  
 85 = BAD DATA Logically assigned .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....

How old were you the first time you used snuff?

(CG26)

## HALLUCINOGENS

### HALLUCINOGENS

The next questions are about substances called hallucinogens. These drugs often cause people to see or experience things that are not real.

A list of some common hallucinogens is shown below. These and many other substances that people use as hallucinogens are often known by street names, and we can't list them all. Please take a moment to look at the substances listed below so you know what kind of drugs the next questions are about.

LSD, also called 'acid'  
PCP, also called 'angel dust' or phencyclidine  
Peyote  
Mescaline  
Psilocybin  
'Ecstasy,' also called MDMA

Have you ever, even once, used LSD, also called "acid"?

(LS01A, LSREF1)

LSD

Len : 2 EVER USED LSD ("ACID")

1 = Yes .....  
2 = No .....  
3 = Yes LOGICALLY ASSIGNED .....  
91 = NEVER USED HALLUCINOGENS .....  
94 = DON'T KNOW .....  
97 = REFUSED .....

Have you ever, even once, used PCP, also called 'angel dust' or phencyclidine?

(LS01B, LSREF2)

PCP

Len : 2 EVER USED PCP ("ANGEL DUST," PHENCYCLIDINE)

1 = Yes .....  
2 = No .....  
3 = Yes LOGICALLY ASSIGNED .....  
91 = NEVER USED HALLUCINOGENS .....  
94 = DON'T KNOW .....  
97 = REFUSED .....

Have you ever, even once, used peyote?

(LS01C)

PEYOTE

Len : 2 EVER USED PEYOTE

1 = Yes .....  
2 = No .....  
91 = NEVER USED HALLUCINOGENS .....

- 98 = BLANK (NO ANSWER).....

## INHALANTS

### INHALANTS

These next questions are about liquids, sprays, and gases that people sniff or inhale to get high or to make them feel good. We are not interested in times when you inhaled a substance accidentally - such as when painting, cleaning an oven, or filling a car with gasoline.

The questions use the term 'inhalant' to include all the things listed below, as well as any other substances that people sniff or inhale for kicks or to get high. Take a moment to look at the substances listed below so you know what kinds of liquids, sprays, and gases these questions are about.

Amyl nitrite, 'poppers,' locker room odorizers, or 'rush'  
Correction fluid, degreaser, or cleaning fluid  
Gasoline or lighter fluid  
Glue, shoe polish, or toluene  
Halothane, ether, or other paint solvents  
Lighter gases, such as butane or propane  
Nitrous oxide or 'whippits'  
Spray paints  
Other aerosol sprays

Have you ever, even once, inhaled amyl nitrite, 'poppers,' locker room odorizers, or 'rush' for kicks or to get high?

(IN01A)

AMYLNIT

Len : 2 EVER INHALED AMYL NITRITE, 'POPPERS,' RUSH, ETC.

1 = Yes .....  
2 = No .....  
3 = Yes LOGICALLY ASSIGNED .....  
85 = BAD DATA Logically assigned .....  
91 = NEVER USED INHALANTS .....  
94 = DON'T KNOW .....  
97 = REFUSED .....

Have you ever, even once, inhaled correction fluid, degreaser, or cleaning fluid for kicks or to get high?

(IN01B)

CLEFLU

Len : 2 EVER INHALED CORRECTION FLUID, DEGREASER, ETC.

1 = Yes .....  
2 = No .....  
3 = Yes LOGICALLY ASSIGNED .....  
85 = BAD DATA Logically assigned .....  
91 = NEVER USED INHALANTS .....  
94 = DON'T KNOW .....  
97 = REFUSED .....

Have you ever, even once, inhaled gasoline or lighter fluid for kicks or to get high?

(IN01C)

GAS

Len : 2 EVER INHALED GASOLINE OR LIGHTER FLUID

1 = Yes .....  
2 = No .....  
3 = Yes LOGICALLY ASSIGNED .....  
85 = BAD DATA Logically assigned .....  
91 = NEVER USED INHALANTS .....  
94 = DON'T KNOW .....  
97 = REFUSED .....

## INHALANTS

Have you ever, even once, inhaled glue, shoe polish, or toluene for kicks or to get high?

(IN01D)

GLUE

Len : 2    EVER INHALED GLUE, SHOE POLISH, OR TOLUENE

1 = Yes .....  
 2 = No .....  
 3 = Yes LOGICALLY ASSIGNED .....  
 85 = BAD DATA Logically assigned .....  
 91 = NEVER USED INHALANTS .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....

Have you ever, even once, inhaled halothane, ether, or other anesthetics for kicks or to get high?

(IN01E)

ETHER

Len : 2    EVER INHALED HALOTHANE, ETHER, OR OTHER ANESTHETIC

1 = Yes .....  
 2 = No .....  
 85 = BAD DATA Logically assigned .....  
 91 = NEVER USED INHALANTS .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....

Have you ever, even once, inhaled lacquer thinner or other paint solvents for kicks or to get high?

(IN01F)

SOLVENT

Len : 2    EVER INHALED LACQUER THINNER, OTHER PAINT SOLVENTS

1 = Yes .....  
 2 = No .....  
 85 = BAD DATA Logically assigned .....  
 91 = NEVER USED INHALANTS .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....

Have you ever, even once, inhaled lighter gases, such as butane or propane for kicks or to get high?

(IN01G)

LGAS

Len : 2    EVER INHALED LIGHTER GASES (BUTANE, PROPANE)

1 = Yes .....  
 2 = No .....  
 85 = BAD DATA Logically assigned .....  
 91 = NEVER USED INHALANTS .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....

Have you ever, even once, inhaled nitrous oxide or 'whippits' for kicks or to get high?

(IN01H)

NITOXID

Len : 2    EVER INHALED NITROUS OXIDE OR 'WHIPPITS'

1 = Yes .....  
 2 = No .....  
 3 = Yes LOGICALLY ASSIGNED .....  
 85 = BAD DATA Logically assigned .....  
 91 = NEVER USED INHALANTS .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....

## INHALANTS

Have you ever, even once, inhaled spray paints for kicks or to get high?

(IN01I)

SPPAINT

Len : 2 EVER INHALED SPRAY PAINTS

1 = Yes .....  
2 = No .....  
3 = Yes LOGICALLY ASSIGNED .....  
85 = BAD DATA Logically assigned .....  
91 = NEVER USED INHALANTS .....  
94 = DON'T KNOW .....  
97 = REFUSED .....

Have you ever, even once, inhaled some other aerosol spray for kicks or to get high?

(IN01J)

AEROS

Len : 2 EVER INHALED OTHER AEROSOL SPRAYS

1 = Yes .....  
2 = No .....  
3 = Yes LOGICALLY ASSIGNED .....  
85 = BAD DATA Logically assigned .....  
91 = NEVER USED INHALANTS .....  
94 = DON'T KNOW .....  
97 = REFUSED .....

Have you ever, even once used any other inhalants for kicks or to get high besides the ones that have been listed?

(IN01L)

INHNLST

Len : 2 EVER USED OTHER INHALANTS

1 = Yes .....  
2 = No .....  
85 = BAD DATA Logically assigned .....  
91 = NEVER USED INHALANTS .....  
94 = DON'T KNOW .....  
97 = REFUSED .....

## INHALANTS

The answers that people give us about their use of inhalants are important to this study's success. We know that this information is personal, but remember your answers will be kept confidential.

Please think again about answering this question: Have you ever, even once, used any type of inhalant for kicks or to get high?

NOTE: This variable was coded as 1 if respondents answered yes to the above question and 91 if respondents answered the above question as no (see below). This variable also was coded as 1 if the questions corresponding to any of the following variables were answered as yes: AMYLNIT, CLEFLU, GAS, GLUE, ETHER, SOLVENT, LGAS, NITOXID, SPPAINT, AEROS, or INHNOLST. This variable also was coded as 91 if all of the above variables were coded as 91.

 99 = LEGITIMATE SKIP .....

## PAIN RELIEVERS

### PAIN RELIEVERS

Now we have some questions about drugs that people are supposed to take only if they have a prescription from a doctor. We are only interested in your use of a drug if:

- the drug was not prescribed for you, or
- you took the drug only for the experience or feeling it caused.

These questions are about the use of pain relievers. We are not interested in your use of "over-the-counter" pain relievers such as aspirin, Tylenol, or Advil that can be bought in drug stores or grocery stores without a doctor's prescription.

Card A shows pictures of some different kinds of prescription pain relievers and lists the names of some others. These pictures show only pills, but we are interested in your use of any form of prescription pain relievers that were not prescribed for you or that you took only for the experience or feeling they caused. Please look at Card A carefully as you answer the next questions.

Have you ever, even once, used Darvocet, Darvon, or Tylenol with codeine that was not prescribed for you or that you took only for the experience or feeling it caused?

(PR01)

The answers that people give us about their use of prescription pain relievers are important to this study's success. We know that this information is personal, but remember your answers will be kept confidential.

Please think again about answering this question: Have you ever, even once, used any type of prescription pain reliever that was not prescribed for you or that you took only for the experience or feeling it caused?

NOTE: This variable was coded as 1 if respondents answered yes to the above question and 91 if respondents answered the above question as no (see below). This variable also was coded as 1 if the questions corresponding to any of the following variables were answered as yes: DARVTYLC, PERCTYLX, VICOLOR, ANLCARD, or ANLNOLST. This variable also was coded as 81 or 91 if all of the above variables were coded as 81 or 91, respectively.

(ANLCARD, ANLNOLST, DARVTYLC, PERCTYLX, PRREF, VICOLOR)

## PAIN RELIEVERS

NOTE: Although the Food and Drug Administration (FDA) did not approve OxyContin for medical use in the United States until late 1995, no editing was done to OXYCAGE when respondents reported first using OxyContin at ages that would indicate nonmedical use prior to FDA approval. Although no editing was done for these cases, caution is advised in interpreting data from these respondents, and particularly the farther that OXYCAGE would be from first use in 1995.

Now think only about your use of Oxycontin that was not prescribed for you or that you took only for the experience or feeling it caused. How old were you the first time you used Oxycontin in either of these ways?

## TRANQUILIZERS

### TRANQUILIZERS

These next questions ask about the use of tranquilizers. Tranquilizers are usually prescribed to relax people, to calm people down, to relieve anxiety, or to relax muscle spasms. Some people call tranquilizers "nerve pills."

Card B shows pictures of some different kinds of prescription tranquilizers. These pictures show only pills, but we are interested in your use of any form of prescription tranquilizers that were not prescribed for you, or that you took only for the experience or feeling they caused.

Please look at Card B carefully as you answer the next questions.

Have you ever, even once, used Klonopin or Clonazepam that was not prescribed for you or that you took only for the experience or feeling it caused?

(TR01)

## TRANQUILIZERS

The answers that people give us about their use of prescription tranquilizers are important to this study's success. We know that this information is personal, but remember your answers will be kept confidential.

Please think again about answering this question: Have you ever, even once, used any type of prescription tranquilizer that was not prescribed for you or that you took only for the experience or feeling it caused?

NOTE: This variable was coded as 1 if respondents answered yes to the above question and 91 if respondents answered the above question as no (see below). This variable also was coded as 1 if the questions corresponding to any of the following variables were answered as yes: KLONOPIN, XNAXATVN, VALMDIAZ, TRNCARD, or TRNOLST. This variable also was coded as 81 or 91 if all of the above variables were coded as 81 or 91, respectively.

(KLONOPIN, TRNCARD, TRNOLST, TRREF, VALMDIAZ, XNAXATVN)

## STIMULANTS

### STIMULANTS

These next questions ask about the use of drugs such as amphetamines that are known as stimulants, "uppers," or "speed." People sometimes take these drugs to lose weight, to stay awake, or for attention deficit disorders. We are not interested in the use of "over-the-counter" stimulants such as Dexatrim or No-Doz that can be bought in drug stores or grocery stores without a doctor's prescription.

Card C shows pictures of some different kinds of prescription stimulants and lists the names of some others. These pictures show only pills, but we are interested in your use of any form of prescription stimulants that were not prescribed for you, or that you took only for the experience or feeling they caused. Please look at Card C carefully as you answer the next questions.

Have you ever, even once, used Methamphetamine, Desoxyn, or Methedrine that was not prescribed for you or that you took only for the experience or feeling it caused? Methamphetamine is also known as crank, crystal, ice, or speed.

NOTE: This variable incorporates the value from a probe question that was asked when the respondent answered REFUSED to this question.

(ST01, STREF1)

METHDES

Len : 2 EVER USED METHAMPHETAMINE, DESOXYN, OR METHEDRINE

98 = BLANK (NO ANSWER).....

## STIMULANTS

Please look at the stimulants shown below the red line on Card C.

Have you ever, even once, used any of these stimulants when they were not prescribed for you or that you took only for the experience or feeling they caused?

(ST04)

STMCARD

Len : 2 EVER USED ANY STIMULANT BELOW RED LINE ON CARD C

1 = Yes .....

The answers that people give us about their use of prescription stimulants are important to this study's success. We know that this information is personal, but remember your answers will be kept confidential.

Please think again about answering this question: Have you ever, even once, used any type of prescription stimulant that was not prescribed for you or that you took only for the experience or feeling it caused?

NOTE: This variable was coded as 1 if respondents answered yes to the above question and 91 if respondents answered the above question as no (see below). This variable also was coded as 1 if the questions corresponding to any of the following variables were answered as yes: METHDES, DIETPILS, RITMPHEN, STMCARD, or STMNOLST. This variable also was coded as 81 or 91 if all of the above variables were coded as 81 or 91, respectively.

(DIETPILS, METHDES, RITMPHEN, STMCARD, STMNOLST, STREF2)  
STMEVER

Len : 2 EVER USED STIMULANTS NONMEDICALLY

1 = Yes .....  
81 = NEVER USED STIMULANTS Logically assigned .....

## SEDATIVES

### SEDATIVES

These next questions ask about the use of sedatives or barbiturates. These drugs are also called "downers," or "sleeping pills." People take these drugs to help them relax or to help them sleep. We are not interested in the use of "over-the-counter" sedatives such as Sominex, Unisom, Nytol, or Benadryl that can be bought in drug stores or grocery stores without a doctor's prescription.

Card D shows pictures of some different kinds of prescription sedatives and lists the names of some others. These pictures show only pills, but we are interested in your use of any form of prescription sedatives that were not prescribed for you, or that you took only for the experience or feeling they caused. Please look at Card D carefully as you answer the next questions.

Have you ever, even once, used Methaqualone, Sopor, or Quaalude that was not prescribed for you or that you took only for the experience or feeling it caused?

(SV01)

METHAQ

Len : 2 EVER USED METHAQUALONE, SOPOR, OR QUAALUDE

- 1 = Yes .....
- 2 = No .....
- 3 = Yes LOGICALLY ASSIGNED .....
- 81 = NEVER USED SEDATIVES Logically assigned .....
- 91 = NEVER USED SEDATIVES .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER) .....

Have you ever, even once, used barbiturates such as Nembutal, Pentobarbital, Seconal, Secobarbital, or Butalbital that were not prescribed for you or that you took only for the experience or feeling they caused?

(SV02)

NEMBBARB

Len : 2 EVER USED BARBITURATES SUCH AS NEMBUTAL, ETC

- 1 = Yes .....
- 2 = No .....
- 81 = NEVER USED SEDATIVES Logically assigned .....
- 91 = NEVER USED SEDATIVES .....

## SEDATIVES

The answers that people give us about their use of prescription sedatives are important to this study's success. We know that this information is personal, but remember your answers will be kept confidential.

Please think again about answering this question: Have you ever, even once, used any type of prescription sedative that was not prescribed for you or that you took only for the experience or feeling it caused?

NOTE: This variable was coded as 1 if respondents answered yes to the above question and 91 if respondents answered the above question as no (see below). This variable also was coded as 1 if the questions corresponding to any of the following variables were answered as yes: METHAQ, NEMBBARB, RESTTMAZ, SEDCARD, or SEDNOLST. This variable also was coded as 81 or 91 if all of the above variables were coded as 81 or 91, respectively.

(METHAQ, NEMBBARB, RESTTMAZ, SEDCARD, SEDNOLST, SVREF)

Starting in 2002, the questionnaire asked respondents to enter the month and year they first started using cigarettes daily if their age of initiation was equal to or 1 year less than their current age. This new information was then used in the creation of the imputation-revised daily cigarette day, month, and year of first use variables (IRCD2DFU, IICD2DFU, IRCD2MFU, IICD2MFU, IRCD2YFU, and IICD2YFU).

The following any tobacco variable, TOBMON, was created by the examination of CIGMON, CGRMON, SMKMON, and PIPMON.

(CGRMON, CIGMON, PIPMON, SMKMON)

TOBMON      Len : 1    ANY TOBACCO - PAST MONTH USE

0 = Did not use in pst month (ALL SOURCE VARS = 0).....  
 1 = Used in past month (ANY SOURCE VAR = 1).....

NOTE: The following three variables, BRNCIG05, BRNCGR05, BRNSMK05, were created with the intent to show the 25 (Cigarette and Cigar) and 15 (Smokeless Tobacco) most used brands in alphabetical order within the overall population. The most widely used brands for each tobacco product and the ranking of these brands were determined by examining weighted frequencies of the respective source variables among all users of that tobacco product. Once the brand ordering was determined, the top 25 or 15 were chosen and the analysis variables were created as defined below. The brand ordering was determined using the 2005 weighted data.

For each of these tobacco brand variables, all persons who indicated no past month use for a particular product were set to the SAS missing code and excluded from the analysis for that product. The category "Other Brands" contains all past month users who reported other valid brands not otherwise defined in one of the other levels. The category "Unknown/Invalid Brands" contains past month users who did not specify a specific tobacco brand or who specified an invalid brand (i.e. a brand of a different tobacco product).

(CIG30BRN, CIGMON)

## RECODED DRUG USE

The following three variables (CPNSTMFG, CPNSTMYR, CPNSTMMN), like the preceding three variables (STMFLAG, STMYR, STMMON), report lifetime, past year, and past month stimulant use. However, whereas STMFLAG, STMYR, and STMMON used the core-only methamphetamine variables MTHFLAG, MTHYR, and MTHMON in their construction, these three variables use the core-plus-noncore methamphetamine variables CPNMTHFG, CPNMTHYR, and CPNMTHMN. For details on the core-plus-noncore methamphetamine variables, please see Appendix B.4.8 of the 2008 Summary of Findings Report. (NOTE: CPN is an abbreviation for Core-Plus-Noncore.)

(IRMTHRC)

CPNSTMFG

Len : 1 CPN STIMULANTS - EVER USED

0 = Never Used .....  
1 = Ever Used .....

(IRMTHRC)

CPNSTMYR

Len : 1 CPN STIMULANTS - PAST YEAR USE

0 = Did not use in the past year .....  
1 = Used within the past year.....

(IRMTHRC)

CPNSTMMN

Len : 1 CPN STIMULANTS - PAST MONTH USE

0 = Did not use in the past month .....  
1 = Used within the past month.....

The following three variables (MTHFLAG, MTHYR, MTHMON), report recency of use for methamphetamine using only core data from the Stimulants module of the questionnaire, unlike the next three variables (CPNMTHFG, CPNMTHYR, CPNMTHMN), which use additional methamphetamine use data from the Special Drugs module. Methamphetamine use data were first added to the Special Drugs module in 2005, then were augmented in 2006 to include further clarifications. For details, please see Appendix B.4.8 of the Results from the 2008 NSDUH: National Findings Report.

(IRMTHRC)

MTHFLAG

Len : 1 METHAMPHETAMINE - EVER USED

0 = Never Used (IRMTHRC = 9).....  
1 = Ever Used (IRMTHRC = 1-3).....

(IRMTHRC)

MTHYR

Len : 1 METHAMPHETAMINE - PAST YEAR USE

0 = Did not use in the past year (IRMTHRC = 3,9).....  
1 = Used within the past year (IRMTHRC = 1,2) .....

(IRMTHRC)

MTHMON

Len : 1 METHAMPHETAMINE - PAST MONTH USE

0 = Did not use in the past month (IRMTHRC = 2-3,9) .....  
1 = Used within the past month (IRMTHRC = 1) .....

The following three variables (CPNMTHFG, CPNMTHYR, CPNMTHMN), like the preceding three variables (MTHFLAG, MTHYR, MTHMON), report lifetime, past year, and past month methamphetamine use. However, MTHFLAG, MTHYR, and MTHMON are based only on data from the methamphetamine questions in the stimulants section of the prescription drug module of the core questionnaire. In 2005 new methamphetamine items were added to the noncore Special Drugs module to capture methamphetamine users who failed to report the drug in the prescription stimulants module. These were augmented in 2006 to include clarifications. The new noncore Special Drugs items were used to construct the final CPNMTHFG, CPNMTHYR, and CPNMTHMN variables in 2011. For details, please see Appendix B.4.8 of the 2008 Summary of Findings Report. (NOTE: CPN is an abbreviation for Core-Plus-Noncore.)

(IRMTHRC)

RANGE = 1919 - 2011 .....  
9999 = NEVER USED.....

The following variable, MJOFLAG, was created by examination of MRJFLAG and then HALFLAG, HERFLAG, COCFLAG, INHFLAG, and PSYFLAG2.

(ANLFLAG, COCFLAG, HALFLAG, HERFLAG, INHFLAG, MRJFLAG, SEDFLAG, STMFLAG, TRQFLAG)

MJOFLAG                   Len : 1    MARIJUANA ONLY - EVER USED

0 = Never used MJ/has used both MJ & another illicit drug .....  
1 = Marijuana is only (illicit) drug ever used.....

## RECODED DRUG USE

The following variable, MJOYR2, was created by examination of MRJYR and then HALYR, HERYR, COCYR, INHYR, and PSYYR2.

(ANLYR, COCYR, HALYR, HERYR, INHYR, MRJYR, SEDYR, STMYR, TRQYR)

MJOYR2      Len : 1    MARIJUANA ONLY - PAST YEAR USE

0 = MJ not used past yr/Used MJ & othr drug past yr .....  
1 = Marijuana is only (illicit) drug in past year.....

The following variable, MJOMON2, was created by examination of MRJMON and then HALMON, HERMON, COCMON, INHMON, and PSYMON2.

(ANLMON, COCMON, HALMON, HERMON, INHMON, MRJMON, SEDMON, STMMON, TRQMON)

MJOMON2      Len : 1    MARIJUANA ONLY - PAST MONTH USE

0 = MJ not used past mnth/Used MJ & othr drug past mo .....  
1 = Marijuana only (illicit) drug in past month .....

The following variable, IEMFLAG, was created by examination of HALFLAG, HERFLAG, COCFLAG, INHFLAG, and PSYFLAG2.

(COCFLAG, HALFLAG, HERFLAG, INHFLAG, PSYFLAG2)

IEMFLAG      Len : 1    ILLICIT DRUG OTHER THAN MARIJUANA - EVER USED

0 = Never used drug/used only marijuana .....  
1 = Illicit drug except for marijuana are ever used .....

The following variable, IEMYR, was created by examination of HALYR, HERYR, COCYR, INHYR, and PSYYR2.

(COCYR, HALYR, HERYR, INHYR, PSYYR2)

IEMYR      Len : 1    ILLICIT DRUG OTHER THAN MARIJUANA - PAST YEAR USED

0 = Never used drug/used only marijuana past year .....  
1 = Illicit drug except for marijuana used past year .....

The following variable, IEMMON, was created by examination of HALMON, HERMON, COCMON, INHMON, and PSYMON2.

(COCMON, HALMON, HERMON, INHMON, PSYMON2)

IEMMON      Len : 1    ILLICIT DRUG OTHER THAN MARIJUANA-PAST MONTH USED

0 = Never used drug/used only marijuana past month .....  
1 = Illicit drug except for marijuana used past month .....

The following four "any illicit drug except for marijuana" variables were created by examination of the age and date of first use variables for hallucinogens, heroin, cocaine, inhalants, and "any psychotherapeutics."

(IRCOCAGE, IRHALAGE, IRHERAGE, IRINHAGE, PSYAGE2)

IEMAGE      Len : 3    ILLICIT DRUG OTHER THAN MARIJUANA - AGE FIRST USE

## RECODED DRUG USE

Heavy Alcohol Use, HVYDRK2, is defined as drinking five or more drinks on the same occasion on each of 5 or more days in the past 30 days. For this variable, "occasion" means at the same time or within a couple hours of each other. All Heavy Alcohol Users are also "Binge" Alcohol Users.

(IRALCD5)  
HVYDRK2

Len : 1 HEAVY ALCOHOL USE PAST 30 DAYS

0 = Never/No heavy alcohol use (IRALCD5 = 0-4,91,93).....  
1 = Heavy alcohol use (IRALCD5 = 5-30) .....

The following variable, BINGEHVY, was created by examination of BINGEDRK, HVYDRK2, and ALCMON. To be considered a past month "binge" or heavy alcohol user, a respondent must have used alcohol in the past month. Further, to be a past month heavy alcohol user, a respondent must also be a past month "binge" alcohol user.

(ALCMON, BINGEDRK, HVYDRK2)

The following variable, CIGAVGM, was defined as the product of the number of days a user smoked cigarettes in the past month (IRCIGFM) and the average number of cigarettes smoked per day on the days cigarettes were smoked in the past month (CIGAVGD).

(CIGAVGD, IRCIGFM)

CIGAVGM

Len : 6 NUMBER OF CIGARETTES SMOKED PER USER IN PAST MONTH

- RANGE = 0.5 - 1500 .....
- . = Not Used/Unknown (CIGAVGD=. or IRCIGFM=91,93) .....

The following variable, ALCVGM, was defined as the product of the number of days a user consumed alcohol in the past month (IRALCFM) and the average number of drinks consumed per day on the days alcohol was used in the past month (NODR30A). A value of missing was assigned whenever a respondent said that they had not used alcohol in the past month (IRALCFM=91, 93 or NODR30A=991, 993) or the average number of drinks consumed per day on the days alcohol was used in the past month was unknown (NODR30A=985, 994, 997, 998) or logically assigned to 5 or more (NODR30A=975).

(IRALCFM, NODR30A)

ALCAVGM

Len : 4 NUMBER OF ALC BEVS DRANK PER USER IN PAST MONTH

- RANGE = 1 - 1875 .....
- . = Not Used/Unknown (See comment above) .....

## RECODED DRUG USE

NOTE: The following 23 variables pertain to the initiation of substance use in the 12 month time period prior to the interview date. The first 20 variables denoted with a 2, ELIGXXX2, are defined directly below.

Respondents who reported no use of a particular substance in their lifetime (IRXXXYFU=9999) or reported their initial use was during the time period 12 months prior to the interview date (as determined by the imputation revised month [IRXXMDFU], day [IRXXDFU], and year [IRXXYFU] of first use and date of the interview) and, excluding daily cigarette use, reported past year use (XXXR=1) were identified as members of the At-Risk population and classified as eligible initiates, ELIGXXX2=1. A negative response was assigned to all other respondents, ELIGXXX2=2, indicating that they are lifetime users whose initiation of use was before the 12 month period prior to the interview. Specific details about the recoded variables are provided in the Incidence Documentation Appendix.

The remaining three variables denoted with a 3 (ELIGPSY3, ELIGSUM3, and ELIGIEM3) are defined separately above each variable.

The following variable, ELIGPSY3, pertains to the initiation of nonmedical use of psychotherapeutics in the 12 month time period prior to the interview date. Psychotherapeutics include pain relievers (ANL), tranquilizers (TRN), stimulants (STM), and sedatives (SED). Respondents who reported (1) no use of any psychotherapeutics in their lifetime (PSYFU2=9999) or (2) reported their initial use was during the time period 12 months prior to the interview date (as determined by the imputation revised month [PSYMFU2], day [PSYDFU2], and year [PSYFU2] of first use and date of the interview) and reported past year use of the specific psychotherapeutic first initiated (XXXYR=1), were identified as members of the At-Risk population and classified as eligible initiates, ELIGPSY3=1. A negative response was assigned to all other respondents, ELIGPSY3=2, indicating that they are lifetime users whose initiation of use was before the 12 month period prior to the interview.

- 1 = Yes (See comment above) .....
- 2 = No (See comment above).....
- 2 = No (See comment above).....

## RECODED DRUG USE

The following variable, ELIGSUM3, pertains to the initiation of illicit drug use in the 12 month time period prior to the interview date. Illicit drugs include marijuana (MRJ), cocaine (COC), heroin (HER), hallucinogens (HAL), inhalants (INH), pain relievers (ANL), tranquilizers (TRN), stimulants (STM), and sedatives (SED). Respondents who reported (1) no illicit drug use in their lifetime (SUMYFU=9999) or (2) reported their initial use was during the time period 12 months prior to the interview date (as determined by the imputation revised month [SUMMFU], day [SUMDFU], and year [SUMYFU] of first use and date of the interview) and reported past year use of the specific illicit drug first initiated (XXXYR=1), were identified as members of the At-Risk population and classified as eligible initiates, ELIGSUM3=1. A negative response was assigned to all other respondents, ELIGSUM3=2, indicating that they are lifetime users whose initiation of use was before the 12 month period prior to the interview.

(INTDATE, SUMDFU, SUMMFU, SUMYFU, SUMYR)

ELIGSUM3 Len : 1 ELIGIBLE FOR PAST YEAR INITIATION OF ILL DRG USE

1 = Yes (See comment above) .....  
 1 = Yes (See comment above) .....  
 2 = No (See comment above) .....  
 2 = No (See comment above) .....

The following variable, ELIGIEM3, pertains to the initiation of use of illicit drugs other than marijuana in the 12 month time period prior to the interview date. Illicit drugs other than marijuana include cocaine (COC), heroin (HER), hallucinogens (HAL), inhalants (INH), pain relievers (ANL), tranquilizers (TRN), stimulants (STM), and sedatives (SED). Respondents who reported (1) no use of any illicit drug other than marijuana in their lifetime (IEMYFU=9999) or (2) reported their initial use was during the time period 12 months prior to the interview date (as determined by the imputation revised month [IEMMFU], day [IEMDFU], and year [IEMYFU] of first use and date of the interview) and reported past year use of the specific illicit drug first initiated (XXXYR=1), were identified as members of the At-Risk population and classified as eligible initiates, ELIGIEM3=1. A negative response was assigned to all other respondents, ELIGIEM3=2, indicating that they are lifetime users whose initiation of use was before the 12 month period prior to the interview.

(IEMDFU, IEMMFU, IEMYFU, IEMYR, INTDATE)

ELIGIEM3 Len : 1 ELIG FOR PY INITIATION OF ILL DRG OTH THAN MRJ USE

1 = Yes (See comment above) .....  
 1 = Yes (See comment above) .....  
 2 = No (See comment above) .....  
 2 = No (See comment above) .....

NOTE: The following 23 variables pertain to the initiation of substance use in the 12 month time period prior to the interview date. The first 20 variables denoted with a 2, RECXXX2, are defined directly below.

Respondents who reported initiation of a particular substance in the time period 12 months prior to the interview date (as determined by the imputation revised month [IRXXXMFU], day [IRXXXDFU] and year [IRXXXYFU] of first use and date of the interview) and, excluding daily cigarette use, reported past year use (XXXYR=1) were classified as recent initiates, RECXXX2=1. A negative response was assigned to all other respondents, RECXXX2=0, indicating that they never used or are lifetime users whose initiation of use was before the 12 month period prior to the interview. Specific details about the recoded variables are provided in the Incidence Documentation Appendix.

The remaining three variables denoted with a 3 (RECPSY3, RECSUM3, and RECIEM3) are defined separately above each variable. These variables are similar to summary drug variables created in previous NSDUHs (RECPSY2, RECSUM2, RECIEM2); however, revisions were made to ensure the respective initiation of use date for the summary drug variable was used in conjunction with the past year recency variable for the specific drug first initiated. Given the small impact of this change, the three variables (RECPSY3, RECSUM3, and RECIEM3) can be considered comparable to the previous NSDUH variables (RECPSY2, RECSUM2, and RECIEM2), respectively. More detailed information can be found in comments directly above each of the variables.

The following variable, RECPSY3, pertains to the initiation of nonmedical use of psychotherapeutics in the 12 month time period prior to the interview date. Psychotherapeutics include pain relievers (ANL), tranquilizers (TRN), stimulants (STM), and sedatives (SED). Respondents who reported (1) initiation of psychotherapeutic use in the time period 12 months prior to the interview date (as determined by the imputation revised month [PSYMFU2], day [PSYDFU2] and year [PSYYFU2] of first use and date of the interview) and (2) reported past year use of the specific psychotherapeutic first initiated (XXXYR=1) were classified as recent initiates, RECPSY3=1. A negative response was assigned to all other respondents, RECPSY3=0, indicating that they never used or are lifetime users whose initiation of use was before the 12 month period prior to the interview. Specific details about the recoded variables are provided in the Incidence Documentation Appendix.

The following variable, RECIEM3, pertains to the initiation of use of illicit drugs other than marijuana in the 12 month time period prior to the interview date. Illicit drugs other than marijuana include cocaine (COC), heroin (HER), hallucinogens (HAL), inhalants (INH), pain relievers (ANL), tranquilizers (TRN), stimulants (STM), and sedatives (SED). Respondents who reported (1) initiation of use of illicit drugs other than marijuana in the time period 12 months prior to the interview date (as determined by the imputation revised month [IEMMFU], day [IEMDFU] and year [IEMYFU] of first use and date of the interview) and (2) reported past year use of the specific illicit drug first initiated (XXXYR=1) were classified as recent initiates, RECIEM3=1. A negative response was assigned to all other respondents, RECIEM3=0, indicating that they never used or are lifetime users whose initiation of use was before the 12 month period prior to the interview. Specific details about the recoded variables are provided in the Incidence Documentation Appendix.

- 1 = Yes (IEMAGE < 21).....
- 2 = No (IEMAGE >= 21).....

NOTE: The following 17 variables pertain to the first illicit drug used among past year initiates of illicit drugs. The variables, which are not mutually exclusive, indicate for each of the drugs whether that drug had the earliest date of first use. Some respondents have an affirmative response for more than one first drug use variable, either due to dates of first use that are the same for non-related drugs or due to subcategory drugs having the same start date as a main category drug (e.g. LSD is a type of hallucinogen, and thus may have the same start date). Date of first use for each individual drug is determined by using the imputation revised month [IRXXXMFU], day [IRXXXDFU] and year [IRXXXFYU] of first use variables. Date of first use for variables that include a combination of drugs such as PSYFSTYR and IEMFSTYR is determined by using the recoded month (XXXMFU), day (XXXDFU), and year (XXXFYU) of first use variables.

## SPECIAL DRUGS

Earlier, the computer recorded that you have never used Methamphetamine, Desoxyn or Methedrine. Which answer is correct?

(SD17A1, SD17ALT)

MTHEVCK<sup>1</sup>

Len : 2 COMPUTER RECORDED NEVER USED METH, CORRECT

- 1 = I have never used Methamp/Desoxyn/Meth .....
- 2 = I last used Methamphetamine [SD17B FILL] .....
- 85 = BAD DATA Logically assigned .....
- 89 = LEGITIMATE SKIP Logically assigned .....
- 98 = BLANK (NO ANSWER) .....
- 99 = LEGITIMATE SKIP .....

Why did you report earlier that you had never used Methamphetamine?

(SD17A2)

MTHNORSN<sup>1</sup>

Len : 2 REASON REPORTED NEVER USED METHAMP

- 1 = Didnt think of Methamphetamine as prescrip drug .....
- 2 = Made a mistake when I answered the earlier quest .....
- 3 = Some other reason .....
- 12 = Made a mistake when answered earlier ques LOG ASSN .....
- 94 = DON'T KNOW .....
- 98 = BLANK (NO ANSWER) .....
- 99 = LEGITIMATE SKIP .....

(SD17A2SC)

MTHNOSP<sup>1</sup>

Len : 2 OTHER REASON NEVER USED METHAMPHETAMINE

- 2 = Made a mistake when I answered the earlier quest .....
- 4 = Didnt recognize crank/crystal/ice/speed as mthamp .....
- 5 = Didnt recognize earlier names/knew mth by another .....
- 6 = Didnt think of mthamp as a pill; Rx unspecified .....
- 9 = Misunderstood earlier quest; reason unspecified .....
- 10 = Used methamphetamine only rarely/long time ago .....
- 70 = Reported use of a prescribed stimulant .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER) .....
- 99 = LEGITIMATE SKIP .....

NOTE: A small number of respondents who reported in the core STIMULANTS module that did not know whether they ever used methamphetamine nonmedically were not asked the question corresponding to MTHAAGE. These cases were assigned a code of 990 (see below).

How old were you the first time you used Methamphetamine?

(SDME01)

MTHAAGE<sup>1</sup>

Len : 3 AGE WHEN FIRST USED METHAMPHETAMINE

- RANGE = 5 - 55 .....
- 981 = NEVER USED METHAMPHETAMINE Logically assigned .....
- 990 = NOT ASKED THE QUESTION Logically assigned .....
- 991 = NEVER USED METHAMPHETAMINE .....

The next question is about GHB, also called "G," "Georgia Home Boy," "Grievous Bodily Harm," "Liquid G," or gamma hydroxybutyrate. Have you ever, even once, used GHB?

(SD19)

GHB<sup>1</sup>

Len : 2 EVER USED GHB

- 1 = Yes .....
- 2 = No .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....

Adderall is a prescription stimulant that comes in tablet or capsule form. Adderall tablets and capsules are shown below. Have you ever, even once, used Adderall that was not prescribed for you or that you took only for the experience or feeling it caused?

(SD20)

ADDERALL<sup>1</sup>

Len : 2 EVER USED ADDERALL THAT WAS NOT PRESCRIBED

- 1 = Yes .....
- 2 = No .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....

## SPECIAL DRUGS

Ambien is a prescription sedative or sleeping pill that comes in tablet form. Ambien tablets are shown below. Have you ever, even once, used Ambien that was not prescribed for you or that you took only for the experience or feeling it caused?

(SD21)

AMBIEN<sup>1</sup>

Len : 2 EVER USED AMBIEN THAT WAS NOT PRESCRIBED

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....

The last two questions were about prescription drugs. The next question is about non-prescription cough or cold medicines, also known as over the counter medicines. Have you ever, even once, taken a non-prescription cough or cold medicine just to get high?

(SD22A)

COLDMEDS<sup>1</sup>

Len : 2 TAKEN A NONPRESCRIPTION COUGH MED TO GET HIGH

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....

Earlier, the computer asked you questions about your use of hallucinogens. These drugs often cause people to see or experience things that are not real. The next questions are about hallucinogens you were not specifically asked about earlier.

Have you ever, even once, used Ketamine, also called "Special K" or "Super K"?

(SD23A)

KETAMINE<sup>1</sup>

Len : 2 EVER USED KETAMINE

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....

Have you ever, even once, used any of the following:

DMT, also called dimethyltryptamine,  
 AMT, also called alpha-methyltryptamine, or  
 Foxy, also called 5-MeO-DIPT?

(SD23B)

TRYPTMN<sup>1</sup>

Len : 2 EVER USED DMT, AMT, FOXY

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....

Have you ever, even once, used Salvia divinorum?

(SD23C)

SALVDIV<sup>1</sup>

Len : 2 EVER USED SALVIA DIVINORUM

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....

## SPECIAL DRUGS

Earlier, the computer recorded that you have used GHB. How long has it been since you last used GHB?

(SD24)

GHBREC<sup>1</sup>

Len : 2 TIME SINCE LAST USED GHB

- 1 = Within the past 30 days.....
- 2 = More than 30 days ago but within the past 12 mos.....
- 3 = More than 12 months ago.....
- 9 = At some point in the lifetime LOG ASSN.....
- 91 = NEVER USED GHB.....
- 97 = REFUSED.....
- 98 = BLANK (NO ANSWER).....

Earlier, the computer recorded that you have used Adderall that was not prescribed for you or that you took only for the experience or feeling it caused. How long has it been since you last used Adderall in either of these ways?

(SD25)

ADDEREC<sup>1</sup>

Len : 2 TIME SINCE LAST USED ADDERALL

- 1 = Within the past 30 days.....
- 2 = More than 30 days ago but within the past 12 mos.....
- 3 = More than 12 months ago.....
- 9 = At some point in the lifetime LOG ASSN.....
- 91 = NEVER USED ADDERALL.....
- 97 = REFUSED.....
- 98 = BLANK (NO ANSWER).....

Earlier the computer recorded that you have used Ambien that was not prescribed for you or that you took only for the experience or feeling it caused. How long has it been since you last used Ambien in either of these ways?

(SD26)

AMBIREC<sup>1</sup>

Len : 2 TIME SINCE LAST USED AMBIEN

- 1 = Within the past 30 days.....
- 2 = More than 30 days ago but within the past 12 mos.....
- 3 = More than 12 months ago.....
- 9 = At some point in the lifetime LOG ASSN.....
- 91 = NEVER USED AMBIEN.....
- 97 = REFUSED.....
- 98 = BLANK (NO ANSWER).....

Earlier, the computer recorded that you have taken a non-prescription cough or cold medicine just to get high. How long has it been since you last took one of these cough or cold medicines to get high?

(SD27)

COLDREC<sup>1</sup>

Len : 2 TIME SINCE LAST USED COUGH/COLD MED

- 1 = Within the past 30 days.....
- 2 = More than 30 days ago but within the past 12 mos.....
- 3 = More than 12 months ago.....
- 9 = At some point in the lifetime LOG ASSN.....
- 91 = NEVER USED COUGH/COLD MED.....
- 97 = REFUSED.....

## SPECIAL DRUGS

NOTE: OTCFLAG is a "flag" variable that has a value of 1 when respondents reported use of an over-the-counter (OTC) cold medication to get high in the past year, but the only drugs that they specified were prescription- type ones. OTCFLAG has a value of 2 when respondents reported use of OTC cold medications to get high but their "OTHER, Specify" variables COLDYR1 through COLDYR5 all had codes of "bad data" or "blank."

**OTCFLAG<sup>1</sup>**      Len : 2    INCONSISTENCY FLAG FOR REPORT OF OTC COLD MEDS

1 = Specified use only of prescrip-type drugs, past yr.....  
 2 = Bad data or blank in COLDYR1-COLDYR5 .....  
 98 = BLANK (OTHERWISE).....

**RECODED SPECIAL DRUGS**

*The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a<sup>1</sup>.*

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the preceding section.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

NOTE: The variables STNEEDLR, STNLRECR, and NEDLRECR were created to be consistent with data from corresponding variables prior to 2005. STNEEDLR was derived from the variables MTHNEEDL and OSTNEEDL. STNLRECR was derived from the variables MTNDLREC and OSTNLREC. NEDLRECR was derived from the variables HRNDLREC, CONDLREC, and STNLRECR. The variables STNEDL06, STNLRC06, and NDLREC06 also took into account data from the methamphetamine variables MTHANEDL, MTANDLRC, and MTHEVCK from the SPECIAL DRUGS module. STNEDL06 was derived from STNEEDLR and MTHANEDL. STNLRC06 was derived from STNLRECR and MTANDLRC. NDLREC06 was derived from NEDLRECR and STNLRC06.

- 98 = MISSING (BUT NOT REFUSED) .....

NOTE: The following 8 variables indicate whether a respondent has ever used a needle to inject any drug, heroin, cocaine, stimulants, or methamphetamine.

NOTE: NEDFLG01, NEDSTM, and NEDMTH are based only on data from the methamphetamine questions in the stimulants module of the core questionnaire. In 2005, new methamphetamine items were added to the non-core special drugs module to capture methamphetamine users who failed to report the drug in the prescription stimulants module. These were augmented in 2006 to include clarifications. The new non-core special drugs items were used to create CPNNDFLG, CPNNDSTM, and CPNNDMTH. For details, please see Appendix B.4.8 of the 2008 National Findings Report. (NOTE: CPN is an abbreviation for Core-Plus-Noncore.)

A respondent was defined as having used a needle to inject drugs based on the core questions, NEDFLG01, if they indicated at least one of the following: using a needle to inject heroin (HERNEEDL), cocaine (COCNEEDL), stimulants in the stimulants module (STNEEDLR), or any other drug (OTDGNEDL). Otherwise, a respondent was defined as never using needles to inject drugs.

(COCNEEDL, HERNEEDL, OTDGNEDL, STNEEDLR)

NEDFLG01

Len : 1 EVER USED A NEEDLE TO INJECT ANY DRUG

- 0 = Never Used/Unknown (Otherwise) .....
- 1 = Ever Used (Any source variable=1,3) .....

A respondent was defined as having used a needle to inject drugs based on the core-plus-noncore questions, CPNNDFLG, if they indicated at least one of the following: using a needle to inject heroin (HERNEEDL), cocaine (COCNEEDL), stimulants in the stimulants or special drugs module (STNEDL06), or any other drug (OTDGNEDL). Otherwise, a respondent was defined as never using needles to inject drugs.

(COCNEEDL, HERNEEDL, OTDGNEDL, STNEDL06)

CPNNDFLG

Len : 1 CPN: EVER USED A NEEDLE TO INJECT ANY DRUG

- 0 = Never Used/Unknown (Otherwise) .....
- 1 = Ever Used (Any source variable=1,3) .....

# RECODED SPECIAL DRUGS

## BLUNTS

### **BLUNTS**

*The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a<sup>1</sup>.*

Sometimes people take some tobacco out of a cigar and replace it with marijuana. This is sometimes called a "blunt".

NOTE: When respondents previously reported never using marijuana but reported lifetime use of cigars with marijuana in them (i.e., "blunts"), a consistency check was triggered only when respondents reported using blunts in the past 30 days. Therefore, BLNTEVER was assigned a code of 11 when respondents reported using blunts but they did not report use in the past 30 days, and they previously had reported never using marijuana.

Have you ever smoked part or all of a cigar with marijuana in it?

(BL01)

BLNTEVER<sup>1</sup>

Len : 2 EVER SMOKED CIGAR WITH MARIJUANA IN IT

1 = Yes .....

97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

## BLUNTS

NOTE: The variable BLNTNOMJ was assigned a code of 5 if respondents were not asked this question because they reported in the TOBACCO module that they smoked cigars in the past 30 days but reported in the BLUNTS module that they did not smoke cigars with marijuana in them in the past 30 days. It could be logically inferred that all of the cigars that these respondents smoked in the past 30 days did not have marijuana in them. BLNTNOMJ was assigned codes of 14 or 24 if respondents were not asked this question and they reported in the BLUNTS module that they smoked a cigar with marijuana in it in the past 30 days. A code of 14 was assigned if respondents reported in the TOBACCO module that they had smoked cigars but not in the past 30 days. A code of 24 was assigned if respondents reported in the TOBACCO module that they had never smoked part or all of a cigar.

Earlier, you reported that you had smoked part or all of a cigar during the past 30 days. During the past 30 days, did you smoke any cigars that did not have marijuana in them?

(BL07)

BLNTNOMJ<sup>1</sup>

Len : 2 SMOKE CIGARS WITH NO MARIJUANA PAST 30 DAYS

1 = Yes .....  
 2 = No .....  
 5 = Yes LOGICALLY ASSIGNED (from skip pattern).....  
 14 = USED BLUNTS PST 30 DY/DIDNT USE CIGARS PST 30 DY .....

NOTE: HALDAFLG is a flag variable that indicates differences in how the hallucinogen variables in the SUBSTANCE DEPENDENCE AND ABUSE MODULE would have been edited based on the logic in 2007, when only past year users from the core HALLUCINOGENS module were routed into the corresponding questions, and how these hallucinogen variables were edited this year. Editing this year took into account logic that routed past year users of ketamine (from KETAREC), the tryptamines DMT, AMT, and 5-MeO-DIPT/"Foxy" (from TRYPREC), and Salvia divinorum (from SALVREC) into these dependence and abuse questions for hallucinogens.

## SUBSTANCE DEPENDENCE AND ABUSE

NOTE: STMDAFLG is a flag variable that indicates differences in how the stimulant variables in the SUBSTANCE DEPENDENCE AND ABUSE MODULE would have been edited based on logic in earlier years and how these stimulant variables were edited this year. In 2004, past year users were routed into the corresponding questions if they reported past year nonmedical use of prescription stimulants or methamphetamine in the core stimulants module or if they reported in the SPECIAL DRUGS module that they used methamphetamine or other stimulants with a needle (from MTNDLREC and OSTLNREC, respectively). Beginning in 2005 (and continuing this year), past year methamphetamine users from the SPECIAL DRUGS variables MTHAREC and MTANDLRC also were asked about stimulant dependence or abuse. STMDAFLG is coded as 1 through 6 if the inclusion of MTHAREC and MTANDLRC changed the outcome for editing of the stimulant dependence or abuse variables. This year, respondents who reported past year nonmedical use of Adderall (from ADDEREC) were eligible to be asked these questions as well. STMDAFLG is coded as 11 through 16 if the inclusion of ADDEREC changed the outcome for editing of these variables.

NOTE: SEDDAFLG is a flag variable that indicates differences in how the sedative variables in the SUBSTANCE DEPENDENCE AND ABUSE MODULE would have been edited based on the logic in 2007, when only past year nonmedical users from the core SEDATIVES module were routed into the corresponding questions, and how these sedative variables were edited this year. Editing this year took into account logic that routed past year nonmedical users of Ambien (from AMBIREC) into these dependence and abuse questions for sedatives.

# IMPUTED SUBSTANCE DEPENDENCE AND ABUSE

## **IMPUTED SUBSTANCE DEPENDENCE AND ABUSE**

NOTE: What follows are the imputation-revised versions of the 17 nicotine dependence variables that make up the Nicotine Dependence Syndrome Scale (NDSS). Missing values were only imputed if only one of the 17 variables had a missing value. Users should note that the imputed values for these variables are predicted values from regression models. These predicted values are not integers, and do not correspond directly to the integer responses from the questionnaire. It would be advisable to make the necessary adjustments (such as rounding or otherwise making the non- integer values into integers) when doing cross-tabulations.

**RECODED SUBSTANCE DEPENDENCE AND ABUSE**

NOTE: The variables in this section are recoded variables that were created from one or more of the variables from the following two sections: Substance Dependence and Abuse or Imputed Substance Dependence and Abuse.

NOTE: The following recoded dependence variables were defined based on the dependence criteria according to the Nicotine Dependence Syndrome Scale (NDSS) and the Fagerstrom Test of Nicotine Dependence (FTND) for respondents who reported smoking cigarettes in the past month. The NDSS score, NDSSANSP, is calculated as the average score over 17 questions pertaining to five aspects of dependence. This average score was only computed for those respondents who had a valid response (based on actual reporting and imputation) to all 17 questions. Respondents who did not have valid responses (based on actual reporting and imputation) for all 17 questions were coded as SAS missing. Based on the NDSS score, a respondent was defined as having nicotine dependence, NDSSDNSP=1, if their average score was greater than or equal to 2.75. The FTND measure is defined by assessing how soon after waking a respondent had their first cigarette (CIGWAKE). Based on the FTND scale, a respondent was defined as having nicotine dependence, FTNDDNSP=1, if the first cigarette was smoked within 30 minutes of waking up on the days they smoked (CIGWAKE=1 or 2) and the respondent reported smoking cigarettes in the past month. Based on the NDSS and the FTND, a respondent who reported smoking cigarettes was defined as having nicotine dependence in the past month, DNICNSP=1, if they met either the NDSS or the FTND criteria for dependence. Specific details for each of the nicotine dependence related variables are provided in the Recoded Substance Dependence and Abuse Variable Documentation Appendix.

## RECODED SUBSTANCE DEPENDENCE AND ABUSE

NOTE: The following recoded dependence variables were defined based on the dependence criteria listed in the Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition (DSM-IV). Specific details for each of the 10 individual drug dependence variables are provided in the Recoded Substance Dependence and Abuse Variable Documentation Appendix.

A respondent was defined as having marijuana, inhalant, hallucinogen, or tranquilizer dependence (DEPNMRJ, DEPNDINH, DEPNDHAL, DEPNDTRN) if the respondent reported a positive response to three or more of the following six dependence criteria:

1. Spent a great deal of time over a period of a month getting, using, or getting over the effects of the substance (XXXLOTTM=1 or XXXGTOVR=1)
2. Unable to keep set limits on substance use or used more often than intended (XXXKPLMT=2)
3. Needed to use substance more than before to get desired effects or noticed that using the same amount had less effect than before (XXXNDMOR=1 or XXXLSEFX=1)
4. Unable to cut down or stop using the substance every time he or she tried or wanted to (XXXCUTEV=2)
5. Continued to use substance even though it was causing problems with emotions, nerves, mental health, or physical problems (XXXEMCTD=1 or XXXPHCTD=1)
6. Reduced or gave up participation in important activities due to substance use (XXXLSACT=1)

An additional question pertaining to withdrawal symptoms was asked for the following 6 drugs: alcohol, pain relievers, cocaine, heroin, sedatives, and stimulants. The withdrawal question asked the respondent if they had experienced substance specific withdrawal symptoms at one time that lasted for longer than a day after they cut back or stopped using (XXXWDSMT=1). The specific number and type of listed withdrawal symptoms varied by substance. A respondent was defined as having alcohol, pain reliever, cocaine, heroin, sedative, or stimulant dependence (DEPDALC, DEPNDANL, DEPNDIOC, DEPNDHER, DEPNDSED, DEPNDSTM) if the respondent reported a positive response to 3 or more of the 7 dependence criteria (including the six standard criteria listed above plus a seventh withdrawal symptom criteria).

Given the current editing and imputation procedures, along with the use of both core and non-core questions to determine whether or not a respondent was asked the substance dependence and withdrawal questions, it is possible for these dependence recode variables to be inconsistent with the imputed substance use and frequency of use variables. The types of inconsistencies that can occur differ by substance since different combinations of the skip logic criteria were used for each substance. Specific details about these inconsistencies are included in the Recoded Substance Dependence and Abuse Variable Documentation Appendix.

 1 = Yes (Any source variable listed above=1) .....

# RECODED SUBSTANCE DEPENDENCE AND ABUSE

A respondent was defined with dependence on any illicit drug excluding marijuana and not dependent on marijuana, DEPNDXMJ=1, if the respondent was classified as being not marijuana dependent (DEPNDRMJ=0), but being dependent (see dependence criteria listed above DEPNDALC) on any one of these following substances: hallucinogens (DEPNDRHAL), inhalants (DEPNDRINH), tranquilizers (DEPNDRTRN), cocaine (DEPNDRCOC), heroin (DEPNDRHER), pain relievers (DEPNDRANL), stimulants (DEPNDRSTM), or sedatives (DEPNDRSED).

(DEPNDRANL, DEPNDRCOC, DEPNDRHAL, DEPNDRHER, DEPNDRINH, DEPNDRMRJ, DEPNDRSED, DEPNDRSTM, DEPNDRTRN)  
DEPNDRXMJ Len : 1 ILLICIT DRUG EXCLUDING MARIJUANA DEP IN PAST YR

0 = No/Unknown (Otherwise).....  
1 = Yes (DEPNDRMJ=0 & any other source variable=1).....

(DEPNDRANL, DEPNDRSED, DEPNDRSTM, DEPNDRTRN)  
DEPNDRPSY Len : 1 PSYCHOTHERAPEUTIC DEPENDENCE IN THE PAST YR

0 = No/Unknown (Otherwise).....  
1 = Yes (DEPNDRTRN, DEPNDRANL, DEPNDRSTM, or DEPNDRSED=1).....

(DEPNDRALC, DEPNDRILL)  
DEPNDRILLALC Len : 1 ILLICIT DRUG OR ALCOHOL DEPENDENCE IN PAST YR

0 = No/Unknown (DEPNDRILL=0 and DEPNDRALC=0) .....  
1 = Yes (DEPNDRILL=1 or DEPNDRALC=1).....

(DEPNDRALC, DEPNDRILL)  
DEPNDRILLANAL Len : 1 ILLICIT DRUG AND ALCOHOL DEPENDENCE IN PAST YR

0 = No/Unknown (DEPNDRILL=0 or DEPNDRALC=0) .....  
1 = Yes (DEPNDRILL=1 and DEPNDRALC=1).....

NOTE: The following abuse variables were defined based on the abuse criteria listed in the Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition (DSM-IV). Specific details for each of the 10 individual substance abuse variables are provided in the Recoded Substance Dependence and Abuse Variable Documentation Appendix.

A respondent was defined as having alcohol, marijuana, cocaine, heroin, hallucinogen, inhalant, pain reliever, tranquilizer, stimulant, or sedative abuse (ABUSEALC, ABUSEMRJ, ABUSECOC, ABUSEHER, ABUSEHAL, ABUSEINH, ABUSEANL, ABUSESTRN, ABUSEESTM, ABUSESED) if they reported a positive response to one or more of the following four abuse criteria and was determined not to be dependent upon the substance of interest:

1. Respondent reported having serious problems due to substance use at home, work or school (XXXSERPB=1)
2. Respondent reported using substance regularly and then did something where substance use might have put them in physical danger (XXXPDANG=1)
3. Respondent reported substance use causing actions that repeatedly got them in trouble with the law (XXXLAWTR=1)
4. Respondent reported having problems caused by substance use with family or friends (XXXFMFPB=1) and continued to use substance even though it was thought to be causing problems with family and friends (XXXFMCTD=1)

Given the current editing and imputation procedures, along with the use of both core and non-core questions to determine whether or not a respondent was asked the abuse questions, it is possible for these abuse recode variables to be inconsistent with the imputed substance use and frequency of use variables. The types of inconsistencies that can occur differ by substance since different combinations of the skip logic criteria were used for each substance. Specific details about these inconsistencies are included in the Recoded Substance Dependence and Abuse Variable Documentation Appendix.

In addition, because the dependence and abuse variables are mutually exclusive with dependence taking precedence (i.e., dependence is determined first and respondents are only classified as having abused if they are not already classified as dependent, regardless of responses to the abuse questions), it is possible for the variables showing abuse of a combination of substances to not correspond with the abuse status of those individual substances. For example, a respondent who is classified as having abused cocaine in the past year may be classified as not having abused illicit drugs because they were dependent on marijuana and already classified as being dependent on illicit drugs.

(ALCFMCTD, ALCFMFPB, ALCLAWTR, ALCPDANG, ALCSERPB, DEPNDRALC)  
ABUSEALC Len : 1 ALCOHOL ABUSE - PAST YEAR

0 = No/Unknown (Otherwise).....  
1 = Yes (Any one of above criteria and DEPNDRALC=0) .....

# RECODED SUBSTANCE DEPENDENCE AND ABUSE

(ANLFMCTD, ANLFMFPB, ANLLAWTR, ANLPDANG, ANLSERP, DEPNDANL)

ABUSEANL Len : 1 PRESCRIPTION PAIN RELIEVER ABUSE - PAST YEAR

0 = No/Unknown (Otherwise).....  
1 = Yes (Any one of above criteria and DEPNDANL=0) .....

(COCFMCTD, COCFMFPB, COCLAWTR, COCPDANG, COCSERP, DEPNDCCOC)

ABUSECOC Len : 1 COCAINE ABUSE - PAST YEAR

0 = No/Unknown (Otherwise).....  
1 = Yes (Any one of above criteria and DEPNDCCOC=0) .....

A respondent was defined with abuse of hallucinogens, ABUSEHAL, if the respondent was classified as abusing (see criteria listed above ABUSEALC) hallucinogens and was routed to the dependence and abuse questions based ONLY on variables that existed in the 2007 skip logic (HALDAFLG=98). Respondents who only reported abusing hallucinogens based on the Special Drugs module questions added in 2008 were defined as not abusing hallucinogens. See Recoded Substance Dependence and Abuse Variable Documentation Appendix for further details.

(DEPNHAL, HALDAFLG, HALFMCTD, HALFMFPB, HALLAWTR, HALPDANG, HALSERP)

ABUSEHAL Len : 1 HALLUCINOGEN ABUSE - PAST YEAR

0 = No/Unknown (Otherwise).....  
1 = Yes (Any one of above criteria and DEPNHAL=0) .....

(DEPNHER, HERFMCTD, HERFMFPB, HERLAWTR, HERPDANG, HERSERP)

ABUSEHER Len : 1 HEROIN ABUSE - PAST YEAR

0 = No/Unknown (Otherwise).....  
1 = Yes (Any one of above criteria and DEPNHER=0) .....

(DEPNINH, INHFMCTD, INHFMFPB, INHLAWTR, INHPDANG, INHSERP)

0 = No/Unknown (Otherwise).....  
1 = Yes (Any one of above criteria and DEPNINH=0) .....

(DEPNMRJ, MRJFMCTD, MRJFMFPB, MRJLAWTR, MRJPDANG, MRJSERP)

ABUSEMRJ Len : 1 MARIJUANA ABUSE - PAST YEAR

0 = No/Unknown (Otherwise).....  
1 = Yes (Any one of above criteria and DEPNMRJ=0) .....

A respondent was defined with abuse of sedatives, ABUSESED, if the respondent was classified as abusing (see criteria listed above ABUSEALC) sedatives and was routed to the dependence and abuse questions based ONLY on variables that existed in the 2007 skip logic (SEDDAFLG=98). Respondents who only reported abusing sedatives based on the Special Drugs module questions added in 2008 were defined as not abusing sedatives. See Recoded Substance Dependence and Abuse Variable Documentation Appendix for further details.

(DEPNSED, SEDDAFLG, SEDFMCTD, SEDFMFPB, SEDLAWTR, SEDPDANG, SEDSERP)

ABUSESED Len : 1 SEDATIVE ABUSE - PAST YEAR

0 = No/Unknown (Otherwise).....  
1 = Yes (Any one of above criteria and DEPNSED=0) .....

A respondent was defined with abuse of stimulants, ABUSESTM, if the respondent was classified as abusing (see criteria listed above ABUSEALC) stimulants and was routed to the dependence and abuse questions based ONLY on variables that existed in the 2004 skip logic (STMDAFLG=98). Respondents who only reported abusing stimulants based on the Special Drugs module questions added in 2005, 2006, and 2008 were defined as not abusing stimulants. See Recoded Substance Dependence and Abuse Variable Documentation Appendix for further details.

(DEPNSTM, STMDAFLG, STFMCTD, STFMFPB, STMLAWTR, STMPDANG, STMSERP)

ABUSESTM Len : 1 STIMULANT ABUSE - PAST YEAR

0 = No/Unknown (Otherwise).....  
1 = Yes (Any one of above criteria and DEPNSTM=0) .....

# RECODED SUBSTANCE DEPENDENCE AND ABUSE

(DEPNDRN, TRNFMCTD, TRNFMFPB, TRNLAWTR, TRNPDANG, TRNSERP)

ABUSETRN Len : 1 TRANQUILIZER ABUSE - PAST YEAR

0 = No/Unknown (Otherwise).....  
1 = Yes (Any one of above criteria and DEPNDTRN=0) .....

Any illicit drug abuse, ABUSEILL, is defined as abusing (see abuse criteria listed above ABUSEALC) any of the following substances: marijuana (ABUSEMRJ), hallucinogens (ABUSEHAL), inhalants (ABUSEINH), tranquilizers (ABUSETRN), cocaine (ABUSECOC), heroin (ABUSEHER), pain relievers (ABUSEANL), stimulants (ABUSESTM), or sedatives (ABUSESED).

(ABUSEANL, ABUSECOC, ABUSEHAL, ABUSEHER, ABUSEINH, ABUSEMRJ, ABUSESED, ABUSESTM, ABUSETRN, DEPNDILL)

ABUSEILL Len : 1 ILLICIT DRUG ABUSE - PAST YEAR

0 = No/Unknown (Otherwise).....  
1 = Yes (Any source variable above=1 & DEPNDILL=0) .....

Any illicit drug abuse other than marijuana abuse, ABUSEIEM, is defined as abusing (see abuse criteria listed above ABUSEALC) any one of the following illicit drugs: hallucinogens (ABUSEHAL), inhalants (ABUSEINH), tranquilizers (ABUSETRN), cocaine (ABUSECOC), heroin (ABUSEHER), pain relievers (ABUSEANL), stimulants (ABUSESTM), or sedatives (ABUSESED). A respondent's marijuana abuse status is not considered in the creation of this variable.

(ABUSEANL, ABUSECOC, ABUSEHAL, ABUSEHER, ABUSEINH, ABUSESED, ABUSESTM, ABUSETRN, DEPNDIEM)

ABUSEIEM Len : 1 ILLICIT DRUG OTHER THAN MARIJUANA ABUSE - PST YR

0 = No/Unknown (Otherwise).....  
1 = Yes (Any source variable above=1 & DEPNDIEM=0) .....

Any illicit drug excluding marijuana abuse, ABUSEXMJ, is defined as not abusing marijuana (ABUSEMRJ=0), but abusing (see abuse criteria listed above ABUSEALC) any one of the following illicit drugs: hallucinogens (ABUSEHAL), inhalants (ABUSEINH), tranquilizers (ABUSETRN), cocaine (ABUSECOC), heroin (ABUSEHER), pain relievers (ABUSEANL), stimulants (ABUSESTM), or sedatives (ABUSESED).

(ABUSEANL, ABUSECOC, ABUSEHAL, ABUSEHER, ABUSEINH, ABUSEMRJ, ABUSESED, ABUSESTM, ABUSETRN, DEPNDXMJ)

**SPECIAL TOPICS**

*The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a<sup>1</sup>.*

The next questions are about encounters with the police or the court system.

Not counting minor traffic violations, have you ever been arrested and booked for breaking the law?

Being "booked" means that you were taken into custody and processed by the police or by someone connected with the courts, even if you were then released.

(SP01)

BOOKED<sup>1</sup>

Len : 2 EVER ARRESTED AND BOOKED FOR BREAKING THE LAW

1 = Yes .....  
 2 = No .....  
 3 = Yes LOGICALLY ASSIGNED .....  
 85 = BAD DATA Logically assigned .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....

NOTE: For the variable NOBOOKYR and the variables pertaining to arrests for specific offenses in the past 12 months (BKMVTHFT through BKOTHOFF), data are included from follow-up questions that were added to the interview in 2002. Respondents who initially reported that they were arrested/booked for 1 or more offenses in the past 12 months but did not answer "yes" to any of the subsequent questions about the specific offenses for which they were arrested were routed to these follow-up questions. If respondents changed their answer to "0" for the number of times they were arrested/booked in the past 12 months, it was logically inferred that any previously answered questions about arrests for specific offenses should have been skipped, and codes of 89 were assigned to the edited variables. If respondents confirmed that they were arrested/booked at least once in the past 12 months, they had additional opportunity to specify one of the offenses for which they were arrested. These data also were used to edit BKMVTHFT through BKOTHOFF. For these reasons, the distributions of NOBOOKYR through BKOTHOFF may not be comparable to those observed in 1999 through 2001.

Not counting minor traffic violations, how many times during the past 12 months have you been arrested and booked for breaking a law?

(SP02, SP03S)

NOBOOKYR<sup>1</sup>

Len : 3 # TIMES ARRESTED AND BOOKED PAST 12 MONTHS

NOTE: For the variable BKOTH, a code of 3 indicates that respondents did not originally answer "yes" to any of the questions about specific offenses for which they were arrested/booked in the past 12 months, including the question about "some other offense." However, these respondents subsequently specified a valid response for an offense in the past 12 months. A code of 5 in BKOTH indicates that respondents reported being arrested/booked at least once in the past 12 months but did not indicate at least one offense for which they were arrested in that period.

In the past 12 months, were you arrested and booked for some other offense besides these that have been named? Please do not include minor traffic violations.

## SPECIAL TOPICS

NOTE: The variable BKOTHOFF includes information from new follow-up questions that were added to the interview in 2002. When BKOTH=3 (see documentation for BKOTH), BKOTHOFF incorporates valid information from these new follow-up questions on specific offenses for which respondents were arrested in the past 12 months.

(SP03QSC, SP03RSC, SP03SSC)

BKOTHOFF<sup>1</sup>      Len : 2    OTHER OFFENSE PAST 12 MONTHS - SPECIFY

- 1 = Motor vehicle theft.....
- 2 = Larceny or theft.....
- 3 = Burglary or breaking and entering.....
- 4 = Aggravated assault.....
- 5 = Other assault, such as simple assault or battery.....
- 6 = Robbery.....
- 7 = Forcible rape.....
- 9 = Arson.....
- 10 = Driving under the influence of alcohol or drugs.....
- 11 = Drunkenness or other liquor law violation.....
- 12 = Possession of tobacco.....
- 13 = Possession, manufacture, or sale of drugs.....
- 14 = Prostitution or commercialized sex.....
- 15 = Any other sexual offense, exc rape/prostitution.....
- 16 = Fraud, possessing stolen goods, vandalism.....
- 18 = Weapons law violations.....
- 19 = Counterfeiting/Forgery.....
- 20 = Viol of court order/probation/parole, perjury.....
- 21 = Disorderly conduct.....
- 22 = Juvenile status offenses.....
- 23 = All oth ofns: crimes agnst persons/prprty/society.....
- 24 = Traffic violations.....
- 25 = Bad checks.....
- 26 = Curfew/loitering/vagrancy violations.....
- 27 = Trespass of real property.....
- 28 = Runaway.....
- 29 = Family offenses, nonviolent.....
- 30 = Embezzlement.....
- 31 = Intimidation.....
- 32 = Gambling.....
- 33 = Organized criminal activity; unspecified.....
- 34 = Deadly conduct; unspecified.....
- 36 = Possession of drug paraphernalia.....
- 38 = Evading/hindering/obstructing police.....
- 39 = False report/statement/alarm.....
- 41 = Extortion/blackmail.....
- 43 = Kidnapping/abduction.....
- 45 = Child endangermnt/neglect/abandonmt; abuse unspcfd.....
- 46 = Theft of/nonpayment for services.....
- 47 = Harassment; intimidation not specified.....
- 85 = BAD DATA Logically assigned.....
- 89 = LEGITIMATE SKIP Logically assigned.....
- 94 = DON'T KNOW.....
- 97 = REFUSED.....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP.....

Were you on probation at any time during the past 12 months?

(SP04)

PROBATON<sup>1</sup>      Len : 2    ON PROBATION AT ANY TIME PAST 12 MONTHS

- 1 = Yes.....
- 2 = No.....
- 85 = BAD DATA Logically assigned.....
- 94 = DON'T KNOW.....
- 97 = REFUSED.....
- 98 = BLANK (NO ANSWER).....

## SPECIAL TOPICS

Were you on parole, supervised release, or other conditional release from prison at any time during the past 12 months?

(SP05)

PAROLREL<sup>1</sup>

Len : 2 ON PAROLE/SUPRV RELEASE PAST 12 MONTHS

1 = Yes .....  
 2 = No .....  
 85 = BAD DATA Logically assigned .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....

NOTE: The variables DRVALDR, DRVAONLY, and DRVDONLY take into account data from the methamphetamine questions that were added to the Special Drugs module in 2005.

During the past 12 months, have you driven a vehicle while you were under the influence of a combination of alcohol and illegal drugs used together?

(SP06A)

DRVALDR<sup>1</sup>

Len : 2 DROVE UNDER INFLU OF ALC & ILL DRUGS PAST 12 MOS

1 = Yes .....  
 2 = No .....  
 81 = NEVER USED ALCOHOL OR DRUGS Logically assigned .....  
 85 = BAD DATA Logically assigned .....  
 89 = LEGITIMATE SKIP Logically assigned .....  
 91 = NEVER USED ALCOHOL OR DRUGS .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

During the past 12 months, have you driven a vehicle while you were under the influence of alcohol/alcohol only?

(SP06B)

DRVAONLY<sup>1</sup>

Len : 2 DROVE UNDER INFLU OF ALC/ALC ONLY PST 12 MOS

1 = Yes .....  
 2 = No .....  
 81 = NEVER USED ALCOHOL OR DRUGS Logically assigned .....  
 85 = BAD DATA Logically assigned .....  
 91 = NEVER USED ALCOHOL OR DRUGS .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

During the past 12 months, have you driven a vehicle while you were under the influence of illegal drugs/ illegal drugs only?

(SP06C)

DRVDONLY<sup>1</sup>

Len : 2 DROVE UNDER INFLU OF DRUGS/DRUGS ONLY PST 12 MOS

1 = Yes .....  
 2 = No .....  
 81 = NEVER USED ALCOHOL OR DRUGS Logically assigned .....  
 85 = BAD DATA Logically assigned .....  
 89 = LEGITIMATE SKIP Logically assigned .....  
 91 = NEVER USED ALCOHOL OR DRUGS .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

## SPECIAL TOPICS

NOTE: DRVFLAG identifies those respondents (Rs) who were routed to the questions corresponding to DRVALDR or DRVDONLY (or both) solely because they reported use of methamphetamine (from MTHAREC), Adderall (from ADDEREC), Ambien (from AMBIREC), or hallucinogens (from KETAREC, TRYPREC, or SALVREC) in the past year in the SPECIAL DRUGS module. DRVFLAG was coded as 5 if the only indication of past year use came from MTHAREC through SALVREC and Rs reported past year use for more than one of these drugs. Rs for whom DRVFLAG had values of 1 through 5 were not counted in the creation of the RECODED SPECIAL TOPICS variables pertaining to substance use and driving, for consistency with how substance use and driving variables were created prior to the changes in logic that asked these questions of these additional noncore past year users.

**DRVFLAG<sup>1</sup>**      Len : 2    ONLY PAST YEAR USER FROM NONCORE SPECIAL DRUGS

1 = Only past yr methamphetamine user (from MTHAREC) .....

2 = Only past yr Adderall user (from ADDEREC) .....

3 = Only past yr Ambien user (from AMBIREC) .....

4 = Only past yr halluc from Special Drugs (see note) .....

5 = >1 pst yr drug from Special Drugs (see note) .....

98 = BLANK (NO ANSWER).....

NOTE: MXMJPNLT is a renamed version of the variable MXMJPENL from prior years. In 2006 a new level (6 - No penalty) was added to the answer categories. Therefore, data from the previous variable MXMJPENL may not be comparable to data from the current variable MXMJPNLT.

What is the maximum legal penalty in [STATE FILL FROM FIPE4] for first offense possession of an ounce or less of marijuana for your own use?

*(SP07)*  
**MXMJPNLT<sup>1</sup>**      Len : 2    MAX PENALTY FOR 1ST MJ POSS < OUNCE IN YOUR STATE

1 = A fine .....

2 = Probation .....

3 = Community service .....

4 = Possible prison sentence .....

5 = Mandatory prison sentence .....

6 = No penalty .....

85 = BAD DATA Logically assigned .....

94 = DON'T KNOW .....

97 = REFUSED .....

98 = BLANK (NO ANSWER).....

How sure are you that [FILL ANSWER FROM SP07] is the maximum legal penalty for first offense possession of an ounce or less of marijuana in [STATE FILL FROM FIPE4]?

How sure are you that there is no legal penalty for first offense possession of an ounce or less of marijuana in [STATE FILL FROM FIPE4]?

*(SP08)*  
**MXMJSURE<sup>1</sup>**      Len : 2    HOW SURE MAX PENALTY FOR MJ POSS IS CORRECT

1 = Very sure .....

2 = Somewhat sure .....

3 = Not at all sure .....

85 = BAD DATA Logically assigned .....

94 = DON'T KNOW .....

97 = REFUSED .....

98 = BLANK (NO ANSWER).....

99 = LEGITIMATE SKIP (MXMJPENL=94,97).....

In [STATE FILL FROM FIPE4], has marijuana been legally approved for medical use?

*(SP09)*  
**MEDMJUSE<sup>1</sup>**      Len : 2    IN YOUR STATE HAS MJ BEEN APPROVED FOR MEDICAL USE

1 = Yes .....

2 = No .....

85 = BAD DATA Logically assigned .....

94 = DON'T KNOW .....

97 = REFUSED .....

98 = BLANK (NO ANSWER).....

# RECODED SPECIAL TOPICS

## RECODED SPECIAL TOPICS

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the preceding section.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

(DRVALDR, DRVAONLY)

DRIVALC2 Len : 1 DROVE VEHICLE WHILE UNDER INFLUENCE OF ALCOHOL

- 1 = Yes (DRVALDR=1 or DRVAONLY=1).....
- 2 = No (DRVALDR=2,89,99 and DRVAONLY=2) .....
- 3 = Unknown (OTHERWISE).....
- 4 = Never/No Use (DRVALDR and DRVAONLY=81,89,91,99) .....

(DRVALDR, DRVDONLY, DRVFLAG)

DRIVDRG2 Len : 1 DROVE VEHICLE UNDER INFLUENCE OF ILLICIT DRUGS

- 1 = Yes (DRVFLAG=98 & {DRVALDR=1 or DRVDONLY=1}) .....
- 2 = No (DRVFLAG<=5 or {DRVALDR=2,89,99 & DRVDONLY=2}).....
- 3 = Unknown (OTHERWISE).....
- 4 = Never/No Use (DRVALDR and DRVDONLY=81,89,91,99) .....

(DRIVALC2, DRIVDRG2)

DRIVALD2 Len : 1 DROVE VEHICLE UNDER INFLUENCE OF ALC OR ILL DRUGS

- 1 = Yes (DRIVALC2=1 or DRIVDRG2=1).....
- 2 = No (OTHERWISE) .....
- 3 = Unknown (DRIVALC2=3 or DRIVDRG2=3).....
- 4 = Never/No Use (DRIVALC2=4 and DRIVDRG2=4) .....

(PAROLREL)

PAROL Len : 1 PAROLE/SUPERVISED RELEASE STATUS IN THE PAST YEAR

- . = Unknown Parole/Supervised Rel Status (Otherwise) .....
- 1 = On Parole/Supervised Release (PAROLREL=1) .....
- 2 = Not on Parole/Supervised Release (PAROLREL=2).....

(PROBATON)

PROB Len : 1 PROBATION STATUS IN THE PAST YEAR

- . = Unknown Probation Status (Otherwise).....
- 1 = On Probation (PROBATON=1) .....
- 2 = Not on Probation (PROBATON=2) .....

**MARIJUANA PURCHASES**

*The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a<sup>1</sup>.*

Now think about the last time you used marijuana. How did you get this marijuana?

(MJE01)

MMGETMJ<sup>1</sup>

Len : 2 HOW DID YOU GET LAST MARIJUANA USED

- 1 = You bought it .....
- 2 = You traded something else for it .....
- 3 = You got it for free or shared someone else's .....
- 4 = You grew it yourself .....
- 85 = BAD DATA Logically assigned .....
- 91 = NEVER USED MARIJUANA .....
- 93 = DID NOT USE MARIJUANA IN THE PAST 12 MOS .....

MMFGIVE<sup>1</sup>

Len : 2 GIVE AWAY ANY MARIJUANA GOT LAST TIME FOR FREE

- 1 = Yes .....
- 2 = No.....
- 91 = NEVER USED MARIJUANA.....
- 93 = DID NOT USE MARIJUANA IN THE PAST 12 MOS .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

## RECODED MARIJUANA PURCHASES

### **RECODED MARIJUANA PURCHASES**

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the preceding section.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

(MMGETMJ)

MJPGOT

Len : 1 METHOD OF OBTAINING LAST USED MARIJUANA

- 1 = Bought it (MMGETMJ=1) .....
- 2 = Traded for it (MMGETMJ=2) .....
- 3 = Got it for free/shared (MMGETMJ=3) .....
- 4 = Grew it yourself (MMGETMJ=4) .....
- 5 = Method Unspecified (Otherwise) .....
- 6 = Never Used MJ (MMGETMJ=91,93) .....

NOTE: The following "source of last used marijuana bought" variable, MJPBTFRM, is defined so that respondents with unknown data for how they got their last used marijuana (MMGETMJ) or whether they bought marijuana (MMBTPYR) in the past year are included in the "Source Unspecified" level, MJPBTFRM=4. This differs from the "location where last used marijuana was bought" variable, MJPBTPL2, where these unknown cases are defined as SAS missing, (MJPBTPL2=.). To produce estimates among respondents who reported last obtaining marijuana by buying it or buying marijuana in the past year, the analysis should be restricted to MMGETMJ=1 or MMBTPYR=1.

(MMBUYWHO)

MJPBTFRM

Len : 1 SOURCE OF LAST USED MARIJUANA BOUGHT

- 1 = Friend (MMBUYWHO=1) .....
- 2 = Relative or Family Member (MMBUYWHO=2) .....
- 3 = Someone Just Met/Did Not Know (MMBUYWHO=3) .....
- 4 = Source Unspecified (Otherwise) .....
- 5 = Nev'r Use MJ/Didn't Buy Last MJ (MMBUYWHO=91,93,99) .....

The following variable, MJPBTPL2, was assigned a positive response if the respondent reported buying their last used marijuana or buying marijuana in the past 12 months (MMGETMJ=1 OR MMBTPYR=1) and reported the corresponding location of buying the marijuana as noted in the level statements below (MMBPLACE/MMBPLOSP). A respondent was defined as buying last used marijuana from "Some Other Place", MJPBTPL2=6, if MMBPLACE=6 and MMBPLOSP=7, 14, 15, 17, 18, 21, 25, 26. MJPBTPL2 was assigned missing if a respondent did not report buying their last used marijuana (MMGETMJ=2, 3, 4, 85, 91, 93, 94, 97, 98) and the respondent did not report buying marijuana in the past year (MMBTPYR=2, 85, 91, 93, 94, 97, 98), and the location where the respondent reported being the last time he or she bought marijuana was unknown (MMBPLACE=85, 91, 93, 97, 98, 99).

(MMBPLACE, MMBPLOSP, MMBTPYR, MMGETMJ)

MJPBTPL2

Len : 1 LOCATION WHERE LAST USED MARIJUANA WAS BOUGHT

- . = Didn't Buy Last MJ or MJ in PY (See comment above) .....
- 1 = Inside a Public Building (MMBPLACE=1,11) .....
- 2 = Outside in Public Area (MMBPLACE=5,15) .....
- 3 = Inside School (MMBPLACE=2,12) .....
- 4 = Outside on School Property (MMBPLACE=3,13) .....
- 5 = Inside Home/Apt/Dorm (MMBPLACE=4,14) .....
- 6 = Some Other Place (See comment above) .....
- 7 = Location Unspecified (Otherwise) .....

## RECODED MARIJUANA PURCHASES

NOTE: The following "source of last used free marijuana" variable, MJPFREGT, is defined so that respondents with unknown data for how they got their last used marijuana (MMGETMJ) or whether they bought (MMBTPYR) or traded something (MMTRADE) for marijuana in the past year are included in the "Source Unspecified" level, MJPFREGT=4. This differs from the "location where last used free marijuana was received" variable, MJPFRPL2, where these unknown cases are defined as SAS missing (MJPFRPL2=.). To produce estimates among respondents who reported obtaining their last used marijuana for free and reported not buying or not trading something for marijuana in the past year, the analysis should be restricted to MMGETMJ=3 and MMBTPYR=2 and MMTRADE=2.

(MMFREWHO)

MJPFREGT

Len : 1 SOURCE OF LAST USED FREE MARIJUANA

- 1 = Friend (MMFREWHO=1) .....
- 2 = Relative or Family Member (MMFREWHO=2) .....
- 3 = Someone Just Met/Did Not Know (MMFREWHO=3) .....
- 4 = Source Unspecified (Otherwise) .....
- 5 = Nev'r Use MJ/Didn't Get Free MJ (MMFREWHO=91,93,99) .....

The following variable, MJPFRPL2, was assigned a positive response if the respondent reported getting their last used marijuana for free and reported not buying or trading something for marijuana in the past 12 months (MMGETMJ=3 and MMBTPYR=2 and MMTRADE=2) and reported the corresponding location of getting the marijuana for free as noted in the level statements below (MMFPLACE/MMFPLOSP). A respondent was defined as getting their last used marijuana for free from "Some Other Place", MJPFRPL2=6, if MMFPLACE=6 and MMFPLOSP=7, 14, 15, 17, 18, 21, 25, 26. MJPFRPL2 was assigned missing if at least one of the three criteria mentioned above was not met.

(MMBTPYR, MMFPLACE, MMFPLOSP, MMGETMJ, MMTRADE)

MJPFRPL2

Len : 1 LOCATION WHERE LAST USED FREE MRJ WAS RECEIVED

- . = Didn't Get Free MJ (See comment above) .....
- 1 = Inside a Public Building (MMFPLACE=1,11) .....
- 2 = Outside in Public Area (MMFPLACE=5,15) .....
- 3 = Inside School (MMFPLACE=2,12) .....
- 4 = Outside on School Property (MMFPLACE=3,13) .....
- 5 = Inside Home/Apt/Dorm (MMFPLACE=4,14) .....
- 6 = Some Other Place (See comment above) .....
- 7 = Location Unspecified (Otherwise) .....

## PRIOR SUBSTANCE USE

### **PRIOR SUBSTANCE USE**

*The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a<sup>1</sup>.*

NOTE: The variables MRJYRBFR and MRJAGLST were not edited with respect to one another. Therefore, inconsistencies could exist between these two variables.

Earlier questions were about the past 12 months. This question is about the year before that, that is, from [DATEFILL - 12 MONTHS] to [DATEFILL]. During that year, beginning [DATEFILL - 12 MONTHS] and ending [DATEFILL], did you use marijuana or hashish, even once?

(LU01)

MRJYRBFR<sup>1</sup> Len : 2 USE MJ OR HASHISH EVEN ONCE YR BEFORE LAST

1 = Yes .....

NOTE: Data for STMAGLST, STIMYLU, and STIMMLU were edited for consistency with data for MTHAGLST, METHYLU, and METHMLU (see below) if respondents reported nonmedical use of methamphetamine in the core STIMULANTS module. In that context, nonmedical use of methamphetamine could include the prescription forms Desoxyn or Methedrine. Respondents in this survey year who reported methamphetamine use in the noncore SPECIAL DRUGS module also were asked questions about their last use of methamphetamine, without reference to prescription forms of the drug. STMAGLST, STIMYLU, and STIMMLU were not edited for consistency with data on the last use of methamphetamine for these additional noncore methamphetamine users. Consequently, STMAGLST, STIMYLU, and STIMMLU could indicate lifetime nonuse of "prescription" stimulants when the corresponding methamphetamine data in MTHAGLST, METHYLU, and METHMLU indicate that respondents were methamphetamine users. Therefore, documentation of codes for 81, 981, 9981, 91, 991, and 9991 in STMAGLST, STIMYLU, and STIMMLU specifically indicates that respondents had never used prescription stimulants nonmedically.

The computer recorded that you last used a prescription stimulant that was not prescribed for you or that you took only for the experience or feeling it caused [STREC FILL]. How old were you the last time you used any prescription stimulant in either of these ways?

(LU19)

STMAGLST<sup>1</sup>

NOTE: Respondents were assigned legitimate skip codes of 99 or 89 in CIGYRBFR if they reported in the core TOBACCO module that they last smoked a cigarette more than 3 years ago. Logically, these respondents would not have smoked a cigarette in the past 12 to 24 months. In addition, CIGYRBFR was not edited with respect to CIGAGLST or CIGDLLST. Therefore, inconsistencies could exist between CIGYRBFR and these other variables.

Earlier questions were about the past 12 months. This question is about the year before that, that is, from [DATEFILL - 12 MONTHS] to [DATEFILL]. During that year, beginning [DATEFILL - 12 MONTHS] and ending [DATEFILL], did you smoke part or all of a cigarette, even once?

# RECODED PRIOR SUBSTANCE USE

## **RECODED PRIOR SUBSTANCE USE**

NOTE: The variables in this section are recoded variables that were created from one or more of the variables from the following two sections: Recoded Drug Use and Prior Substance Use.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

1 = Used in Pr Yr NOT Pst Yr (MRJYR=0 and MJPRIOR=1) .....

## RECODED PRIOR SUBSTANCE USE

Note: The following 5 variables pertain to the source of a respondent's most recent nonmedical use of prescription pain relievers (ANLLTSC), prescription tranquilizers (TRNLTSC), prescription stimulants (STMLTSC), prescription sedatives (SEDLTSC), and methamphetamine (MTHLTSC2) within the past year.

For each variable, excluding MTHLTSC2, there are 11 mutually exclusive categories; 10 categories for specific sources and one category for those respondents who did not indicate using the drug in the past year. Since methamphetamine is not available by prescription, the first 4 categories are not applicable thus there are only 7 mutually exclusive categories for MTHLTSC2; 6 sources and one category for non past year users. The categories for the specific sources take into account responses from past month users who indicated a single source during the past 30 days, past month users who indicated their most recent source after selecting multiple sources during the past 30 days, and past year users who indicated their most recent source of drug use.

Questions related to source of stimulant use pertain only to prescription stimulants and are not asked of respondents who were users of only methamphetamine, thus those respondents who indicated non-prescription stimulant use only (STMGTLAS=99) were classified as having "No Past Year Rx Use" (STMLTSC=11).

Based on the following conditions, a respondent was classified in one of the following 12 categories (including SAS missing) for the source of most recent prescription drug use in the past year for the variables, ANLLTSC, TRNLTSC, STMLTSC, and SEDLTSC:

1. Got From One Doctor (XXXGTLAS=1, 11 or only XXXRX1DR=1, 3, 5)
2. Got From More Than One Doctor (XXXGTLAS=2, 12 or only XXXRXDRS=1, 3, 5)
3. Wrote Fake Prescription (XXXGTLAS=3, 13 or only XXXRXFAK=1, 3, 5)
4. Stole from Dr Office, Clinic, Hospital, or Pharmacy (XXXGTLAS=4, 14 or only XXXSTOLE=1, 3, 5)
5. Got From Friend or Relative for Free (XXXGTLAS=5, 15 or only XXXFRFRE=1, 3, 5)
6. Bought from Friend or Relative (XXXGTLAS=6, 16 or only XXXFRBUY=1, 3, 5)
7. Took from Friend or Relative without Asking (XXXGTLAS=7, 17 or only XXXFRTKE=1, 3, 5)
8. Bought from Drug Dealer or Other Stranger (XXXGTLAS=8, 18 or only XXXDEALR=1, 3, 5)
9. Bought on the Internet (XXXGTLAS=9, 19 or only XXXINET=1, 3, 5)
10. Got Some Other Way (XXXGTLAS=10 and XXXGTOSP=11-38, 71) or (only XXXOTHWY=1, 3, 5 and XXXOTHSP=11-38, 71))
11. No Past Year Use (XXXGTLAS=81, 89, 91, 93, 99)

(SAS Missing) Unknown/Invalid Source (XXXGTLAS=85, 94, 97, 98 or [XXXGTLAS=10 and XXXGTOSP=70, 72-75, 85, 94, 97, 98] or [XXXGTLAS=99 and only XXXOTHWY=1 and XXXOTHSP=70, 72-75, 85, 94, 97, 98])

- 11 = No Past Year Use .....

## RECODED PRIOR SUBSTANCE USE

The variable for the source of most recent methamphetamine use in the past year, MTHLTSC2, was defined by including respondents routed from the core Stimulants module as well as respondents routed from the noncore Special Drugs module who reported they did not think of methamphetamine as a prescription drug when asked about use in the core Stimulants module.

As indicated below, the imputed recency variable, CPNMTHYR, was used in conjunction with the edited source variables to determine a respondent's source for most recently used methamphetamine based on past year use as defined from both the core Stimulants module and legitimate responses from the noncore Special Drugs module, as previously stated. The categories were defined as follows:

5. From Friend or Relative for Free (Valid Past Year Use [CPNMTHYR=1] and MTHGTLAS=5, 15 or only MTHFRFRE=1, 3, 5)
6. Bought from Friend or Relative (Valid Past Year Use [CPNMTHYR=1] and MTHGTLAS=6, 16 or only MTHFRBUY=1, 3, 5)
7. Took from Friend or Relative without Asking (Valid Past Year Use [CPNMTHYR=1] and MTHGTLAS=7, 17 or only MTHFRTKE=1, 3, 5)
8. Bought from Drug Dealer or Other Stranger (Valid Past Year Use [CPNMTHYR=1] and MTHGTLAS=8, 18 or only MTHDEALR=1, 3, 5)
9. Bought on the Internet (Valid Past Year Use [CPNMTHYR=1] and MTHGTLAS=9, 19 or only MTHINET=1, 3, 5)
10. Some Other Way (Valid Past Year Use [CPNMTHYR=1] and [MTHGTLAS=10 and MTHGTOSP=11-38, 71 or only MTHOTHWY=1, 3, 5 and MTHOTHSP=11-38, 71])
11. No Lifetime or Past Year Use (CPNMTHYR=0)

(SAS Missing) Unknown/Invalid Source {Valid Past Year Use [CPNMTHYR=1] and ([MTHGTLAS=85, 94, 97, 98] or [MTHGTLAS=10 and MTHGTOSP=70, 72, 73, 74, 75, 85, 94, 97, 98] or [MTHGTLAS=99 and only MTHOTHWY=1 and MTHOTHSP=70, 72, 73, 74, 85, 94, 97, 98])}

Please see Appendix B.4.8 of the Results from the 2008 NSDUH: National Findings for more information.

(CPNMTHYR, MTHDEALR, MTHFRBUY, MTHFRFRE, MTHFRTKE, MTHGTLAS, MTHGTOSP, MTHINET, MTHOTHSP, MTHOTHWY)

 11 = No Past Year Use .....

NOTE: The following 46 variables were created to capture all a respondent's reported sources of past month prescription drug and methamphetamine (MTH) use. The prescription drugs include pain relievers (ANL), tranquilizers (TRN), stimulants (STM), and sedatives (SED).

NOTE: For the following 40 variables, to produce estimates among adults with past month prescription drug use, the analysis will need to be restricted by the specific past month prescription drug use variable (XXXMON=1).

# RECODED PRIOR SUBSTANCE USE

The following variable, MTHOTHW2, was defined as yes if a respondent reported past month methamphetamine use (CPNMTHMN=1) and that friends/relatives got methamphetamine in "some other way" (MTHOTHWY=1, 3, 5) and their write-in response was classified as a valid other-specify source (MTHOTHSP=11-38, 71). MTHOTHW2 was defined as no if a respondent reported past month methamphetamine use (CPNMTHMN=1) and either of these situations occurred: (1) friends/relatives did not get methamphetamine in "some other way" (MTHOTHWY=6) or (2) friends/relatives got methamphetamine in "some other way" (MTHOTHWY=1, 3, 5) and their write-in response was classified as an invalid other-specify source (MTHOTHSP=5-9). MTHOTHW2 was recoded to SAS missing if a respondent indicated past month methamphetamine use (CPNMTHMN=1) and either of these situations occurred: (1) the respondent indicated that during the past 30 days they got methamphetamine in "some other way" (MTHOTHWY=1, 3, 5) and their write-in response was classified as an invalid or unknown source (MTHOTHSP=70, 72, 73, 74, 85, 94, 97, 98) or (2) a response to getting methamphetamine "some other way" was unknown (MTHOTHWY=85, 93, 94, 97, 98).

- 3 = No Past Month Use (CPNMTHMN=0) .....

## RECODED PRIOR SUBSTANCE USE

Note: The following 5 variables pertain to the source of a respondent's friend or relative's most recent nonmedical use of prescription pain relievers (ANLSRCFR), prescription tranquilizers (TRNSRCFR), prescription stimulants (STMSRCFR), prescription sedatives (SEDSRCFR), and methamphetamine (MTHSRCFR) within the past year.

During the 2013 data processing some errors were detected where not all valid levels of the other-specify variables were considered when distinguishing between an unknown/invalid source and a valid source not from a friend or relative for free. The overall impact of these inconsistencies is anticipated to be small and it is recommended that the SAS missing and level 11 not be used as two distinct levels in analyses. See the 2013 data file codebook documentation for more detailed information.

For each variable, excluding MTHSRCFR, there are 11 mutually exclusive categories; 10 categories for specific sources and one category for those respondents who did not indicate using the drug in the past year (or lifetime). Since methamphetamine is not available by prescription, the first 4 categories are not applicable thus there are only 7 mutually exclusive categories for MTHSRCFR; 6 sources and one level for non past year users. The categories for the specific sources take into account responses from past month users who indicated a single source during the past 30 days, past month users who indicated their most recent source after indicating multiple sources during the past 30 days, and past year users who indicated their most recent source of drug use.

Questions related to source of stimulant use pertain only to prescription stimulants and are not asked of respondents who were users of only methamphetamine, thus those respondents who indicated non-prescription stimulant use only (STMGLAS=99) were classified as having "No Lifetime or Past Year Rx Use" (STMSRCFR=11).

Based on the following conditions, a respondent was classified in one of the following 12 categories for the source of most recent prescription drug use in the past year for the variables, ANLSRCFR, TRNSRCFR, STMSRCFR, and SEDSRCFR:

1. Got From One Doctor ((XXXGTLAS=5 and XXXFFLAS=1, 11) or (XXXGTLAS=89, 99, 15 and XXXFRFRE=1, 3, 5 and only XXXFF1DR=1, 3, 5))
2. Got From More Than One Doctor ((XXXGTLAS=5 and XXXFFLAS=2, 12) or (XXXGTLAS=89, 99, 15 and XXXFRFRE=1, 3, 5 and only XXXFFDRS=1, 3, 5))
3. Wrote Fake Prescription ((XXXGTLAS=5 and XXXFFLAS=3, 13) or (XXXGTLAS=89,99,15 and XXXFRFRE=1, 3, 5 and only XXXFFAKE=1, 3, 5))
4. Stole from Dr Office, Clinic, Hospital, or Pharmacy ((XXXGTLAS=5 and XXXFFLAS=4,14) or (XXXGTLAS=89, 99, 15 and XXXFRFRE=1, 3, 5 and only XXXFFSTL=1, 3, 5))
5. Got From Friend or Relative for Free ((XXXGTLAS=5 and XXXFFLAS=5, 15) or (XXXGTLAS=89, 99, 15 and XXXFRFRE=1, 3, 5 and only XXXFFREE=1, 3, 5))
6. Bought from Friend or Relative ((XXXGTLAS=5 and XXXFFLAS=6, 16) or (XXXGTLAS=89, 99, 15 and XXXFRFRE=1, 3, 5 and only XXXFFBOT=1, 3, 5))
7. Took from Friend or Relative without Asking ((XXXGTLAS=5 and XXXFFLAS=7, 17) or (XXXGTLAS=89, 99, 15 and XXXFRFRE=1, 3, 5 and only XXXFFTAK=1, 3, 5))
8. Bought from Drug Dealer or Other Stranger ((XXXGTLAS=5 and XXXFFLAS=8, 18) or (XXXGTLAS=89, 99, 15 and XXXFRFRE=1, 3, 5 and only XXXFFDLR=1, 3, 5))
9. Bought on the Internet ((XXXGTLAS=5 and XXXFFLAS=9, 19) or (XXXGTLAS=89, 99, 15 and XXXFRFRE=1, 3, 5 and only XXXFFNET=1, 3, 5))
10. Got Some Other Way ((XXXGTLAS=5 and XXXFFLAS=10 and XXXFFLSP=valid "other" response, levels 11-38, 71) or (XXXGTLAS=89, 99, 15 and XXXFRFRE=1, 3, 5 and XXXFFOTH=1, 3, 5 and XXXFFOSP=valid "other" response, levels 11-38, 71))
11. No Past Year Use or Valid Source of Most Recent Use Not From Friend or Relative for Free ((XXXGTLAS=1-4, 6-14, 16-19) or (XXXFFLAS=81, 89, 91, 93, 99 and XXXFFLSP=81, 89, 91, 93, 99 and XXXFRFRE=6, 81, 89, 83, 91, 93, 99))

(SAS Missing) Unknown/Invalid Source ((XXXGTLAS=5, 15, 89, 99 and XXXFRFRE=1, 3, 5 and (XXXFF1DR through XXXFFOTH=94, 97, 98 or multiple responses)) or [XXXGTLAS=85, 94, 97, 98] or [XXXGTLAS=10 and XXXGTOSP=85, 94, 97, 98] or [XXXGTLAS=15 and (XXXFF1DR=93 or XXXFFDRS=93 or XXXFFAKE=93 or XXXFFSTL=93 or XXXFFREE=93 or XXXFFBOT=93 or XXXFFTAK=93 or XXXFFDLR=93 or XXXFFNET=93)] or [XXXGTLAS=5 and XXXFFLAS=85, 94, 97, 98] or [XXXGTLAS=5 and XXXFFLAS=10 and XXXFFLSP=70, 72-75, 85, 94, 97, 98] or [XXXGTLAS=89, 99, 15 and XXXFRFRE=1, 3, 5 and XXXFFOTH=1, 3, 5 and XXXFFOSP=70, 72-75, 85, 94, 97, 98])

(ANLFF1DR, ANLFFAKE, ANLFFBOT, ANLFFDLR, ANLFFDRS, ANLFFLAS, ANLFFLSP, ANLFFNET, ANLFFOSP, ANLFFOTH, ANLFFREE, ANLFFSTL, ANLFFTAK, ANLFRFRE, ANLGLAS, ANLGTOP)

## RECODED PRIOR SUBSTANCE USE

Due to the outcome of the 2006 Methamphetamine Analysis Study, the variable for a friend or relative's source of methamphetamine for the respondent's most recent methamphetamine use in the past year when they reported they received this most recent drug from a friend or relative for free, MTHSRCFR, was defined by including respondents routed from the core Stimulants module, as well as respondents routed from the noncore Special Drugs module who reported they did not think of methamphetamine as a prescription drug when asked about use in the core Stimulants module.

As described in the comment above ANLSRCFR, during the 2013 data processing some errors were detected. It is recommended that the SAS missing and level 11 not be used as two distinct levels in analyses. See the 2013 data file codebook documentation for more detailed information.

As indicated below, the imputed recency variable, CPNMTHYR, was used in conjunction with the edited source variables to determine a respondent's source for most recently used methamphetamine based on past year use as defined from both the core Stimulants module and legitimate responses from the noncore Special Drugs module, as previously stated. Please see Appendix B.4.8 of the Results from the 2008 NSDUH: National Findings for more information.

5. From Friend or Relative for Free {CPNMTHYR=1 and ([MTHGTLAS=5, 15 and MTHFFLAS=5, 15] or [MTHGTLAS=89, 99 and MTHFRFRE=1, 3, 5 and only MTHFFREE=1, 3, 5] or [MTHGTLAS=89, 99 and MTHFRFRE=1, 3, 5 and MTHFFOTH=1, 3, 5 and MTHFFOSP=5])}
6. Bought from Friend or Relative {CPNMTHYR=1 and ([MTHGTLAS=5, 15 and MTHFFLAS=6, 16] or [MTHGTLAS=89, 99 and MTHFRFRE=1, 3, 5 and only MTHFFBOT=1, 3, 5] or [MTHGTLAS=89, 99 and MTHFRFRE=1, 3, 5 and MTHFFOTH=1, 3, 5 and MTHFFOSP=6])}
7. Took from Friend or Relative without Asking {CPNMTHYR=1 and ([MTHGTLAS=5, 15 and MTHFFLAS=7, 17] or [MTHGTLAS=89, 99 and MTHFRFRE=1, 3, 5 and only MTHFFTAK=1, 3, 5] or [MTHGTLAS=89, 99 and MTHFRFRE=1, 3, 5 and MTHFFOTH=1, 3, 5 and MTHFFOSP=7])}
8. Bought from Drug Dealer or Other Stranger {CPNMTHYR=1 and ([MTHGTLAS=5, 15 and MTHFFLAS=8, 18] or [MTHGTLAS=89, 99 and MTHFRFRE=1, 3, 5 and only MTHFFDLR=1, 3, 5] or [MTHGTLAS=89, 99 and MTHFRFRE=1, 3, 5 and MTHFFOTH=1, 3, 5 and MTHFFOSP=8])}
9. Bought on the Internet {CPNMTHYR=1 and ([MTHGTLAS=5, 15 and MTHFFLAS=9, 19] or [MTHGTLAS=89, 99 and MTHFRFRE=1, 3, 5 and only MTHFFNET=1, 3, 5] or [MTHGTLAS=89, 99 and MTHFRFRE=1, 3, 5 and MTHFFOTH=1, 3, 5 and MTHFFOSP=9])}
10. Some Other Way {CPNMTHYR=1 and ([MTHGTLAS=5, 15 and MTHFFLAS=10 and MTHFFLSP=valid "other" response, levels 11-38, 71] or [MTHGTLAS=89, 99 and MTHFRFRE=1, 3, 5 and MTHFFOTH=1, 3, 5 and MTHFFOSP=valid "other" response, levels 11-38, 71])}
11. No Past Year Use or Valid Source of Most Recent Use Not From Friend or Relative for Free {CPNMTHYR=0 or [MTHGTLAS=6-9, 10, 16-19 and MTHGTOSP^=(85, 94, 97)] or [MTHGTLAS=81, 89, 91, 93, 99 and MTHFFLSP=81, 89, 91, 93, 99 and MTHFRFRE=6, 81, 83, 91, 93, 99 and CPNMTHYR ne 1]}

NOTE: The following 46 variables were created to capture all a respondents friends or relative's reported sources of past month prescription drug and methamphetamine (MTH) use. The prescription drugs include pain relievers (ANL), tranquilizers (TRN), stimulants (STM), and sedatives (SED).

NOTE: For the following 40 variables, to produce estimates among adults with past month prescription drug use, the analysis will need to be restricted by the specific past month prescription drug use variable (XXXMON=1).

## SUBSTANCE TREATMENT

### **SUBSTANCE TREATMENT**

*The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a<sup>1</sup>.*

NOTE: Respondents were not asked questions in the SUBSTANCE TREATMENT module if they did not report lifetime use of alcohol, marijuana, cocaine, heroin, hallucinogens, inhalants, methamphetamine, or lifetime use of prescription psychotherapeutics (pain relievers, tranquilizers, stimulants, or sedatives) for nonmedical reasons. Codes of 81 or 91 in the edited SUBSTANCE TREATMENT variables indicate that the questions did not apply because respondents were nonusers of all of these substances.

These next questions deal with treatment for alcohol and drug problems, not including cigarettes. Please report treatment or counseling designed to help you reduce or stop your alcohol or drug use. Please include detoxification and any other treatment for medical problems associated with your alcohol or drug use.

Have you ever received treatment or counseling for your use of alcohol or any drug, not counting cigarettes?

## SUBSTANCE TREATMENT

NOTE: The variables NDTXNEDR, NDTXALCR, NDTXMJR, NDTXCOCR, NDTXHERR, NDTXHALR, NDTXINHR, NDTXANLR, NDTXTRNR, NDTXSTMR, NDTXSEDR, NDTXSODR, NDTXDG1R, NDTXDG2R, NDTXDG3R, NDTXDG4R, NDTXDG5R, and NDTXEFTR are renamed versions of the following variables from the 1999 survey: NDTXNEED, NDTXALC, NDTXMJ, NDTXCOC, NDTXHER, NDTXHAL, NDTXINH, NDTXANL, NDTXTRAN, NDTXSTIM, NDTXSED, NDTXSOD, NDTXDRG1, NDTXDRG2, NDTXDRG3, NDTXDRG4, NDTXDRG5, and NDTXEFRT. These variables were renamed because changes in the skip logic for 2000 affected whether respondents were asked (or not asked) the questions corresponding to these variables.

During the past 12 months, did you need treatment or counseling for your alcohol or drug use?

## SUBSTANCE TREATMENT

NOTE: For most of the remaining questions in the SUBSTANCE TREATMENT module, the wording differed depending on whether respondents previously reported that they were still in treatment or that they were no longer in treatment. Where two question wordings appear for a given variable, the first wording was what respondents received if they reported that they were no longer in treatment. The second wording was what respondents received if they reported that they were still in treatment.

What was the main place where you received treatment the last time you started treatment/are currently receiving treatment for your alcohol or other drug use, not counting cigarettes?

(TX25, TX25SC1)

NOTE: The variables TXALONEV, TXALONAG, TXDRONEV, TXDRONAG, TXALCDEV, TXALCDAG, TXDRGAEV, and TXDRGAAG pertain to respondents who were lifetime recipients of substance treatment but who had not received treatment in the past year. TXALONEV and TXALONAG pertain to respondents who were lifetime alcohol users but had not reported lifetime use of other drugs. TXDRONEV and TXDRONAG pertain to respondents who did not report lifetime use of alcohol but reported lifetime use of other drugs. TXALCDEV, TXALCDAG, TXDRGAEV, and TXDRGAAG pertain to respondents who were lifetime users of alcohol and other drugs.

NOTE: TXALONEV was assigned a value of 11 or 12 when respondents originally reported that they had not received treatment in the past 12 months but they were logically inferred to have received treatment in that period (TXYREVER=3). Respondents who themselves reported that they had gotten treatment in the past 12 months were asked a different set of questions. However, respondents who reported that they had ever received treatment for their use of alcohol but were logically inferred to have gotten treatment in the past 12 months cannot be inferred to have received alcohol treatment in that period (TXALONEV=11). TXALONEV was assigned a value of 22 when respondents were lifetime users of alcohol but had never used (or misused) marijuana, cocaine, heroin, hallucinogens, inhalants, prescription psychotherapeutics (pain relievers, tranquilizers, stimulants, or sedatives), and they reported that they had never received treatment for their use of alcohol.

Earlier you reported that at some time in your life you received treatment or counseling for your use of alcohol or any drug, not counting cigarettes. Have you ever received treatment for your alcohol use?

## SUBSTANCE TREATMENT

NOTE: TXFGALAG is a "flag" variable that indicates when the first receipt of alcohol treatment in TXALONAG, TXALCDAG, TXYALAGE, TXYDRAAG, or TXYADAAG is inconsistent with the first use of alcohol (from ALCTRY). When TXFGALAG=5, the respondent previously reported never using alcohol. However, the respondent subsequently reported an age for first receipt of alcohol treatment, based on some indication of alcohol treatment in TXYRADG.

**TXFGALAG<sup>1</sup>**      Len : 2    CONSISTENCY OF ALC TX AGE WITH ALC AFU

0 = 1st alc tx age consistent with alc AFU .....  
 1 = 1st alc tx age differs from alc AFU by 1 yr .....  
 2 = 1st alc tx age differs from alc AFU by 2 yrs .....  
 3 = 1st alc tx age differs from alc AFU by 3-4 yrs .....  
 4 = 1st alc tx age differs from alc AFU by >=5 yrs .....  
 5 = Never used alc in core but reported an alc tx age .....  
 81 = NEVER USED ALCOHOL OR DRUGS Logically assigned .....  
 91 = NEVER USED ALCOHOL OR DRUGS .....  
 98 = UNKNOWN .....  
 99 = LEGITIMATE SKIP .....

NOTE: TXFGDGAG is a "flag" variable that indicates when the first receipt of drug treatment in TXDRONAG, TXDRGAAG, TXYALDAG, TXYDRAGE, or TXYADDAG is inconsistent with the earliest reported first use of drugs. When TXFGDGAG=5, the respondent previously reported never using (or misusing) marijuana, cocaine, heroin, hallucinogens, inhalants, or prescription psychotherapeutics (pain relievers, tranquilizers, stimulants, or sedatives). However, the respondent subsequently reported an age for first receipt of drug treatment, based on some indication of drug treatment in TXYRADG.

**TXFGDGAG<sup>1</sup>**      Len : 2    CONSISTENCY OF FIRST DRUG TX AGE WITH DRUG AFUS

0 = 1st drug tx age consistent w/min drug AFU .....  
 1 = 1st drug tx age differs from min drug AFU by 1 yr .....  
 2 = 1st drug tx age differs fr min drug AFU by 2 yrs .....  
 3 = 1st drug tx age differs fr min drug AFU by 3-4 yrs .....  
 4 = 1st drug tx age differs fr min drug AFU by >=5 yrs .....  
 5 = Never used drugs in core but reportd a drug tx age .....  
 81 = NEVER USED ALCOHOL OR DRUGS Logically assigned .....  
 91 = NEVER USED ALCOHOL OR DRUGS .....  
 98 = UNKNOWN .....  
 99 = LEGITIMATE SKIP .....

NOTE: TXFGADAG is a "flag" variable that indicates when an inconsistency exists between the first receipt of alcohol or drug treatment and the earliest reported first use of alcohol or drugs. If TXFGALAG=5 or TXFGDGAG=5, then TXFGADAG=5.

**TXFGADAG<sup>1</sup>**      Len : 2    CONSISTENCY OF FIRST TX AGE WITH ALC/DRUG AFUS

0 = 1st tx age consistent w/minimum AFU .....  
 1 = 1st tx age differs from min AFU by 1 yr .....  
 2 = 1st tx age differs from min AFU by 2 yrs .....  
 3 = 1st tx age differs from min AFU by 3-4 yrs .....  
 4 = 1st tx age differs from min AFU by >=5 yrs .....  
 5 = Any lifetime nonuse with a related tx age .....  
 81 = NEVER USED ALCOHOL OR DRUGS Logically assigned .....  
 91 = NEVER USED ALCOHOL OR DRUGS .....  
 98 = UNKNOWN .....  
 99 = LEGITIMATE SKIP .....

## SUBSTANCE TREATMENT

The next question is about self-help groups. Some examples of self-help groups for alcohol or drug use are AA or Alcoholics Anonymous, NA or Narcotics Anonymous, CA or Cocaine Anonymous, and CMA or Crystal Meth Anonymous.

During the past 12 months, did you go to any self-help group meetings or 12-step programs to receive help for your own use of alcohol or any drug, not counting cigarettes?

(TX52)

TX12MSHG<sup>1</sup>

Len : 2 WENT TO SELF-HELP GRP/12-STEP PGMS PAST 12 MOS

1 = Yes .....  
 2 = No .....  
 5 = Yes LOGICALLY ASSIGNED (from skip pattern) .....  
 81 = NEVER USED ALCOHOL OR DRUGS Logically assigned .....  
 85 = BAD DATA Logically assigned .....  
 91 = NEVER USED ALCOHOL OR DRUGS .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER) .....

Did you go to the self-help group because of your alcohol use only, your drug use only, or because of both alcohol and drug use?

(TX53)

TX12SGAD<sup>1</sup>

Len : 2 WENT TO SELF-HELP GRP FOR ALC ONLY/DRUG ONLY/BOTH

1 = Alcohol use only .....  
 2 = Drug use only .....  
 3 = Both alcohol and drug use .....  
 11 = Alcohol use only LOGICALLY ASSIGNED (TXYRSGAD=1) .....  
 12 = Drug use only LOGICALLY ASSIGNED (TXYRSGAD=2) .....  
 13 = Both alcohol and drug use LOG ASSN (TXYRSGAD=3) .....  
 81 = NEVER USED ALCOHOL OR DRUGS Logically assigned .....  
 91 = NEVER USED ALCOHOL OR DRUGS .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER) .....  
 99 = LEGITIMATE SKIP .....

NOTE: TXSHGFLG compares the consistency of data in the self-help group variable TX12MSHG and the self-help group variable TXYRSHG. TXSHGFLG has a value of 1 when TX12MSHG was answered as "yes" but TXYRSHG indicates that respondents did not receive treatment in a self-help group, even though they reported that they received treatment in the past 12 months. TXSHGFLG has a value of 2 when TX12MSHG was answered as "yes" but TXYREVER or TXEVER indicated that respondents never received any treatment in the past 12 months or lifetime, respectively. TXSHGFLG has a value of 3 when TX12MSHG was not answered as "yes" but TXYRSHG indicates that respondents were logically inferred to have gotten treatment in a self-help group in the past 12 months. TXSHGFLG has a value of 4 when TX12MSHG was answered as "yes" but TXYRSHG was answered as "don't know" or "refused" or it was blank. Finally, TXSHGFLG has a value of 5 when TX12MSHG was answered as "don't know" or "refused" but TXYRSHG was answered as "no."

TXSHGFLG<sup>1</sup>

Len : 2 CONSISTENCY FLAG BETWEEN TX12MSHG AND TXYRSHG

1 = TX12MSHG=1 but TXYRSHG=2 (see note) .....  
 2 = TX12MSHG=1 but TXYREVER=2 or TXEVER=2 (see note) .....  
 3 = TX12MSHG NE 1 but TXYRSHG=3 or 5 (see note) .....  
 4 = TX12MSHG=1 but TXYRSHG=94, 97, or 98 (see note) .....  
 5 = TX12MSHG=94 or 97 but TXYRSHG=2 (see note) .....  
 81 = NEVER USED ALCOHOL OR DRUGS Logically assigned .....  
 91 = NEVER USED ALCOHOL OR DRUGS .....  
 98 = BLANK (NO ANSWER) .....

## RECODED SUBSTANCE TREATMENT

### **RECODED SUBSTANCE TREATMENT**

NOTE: The variables in this section are recoded variables that were created from one or more of the variables from two of the preceding sections: Substance Treatment or Recoded Substance Dependence and Abuse.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

NOTE: The following 7 recoded variables contain information about receiving treatment at any location in lifetime or in the past year.

(TXEVER)  
TXILALEV

Len : 1 RECEIVED TREATMENT FOR DRG OR ALC USE IN LIFETIME

0 = No/Unknown (Otherwise).....  
1 = Yes (TXEVER=1).....

(TXYRADG)  
ALCTRMT

Len : 1 RCVD TRMT ANY LOC FOR ALC USE - PST YR

0 = No/Unknown (Otherwise).....  
1 = Yes (TXYRADG=1,3,4,6,11,12).....

(TXYRADG)  
ILLTRMT

Len : 1 RCVD TRMT ANY LOC FOR ILL DRG USE - PST YR

0 = No/Unknown (Otherwise).....  
1 = Yes (TXYRADG=2,3,5,6,11,12).....

A respondent was classified as receiving treatment at any location in the past year for alcohol use but not illicit drug use, TXALNOIL, if they received only alcohol use treatment at any location in the past year (TXYRADG=1). Respondents with unknown illicit drug use treatment (TXYRADG=4) or who reported receiving alcohol use treatment only but in later treatment questions indicated receiving illicit drug use treatment (TXYRADG=11) are not classified as receiving treatment for alcohol use only.

(TXYRADG)  
TXALNOIL

Len : 1 RCVD TRMT ANY LOC FOR ALC BUT NOT ILL - PST YR

0 = No/Unknown (Otherwise).....  
1 = Yes (TXYRADG=1).....

A respondent was classified as receiving treatment at any location in the past year for illicit drug use but not alcohol, TXILNOAL, if they received only illicit drug use treatment at any location in the past year (TXYRADG=2). Respondents with unknown alcohol use treatment (TXYRADG=5) or who reported receiving illicit drug use treatment only but in later treatment questions indicated receiving alcohol use treatment (TXYRADG=12) are not classified as receiving treatment for illicit drug use only.

(TXYRADG)  
TXILNOAL

Len : 1 RCVD TRMT ANY LOC FOR ILL DRG BUT NOT ALC - PST YR

0 = No/Unknown (Otherwise).....  
1 = Yes (TXYRADG=2).....

(TXYREVER)  
TXILLALC

Len : 1 RCVD TRMT ANY LOC FOR ILL DRG OR ALC - PST YR

0 = No/Unknown (Otherwise).....  
1 = Yes (TXYREVER=1,3).....

(TXYRADG)  
TXILANAL

Len : 1 RCVD TRMT ANY LOC FOR ILL DRG AND ALC - PST YR

0 = No/Unknown (Otherwise).....  
1 = Yes (TXYRADG=3,6,11,12).....

# RECODED SUBSTANCE TREATMENT

NOTE: The following 11 recoded variables contain respondent information about receiving last or current treatment for various substances.

(TXLTYALC)  
TXLTALC2

Len : 1 RECEIVED LAST/CURRENT TREATMENT FOR ALCOHOL

0 = No/Unknown (Otherwise).....  
1 = Yes (TXLTYALC=1,3,5).....

(TXLTYMJ)  
TXLTMJ2

Len : 1 RECEIVED LAST/CURRENT TREATMENT FOR MARIJUANA

0 = No/Unknown (Otherwise).....  
1 = Yes (TXLTYMJ=1,3).....

(TXLTYCOC)  
TXLTCOC2

Len : 1 RECEIVED LAST/CURRENT TREATMENT FOR COCAINE

0 = No/Unknown (Otherwise).....  
1 = Yes (TXLTYCOC=1,3).....

(TXLTYHER)  
TXLTHER2

Len : 1 RECEIVED LAST/CURRENT TREATMENT FOR HEROIN

0 = No/Unknown (Otherwise).....  
1 = Yes (TXLTYHER=1,3).....

(TXLTYHAL)  
TXLTHAL2

Len : 1 RECEIVED LAST/CURRENT TREATMENT FOR HALLUCINOGENS

0 = No/Unknown (Otherwise).....  
1 = Yes (TXLTYHAL=1,3).....

(TXLTYINH)  
TXLTINH2

Len : 1 RECEIVED LAST/CURRENT TREATMENT FOR INHALANTS

0 = No/Unknown (Otherwise).....  
1 = Yes (TXLTYINH=1,3).....

(TXLTYANL)  
TXLTANL2

Len : 1 RECEIVED LAST/CURRENT TREATMENT FOR PAIN RELIEVERS

0 = No/Unknown (Otherwise).....  
1 = Yes (TXLTYANL=1,3).....

(TXLTYTRN)  
TXLTTRN2

Len : 1 RECEIVED LAST/CURRENT TREATMENT FOR TRANQUILIZERS

0 = No/Unknown (Otherwise).....  
1 = Yes (TXLTYTRN=1,3).....

(TXLTYSTM)  
TXLTSTM2

Len : 1 RECEIVED LAST/CURRENT TREATMENT FOR STIMULANTS

0 = No/Unknown (Otherwise).....  
1 = Yes (TXLTYSTM=1,3).....

(TXLTYSED)  
TXLTSER2

Len : 1 RECEIVED LAST/CURRENT TREATMENT FOR SEDATIVES

0 = No/Unknown (Otherwise).....  
1 = Yes (TXLTYSED=1,3).....

## RECODED SUBSTANCE TREATMENT

The following variable, TXLTILL2, was created by examination of the receipt of last/current treatment of marijuana (TXLTMJ2), cocaine (TXLTCOC2), heroin (TXLTHER2), stimulants (TXLTSTM2), sedatives (TXLTSED2), pain relievers (TXLTANL2), hallucinogens (TXLTHAL2), inhalants (TXLTINH2), and tranquilizers (TXLTTRN2).

(TXLTANL2, TXLTCOC2, TXLTHAL2, TXLTHER2, TXLTINH2, TXLTMJ2, TXLTSED2, TXLTSTM2, TXLTTRN2)  
TXLTILL2      Len : 1    RECEIVED LAST/CURRENT TREATMENT FOR ILLICIT DRUGS

0 = No/Unknown (Otherwise).....  
1 = Yes (Any source variable=1).....

NOTE: The following 27 recoded variables contain payment information about respondents last or current treatment.

(TXPYINS)  
TXPINS2      Len : 1    LAST/CURR ILL DRG/ALC TRT PAID FOR BY INSURANCE

0 = No/Unknown (Otherwise).....  
1 = Yes (TXPYINS=1,3).....

(TXPYCARE)  
TXPCARE2      Len : 1    LAST/CURR ILL DRG/ALC TRT PAID FOR BY MEDICARE

0 = No/Unknown (Otherwise).....  
1 = Yes (TXPYCARE=1,3).....

# RECODED SUBSTANCE TREATMENT

NOTE: The following 7 recoded variables contain information about receiving treatment at a specialty facility in the past year.

A respondent was classified as receiving treatment in the past year for alcohol use at a specialty facility, SPECTALC, that is a hospital (inpatient), a rehabilitation facility (in or outpatient), or at a mental health center if they met either of these conditions:

1. Reported receiving only alcohol treatment in the past year (TXYRADG=1, 4, 11) and that treatment was received at one of the four specialty facilities (TXYRHOSP=1, 3, 5 or TXYRRFIN=1, 3, 5 or TXYRRFOP=1, 3, 5 or TXYRMHC=1, 3, 5 or TXYROTSP=21, 22, 23, 24, 45, 46, 56, 64, 76, 81).
- 2.
3.
  - Reported receiving both illicit drug and alcohol treatment in the past year (TXYRADG=3, 6) and reported specifically receiving alcohol treatment at one of the four specialty facilities in the follow-up questions (TXYRHPAD=1, 3 or TXYRINAD=1, 3 or TXYRPOAD=1, 3 or TXYRMHAD=1, 3 or (TXYROTSP=21, 22, 23, 24, 45, 46, 56, 64, 76, 81 and TXYROTAD=1, 3)).
- 4.

(TXYRADG, TXYRHOSP, TXYRHPAD, TXYRINAD, TXYRMHAD, TXYRMHC, TXYROTAD, TXYROTSP, TXYRPOAD, TXYRRFIN, TXYRRFOP)

SPECTALC Len : 1 RCVD TRMT AT SPEC FAC FOR ALC - PST YR

0 = No/Unknown (Otherwise).....  
1 = Yes (See comment above) .....

A respondent was classified as receiving treatment in the past year for illicit drug use at a specialty facility, SPECTILL, that is a hospital (inpatient), a rehabilitation facility (in or outpatient), or a mental health center if they met either of these conditions:

1. Reported receiving only illicit drug treatment in the past year (TXYRADG=2, 5, 12) and that treatment was received at one of the four specialty facilities (TXYRHOSP=1, 3, 5 or TXYRRFIN=1, 3, 5 or TXYRRFOP=1, 3, 5 or TXYRMHC=1, 3, 5 or TXYROTSP=21, 22, 23, 24, 45, 46, 56, 64, 76, 81).
2. Reported receiving both illicit drug and alcohol treatment in the past year (TXYRADG=3, 6) and reported specifically receiving illicit drug treatment at one of the four specialty facilities in the follow-up questions (TXYRHPAD=2, 3 or TXYRINAD=2, 3 or TXYRPOAD=2, 3 or TXYRMHAD=2, 3 or (TXYROTSP=21, 22, 23, 24, 45, 46, 56, 64, 76, 81 and TXYROTAD=2, 3)).

## RECODED SUBSTANCE TREATMENT

A respondent was classified as receiving treatment in the past year for alcohol use but not illicit drug use at a specialty facility, SPCALNIL, that is a hospital (inpatient), a rehabilitation facility (in or outpatient), or at a mental health center if they met one of the following conditions:

1. Reported receiving only alcohol treatment in the past year (TXYRADG=1) and that treatment was received at a specialty facility (TXYRHOSP=1, 3, 5 or TXYRRFIN=1, 3, 5 or TXYRRFOP=1, 3, 5 or TXYRMHC=1, 3, 5 or TXYROTSP=21, 22, 23, 24, 45, 46, 56, 64, 76, 81).
2. Reported receiving only alcohol treatment in the past year but also reported receiving treatment for illicit drug use during their last or current treatment (TXYRADG=11), the reported alcohol treatment was received at one of the four specialty facilities (TXYRHOSP=1, 3, 5 or TXYRRFIN=1, 3, 5 or TXYRRFOP=1, 3, 5 or TXYRMHC=1, 3, 5 or TXYROTSP=21, 22, 23, 24, 45, 46, 56, 64, 76, 81), and their last or current treatment was not at one of the four specialty facilities (LASTTXSP=0).
3. Reported receiving both illicit drug and alcohol treatment in the past year (TXYRADG=3, 6) and reported specifically receiving only alcohol treatment at one of the four specialty facilities in the follow-up questions (TXYRHPAD=1 or TXYRINAD=1 or TXYRPOAD=1 or TXYRMHAD=1 or (TXYROTAD=1 and TXYROTSP=21, 22, 23, 24, 45, 46, 56, 64, 76, 81)) but did not report specifically receiving illicit drug treatment or illicit drug and alcohol treatment at one of the four specialty facilities in the follow-up questions (TXYRHPAD NE 2, 3 or TXYRINAD NE 2, 3 or TXYRPOAD NE 2, 3 or TXYRMHAD NE 2, 3 or (TXYROTAD NE 2, 3 and TXYROTSP=21, 22, 23, 24, 45, 46, 56, 64, 76, 81) or TXYROTSP NE 21, 22, 23, 24, 45, 46, 56, 64, 76, 81).

For the logically assigned levels of TXYRADG, the creation of this variable may be unclear; therefore, details for classifying respondents as not receiving alcohol only treatment at a specialty facility for these logically assigned levels are below:

1. Reported receiving alcohol treatment in the past year but illicit drug treatment status is unknown (TXYRADG=4) or reported receiving illicit drug treatment in the past year but alcohol treatment status is unknown (TXYRADG=5).
2. Reported receiving only illicit drug treatment in the past year but also reported receiving treatment for alcohol during their last or current treatment (TXYRADG=12).
3. Reported receiving only alcohol treatment in the past year but also reported receiving treatment for illicit drug use during their last or current treatment (TXYRADG=11) and the reported alcohol treatment was not at a specialty facility (TXYRHOSP=2, 94, 97, 98 and TXYRRFIN=2, 94, 97, 98 and TXYRRFOP=2, 94, 97, 98 and TXYRMHC=2, 94, 97, 98 and TXYROTSP NE 21, 22, 23, 24, 45, 46, 56, 64, 76, 81).
4. Reported receiving only alcohol treatment in the past year but also reported receiving treatment for illicit drug use during their last or current treatment (TXYRADG=11) and their reported alcohol treatment was at a specialty facility (TXYRHOSP=1, 3, 5 or TXYRRFIN=1, 3, 5 or TXYRRFOP=1, 3, 5 or TXYRMHC=1, 3, 5 or TXYROTSP=21, 22, 23, 24, 45, 46, 56, 64, 76, 81) but their last or current treatment was at a specialty facility (LASTTXSP=1) and included treatment for illicit drug use.

## RECODED SUBSTANCE TREATMENT

A respondent was classified as receiving treatment in the past year for illicit drug use but not alcohol use at a specialty facility, SPCILNAL, that is a hospital (inpatient), a rehabilitation facility (in or outpatient), or at a mental health center if they met one of the following conditions:

1. Reported receiving only illicit drug treatment in the past year (TXYRADG=2) and that treatment was received at a specialty facility (TXYRHOSP=1, 3, 5 or TXYRRFIN=1, 3, 5 or TXYRRFOP=1, 3, 5 or TXYRMHC=1, 3, 5 or TXYROTSP=21, 22, 23, 24, 45, 46, 56, 64, 76, 81).
2. Reported receiving only illicit drug treatment in the past year but also reported receiving treatment for alcohol use during their last or current treatment (TXYRADG=12), the reported illicit drug treatment was received at one of the four specialty facilities (TXYRHOSP=1, 3, 5 or TXYRRFIN=1, 3, 5 or TXYRRFOP=1, 3, 5 or TXYRMHC=1, 3, 5 or TXYROTSP=21, 22, 23, 24, 45, 46, 56, 64, 76, 81), and their last or current treatment was not at one of the four specialty facilities (LASTTXSP=0).
3. Reported receiving both illicit drug and alcohol treatment in the past year (TXYRADG=3, 6) and reported specifically receiving only illicit drug treatment at one of the four specialty facilities in the follow-up questions (TXYRHPAD=2 or TXYRINAD=2 or TXYRPOAD=2 or TXYRMHAD=2 or (TXYROTAD=2 and TXYROTSP=21, 22, 23, 24, 45, 46, 56, 64, 76, 81)) but did not report specifically receiving alcohol treatment or illicit drug and alcohol treatment at one of the four specialty facilities in the follow-up questions (TXYRHPAD NE 1, 3 or TXYRINAD NE 1, 3 or TXYRPOAD NE 1, 3 or TXYRMHAD NE 1, 3 or (TXYROTAD NE 1, 3 and TXYROTSP=21, 22, 23, 24, 45, 46, 56, 64, 76, 81) or TXYROTSP NE 21, 22, 23, 24, 45, 46, 56, 64, 76, 81).

For the logically assigned levels of TXYRADG, the creation of this variable may be unclear; therefore, details for classifying respondents as not receiving illicit drug only treatment at a specialty facility for these logically assigned levels are below:

1. Reported receiving alcohol treatment in the past year but illicit drug treatment status is unknown (TXYRADG=4) or reported receiving illicit drug treatment in the past year but alcohol treatment status is unknown (TXYRADG=5).
2. Reported receiving only alcohol treatment in the past year but also reported receiving treatment for illicit drugs during their last or current treatment (TXYRADG=11).
3. Reported receiving only illicit drug treatment in the past year but also reported receiving treatment for alcohol use during their last or current treatment (TXYRADG=12) and the reported illicit drug treatment was not at a specialty facility (TXYRHOSP=2, 94, 97, 98 and TXYRRFIN=2, 94, 97, 98 and TXYRRFOP=2, 94, 97, 98 and TXYRMHC=2, 94, 97, 98 and TXYROTSP NE 21, 22, 23, 24, 45, 46, 56, 64, 76, 81).
4. Reported receiving only illicit drug treatment in the past year but also reported receiving treatment for alcohol use during their last or current treatment (TXYRADG=12) and their reported illicit drug treatment was at a specialty facility (TXYRHOSP=1, 3, 5 or TXYRRFIN=1, 3, 5 or TXYRRFOP=1, 3, 5 or TXYRMHC=1, 3, 5 or TXYROTSP=21, 22, 23, 24, 45, 46, 56, 64, 76, 81) but their last or current treatment was at a specialty facility (LASTTXSP=1) and included treatment for alcohol use.

1 = Yes (ILLNEED=1 and SPECTILL=0).....

The following variable, TXGPILAL, is defined as needing illicit drug or alcohol treatment in the past year, but not receiving illicit drug or alcohol treatment at a specialty facility. This treatment measure is referred to as a treatment gap.

(SPILLALC, TXNDILAL)

TXGPILAL      Len : 1    NEEDED TRT FOR DRG/ALC USE, NOT RCD TRT SP FAC-PY

0 = No/Unknown (Otherwise).....  
1 = Yes (TXNDILAL=1 and SPILLALC=0).....

NOTE: The following 15 recoded variables contain respondent information about reasons for not receiving substance treatment in the past year or not receiving additional substance treatment in the past year.

(FLNDILAL, NDMRNHCV, NDTXNHCV)

TXRNNHCV      Len : 1    NO TRT/ADDL TRT PST YR B/C COULDNT AFFORD/NO INSUR

. = Felt No Need for Drg/Alc Trt Pst Yr (FLNDILAL=2).....  
0 = No/Unknown (Otherwise).....  
1 = Yes (FLNDILAL=1 &(NDTXNHCV or NDMRNHCV=1,3,11,13)).....

(FLNDILAL, NDMRLMCV, NDTXLMCV)

TXRNLMCV      Len : 1    NO TRT/ADDL TRT PST YR B/C INS DIDNT COVR TRT/COST

. = Felt No Need for Drg/Alc Trt Pst Yr (FLNDILAL=2).....  
0 = No/Unknown (Otherwise).....  
1 = Yes (FLNDILAL=1 &(NDTXLMCV or NDMRLMCV=1,3,11,13)).....

(FLNDILAL, NDMRNTSP, NDTXNTSP)

TXRNTSP      Len : 1    NO TRT/ADDL TRT PST YR B/C NO TRANSPORTATION

. = Felt No Need for Drg/Alc Trt Pst Yr (FLNDILAL=2).....  
0 = No/Unknown (Otherwise).....  
1 = Yes (FLNDILAL=1 &(NDTXNTSP or NDMRNTSP=1,3,11,13)).....

(FLNDILAL, NDMRTYPE, NDTXTYPE)

TXRNTYPE      Len : 1    NO TRT/ADDL TRT PST YR B/C NO PROGRAM HAD TYPE TRT

. = Felt No Need for Drg/Alc Trt Pst Yr (FLNDILAL=2).....  
0 = No/Unknown (Otherwise).....  
1 = Yes (FLNDILAL=1 &(NDXTYPE or NDMRTYPE=1,3,11,13)).....

(FLNDILAL, NDMRREDY, NDTXREDY)

TXRNNSTP      Len : 1    NO TRT/ADDL TRT PST YR B/C NOT READY TO STOP USE

. = Felt No Need for Drg/Alc Trt Pst Yr (FLNDILAL=2).....  
0 = No/Unknown (Otherwise).....  
1 = Yes (FLNDILAL=1 &(NDTXREDY or NDMRREDY=1,3,11,13)).....

(FLNDILAL, NDMROPEN, NDTXOPEN)

TXRNOPE      Len : 1    NO TRT/ADDL TRT PST YR B/C NO OPENINGS IN PROGRAM

. = Felt No Need for Drg/Alc Trt Pst Yr (FLNDILAL=2).....  
0 = No/Unknown (Otherwise).....  
1 = Yes (FLNDILAL=1 &(NDTXOPEN or NDMROPEN=1,3,11,13)).....

# RECODED SUBSTANCE TREATMENT

(FLNDILAL, NDMRWHER, NDTXWHER)

TXRNWHER Len : 1 NO TRT/ADDL TRT PST YR B/C DIDNT KNOW WHERE TO GO

. = Felt No Need for Drg/Alc Trt Pst Yr (FLNDILAL=2).....  
 0 = No/Unknown (Otherwise).....  
 1 = Yes (FLNDILAL=1 &(NDTXWHER or NDMRWHER=1,3,11,13)) .....

(FLNDILAL, NDMRNBR, NDTXNBR)

TXRNNBR Len : 1 NO TRT/ADDL TRT PST YR B/C CAUSE NBR HAVE NEG OPIN

. = Felt No Need for Drg/Alc Trt Pst Yr (FLNDILAL=2).....  
 0 = No/Unknown (Otherwise).....  
 1 = Yes (FLNDILAL=1 &(NDTXNBR or NDMRNBR=1,3,11,13)) .....

(FLNDILAL, NDMRJOB, NDTXJOB)

. = Felt No Need for Drg/Alc Trt Pst Yr (FLNDILAL=2).....  
 0 = No/Unknown (Otherwise).....  
 1 = Yes (FLNDILAL=1 &(NDTXBUSY or NDMRBUSY=1,3,11,13)) .....

(FLNDILAL, NDMRFOUT, NDTXFOUT)

TXRNFOUT Len : 1 NO TRT/ADDL TRT PST YR B/C NOT WANT OTHRS TO KNOW

. = Felt No Need for Drg/Alc Trt Pst Yr (FLNDILAL=2).....  
 0 = No/Unknown (Otherwise).....  
 1 = Yes (FLNDILAL=1 &(NDTXFOUT or NDMRFOUT=1,3,11,13)) .....

# RECODED SUBSTANCE TREATMENT

The following variable, TXRNOTHR, was assigned a positive response if a respondent felt a need for substance use treatment in the past year (FLNDILAL=1) and reported the reason for not receiving treatment or not receiving additional treatment as some other reason than the fourteen reasons listed above (NDTXRIMP=16-31 or NDMRRIMP=16-31). A negative response was assigned if a respondent felt a need for substance use treatment in the past year (FLNDILAL=1) and reported one of the reasons listed in the fourteen variables above, reported they did get/sought treatment, did not report an other-specify reason, or were not asked the question (NDTXRIMP=1-14, 70, 85, 94, 97, 98, 99 or NDMRRIMP=1-14, 70, 85, 94, 97, 98, 99).

(FLNDILAL, NDMRRIMP, NDTXRIMP)

TXRNOTHR      Len : 1    NO TRT/ADDL TRT PST YR B/C SOME OTHER REASON

. = Felt No Need for Drg/Alc Trt Pst Yr (FLNDILAL=2).....  
0 = No/Unknown (See comment above).....  
1 = Yes (See comment above) .....

# PREGNANCY AND HEALTH CARE

## PREGNANCY AND HEALTH CARE

The next questions are about your health and health care.

Are you currently pregnant?

(HLTH01)

PREGNANT

Len : 2 ARE YOU PREGNANT

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

How many months pregnant are you?

(HLTH02)

PREGMOS

Len : 2 HOW MANY MONTHS PREGNANT

RANGE = 1 - 9 .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

During the past 12 months, that is since [DATEFILL], how many different times have you been treated in an emergency room for any reason?

(HLTH03)

NMERTMT

Len : 2 # OF TIMES BEEN TREATED IN EMER ROOM PAST 12 MOS

RANGE = 0 - 90 .....  
 985 = BAD DATA Logically assigned .....  
 994 = DON'T KNOW .....  
 997 = REFUSED .....  
 998 = BLANK (NO ANSWER).....

During the past 12 months, have you stayed overnight or longer as an inpatient in a hospital?

(HLTH04)

INHOSPYR

Len : 2 STAYED OVERNIGHT AS INPNT IN HOSP PAST 12 MOS

1 = Yes .....  
 2 = No .....  
 85 = BAD DATA Logically assigned .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....

During the past 12 months, how many nights were you an inpatient in a hospital?

(HLTH05)

NMNGTHSP

Len : 3 # NIGHTS STAYED IN HOSPITAL OVERNIGHT OR LONGER

RANGE = 1 - 333 .....  
 985 = BAD DATA Logically assigned .....  
 994 = DON'T KNOW .....  
 997 = REFUSED .....  
 998 = BLANK (NO ANSWER).....  
 999 = LEGITIMATE SKIP .....

## PREGNANCY AND HEALTH CARE

The following is a list of health conditions. Please read the list, and type in the numbers of any of these conditions that a doctor or other medical professional has ever told you that you had.

Please type in the numbers of any that apply.

(CHKLST)  
LIFANXD

Len : 2    EVER HAD ANXIETY DISORDER

1 = Response entered.....  
6 = Response not entered.....  
85 = BAD DATA Logically assigned .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

(CHKLST)  
LIFASMA

Len : 2    EVER HAD ASTHMA

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

(CHKLST)  
LIFBRONC

Len : 2    EVER HAD BRONCHITIS

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

(CHKLST)  
LIFCIRR

Len : 2    EVER HAD CIRRHOSIS OF THE LIVER

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

(CHKLST)  
LIFDEPRS

Len : 2    EVER HAD DEPRESSION

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

(CHKLST)  
LIFDIAB

Len : 2    EVER HAD DIABETES

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

# PREGNANCY AND HEALTH CARE

(CHKLST)  
LIFHARTD

Len : 2 EVER HAD HEART DISEASE

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

(CHKLST)  
LIFHEPAT

Len : 2 EVER HAD HEPATITIS

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

(CHKLST)  
LIFHBP

Len : 2 EVER HAD HIGH BLOOD PRESSURE

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

(CHKLST)  
LIFHIV

Len : 2 EVER HAD HIV/AIDS

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

(CHKLST)  
LIFLUNCA

Len : 2 EVER HAD LUNG CANCER

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

(CHKLST)  
LIFPANCR

Len : 2 EVER HAD PANCREATITIS

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

# PREGNANCY AND HEALTH CARE

(CHKLST)  
LIFPNEU

Len : 2 EVER HAD PNEUMONIA

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

(CHKLST)  
LIFSTD5

Len : 2 EVER HAD SEXUALLY TRANSMITTED DISEASE

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

(CHKLST)  
LIFSINUS

Len : 2 EVER HAD SINUSITIS

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

(CHKLST)  
LIFSLPAP

Len : 2 EVER HAD SLEEP APNEA

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

(CHKLST)  
LIFSTROK

Len : 2 EVER HAD STROKE

1 = Response entered.....  
6 = Response not entered.....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (LIFNONE=95) .....

# RECODED PREGNANCY AND HEALTH CARE

## **RECODED PREGNANCY AND HEALTH CARE**

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the preceding section.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

(PREGNANT)

PREG

Len : 1 PREGNANT FEMALES AGED 12-44

0 = Otherwise .....  
1 = Pregnant Females Aged 12-44 (PREGNANT=1) .....

(PREGNANT)

PREG2

Len : 1 PREGNANCY STATUS OF FEMALES AGED 12-44

. = Unknown (Otherwise) .....  
1 = Pregnant (PREGNANT=1) .....  
2 = Not Pregnant (PREGNANT=2) .....  
3 = Males/Females Not Aged 12-44 (PREGNANT=89,99) .....

(PREG, PREGMOS)

TRIMEST

Len : 1 CURRENT TRIMESTER OF PREGNANCY-FEMALES AGED 12-44

. = Unknown (PREG=1 & PREGMOS=85,94,97) .....  
1 = 1st 3 months of pregnancy (PREG=1 & PREGMOS=1-3) .....  
2 = 2nd 3 months of pregnancy (PREG=1 & PREGMOS=4-6) .....  
3 = Last 3 months of pregnancy (PREG=1 & PREGMOS=7-9) .....  
4 = Males/Not Pregnant Females (PREG=0) .....

NOTE: The following 40 recoded variables contain information about whether a doctor or other medical professional had told the respondent that they had a specific health condition in their lifetime or in the past year.

(LIFANXD)

ANXDLIF

Len : 1 HAD ANXIETY IN LIFETIME

. = Unknown (Otherwise) .....  
0 = No (LIFANXD=6,99) .....  
1 = Yes (LIFANXD=1) .....

(YRANXD)

ANXDYR

**ADULT MENTAL HEALTH TREATMENT**

*The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a<sup>1</sup>.*

These next questions are about treatment and counseling for problems with emotions, nerves or mental health. Please do not include treatment for alcohol or drug use.

NOTE: This variable incorporates the value from a probe question that was asked when the respondent answered REFUSED to this question.

During the past 12 months, have you stayed overnight or longer in a hospital or other facility to receive treatment or counseling for any problem you were having with your emotions, nerves, or mental health? Please do not include treatment for alcohol or drug use.

## ADULT MENTAL HEALTH TREATMENT

NOTE: This variable incorporates the value from a probe question that was asked when the respondent answered REFUSED to this question.

The list below includes some of the places where people can get outpatient treatment or counseling for problems with their emotions, nerves, or mental health.

During the past 12 months, did you receive any outpatient treatment or counseling for any problem you were having with your emotions, nerves, or mental health at any of the places listed below? Please do not include treatment for alcohol or drug use.

- An outpatient mental health clinic or center
- The office of a private therapist, psychologist, psychiatrist, social worker, or counselor that was not part of a clinic
- A doctor's office that was not part of a clinic
- An outpatient medical clinic
- A partial day hospital or day treatment program
- Some other place

## ADULT MENTAL HEALTH TREATMENT

Earlier, we asked whether you have received prescription medicines, inpatient treatment or outpatient treatment for your emotions, nerves or mental health. The list below contains possible sources of treatment, counseling or support that were not mentioned before.

Acupuncturist or acupressurist  
 Chiropractor  
 Herbalist  
 In-person support group or self-help group  
 Internet support group or chat room  
 Spiritual or religious advisor, such as a pastor, priest, rabbi  
 Telephone hotline  
 Massage therapist

Did you receive treatment, counseling or support from any other sources such as these during the past 12 months?

# RECODED ADULT MENTAL HEALTH TREATMENT

## **RECODED ADULT MENTAL HEALTH TREATMENT**

NOTE: The variables in this section are recoded variables that were created from one or more variables from the following sections: Adult Mental Health Treatment and Recoded Substance Treatment.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

. = Unknown/Aged 12-17/Log Assign Yes (Otherwise) .....  
 1 = Yes (AUINPYR=1) .....  
 2 = No (AUINPYR=2) .....

The following variable, AMHOUTP3, is defined as SAS missing if a respondent reported receiving outpatient mental health treatment/counseling in the past year at "Some Other Place" (AUOPTYR=1,3 and only AUOPOTOP=1, 3) and their write-in response was classified as an invalid outpatient mental health treatment/counseling location or alternative treatment/support (AUOPYRSP=7, 8, 10, 11, 17, 22, 26, 30, 34, 35, 36, 37, 38, 39, 42, 45, 48, 49, 50, 51, 54, 55, 56, 71, 72). In addition to the responses described above, respondents aged 12-17 and those coded as bad data, legitimate skip, don't know, refused, or blank (AUOPTYR=85, 89, 94, 97, 98, 99) were also defined as SAS missing. A respondent was assigned a positive response if they indicated they had received outpatient mental health treatment/counseling in the past year (AUOPTYR=1, 3) and they did not indicate an alternative source or invalid outpatient location (AUOPYRSP not =7, 8, 10, 11, 17, 22, 26, 30, 34, 35, 36, 37, 38, 39, 42, 45, 48, 49, 50, 51, 54, 55, 56, 71, 72) as their only location for outpatient treatment.

## RECODED ADULT MENTAL HEALTH TREATMENT

The following variable, AMHSVTYP, classifies what type of mental health treatment/counseling was received in the past year. Respondents who reported receiving treatment for mental health were classified in one of 7 mutually exclusive categories. A respondent was assigned to level one if they reported receiving inpatient treatment only (AMHINP2=1 and AMHOUTP3=2 and AMHRX2=2), to level two if they reported receiving outpatient treatment only (AMHINP2=2 and AMHOUTP3=1 and AMHRX2=2), to level three if they reported receiving prescription medication treatment only (AMHINP2=2 and AMHOUTP3=2 and AMHRX2=1), to level four if they reported receiving both inpatient and outpatient treatment only (AMHINP2=1 and AMHOUTP3=1 and AMHRX2=2), to level five if they reported receiving inpatient and prescription medication treatment only (AMHINP2=1 and AMHOUTP3=2 and AMHRX2=1), to level six if they reported receiving outpatient and prescription medication treatment only (AMHINP2=2 and AMHOUTP3=1 and AMHRX2=1), or to level seven if they reported receiving inpatient, outpatient, and prescription medication treatment (AMHINP2=1 and AMHOUTP3=1 and AMHRX2=1). Respondents who did not receive mental health treatment in the past year were assigned to level eight (AMHINP2=2 and AMHOUTP3=2 and AMHRX2=2). Respondents whose specific treatment was not distinguishable due to missing values in one or more of the three source variables (AMHINP2, AMHOUTP3, or AMHRX2) were assigned a SAS missing.

# RECODED ADULT MENTAL HEALTH TREATMENT

NOTE: The following 7 variables contain information about the location of outpatient mental health treatment/counseling received in the past year. These variables were revised for the 2009 NSDUH to include those respondents who reported receiving NO outpatient mental health treatment (AMHOUTP3=2) in the No category for the location. This differs from the variables named similarly in the past as they were only defined for those respondents who reported having received outpatient mental health treatment in the past year (AMHOUTP3=1) and those respondents who reported No outpatient mental health treatment were previously defined as SAS missing.

Only respondents who reported having received outpatient mental health treatment/counseling (AMHOUTP3=1) can be defined as having received it at the location. A respondent was allowed to report any of five specific locations or "Some Other Place". If a respondent reported "Some Other Place," they were asked to provide a description of the other location in a follow-up question. The first five variables below were created by examination of the variables containing information on the five specific locations, while the last two variables were created by examination of the variables containing information on the other-specify locations which were grouped into two main categories.

# RECODED ADULT MENTAL HEALTH TREATMENT

NOTE: The following variables, MHLSCHL3 and MHLOTH3, were created by examination of the other-specify write-in responses for locations where a respondent received outpatient mental health treatment/counseling. See additional information included above the location of outpatient mental health treatment recode variable, MHLMNT3.

The following variable, MHLSCHL3, was assigned a positive response if a respondent indicated receiving outpatient mental health treatment/counseling in the past year (AMHOUTP3=1) at some location other than the five locations defined above (AUOPOTOP=1) and the location was classified as "School or University Setting/Clinic/Center" (AUOPYRSP=9). A negative response was assigned if the respondent indicated receiving outpatient mental health treatment/counseling in the past year (AMHOUTP3=1) at one of the five locations defined above but not some location other than these five locations (AUOPOTOP=6 AND AUOPYRSP=99), at some location other than the five locations defined above or "School or University Setting/Clinic/Center" and this location was classified as a valid outpatient treatment location (AUOPYRSP=1-6, 12, 13, 14, 15, 16, 18, 19, 20, 21, 23, 24, 25, 27, 28, 29, 31, 32, 33, 40, 41, 43, 44, 46, 47, 52, 53, 57, 58, 60-70), or if they did not receive outpatient mental health treatment in the past year (AMHOUTP3=2). Respondents who indicated receiving outpatient treatment in the past year (AMHOUTP3=1) at some location other than the five locations defined above (AUOPOTOP=1) and the location was classified as an invalid or alternative source of treatment (AUOPYRSP=7, 8, 10, 11, 17, 22, 26, 30, 34, 35, 36, 37, 38, 39, 42, 45, 48, 49, 50, 51, 54, 55, 56, 59, 71, 72), bad data, don't know, refused, or blank (AUOPYRSP=85, 94, 97, 98), aged 12-17 (AUOPYRSP=89, 99 and AMHOUTP3=.), or classified as missing for receiving outpatient treatment in the past year (AMHOUTP3=.) were set to SAS missing.

(AMHOUTP3, AUOPOTOP, AUOPYRSP)

MHLSCHL3 Len : 1 RCVD OUTP MH TRT AT A SCHOOL SETTING IN PST YR

. = Otherwise (See comment above) .....  
 0 = No (See comment above) .....  
 1 = Yes (See comment above) .....

The following variable, MHLOTH3, was assigned a positive response if a respondent indicated receiving outpatient mental health treatment/counseling in the past year (AMHOUTP3=1) at some location other than the six locations defined above and was classified as a valid location for outpatient mental health treatment/counseling and not considered an alternative source of treatment (AUOPOTOP=1 and AUOPYRSP=12, 13, 14, 15, 16, 18, 19, 20, 21, 23, 24, 25, 27, 28, 29, 31, 32, 33, 40, 41, 44, 46, 47, 52, 53, 57, 58, 60-69). A negative response was assigned if the respondent indicated receiving outpatient mental health treatment/counseling in the past year (AMHOUTP3=1) at one of the first five specified locations but not some location other than these locations (AUOPOTOP=6 and AUOPYRSP=99), indicated some other location to be one of the six specified locations defined above (AUOPYRSP=1-6, 9, 43), provided a name of a facility (AUOPYRSP=70) as the 'other' location, or if reported not receiving outpatient mental health treatment in the past year (AMHOUTP3=2). Respondents who indicated receiving outpatient treatment in the past year (AMHOUTP3=1) at some location other than the five locations defined above (AUOPOTOP=1) and the location was classified as an invalid or alternative source of treatment (AUOPYRSP=7, 8, 10, 11, 17, 22, 26, 30, 34, 35, 36, 37, 38, 39, 42, 45, 48, 49, 50, 51, 54, 55, 56, 59, 71, 72), bad data, don't know, refused, or blank (AUOPYRSP=85, 94, 97, 98), aged 12-17 (AUOPYRSP=89, 99 and AMHOUTP3=.), or classified as missing for receiving outpatient treatment in the past year (AMHOUTP3=.) were set to SAS missing.

# RECODED ADULT MENTAL HEALTH TREATMENT

NOTE: The following 15 variables contain information about the reasons for not receiving mental health treatment/counseling that was needed in the past year. A respondent must have reported not receiving mental health treatment that was needed in the past year (AMHTXND2=1) in order to be asked the questions on the reason for not receiving treatment. A respondent was allowed to report any of eight specific reasons or "Some Other Reason." If a respondent reported "Some Other Reason," they were allowed to report any of six additional specific reasons or report "Some Other Reason" again. If a respondent reported "Some Other Reason" again, they were then asked to provide the most important other reason in a follow-up question. The first 14 variables below were created by examination of the variables containing information on the fourteen specific reasons; while the last variable was created by examination of the most important other-specify reasons.

## RECODED YOUTH EXPERIENCES

The following variable, TALKPROB, was created from the variables containing information on who youths would talk with about serious problems: No one (YETLKNON), parent/guardian (YETLKPAR), boyfriend/girlfriend (YETLKBGF), other adults (YETLKOTA), or some other person (YETLKSOP). Youths who did not report a positive response to at least one of the source variables (no source variables=1), or youths who reported both being able to talk with no one (YETLKNON=11) and being able to talk to someone (YETLKPAR, YETLKBGF, YETLKOTA, or YETLKSOP=11), or respondents over the age of 17 (all source variables=99) were coded as SAS missing.

(YETLKBGF, YETLKNON, YETLKOTA, YETLKPAR, YETLKSOP)

TALKPROB      Len : 1    WHO YTH TALKS WITH ABOUT SERIOUS PROBLEMS

. = Otherwise (See comment above) .....

 1 = Yes (YEPRGSTD=1).....  
 2 = No (YEPRGSTD=2).....

## RECODED YOUTH EXPERIENCES

The following variable, YTHACT2, was created by counting the number of positive responses reported over the following 4 youth activity questions: School-based (YESCHACT), community-based (YECOMACT), church or faith-based (YEFAIACT), or other activities (YEOTHACT). Youth respondents who reported participation in 2 or more activities were included in the "2 or More Activities" category regardless of how many other activity questions were answered. Youth respondents who did not answer 2 or more of the 4 youth activity questions with a "yes" or "no" response were coded as SAS missing. To be included in the "None or 1 Activity" category, a youth respondent must have answered 2 or more of the activity questions and reported they participated in either zero or one activity.

(YECOMACT, YEFAIACT, YEOTHACT, YESCHACT)

**YTHACT2** Len : 1 YTH PARTICIPATED IN YOUTH ACTIVITIES

About how many days out of 365 in the past 12 months were you totally unable to work or carry out your normal activities because of your emotions, nerves or mental health?

You can use any number between 0 and 365 to answer.

(LIAD68)  
IMPYDAYS<sup>1</sup>

Len : 3    HOW MANY DAY IN PAST YR YOU WERE UNABLE TO WORK

RANGE = 0 - 365 .....  
994 = DON'T KNOW .....  
997 = REFUSED .....  
998 = BLANK (NO ANSWER).....  
999 = LEGITIMATE SKIP .....

NOTE: IMPAIR is a created variable based on answers to questions corresponding to IMPREMEM through IMPWORK. Questions corresponding to these variables were adapted from a subset of questions in the World Health Organization Disability Assessment Schedule (WHODAS), which consists of questions that are used for assessing impairment in social adjustment and behavior.

Since 2010, an alternate score was given to the source variable (WHODAS) for respondents whose answers to questions corresponding to the distress measures DSTNRV30 through DSTNGD12 were all missing. The IMPAIR variable for these cases was assigned a level of 89 (LEGITIMATE SKIP Logically assigned).

99 = LEGITIMATE SKIP .....

## RECODED MENTAL HEALTH

### **RECODED MENTAL HEALTH**

NOTE: The variables in this section are recoded variables that were created from one or more of the variables from the following two sections: Mental Health and Recoded Substance Dependence and Abuse.

Recoded variables were defined to measure psychological distress, Serious Mental Illness (SMI) and other levels of mental illness, as well as suicide ideation. A logistic regression model revised in 2012 is used to determine the predicted probability of SMI. The predicted mental illness variables (e.g., SMIYR\_U, AMIYR\_U) that were derived from the 2012 model were examined to determine how they were associated with the mental health predictor variables in the 2012 model. It was found that the 2012 model significantly overestimated the proportion of adults aged 18 or older with SMI (and those with AMI) who had suicidal thoughts in the past year and also the proportion of adults who had MDE in the past year. Therefore, it is recommended that the mental illness variables derived from the 2012 model should not be used when analyzing past year suicidal thoughts, past year MDE, or other associated variables (including past year suicide attempts, suicide plans, medical treatment for suicide attempts, or lifetime MDE). Similarly, it is recommended that model-based mental illness variables should not be used in conjunction with the K6 variables (including serious psychological distress) or WHODAS variables in any analyses. Specific details about the creation and use of the distress and mental illness variables can be found in the Recoded Mental Health Appendix.

NOTE: The following five variables contain information about psychological distress. The 2008 NSDUH was the first survey year where variables on past month psychological distress (K6SCMON and SPDMON) were available and these variables were used beginning with the 2008 Detailed Tables. A second set of variables describes past year psychological distress (K6SCYR, K6SCMAX, and SPDYR). The past year distress variables, K6SCMAX and SPDYR, were created based on data from the past month K6 items and the worst month in the past year K6 items. Prior to the 2008 NSDUH, past year distress was based only on the worst month in the past year K6 items (SPD\_UADJ). Due to the addition of the past month K6 items, it was determined that past year SPD in 2008 and later years is not comparable with years prior to 2008. In order to be able to make comparisons of SPD estimates across years, statistically adjusted variables were created for 2005-2007. The 2005-2007 adjusted past year SPD recodes, K6SMXADJ and SPDYRADJ, can be renamed to the 2008 SPD variable names for analyses that use data from 2005 and subsequent years.

The following variable, K6SCMON, is a score with values ranging from 0 to 24 indicating the level of psychological distress over the past 30 days (past month). This variable is based on data collected from a series of six questions known as the K6, asking adult respondents how frequently they experienced symptoms of psychological distress during the past 30 days. These questions include the following symptoms of distress: feeling nervous (DSTNRV30), feeling hopeless (DSTHOP30), feeling restless or fidgety (DSTRST30), feeling so sad or depressed that nothing could cheer you up (DSTCHR30), feeling that everything was an effort (DSTEFF30), and feeling down on yourself, no good, or worthless (DSTNGD30). For each of the six items listed above, responses of "all of the time" were coded 4, "most of the time" were coded 3, "some of the time" were coded 2, "a little of the time" were coded 1, and "none of the time" and all other responses were coded 0. These assigned values were summed across the six items to calculate a total score for K6SCMON. Specific details about this variable are provided in the Recoded Mental Health Appendix.

(DSTCHR30, DSTEFF30, DSTHOP30, DSTNGD30, DSTNRV30, DSTRST30)

K6SCMON Len : 2 K6 TOTAL SCORE IN PAST MONTH

RANGE = 0 - 24 .....  
 . = Aged 12-17 (AGE<18) .....

(K6SCMON)

SPDMON Len : 1 PAST MONTH SERIOUS PSYCH DISTRESS INDICATOR

. = Aged 12-17 (K6SCMON=.) .....  
 0 = No (K6SCMON < 13) .....  
 1 = Yes (K6SCMON >= 13) .....

## RECODED MENTAL HEALTH

NOTE: The 2 variables directly above are defined based on questions asking about a respondent's level of psychological distress over the past 30 days. Respondents were then asked if there was a month in the past 12 months when they felt more depressed, anxious, or emotionally stressed than they felt in the past 30 days. This level of psychological distress is referenced as the "worst month in past year" in the following documentation.

The following variable, K6SCYR, is a score with values ranging from 0 to 24 indicating the level of psychological distress during the worst month of the past year, that was not the past 30 days. This variable is only defined for respondents who reported that there was a month in the past 12 months when he/she was more depressed, anxious, or emotionally stressed than during the past 30 days (DSTWORST=1). This score variable is based on a series of six questions asking respondents how frequently they experienced symptoms of psychological distress during their worst month in the past year (only if the worst month was not the past 30 days). These questions are from the K6 and include the following symptoms of distress: feeling nervous (DSTNRV12), feeling hopeless (DSTHOP12), feeling restless or fidgety (DSTRST12), feeling so sad or depressed that nothing could cheer you up (DSTCHR12), feeling that everything was an effort (DSTEFF12), and feeling down on yourself, no good, or worthless (DSTNGD12). For each of the six items listed above, responses of "all of the time" were coded 4, "most of the time" were coded 3, "some of the time" were coded 2, "a little of the time" were coded 1, and "none of the time" and all other responses were coded 0. These assigned values were summed across the six items to calculate a total score for K6SCYR. For respondents who indicated that they did not have a month in the past year worse than the past 30 days, K6SCYR was set to missing. Specific details about this variable are provided in the Recoded Mental Health Appendix.

(DSTCHR12, DSTEFF12, DSTHOP12, DSTNGD12, DSTNRV12, DSTRST12, DSTWORST)  
K6SCYR      Len : 2    K6 TOTAL SCORE IN WORST MONTH OF PAST YEAR

RANGE = 0 - 24 .....  
. = Aged 12-17 (AGE < 18) or DSTWORST=2 .....

The following variable, K6SCMAX, is defined to be the higher K6 score between the past month K6 total score (K6SCMON) variable, and the K6 total score in the worst month of the past year if the worst month was not the past 30 days (K6SCYR) variable.

(DSTWORST, K6SCMON, K6SCYR)

. = Aged 12-17/Unknown (Otherwise).....  
 0 = No (SUICHOSP=2 or MHSUIMED=0).....  
 1 = Yes (SUICHOSP=1).....

NOTE: The following ten variables pertain to the creation of the variables on mental illness. These variables include total scores from the psychological distress and impairment scales, the predicted probability of serious mental illness (SMI), and indicators of various levels of mental illness. Until 2012, a model developed for the 2008 NSDUH was used to determine mental illness status. A revised and improved model predicting mental illness was used starting with the 2012 NSDUH. For the 2012 mental health detailed tables, both the 2012 estimates and the previous 2008-2011 estimates were based on the new model. The 2008 detailed tables and the 2009-2011 mental health detailed tables have been updated to include the 2012 model based mental illness estimates. Additional details about the creation and use of these variables are provided in the Recoded Mental Health Appendix.

The following variable, WSPDSC2, is an alternative version of the original worst K6 total score in the past year (K6SCMAX) with values ranging from 0 to 17 rather than 0 to 24. The original total score variable is documented previously in this section with the psychological distress variables. This alternative total score was calculated by assigning a value of 0 when K6SCMAX had a value from 0 to 7 and assigning a value of 1 to 17 when K6SCMAX had a corresponding value from 8 to 24. This alternative version was used in the regression model to determine SMI because SMI prevalence was typically extremely low for respondents with worst K6 total scores less than 8. Specific details about this variable are provided in the Recoded Mental Health Appendix.

(K6SCMAX)

WSPDSC2 Len : 2 ALTERNATIVE WORST K6 TOTAL SCORE

RANGE = 0 - 17 .....  
 . = Aged 12-17 (AGE < 18) .....

## RECODED MENTAL HEALTH

NOTE: The following two variables, WHODASC2 and WHODASC3, are score variables that indicate the level of impairment for respondents. These variables are based on data collected from a series of thirteen questions asking respondents how much difficulty they experienced in doing eight daily activities in the one month in the past year when they were at their worst emotionally. These questions, drawn from the World Health Organization Disability Assessment Schedule (WHODAS), comprise an abbreviated scale which is used to capture information on impairment (see the Recoded Mental Health Appendix for more information). Respondents who had indicated during the administration of any of the K6 items that they had experienced at least one of the K6 symptoms (defined in the note above variables K6SCMON and K6SCYR) at least "a little of the time" (i.e., K6SCMON greater than 0 or K6SCYR greater than 0) were asked about remembering to do things they needed to do (IMPREMEM), concentrating on doing something important when other things were going on around them (IMPCONCN), going out of the house and getting around on their own (IMPGOUT, IMPGOUTM), dealing with people they did not know well (IMPPEOP, IMPPEOPM), participating in social activities (IMPSOC, IMPSOCM), taking care of household responsibilities (IMPHHLD, IMPHHLDM), taking care of daily responsibilities at work or school (IMPRES, IMPRESM), and getting daily work done as quickly as needed (IMPWORK, IMPRESM). Respondents who reported that they did not engage in an activity were asked a follow-up question to determine if they did not do so because of emotions, nerves, or mental health.

For the original WHODAS total score, WHODASC2, a value of 3 was assigned for each of the daily activities that a respondent indicated having "severe" difficulty performing, or if the respondent indicated not performing the activity due to problems with emotions, nerves, or mental health. A value of 2 was assigned for each of the daily activities that a respondent indicated having "moderate" difficulty performing, and a value of 1 was assigned for "mild" difficulty. For activities that had a follow-up question, a response of "yes" were assigned a value of a 3 as having "severe difficulty." A value of 0 was assigned for all other responses and nonresponses for each activity. These assigned values were summed to calculate a total score for WHODASC2 which ranges from 0 to 24.

For the alternative WHODAS total score, WHODASC3, a value of 1 was assigned for each of the daily activities that a respondent indicated having "moderate" or "severe" difficulty performing, or if the respondent indicated not performing the activity due to problems with emotions, nerves, or mental health. For activities that had a follow-up question, a response of "yes" were assigned a value of a 1 as having "moderate or severe difficulty." A value of 0 was assigned for all other responses and nonresponses for each activity. These assigned values were summed to calculate a total score for WHODASC3 which ranges from 0 to 8. The alternative version of the WHODAS total score (WHODASC3) was used in the regression model to determine SMI, since it was thought that the sum of a dichotomous measure might fit better than the sum of a linear continuous measure.

(IMPCONCN, IMPGOUT, IMPGOUTM, IMPHHLD, IMPHHLDM, IMPPEOP, IMPPEOPM, IMPREMEM, IMPRES, IMPRESM, IMPSOC, IMPSOCM, IMPWORK, K6SCMAX)

RANGE = 0 - 8 .....  
 . = Aged 12-17 (AGE < 18) .....

## RECODED MENTAL HEALTH

NOTE: The following nine mental illness variables are based on the 2012 mental illness prediction model. During the 2012 NSDUH, the mental illness variables were revised based on a new and improved prediction model (2012 model). These revised mental illness variables are not comparable with similarly named variables (based on the 2008 mental illness prediction model) which were previously included in the 2008 through 2011 NSDUH data files. The revised variables were renamed by appending "\_U" to the previous variable names. Recommendations concerning the analysis of the mental illness variables derived from the predicted probability of SMI (SMIPP\_U) are noted in the documentation above SMIYR\_U. Specific details about these variables and the prediction models are provided in the Recoded Mental Health Appendix.

Mental illness variables based on the 2008 mental illness prediction model are no longer used in the estimation of mental illness and are not being provided for the 2012 and future NSDUHs. All the 2008 model-based mental illness variables typically found in this section have been removed from the 2008-2011 NSDUH data files and replaced with the revised 2012 model based mental illness variables. The only exception is SMIPP (the SMI predicted probability based on the 2008 model) which will remain available on the 2008-2011 NSDUH data files. Additional information about SMIPP can be found at the end of this section.

In order to be able to make comparisons of SMI estimates across years, SMI variables were created for 2005-2007 based on an alternative model. The 2005-2007 SMI recodes, SMIPP\_A and SMIYR\_A, are considered comparable with the variables SMIPP\_U and SMIYR\_U, respectively, for 2008 and later NSDUHs. However, users should consider the differences in methodology before making any decisions on whether and how to use the 2005-2007 SMI variables. Specific details about these 2005-2007 variables are provided in the Recoded Mental Health Appendix.

The following variable, SMIPP\_U, is a predicted probability that a respondent has Serious Mental Illness (SMI) estimated using the 2012 revised logistic regression model. SMIPP\_U was used to determine these levels of mental illness: Serious (SMI), Serious or Moderate (SMMI), and Any (AMI). The categories of moderate (MMI) and mild (LMI) were determined by subtraction.

(AGE1830, AMDEY2\_U, MHSUTK\_U, WHODASC3, WSPDSC2)

SMIPP\_U Len : 12 PREDICTED SERIOUS MENTAL ILLNESS PROB REVISED

RANGE = 0.0025409721 - 0.9291205406 .....  
 . = Aged 12-17 (AGE < 18) .....

NOTE: The following six variables (SMIYR\_U, AMIYR\_U, SMMIYR\_U, MMIYR\_U, LMIYR\_U, and LMMIYRU) are not recommended to be used when analyzing variables for past year suicidal thoughts, past year MDE, K6, or the WHODAS, nor are they recommended to be used when analyzing other variables closely linked with these variables (including past year suicide attempts, suicide plans, medical treatment for suicide attempts, lifetime MDE, SPD, or components used in the K6 or WHODAS scales). Specific details about the creation and use of these variables can be found in the Recoded Mental Health Appendix.

In order to be able to make comparisons of SMI estimates across years, SMI variables were created for 2005-2007 based on an alternative model. The 2005-2007 SMI recodes, SMIPP\_A and SMIYR\_A, are considered comparable with the variables SMIPP\_U and SMIYR\_U, respectively, for 2008 and later NSDUHs. However, users should consider the differences in methodology before making any decisions on whether and how to use the 2005-2007 SMI variables. The same analysis recommendation noted above also applies for the 2005-2007 SMIYR\_A variable. Specific details about these 2005-2007 variables are provided in the Recoded Mental Health Appendix.

The following variable, SMIYR\_U, is a Serious Mental Illness (SMI) indicator for respondents based on the 2012 revised predicted probability of SMI (SMIPP\_U). If SMIPP\_U is greater than or equal to a specified cutoff point (0.260573529) then SMIYR\_U=1, and if SMIPP\_U is less than the cutoff point then SMIYR\_U=0. This indicator is not comparable with SMI variables prior to 2008, in which SMI was only based on psychological distress. Also, this indicator based on the 2012 model is not comparable with the indicator based on the 2008 model. Specific details about this variable can be found in the Recoded Mental Health Appendix.

(SMIPP\_U)

SMIYR\_U Len : 1 SMI IND (1/0) BASED ON REVISED PREDICTED SMI PROB

. = Aged 12-17 (AGE < 18) .....  
 0 = No Past Year SMI (See comment above) .....  
 1 = Past Year SMI (See comment above) .....

The following variable, AMIYR\_U, is an indicator for Any Mental Illness (AMI) based on the 2012 revised predicted probability of SMI (SMIPP\_U). If SMIPP\_U is greater than or equal to a specified cutoff point (0.0192519810) then AMIYR\_U=1, and if SMIPP\_U is less than the cutoff point then AMIYR\_U=0. This indicator based on the 2012 model is not comparable with the indicator based on the 2008 model. AMI is defined as having Serious, Moderate, or Mild Mental Illness. Specific details about this variable are provided in the Recoded Mental Health Appendix.

(SMIPP\_U)

AMIYR\_U Len : 1 AMI IND (1/0) BASED ON REVISED PREDICTED SMI PROB

. = Aged 12-17 (AGE < 18) .....  
 0 = No Past Yr Any Mental Illness (See comment above) .....  
 1 = Past Year Any Mental Illness (See comment above) .....

## RECODED MENTAL HEALTH

The following variable, SMMIYR\_U, is an indicator for Serious or Moderate Mental Illness (SMMI) based on the 2012 revised predicted probability of SMI (SMIPP\_U). If SMIPP\_U is greater than or equal to a specified cutoff point (0.077686285365) then SMMIYR\_U=1, and if SMIPP\_U is less than the cutoff point then SMMIYR\_U=0. This indicator based on the 2012 model is not comparable with the indicator based on the 2008 model. Specific details about this variable are provided in the Recoded Mental Health Appendix.

(SMIPP\_U)

SMMIYR\_U

Len : 1 SMMI IND (1/0) BASED ON REVISED PREDICTED SMI PROB

. = Aged 12-17 (AGE < 18) .....  
 0 = No Past Year SMMI (See comment above) .....  
 1 = Past Year SMMI (See comment above) .....

The following variable, MMIYR\_U, is an indicator for Moderate Mental Illness (MMI). This indicator derived from mental illness variables based on the 2012 model is not comparable with the indicator derived from mental illness variables based on the 2008 model. Specific details about this variable are provided in the Recoded Mental Health Appendix.

(SMIYR\_U, SMMIYR\_U)

MMIYR\_U

Len : 1 MOD MI IND (1/0) BASED ON REVISED PRED SMI PROB

. = Aged 12-17 (AGE < 18) .....  
 0 = No Past Year MMI (Otherwise) .....  
 1 = Past Year MMI (SMMIYR\_U=1 and SMIYR\_U=0) .....

The following variable, LMIYR\_U, is an indicator for Mild (Low) Mental Illness (LMI). This indicator derived from mental illness variables based on the 2012 model is not comparable with the indicator derived from mental illness variables based on the 2008 model. Specific details about this variable are provided in the Recoded Mental Health Appendix.

(AMIYR\_U, SMMIYR\_U)

LMIYR\_U

Len : 1 MILD MI IND (1/0) BASED ON REVISED PRED SMI PROB

. = Aged 12-17 (AGE < 18) .....  
 0 = No Past Year LMI (Otherwise) .....  
 1 = Past Year LMI (AMIYR\_U=1 and SMMIYR\_U=0) .....

The following variable, LMMIYRU, is an indicator for Mild (Low) Mental Illness (LMI) or Moderate Mental Illness (MMI). This indicator is derived from mental illness variables based on the 2012 model. Specific details about this variable are provided in the Recoded Mental Health Appendix. This mental illness variable is referred to as any mental illness (AMI) excluding serious mental illness (SMI).

(LMIYR\_U, MMIYR\_U)

LMMIYRU

Len : 1 LMMI IND (1/0) BASED ON REVISED PREDICTED SMI PROB

. = Aged 12-17 (AGE < 18) .....  
 0 = No Past Year LMMI (Otherwise) .....  
 1 = Past Year LMMI (LMIYR\_U=1 or MMIYR\_U=1) .....

The following variable, MI\_CAT\_U, is a categorical mental illness indicator. This indicator derived from mental illness variables based on the 2012 model is not comparable with the indicator derived from mental illness variables based on the 2008 model. Please note that MI\_CAT\_U is not recommended to be used when analyzing variables for past year suicidal thoughts, past year MDE, K6, or the WHODAS, nor is it recommended to be used when analyzing other variables closely linked with these variables (including past year suicide attempts, suicide plans, medical treatment for suicide attempts, lifetime MDE, SPD, or components used in the K6 or WHODAS scales). Specific details about the creation and use of this variable can be found in the Recoded Mental Health Appendix.

(LMIYR\_U, MMIYR\_U, SMIYR\_U)

 1 = Past Year Mild Mental Illness (LMIYR\_U=1) .....  
 2 = Past Year Moderate Mental Illness (MMIYR\_U=1) .....  
 3 = Past Year Serious Mental Illness (SMIYR\_U=1) .....

## RECODED MENTAL HEALTH

NOTE: The following three variables are recodes that combine mental illness measures based on the 2012 revised predicted probability of SMI (SMIPP\_U) with drug or alcohol dependence or abuse in the past year. These variables based on the 2012 mental illness prediction model are not comparable with similarly named variables from previous years using SMI based on the 2008 mental illness prediction model. Please note that SMIDA2\_U, AMIDA2\_U, and LMMIADAU are not recommended to be used when analyzing variables for past year suicidal thoughts, past year MDE, K6, or the WHODAS, nor are they recommended to be used when analyzing other variables closely linked with these variables (including past year suicide attempts, suicide plans, medical treatment for suicide attempts, lifetime MDE, SPD, or components used in the K6 or WHODAS scales). Specific details about the creation and use of the mental illness variables used in these recodes can be found in the Recoded Mental Health Appendix. Specific information about the dependence or abuse variables used in these recodes can be found in the Recoded Substance Dependence and Abuse Variable Documentation Appendix.

(ABODILAL, SMIYR\_U)

SMIDA2\_U      Len : 1    SMI AND DRUG/ALCOHOL DEP OR ABUSE REVISED (1/2)

. = Aged 12-17 (SMIYR\_U=.) .....  
 1 = Yes (SMIYR\_U=1 and ABODILAL=1) .....  
 2 = No (SMIYR\_U=0 or ABODILAL=0) .....

(ABODILAL, AMIYR\_U)

AMIDA2\_U      Len : 1    AMI AND DRUG/ALCOHOL DEP OR ABUSE REVISED (1/2)

. = Aged 12-17 (AMIYR\_U=.) .....  
 1 = Yes (AMIYR\_U=1 and ABODILAL=1) .....  
 2 = No (AMIYR\_U=0 or ABODILAL=0) .....

(ABODILAL, LMMIYRU)

LMMIADAU      Len : 1    LMMI AND DRUG/ALCOHOL DEP OR ABUSE (1/0)

. = Aged 12-17 (LMMIYRU=.) .....  
 0 = No (LMMIYRU=0 or ABODILAL=0) .....  
 1 = Yes (LMMIYRU=1 and ABODILAL=1) .....

Note: The following variable, SMIPP, is a predicted probability that a respondent has Serious Mental Illness (SMI) estimated using the 2008 logistic regression model. It was created using the following formula:  $SMIPP = 1 / (1 + \exp[-(-4.74999920 + 0.20977232 * WSPDSC2 + 0.38388395 * WHODASC3)])$ . This measure based on the 2008 model is not comparable with the measure (SMIPP\_U) based on the 2012 model defined above. Mental illness variables based on the 2008 model are no longer recommended for use in the estimation of mental illness. Thus, SMIPP is not being provided for estimation purposes but for possible methodological investigative purposes. For more information on how to use SMIPP from the 2008 model to create mental illness variables and additional information on how to use the 2008 model measures, see Appendix B, Section B.4.3, in the 2009 mental health findings report.

(WHODASC3, WSPDSC2)

SMIPP      Len : 12    PREDICTED SERIOUS MENTAL ILLNESS PROBABILITY

RANGE = 0.0085774923 - 0.8684361603 .....  
 . = Aged 12-17 (AGE < 18) .....

## ADULT DEPRESSION

### ADULT DEPRESSION

*The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a<sup>1</sup>.*

NOTE: All of the respondents aged 18 or older were asked the questions in the Adult Depression module in this current survey year. In the 2004 survey, a subset of the adults was asked these questions.

Have you ever in your life had a period of time lasting several days or longer when most of the day you felt sad, empty or depressed?

(ASC21)

ADDPREV<sup>1</sup>

Len : 2 SEVERAL DAYS OR LNGR WHEN FELT SAD/EMPTY/DPRSD

1 = Yes .....  
 2 = No .....  
 85 = BAD DATA Logically assigned .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

Have you ever had a period of time lasting several days or longer when most of the day you were very discouraged about how things were going in your life?

(ASC22)

ADDSCEV<sup>1</sup>

Len : 2 SEVERAL DAYS OR LNGR FELT DISCOURAGED ABT LIFE

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

Have you ever had a period of time lasting several days or longer when you lost interest in most things you usually enjoy like work, hobbies, and personal relationships?

(ASC23)

ADLOSEV<sup>1</sup>

Len : 2 EVER HAD PER OF TIME LST INTRST IN ENJOYABLE THGS

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

During times when you felt sad, empty, or depressed most of the day, did you ever feel discouraged about how things were going in your life?

(AD01)

ADDPDISC<sup>1</sup>

Len : 2 FEEL DISCRGD ABOUT LIFE WHEN SAD/EMPTY/DEPRESSED

1 = Yes .....  
 2 = No .....  
 85 = BAD DATA Logically assigned .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

## ADULT DEPRESSION

During the times when you felt sad, empty, or depressed, did you ever lose interest in most things like work, hobbies, and other things you usually enjoy?

(AD01A, AD01B)

AD01SIN<sup>1</sup>

Len : 2 EVER LOSE INT IN THINGS WHEN SAD/EMPTY/DEPRESSED

1 = Yes .....  
 2 = No .....  
 85 = BAD DATA Logically assigned .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

During times when you felt discouraged about how things were going in your life, did you ever lose interest in most things like work, hobbies, and other things you usually enjoy?

(AD02)

AD02SIN<sup>1</sup>

Len : 2 EVER LOSE INT IN THNGS WHEN FEELING DISCOURGAGED

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

Did you ever have a period of time like this that lasted most of the day nearly every day for two weeks or longer?

(AD09)

AD09S2WK<sup>1</sup>

Len : 2 PERIOD OF TIME LASTED EVERY DAY FOR 2 WKS /LNGR

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

Think about the times when you [FEELFILL]. Did you ever have a period of time like this that lasted most of the day, nearly every day, for two weeks or longer?

(AD12)

AD12PR2WK<sup>1</sup>

Len : 2 TIME WHEN [FEELFILL] LSTD EVRYDY 2 WKS OR LNGR

1 = Yes .....  
 2 = No .....  
 85 = BAD DATA Logically assigned .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

Think of times lasting two weeks or longer when [NUMPROBS] with your mood [WASWERE] most severe and frequent. During those times, how long did your [FEELNOUN] usually last?

(AD16)

AD16RHRS<sup>1</sup>

Len : 2 TIME THAT MOST SEVERE/FREQUENT MOOD LASTED

1 = Less than 1 hour .....  
 2 = At least 1 hour but no more than 3 hours .....  
 3 = At least 3 hours but no more than 5 hours .....  
 4 = 5 hours or more .....  
 85 = BAD DATA Logically assigned .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

## ADULT DEPRESSION

Still thinking of times lasting two weeks or longer when [NUMPROBS] with your mood [WASWERE] most severe and frequent, how severe was your emotional distress during those times?

(AD17)

ADWRDST<sup>1</sup>

Len : 2 HOW SEVERE WAS EMOTIONAL DISTRESS DURING 2 WKS

- 1 = Mild .....
- 2 = Moderate .....
- 3 = Severe .....
- 4 = Very Severe .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

Again, think of times lasting two weeks or longer when [NUMPROBS] with your mood [WASWERE] most severe and frequent.

How often, during those times, was your emotional distress so severe that nothing could cheer you up?

(AD18)

ADWRCHR<sup>1</sup>

Len : 2 EMOT DISTRSS SO SEVERE NOTHING COULD CHEER YOU UP

- 1 = Often .....
- 2 = Sometimes .....
- 3 = Rarely .....
- 4 = Never .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

Once again, please think of times lasting two weeks or longer when [NUMPROBS] with your mood [WASWERE] most severe and frequent.

How often, during those times, was your emotional distress so severe that you could not carry out your daily activities?

(AD19)

ADWRIMP<sup>1</sup>

Len : 2 EMOT DISTRSS SO SEVERE COULD NT DO DLY ACTIVITIES

- 1 = Often .....
- 2 = Sometimes .....
- 3 = Rarely .....
- 4 = Never .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

People who have problems with their mood often have other problems at the same time. These problems may include things like changes in:

- sleep
- appetite
- energy
- the ability to concentrate and remember
- feelings of low self-worth

Did you ever have any of these problems during a period of time when you [FEELFILL] for two weeks or longer?

(AD21)

ADPPROB<sup>1</sup>

Len : 2 EVER HAVE OTH PRBLMS DURING 2 WKS OR LONGER

- 1 = Yes .....
- 2 = No .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

## ADULT DEPRESSION

Think again about these other problems we just mentioned. They include things like changes in

- sleep
- appetite
- energy
- the ability to concentrate and remember
- feelings of low self-worth

Please think of a time when you [FEELFILL] for two weeks or longer and you also had the largest number of these other problems at the same time.

Is there one particular time like this that stands out in your mind as the worst one you ever had?

(AD22)

ADWRPROB<sup>1</sup>

Len : 2 ONE PARTICULAR TIME THAT IS THE WORST ONE EVER

1 = Yes .....  
 2 = No.....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

How old were you when that worst period of time started?

Then think of the most recent time when you [FEELFILL] for two weeks or longer and you also had the largest number of these other problems at the same time.

How old were you when that time started?

(AD22A, AD22C)

ADWRAGE<sup>1</sup>

Len : 3 AGE WHEN WORST PERIOD OF TIME STARTED

RANGE = 1 - 87 .....  
 985 = BAD DATA Logically assigned .....  
 994 = DON'T KNOW .....  
 997 = REFUSED .....  
 998 = BLANK (NO ANSWER).....  
 999 = LEGITIMATE SKIP .....

In answering the next questions, think about the period of time when your [FEELNOUN] and other problems were the worst.

In answering the next questions, think about the most recent period of time when you [FEELFILL] and had other problems at the same time.

During that time, did you feel sad, empty, or depressed most of the day nearly every day?

(AD24A)

ADWRDEPR<sup>1</sup>

Len : 2 WHEN PRBLMS WORST FELT SAD/EMPTY/DPRSD EVERY DAY

1 = Yes .....  
 2 = No.....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

During that [TIMEFILL] period of time, did you feel discouraged about how things were going in your life most of the day nearly every day?

(AD24C)

ADWRDISC<sup>1</sup>

Len : 2 WHEN PRBLMS WORST FELT DISCRGED ABT LIFE EVERYDAY

1 = Yes .....  
 2 = No.....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

## ADULT DEPRESSION

During that [TIMEFILL] period of time, did you lose interest in almost all things like work and hobbies and things you like to do for fun?

(AD24E)

ADWRLSIN<sup>1</sup>

Len : 2 WHEN PRBLMS WORST LOSE INTRST IN ENJOYABLE THINGS

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

During that [TIMEFILL] period of time, did you lose the ability to take pleasure in having good things happen to you, like winning something or being praised or complimented?

(AD24F)

ADWRPLSR<sup>1</sup>

Len : 2 WHEN PRBLMS WORST LOSE PLSURE IN GOOD THINGS

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

The next questions are about changes in appetite and weight.

In answering the next questions, think about the period of time/most recent period of time when your [FEELNOUN] and other problems were the worst.

Did you have a much smaller appetite than usual nearly every day during that time?

(AD26A)

ADWRELES<sup>1</sup>

Len : 2 WHEN PRBLMS WORST HAVE SMALLER APPETITE EVERY DAY

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

Did you have a much larger appetite than usual nearly every day?

(AD26B)

ADWREMOR<sup>1</sup>

Len : 2 WHEN PRBLMS WORST HAVE LARGER APPETITE EVERY DAY

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

Did you gain weight without trying to during that [TIMEFILL] period of time?

(AD26C)

ADWRGAIN<sup>1</sup>

Len : 2 WHEN PRBLMS WORST DID YOU GAIN WEIGHT W/O TRYING

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

ADULT DEPRESSION

Did you gain weight without trying to because you were growing?

(AD26C1)

ADWRGROW<sup>1</sup> Len : 2 WHEN PRBLMS WORST GAIN WGHT W/O TRYING BC GROWING

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

Did you gain weight without trying to because you were pregnant?

(AD26C2)

ADWRPREG<sup>1</sup> Len : 2 WHEN PRBLMS WORST GAIN WGHT W/O TRYING BC PRGN

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

How many pounds did you gain? Please enter your answer as a whole number.

(AD26D)

ADWRGNLB<sup>1</sup> Len : 3 WHEN PRBLMS WORST # LBS GAINED WITHOUT TRYING

RANGE = 0 - 200 .....  
994 = DON'T KNOW .....  
997 = REFUSED .....  
998 = BLANK (NO ANSWER).....  
999 = LEGITIMATE SKIP .....

Did you lose weight without trying to?

(AD26E)

ADWRLOSE<sup>1</sup> Len : 2 WHEN PRBLMS WORST DID YOU LOSE WEIGHT W/O TRYING

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

Did you lose weight without trying to because you were sick or on a diet?

(AD26E1)

ADWRDIET<sup>1</sup> Len : 2 WHEN PRBLMS WORST LOSE WGHT W/O TRYING BC SICK/DT

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

How many pounds did you lose?

Please enter your answer as a whole number.

(AD26F)

ADWRSLB<sup>1</sup> Len : 3 WHEN PRBLMS WORST # LBS LOST WITHOUT TRYING

RANGE = 0 - 150 .....  
994 = DON'T KNOW .....  
997 = REFUSED .....  
998 = BLANK (NO ANSWER).....  
999 = LEGITIMATE SKIP .....

## ADULT DEPRESSION

Again, please think about the period of time/most recent period of time when your [FEELNOUN] and other problems were the worst.

Did you have a lot more trouble than usual falling asleep, staying asleep, or waking too early nearly every night during that [TIMEFILL] period of time?

(AD26G)

ADWRSLEP<sup>1</sup>

Len : 2 WHEN PRBLMS WORST HAVE PRBS SLEEPING/WAKING EARLY

- 1 = Yes .....
- 2 = No .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

During that [TIMEFILL] period of time, did you sleep a lot more than usual nearly every night?

(AD26H)

ADWRSMOR<sup>1</sup>

Len : 2 WHEN PRBLMS WORST SLEEP A LOT MORE THAN USUAL

- 1 = Yes .....
- 2 = No .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

During that [TIMEFILL] period of time, did you feel tired or low in energy nearly every day, even when you had not been working very hard?

(AD26J)

ADWRENRG<sup>1</sup>

Len : 2 WHEN PRBLMS WORST FEEL TIRED/LOW ON ENERGY EVRYDY

- 1 = Yes .....
- 2 = No .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

Did you talk or move more slowly than is normal for you nearly every day?

(AD26L)

ADWRSLOW<sup>1</sup>

Len : 2 WHEN PRBLMS WORST TALK/MOVE SLOWER THAN USUAL

- 1 = Yes .....
- 2 = No .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

Did anyone else notice that you were talking or moving slowly?

(AD26M)

ADWRSLNO<sup>1</sup>

Len : 2 WHEN PRBLMS WORST PEOP NOTICE SLOWER THAN USUAL

- 1 = Yes .....
- 2 = No .....
- 94 = DON'T KNOW .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

## ADULT DEPRESSION

Were you so restless or jittery nearly every day that you paced up and down or couldn't sit still?

(AD26N)

ADWRJITT<sup>1</sup>

Len : 2 WHEN PRBLMS WORST RSTLSS/JITTRY/PACING EVERYDAY

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

Did anyone else notice that you were restless?

(AD26O)

ADWRJINO<sup>1</sup>

Len : 2 WHEN PRBLMS WORST PEOP NOTICE YOU WERE RSTLSS

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

The next questions are about changes in your ability to concentrate, and your feelings about yourself.

Again, in answering these questions, think about the period of time/most recent period of time when your [FEELNOUN] and other problems were the worst.

During that [TIMEFILL] time, did your thoughts come much more slowly than usual or seem confused nearly every day?

(AD26P)

ADWRTHOT<sup>1</sup>

Len : 2 WHEN PRBLMS WORST THGHTS SLOWER/MORE CONFUSING

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

Did you have a lot more trouble concentrating than usual nearly every day?

(AD26R)

ADWRCONC<sup>1</sup>

Len : 2 WHEN PRBLMS WORST HAVE TROUBLE CONCENTRATING

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

Were you unable to make decisions about things you ordinarily have no trouble deciding about?

(AD26S)

ADWRDCSN<sup>1</sup>

Len : 2 WHEN PRBLMS WORST UNABLE TO MAKE DECISIONS

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

## ADULT DEPRESSION

Did you feel that you were not as good as other people nearly every day?

(AD26U)

ADWRNOGD<sup>1</sup>

Len : 2 WHEN PRBLMS WRST FEEL NOT AS GOOD AS OTHER PEOPLE

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

Did you feel totally worthless nearly every day?

(AD26V)

ADWRWRTH<sup>1</sup>

Len : 2 WHEN PRBLMS WORST FEEL TOTALLY WORTHLESS EVERYDAY

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

The next questions are about thoughts of death or suicide.

Again, in answering these questions, think about the period of time/most recent period of time when your [FEELNOUN] and other problems were the worst.

Did you often think a lot about death, either your own, someone else's, or death in general?

(AD26AA)

ADWRDLOT<sup>1</sup>

Len : 2 WHEN PRBLMS WORST THINK A LOT ABOUT DEATH

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

During that period, did you ever think that it would be better if you were dead?

(AD26BB)

ADWRDBTR<sup>1</sup>

Len : 2 WHEN PRBLMS WORST THNK IT WOULD BE BETTER IF DEAD

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

Did you think about committing suicide?

(AD26CC)

ADWRSTHK<sup>1</sup>

Len : 2 WHEN PRBLMS WORST THINK ABOUT COMMITTING SUICIDE

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

## ADULT DEPRESSION

Did you make a suicide plan?

(AD26DD)

ADWRSPLN<sup>1</sup>

Len : 2 WHEN PRBLMS WORST MAKE A SUICIDE PLAN

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

Did you make a suicide attempt?

(AD26EE)

ADWRSATP<sup>1</sup>

Len : 2 WHEN PRBLMS WORST MAKE A SUICIDE ATTEMPT

1 = Yes .....  
 2 = No .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

(D\_MDEA1)

AD\_MDEA1<sup>1</sup>

Len : 2 SAD/EMPTY/DEPRESSED MOST OF DAY OR DISCOURAGED

1 = Has symptom .....  
 2 = Does not have symptom .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = OTHER MISSING/NOT APPLICABLE .....  
 99 = LEGITIMATE SKIP .....

(D\_MDEA2)

AD\_MDEA2<sup>1</sup>

Len : 2 LOST INTEREST OR PLEASURE IN MOST THINGS

1 = Has symptom .....  
 2 = Does not have symptom .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = OTHER MISSING/NOT APPLICABLE .....  
 99 = LEGITIMATE SKIP .....

(D\_MDEA3)

AD\_MDEA3<sup>1</sup>

## RECODED ADULT DEPRESSION

### **RECODED ADULT DEPRESSION**

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the preceding section.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

NOTE: The following variable, AMDELT, identifies an adult as having a major depressive episode (MDE) in their lifetime and AMDEYR identifies an adult as having MDE in the prior year. Due to questionnaire changes in 2008, these MDE variables are not directly comparable to MDE variables from 2004 to 2008. Adjusted lifetime and past year MDE variables (AJAMDELT and AJAMDEYR) were developed to allow comparisons of adult MDE data across years beginning with 2005 and continuing through 2008 and later years. Adjusted variables were not created for 2004. The youth MDE variables continue to remain comparable between 2004 and 2011. Specific details about the analysis of MDE data can be found in the Recoded Depression Variable Documentation Appendix.

A respondent was classified as having a major depressive episode (MDE) in their lifetime (AMDELT=1) if they reported experiencing at least 5 out of the 9 criteria used to define an adult as having had MDE in their lifetime, where at least one of the criteria is a depressed mood or loss of interest or pleasure in daily activities (ADSMMDA=1).

An adult was classified as NOT having a major depressive episode (MDE) in their lifetime, AMDELT=2, if they met either of these conditions:

1. Reported experiencing fewer than 5 out of the 9 criteria used to define an adult as having had MDE in their lifetime (ADSMMDA=2).
2. If the number of criteria used to define an adult as having had MDE in their lifetime is unknown (ADSMMDA=98) and the respondent reported at least one of the following:
  - i. Never having had a period of time lasting several days or longer when felt sad, empty, or depressed (ADDPREV=2), discouraged about how things were going in life (ADDSCEV=2), and lost interest in most things usually enjoyable (ADLOSEV=2).
  - ii. Experienced the feelings in (i), but they did not last most of the day, nearly every day for two weeks or longer (ADLSI2WK=2) or (ADDP2WK=2).
  - iii. Experienced the feelings in (i) most of the day, nearly every day for two weeks or longer, but the feelings lasted less than an hour when mood was most severe and frequent (ADWRHRS=1).
  - iv. Experienced the feelings in (i) most of the day, nearly every day for two weeks or longer for at least an hour during those times when mood was most severe and frequent, but emotional distress was mild (ADWRDST=1), there was never a time when emotional distress was so severe that you could not be cheered up (ADWRCHR=4), and there was never a time when your emotional distress was so severe that you could not carry out your daily activities (ADWRIMP=4).
  - v. Experienced the feelings in (i) most of the day, nearly every day for two weeks or longer for at least an hour and the severe distress were more than mild or at some point could not be cheered up or could not carry out daily activities, but never had any other problems during those weeks, such as changes in sleep, appetite, energy, the ability to concentrate and remember, or feelings of low self-worth (ADPPROB=2).

(ADPPROB, ADPP2WK, ADPPREV, ADDSCEV, ADLOSEV, ADLSI2WK, ADSMMDEA, ADWRCHR, ADWRDST, ADWRHRS, ADWRIMP)

**AMDELT** Len : 1 ADULT: LIFETIME MAJOR DEPRESSIVE EPISODE (MDE)

. = Aged 12-17/Unknown (Otherwise).....  
 1 = Yes (ADSMMDA=1).....  
 2 = No (See comment above).....

(ADPB2WK, AMDELT)

**AMDEYR** Len : 1 ADULT: PAST YEAR MAJOR DEPRESSIVE EPISODE (MDE)

. = Aged 12-17/Unknown (Otherwise).....  
 1 = Yes (AMDELT=1 & ADPB2WK=1).....  
 2 = No (AMDELT=2 or [AMDELT=1 & ADPB2WK=2]).....

## RECODED ADULT DEPRESSION

The following adult MDE variable, AMDEY2\_U, is used in the 2012 mental illness prediction model. It is defined differently than AMDEYR which is used in the Mental Health Detailed Tables. See the mental illness variables in the Recoded Mental Health section of this codebook and the Recoded Mental Health Appendix for more details on the 2012 mental illness prediction model.

(AMDEYR, CATAG18)

AMDEY2\_U      Len : 1    ADULT PAST YEAR MDE - 'UNKNOWN' IMPUTED AS 'NO'

. = Aged 12-17 (CATAG18=2) .....  
 0 = No/Unknown (CATAG18=1 and AMDEYR=.,2).....  
 1 = Yes (CATAG18=1 and AMDEYR=1) .....

NOTE: The following 25 variables are among all adult respondents who were asked the respective questions and are not confined to those respondents who were ultimately classified as having a Major Depressive Episode (MDE) in their lifetime or past year. To produce estimates among adults with MDE, the analysis will need to be restricted by either the lifetime MDE variable (AMDELT) or the past year MDE variable (AMDEYR).

(ADSEEDOC)

ATXMDEYR      Len : 1    ADULT: SAW OR TALK TO MD/PROF FOR MDE IN PAST YEAR

## RECODED ADULT DEPRESSION

The following variable, AOTHMDE, defines an adult as having seen or talked to another professional about MDE during the past year if s/he entered a valid write-in response other than the responses that matched existing categories (ADOTHSP=13-32, 36, 37, 38, 39, 40, 41, 801).

An adult was classified as NOT having seen or talked to another professional about MDE during the past year, AOTHMDE=0, if s/he met either of these conditions:

1. Reported NOT seeing or talking to a medical doctor or other professional during the past year (ADSEEDOC=2).
2. Response not entered for whether other mental health professional was seen or talked to during the past year (ADOTHHLP=6).
3. Write-in response entered matched an existing category (ADOTHSP=1-10, 12).

(ADOTHHLP, ADOTHSP, ADSEEDOC)

**AOTHMDE** Len: 1 ADULT: SAW/TALK TO OTHER PROF ABOUT MDE IN PST YR

. = Aged 12-17/Unknwn/Legit Skip/Invalid Spec. Resp. ....  
 0 = No (See comment above) .....  
 1 = Yes (See comment above) .....

NOTE: The following variable, AHLTMDE, indicates whether an adult reported seeing or talking to a health professional about MDE in the past year. Adults were classified as having seen or talked to a health professional (AHLTMDE=1) if they reported seeing or talking to any of the following professionals: general practitioner or family doctor (ADOCMDE=1); other medical doctor (AOMDMDE=1); psychologist (APSY1MDE=1); psychiatrist or psychotherapist (APSY2MDE=1); social worker (ASOCMDE=1); counselor (ACOUNMDE=1); other mental health professional (AOMHMDE=1); or nurse, occupational therapist, or other health professional (ANURSMDE=1). Respondents were classified as having not seen or talked to a health professional (AHLTMDE=0) if they reported not seeing or talking to all of the professionals listed above (source variable=0).

(ACOUNMDE, ADOCMDE, ANURSMDE, AOMDMDE, AOMHMDE, APSY1MDE, APSY2MDE, ASOCMDE)

 0 = No (AHLTMDE=0 or ARXMDEYR=0).....  
 1 = Yes (AHLTMDE=1 and ARXMDEYR=1) .....

NOTE: The following four variables make up the four role domains (home management, work, close relationships with others, and social life) of the Sheehan Disability Scale (SDS), which measures the impact of a disorder on a adult's life.

(ADPSHMG2)

ASDSHOM2

Len : 1 ADULT: MDE ROLE IMPAIRMENT - HOME MANAGEMENT

. = Aged 12-17/Unkn/Legit Skip (Otherwise) .....  
 1 = None (ADPSHMG2=0).....  
 2 = Mild (ADPSHMG2=1,2,3) .....  
 3 = Moderate (ADPSHMG2=4,5,6).....  
 4 = Severe (ADPSHMG2=7,8,9).....  
 5 = Very Severe (ADPSHMG2=10) .....

(ADPSWORK)

ASDSWRK2

Len : 1 ADULT: MDE ROLE IMPAIRMENT - ABILITY TO WORK

. = Aged 12-17/Unkn/Legit Skip (Otherwise) .....  
 1 = None (ADPSWORK=0).....  
 2 = Mild (ADPSWORK=1,2,3) .....  
 3 = Moderate (ADPSWORK=4,5,6) .....  
 4 = Severe (ADPSWORK=7,8,9) .....  
 5 = Very Severe (ADPSWORK=10).....

(ADPSRELS)

ASDSREL2

Len : 1 ADULT: MDE ROLE IMPAIRMENT - CLOSE RELATIONSHIPS

. = Aged 12-17/Unkn/Legit Skip (Otherwise) .....  
 1 = None (ADPSRELS=0).....  
 2 = Mild (ADPSRELS=1,2,3).....  
 3 = Moderate (ADPSRELS=4,5,6).....  
 4 = Severe (ADPSRELS=7,8,9).....  
 5 = Very Severe (ADPSRELS=10) .....

(ADPSSOC)

ASDSSOC2

Len : 1 ADULT: MDE ROLE IMPAIRMENT - SOCIAL LIFE

. = Aged 12-17/Unkn/Legit Skip (Otherwise) .....  
 1 = None (ADPSSOC=0) .....  
 2 = Mild (ADPSSOC=1,2,3) .....  
 3 = Moderate (ADPSSOC=4,5,6).....  
 4 = Severe (ADPSSOC=7,8,9) .....  
 5 = Very Severe (ADPSSOC=10) .....

The following variable, ASDSOVL2, is assigned the maximum level of interference over the four role domains of SDS: home management (ASDSHOM2), ability to work (ASDSWRK2), close relationships (ASDSREL2), and social life (ASDSSOC2).

(ASDSHOM2, ASDSREL2, ASDSSOC2, ASDSWRK2)

ASDSOVL2

Len : 1 ADULT: MAX SEVERITY LEVEL OF MDE ROLE IMPAIRMENT

. = Aged 12-17/Unknown/Legitimate Skip (Otherwise).....  
 1 = None (See comment above).....  
 2 = Mild (See comment above).....  
 3 = Moderate (See comment above) .....  
 4 = Severe (See comment above).....  
 5 = Very Severe (See comment above).....

# RECODED ADULT DEPRESSION

The following variable, AMDEIMP, is derived from the maximum severity level of MDE role impairment (ASDSOVL2) and is restricted to adults with past year MDE (AMDEYR).

(AMDEYR, ASDSOVL2)

AMDEIMP      Len : 1    ADULT: MDE WITH SEVERE ROLE IMPAIRMENT

- . = Aged 12-17/Unknown (Otherwise).....
- 1 = Yes (AMDEYR=1 and ASDSOVL2=4,5).....
- 2 = No (AMDEYR=2 or ASDSOVL2=1,2,3).....

**YOUTH MENTAL HEALTH TREATMENT**

*The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a<sup>1</sup>.*

These next questions are about treatment and counseling for problems with your behaviors or emotions that were not caused by alcohol or drugs.

During the past 12 months, have you stayed overnight or longer in any type of hospital to receive treatment or counseling for emotional or behavioral problems that were not caused by alcohol or drugs?

# RECODED YOUTH MENTAL HEALTH TREATMENT

## **RECODED YOUTH MENTAL HEALTH TREATMENT**

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the preceding section.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

The following recoded variables contain information about whether youths received mental health care in the past year from each of 11 specific services for problems with behaviors or emotions that were not caused by alcohol or drugs.

NOTE: The following eight variables contain information on the general types of mental health services received by youths in the past year for problems with behavior or emotions that were not caused by alcohol or drugs. These five variables were created for use during the 2011 NSDUH: ANYMHIN, ANYMHOUT, ANYSMH, ANYMHED2, and ANYSMPS2. These three variables, ANYMHIN2, ANYSMH2, and ANYNSMH, were created to generate multi-year trend estimates for the 2013 Mental Health Detailed Tables.

The following variable, ANYMHIN, indicates whether a youth reported receiving specialty inpatient/residential mental health services in the past year from any of 3 specific inpatient/residential sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created based on the following 3 sources of treatment variables: stayed overnight in hospital (YHOSP), stayed in residential treatment facility (YRESID), and spent time in foster care (YFOST). Youths who reported a positive response (source variable=1) to one or more of the 3 questions were included in the yes category regardless of how many of the 3 questions they answered. Youths who did not report a positive response, but answered all 3 of the questions were included in the no category. Youths who did not report a positive response and did not answer all the questions, and adults were included in the unknown/18+ category.

(YFOST, YHOSP, YRESID)

ANYMHIN

Len : 1 YTH RCVD SPEC INPATIENT MH SERVICES IN PY

. = Unknown/Aged 18+ (Otherwise).....  
 0 = No (YHOSP, YRESID, and YFOST=0).....  
 1 = Yes (YHOSP, YRESID, or YFOST=1).....

The following variable, ANYMHIN2, indicates whether a youth reported receiving specialty inpatient/residential mental health services in the past year from any of 2 specific inpatient/residential sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created based on the following 2 sources of treatment variables: stayed overnight in hospital (YHOSP) and stayed in residential treatment facility (YRESID). Youths who reported a positive response (source variable=1) to either question were included in the yes category. Youths who did not report a positive response, but answered both questions were included in the no category. Youths who did not report a positive response and did not answer both questions, and adults, were included in the unknown/18+ category.

During the 2013 NSDUH process, it was determined that treatment received through foster care should not be included in the specialty treatment category instead; thus the revised variable ANYMHIN2 that does not include foster care was created for all years back to 2002.

## RECODED YOUTH MENTAL HEALTH TREATMENT

The following variable, ANYMHOUT, indicates whether a youth reported receiving specialty outpatient mental health services in the past year from any of 4 specific outpatient sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created based on the following 4 source of treatment variables: spent time in a day treatment facility (YDAYTRT), received treatment at a mental health clinic (YCLIN), from a private therapist (YTHER), and from an in-home therapist (YHOME). Youths who reported a positive response (source variable=1) to one or more of the 4 questions were included in the yes category regardless of how many of the 4 questions they answered. Youths who did not report a positive response, but answered all 4 of the questions were included in the no category. Youths who did not report a positive response and did not answer all the questions, and adults were included in the unknown/18+ category.

(YCLIN, YDAYTRT, YHOME, YTHER)

. = Unknown/Aged 18+ (Otherwise).....  
 0 = No (YDAYTRT, YCLIN, YTHER, and YHOME=0).....  
 1 = Yes (YDAYTRT, YCLIN, YTHER, or YHOME=1).....

The following variable, ANYSMH, indicates whether a youth reported receiving specialty mental health services in the past year from any of 7 specific inpatient/residential or outpatient specialty sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created based on the following 7 source of treatment variables: stayed overnight in a hospital (YHOSP), stayed in a residential treatment facility (YRESID), spent time in foster care (YFOST), spent time in a day treatment facility (YDAYTRT), received treatment from a mental health clinic (YCLIN), from a private therapist (YTHER), and from an in-home therapist (YHOME). Youths who reported a positive response (source variable=1) to one or more of the 7 questions were included in the yes category regardless of how many of the 7 questions they answered. Youths who did not report a positive response, but answered all 7 of the questions were included in the no category. Youths who did not report a positive response and did not answer all the questions, and adults were included in the unknown/18+ category.

The following variable, ANYSMH2, indicates whether a youth reported receiving specialty mental health services in the past year from any of 6 specific inpatient/residential or outpatient specialty sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created based on the following 6 source of treatment variables: stayed overnight in a hospital (YHOSP), stayed in a residential treatment facility (YRESID), spent time in a day treatment facility (YDAYTRT), received treatment from a mental health clinic (YCLIN), from a private therapist (YTHER), and from an in-home therapist (YHOME). Youths who reported a positive response (source variable=1) to one or more of the 6 questions were included in the yes category regardless of how many of the 6 questions they answered. Youths who did not report a positive response, but answered all 6 of the questions were included in the no category. Youths who did not report a positive response and did not answer all the questions, and adults were included in the unknown/18+ category.

During the 2013 NSDUH process, it was determined that treatment received through foster care should be included in the non-specialty treatment category instead; thus the revised variable ANYSMH2 was created for all years back to 2002.

(YCLIN, YDAYTRT, YHOME, YHOSP, YRESID, YTHER)

The following variable, ANYNSMH, indicates whether a youth reported receiving nonspecialty mental health services in the past year from any of five specific nonspecialty sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created based on the following five source of treatment variables: school social worker, school psychologist, or school counselor (YSHSW), special school or program within a regular school for students with emotional or behavioral problems (YSPEC), pediatrician or other family doctor (YPED), juvenile detention center, prison, or jail (YJAIL), and foster care or therapeutic foster care (YFOST). Youths who reported a positive response (source variable=1) to one or more of the five questions were included in the yes category regardless of how many of the five questions they answered. Youths who did not report a positive response, but answered all five of the questions were included in the no category. Youths who did not report a positive response and did not answer all the questions, and adults were included in the unknown/18+ category.

## RECODED YOUTH MENTAL HEALTH TREATMENT

The following variable, ANYMHED2, indicates whether a youth enrolled in school reported receiving mental health services in the past year from education sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created using the following source of treatment variables: talked to school social worker, school psychologists, or school counselors for problems (YSHSW) and attended a special school or participated in a special program at a regular school for problems (YSPEC). Youths who reported a positive response (source variable=1) to one or more of these questions were included in the yes category regardless of how many of the questions they answered. Youths who did not report a positive response, but answered both questions were included in the no category. Youths who did not report a positive response and did not answer both questions, and adults were included in the unknown/18+ category. This variable is not comparable with variables named similarly in past NSDUHs due to questionnaire changes in the Youth Mental Health Utilization module.

(YSHSW, YSPEC)

The following variable, ANYSMPS2, indicates whether a youth reported receiving specialty mental health services along with services from either education or general medical (family doctor/pediatrician) settings in the past year for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created using the following 3 source of treatment variables: received specialty mental health services (ANYSMH), education setting-based mental health services (ANYMHED2), and treatment from a family doctor/pediatrician (YPED). Included in the unknown/18+ category were adults and youths who did not provide enough information to determine whether mental health care was received at both a specialty mental health service along with services from either an education or general medical setting [ANYSMH=. or (ANYSMH=1 and ((ANYMHED2=0 and YPED=.) or (ANYMHED2=. and YPED=0) or (ANYMHED2=. and YPED=.)]]]. This variable is not comparable with variables named similarly in past NSDUHs due to questionnaire changes in the Youth Mental Health Utilization module.

## RECODED YOUTH MENTAL HEALTH TREATMENT

The following variable, SPINVEST, indicates how many overnight stays were reported at an inpatient/residential specialty mental health service in the past year. The number of overnight stays is calculated by adding the number of overnight stays at a hospital (YUHOSPNM), residential treatment center (YURSIDNM), and in foster care (YUFCARNM). A value of 6 (No Overnight Stays) was assigned whenever a respondent said they had used none of the services (YUHOSPYR, YURSIDYR, YUFCARYR all equal 2). A value of missing was assigned when the response to whether received treatment or number of overnight stays was unknown for any of the 3 locations (any of YUHOSPYR, YURSIDYR, YUFCARYR=85, 94, 97, 98 OR any of YUHOSPNM, YURSIDNM, YUFCARNM=985, 994, 997, 998), unless the sum of the overnight stays for services with non-missing information was greater than or equal to 25, in which case a value of 5 (25 or more stays) was assigned. A missing value was also assigned for respondents aged 18 or older.

(YUFCARNM, YUFCARYR, YUHOSPNM, YUHOSPYR, YURSIDNM, YURSIDYR)  
SPINVEST      Len : 1    # NIGHTS YTH STAYED IN SPECIALTY INPATIENT MH SRVC

. = Unknown/18+ (See comment above) .....  
1 = 1 Overnight Stay (See comment above).....  
2 = 2 Overnight Stays (See comment above).....

The following variable, SMHBRK, indicates whether a respondent received their most recent mental health services from at least one specialty mental health source in the past year because they broke rules or "acted out". This recode was created by examination of the following source variables: stayed overnight in hospital (YUHOBKRU), residential treatment center (YURSBKRU), in foster care (YUFCBKRU), or visited a day treatment program (YUDYBKRU), mental health center (YUMHBKRU), private therapist (YUTPBKRU), or received treatment from an in-home therapist (YUIHBKRU) because they broke rules or "acted out". Adults, youths that did not report receiving services from any of the 7 specialty sources in the past year, and youths that reported receiving services in the past year, but did not indicate a valid reason for receiving services at any of these locations were assigned to the unknown category.

1 = Reason indicated (See comment above) .....

NOTE: The following 13 variables, SEMXXX2, indicate whether a respondent last received any specialty mental health services along with services from either education or general medical (family doctor/pediatrician) settings in the past year because of respective reasons for problems with behavior or emotions that were not caused by alcohol or drugs. These recodes were created by examination of the following sources: received any specialty mental services (SMHXXX), received treatment from a family doctor or pediatrician (FDOCXXX), and talked to a school social worker, school psychologist, or school counselor (SHSWXXX) in the past year because of respective reasons.

Respondents for the SEMXXX2 reason variables were treated as missing if 1) they were aged 18 or older 2) they did not receive care or it is unknown if they received care for any reason at any of the specialty mental health services (ANYSMH=0 or missing) or at both an education and general medical setting (YPED and YSHSW=0 or missing) or if 3) they did receive treatment at both of these services but did not indicate a valid reason for receiving services at a specialty mental health service along with services from either education or general medical setting, or there was not sufficient information to determine if these services were received for the specified reason. Respondents were categorized as not having received care for the specified reason if they were not categorized as missing and it could not be shown that they received care for the specified reason at a specialty mental health service along with services from either an education or general medical setting.

Note that responses for receipt of care for the specified reason are only taken into account for services received. For example, a respondent who indicated receiving both education and general medical services, and indicated that they did not receive care for the specified reason for education, but did not indicate any reason for medical will be assigned to the unknown category. However, if this respondent only indicated receiving education services then with the same responses to the reason questions, they would be assigned to the "No" category (assuming that they also did not receive care from any specialty services). These variables are not comparable with variables named SEMXXX in previous NSDUHs due to questionnaire changes in the Youth Mental Health Utilization module.

- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

People who have problems with their mood often have other problems at the same time. These problems may include things like changes in:

- sleep
- eating
- energy
- the ability to keep their mind on things
- feeling badly about themselves

Did you ever have any of these problems during a period of time when you [FEELFILL] for two weeks or longer?

(YD21)

YODPPROB<sup>1</sup>

Len : 2 EVER HAVE OTH PRBLMS DURING 2 WKS OR LONGER

- 1 = Yes .....
- 2 = No.....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

## ADOLESCENT DEPRESSION

Think again about these other problems we just mentioned. They include things like changes in:

- sleep
- eating
- energy
- the ability to keep their mind on things
- feeling badly about themselves

Can you think of the worst time when you [FEELFILL] for two weeks or longer and also had these other problems at the same time?

(YD22)

YOWRPROB<sup>1</sup>      Len : 2    ONE PARTICULAR TIME THAT IS THE WORST ONE EVER

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

How old were you when that worst period of time started?

Then think of the most recent time you [FEELFILL] for two weeks or longer and you had these other problems at the same time.

How old were you when that time started?

(YD22A, YD22C)

YOWRAGE<sup>1</sup>      Len : 3    AGE WHEN WORST PERIOD OF TIME STARTED

RANGE = 1 - 17 .....  
 994 = DON'T KNOW .....  
 997 = REFUSED .....  
 998 = BLANK (NO ANSWER).....  
 999 = LEGITIMATE SKIP .....

In answering the next questions, think about the period of time when your [FEELNOUN] and other problems were the worst.

In answering the next questions, think about the most recent period of time when you [FEELFILL] and had other problems at the same time.

During that time, did you feel sad, empty, or depressed for most of the day nearly every day?

(YD24A)

YOWRDEPR<sup>1</sup>      Len : 2    WHEN PRBLMS WORST FELT SAD/EMPTY/DPRSD EVERY DAY

1 = Yes .....  
 2 = No .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

During that [TIMEFILL] period of time, did you feel discouraged about how things were going in your life most of the day nearly every day?

(YD24C)

**RECODED ADOLESCENT DEPRESSION**

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the preceding section.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

NOTE: Starting with the 2004 NSDUH, respondents were administered separate age-appropriate depression modules designed to measure whether or not respondents had experienced a major depressive episode (MDE) in their lifetime and past year. All adolescent (youth) respondents aged 12 to 17 were asked questions from the Youth Depression module. The 2004 NSDUH only asked a subsample of adults aged 18 or older the questions from the Adult Depression module, but starting in 2005, all adults were administered the questionnaire module.

From 2004 through 2007, a single set of variables was created containing the recoded MDE data for both adult and adolescent respondents combined. In 2008, instead of a single set of variables, two recoded sets of MDE variables were created for adolescents and adults separately. This change was due to the presence of context effects in the adult estimates stemming from changes in the mental health module which precedes the adult depression section within the questionnaire. Based on an analysis of the 2008 data that evaluated the presence of context effects, it was determined that the adult depression estimates in 2008 and later years are not comparable with years prior to 2008, and the variables were therefore renamed to indicate the lack of comparability. The youth depression estimates were not impacted by the 2008 adult questionnaire changes and are considered comparable across years. Therefore, only the youth depression variables that were previously defined for both adults and youth had to be renamed. Multi-year trend analyses can be performed by renaming the recoded adolescent depression variables the same across years. Youth depression variables that did not require renaming are noted specifically in the comments above the variables below. See the 2008 Recoded Mental Health Appendix for more detailed information on the 2008 changes.

In 2009, changes were made to the youth mental health service utilization (YMHSU) questions that preceded the adolescent depression questions. These changes included the replacement of five questions that asked about receipt of special education services and school counseling, and time spent in jail or foster care with questions that asked about receipt of mental health services in the education and justice system sectors. Due to this change, a context effect analysis was done using data from the first 6 months of the 2009 NSDUH and sought to determine whether changes in the YMHSU module affected responses to the first three adolescent depression questions and the lifetime and past year MDE estimates. The results of the analysis showed these changes in 2009 did not appear to affect the estimates of adolescent MDE; therefore, no further variable changes were needed.

Additional details on these adolescent depression recoded variables as well as sample SAS code showing how to rename the variables for multi-year analyses are provided in the Recoded Depression Variable Documentation Appendix.

The following variable, YMDELT, classifies an adolescent as having a major depressive episode (MDE) in their lifetime, YMDELT=1, if they reported experiencing at least 5 out of the 9 criteria used to define an adolescent as having had MDE in their lifetime, where at least one of the criteria is a depressed mood or loss of interest or pleasure in daily activities (YODSMMDE=1).

An adolescent was classified as NOT having a major depressive episode (MDE) in their lifetime, YMDELT=2, if they met either of these conditions:

1. Reported experiencing fewer than 5 out of the 9 criteria used to define an adolescent as having had MDE in their lifetime (YODSMMDE=2).
2. If the number of criteria used to define an adolescent as having had MDE in their lifetime is unknown (YODSMMDE=98) and the respondent reported at least one of the following:
  1. Never having had a period of time lasting several days or longer when felt sad, empty, or depressed (YODPREV=2), discouraged or hopeless about how things were going in life (YODSCEV=2), and lost interest and became bored with most things usually enjoyable (YOLOSEV=2).
  2. Experienced the feelings in (i), but they did not last most of the day, almost every day for two weeks or longer [YOLSI2WK=2 or YODPR2WK=2].
  3. Experienced the feelings in (i) most of the day, almost every day for two weeks or longer, but the feelings lasted less than an hour when mood was most severe and frequent (YOWRHRS=1).
  4. Experienced the feelings in (i) most of the day, almost every day for two weeks or longer for at least an hour during those times when mood was most severe and frequent, but the bad feelings were mild (YOWRDST=1), there was never a time when you felt so bad that nothing could cheer you up (YOWRCHR=4), and there was never a time when you felt so bad that you could not carry out your daily activities (YOWRIMP=4).
  5. Experienced the feelings in (i) most of the day, almost every day for two weeks or longer for at least an hour with bad feelings that were more than mild or at some point could not be cheered up or could not carry out daily activities, but never had any other problems during those weeks, such as changes in sleep, eating, energy, the ability to keep mind on things, or feeling badly about self (YODPPROB=2).

# RECODED ADOLESCENT DEPRESSION

# RECODED ADOLESCENT DEPRESSION

The following variable, YOTHMDE, defines an adolescent as having seen or talked to another professional about MDE during the past year, YOTHMDE=1, if s/he entered a valid write-in response other than the responses that matched the existing categories (YOOHSP=13-28, 801).

An adolescent was classified as NOT having seen or talked to another professional about MDE during the past year, YOTHMDE=0, if s/he met either of these conditions:

1. Reported NOT seeing or talking to a medical doctor or other professional during the past year (YOSEEDOC=2).
2. Response not entered for whether other mental health professional was seen or talked to during the past year (YOOHHLP=6).
3. Write-in response entered matched an existing category (YOOHSP=1-10, 12).

(YOOHHLP, YOOHSP, YOSEEDOC)

YOTHMDE Len : 1 YOUTH: SAW/TALK TO OTHER PROF ABOUT MDE IN PST YR

. = Aged 18+/Unknown/Legit Skip/Invalid Spec. Resp. ....  
0 = No (See comment above).....  
1 = Yes (See comment above) .....

NOTE: The following variable, YHLMDE, indicates whether a youth reported seeing or talking to a health professional about MDE in the past year. Youths were classified as having seen or talked to a health professional (YHLMDE=1) if they reported seeing or talking to any of the following professionals: general practitioner or family doctor (YDOCMDE=1); other medical doctor (YOMDMDE=1); psychologist (YPSY1MDE=1); psychiatrist or psychotherapist (YPSY2MDE=1); social worker (YSOCMDE=1); counselor (YCOUNMDE=1); other mental health professional (YOMHMD=1); or nurse, occupational therapist, or other health professional (YNURSMDE=1). Respondents were classified as having not seen or talked to a health professional (YHLMDE=0) if they reported not seeing or talking to all of the professionals listed above (source variable=0).

(YCOUNMDE, YDOCMDE, YNURSMDE, YOMDMDE, YOMHMD, YPSY1MDE, YPSY2MDE, YSOCMDE)

NOTE: The following five variables were not renamed in 2008 since they were originally only defined for youth; therefore, no changes are needed for these in order to generate analyses across years.

NOTE: The following four variables make up the four role domains (chores at home, school or work, close relationships with family, and social life) of the Sheehan Disability Scale (SDS), which measures the impact of a disorder on an adolescent's life.

(YOPSHMGT)

YSDSHOME

Len : 1 YOUTH: MDE ROLE IMPAIRMENT - CHORES AT HOME

. = Aged 18+/Unknown/Legitimate Skip (Otherwise).....  
 1 = None (YOPSHMGT=0).....  
 2 = Mild (YOPSHMGT=1,2,3).....  
 3 = Moderate (YOPSHMGT=4,5,6).....  
 4 = Severe (YOPSHMGT=7,8,9).....  
 5 = Very Severe (YOPSHMGT=10).....

(YOPSWORK)

YSDSWRK

Len : 1 YOUTH: MDE ROLE IMPAIRMENT - SCHOOL OR WORK

. = Aged 18+/Unknown/Legitimate Skip (Otherwise).....  
 1 = None (YOPSWORK=0).....  
 2 = Mild (YOPSWORK=1,2,3).....  
 3 = Moderate (YOPSWORK=4,5,6).....  
 4 = Severe (YOPSWORK=7,8,9).....  
 5 = Very Severe (YOPSWORK=10).....

(YOPSRELS)

YSDSREL

Len : 1 YOUTH: MDE ROLE IMPAIRMENT - FAMILY RELATIONSHIPS

. = Aged 18+/Unknown/Legitimate Skip (Otherwise).....  
 1 = None (YOPSRELS=0).....  
 2 = Mild (YOPSRELS=1,2,3).....  
 3 = Moderate (YOPSRELS=4,5,6).....  
 4 = Severe (YOPSRELS=7,8,9).....  
 5 = Very Severe (YOPSRELS=10).....

(YOPSSOC)

YSDSSOC

Len : 1 YOUTH: MDE ROLE IMPAIRMENT - SOCIAL LIFE

. = Aged 18+/Unknown/Legitimate Skip (Otherwise).....  
 1 = None (YOPSSOC=0).....  
 2 = Mild (YOPSSOC=1,2,3).....  
 3 = Moderate (YOPSSOC=4,5,6).....  
 4 = Severe (YOPSSOC=7,8,9).....  
 5 = Very Severe (YOPSSOC=10).....

The following variable, YSDSOVRL, is assigned the maximum level of interference over the four role domains of SDS: chores at home (YSDSHOME), school or work (YSDSWRK), family relationships (YSDSREL), and social life (YSDSSOC).

(YSDSHOME, YSDSREL, YSDSSOC, YSDSWRK)

YSDSOVRL

Len : 1 YOUTH: MAX SEVERITY LEVEL OF MDE ROLE IMPAIRMENT

. = Aged 18+/Unknown/Legitimate Skip (Otherwise).....  
 1 = None (See comment above).....  
 2 = Mild (See comment above).....  
 3 = Moderate (See comment above).....  
 4 = Severe (See comment above).....  
 5 = Very Severe (See comment above).....

# RECODED ADOLESCENT DEPRESSION

The following variable, MDEIMPY, is derived from the maximum severity level of MDE role impairment (YSDSOVRL) and is restricted to adolescents with past year MDE (YMDEYR).

(YMDEYR, YSDSOVRL)

MDEIMPY Len : 1 YOUTH: MDE WITH SEVERE ROLE IMPAIRMENT

. = Aged 18+/Unknown (Otherwise).....  
 1 = Yes (YMDEYR=1 and YSDSOVRL=4,5).....

. = Aged 18+/Unknown (Otherwise).....  
 0 = No (MDEIMPY=2 or ABODILAL=0).....  
 1 = Yes (MDEIMPY=1 & ABODILAL=1) .....

**CONSUMPTION OF ALCOHOL**

*The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a<sup>1</sup>.*

The next few questions return to the topic of alcohol. Remember that by a drink, we mean a can or bottle of beer, a glass of wine or a wine cooler, a shot of liquor, or a mixed drink with liquor in it. We are not asking about times when you only had a sip or two from a drink.

Earlier, the computer recorded that you drank at least one alcoholic beverage within the past 30 days, that is, since [DATEFILL].

Please think about the last time you drank any alcoholic beverage. How many drinks did you have that time?

(CA01)

NOTE: Variables pertaining to consumption of 5 or more drinks or 4 or more drinks in a single occasion have been edited with respect to ED4FLAG. ED4FLAG takes into account the editing of the variables NODR30A and DR5DAY in the core ALCOHOL module.

ED4FLAG<sup>1</sup>

Len : 2 ANY REPORT OF 4 OR 5+ DRINKS FROM ALCOHOL MODULE

0 = No report of 4 or 5+ drinks or not applicable.....  
1 = Report of 4 drinks in NODR30A; no rpt 5+ drinks.....  
2 = Report of 5+ drinks in NODR30A or DR5DAY.....  
12 = Report of 5+ drinks LOGICALLY ASSIGNED.....  
85 = BAD DATA Logically assigned.....

[Earlier the computer recorded that you have had at least one drink of an alcoholic beverage in your lifetime.] Have you ever had 5 or more drinks on the same occasion? By 'occasion,' we mean at the same time or within a couple of hours of each other.

(CA10)  
CABNGEV<sup>1</sup>

Len : 2 EVER HAD 5 OR MORE DRINKS ON THE SAME OCCASION

1 = Yes.....  
2 = No.....  
3 = Yes LOGICALLY ASSIGNED.....  
4 = No LOGICALLY ASSIGNED.....  
5 = Yes LOGICALLY ASSIGNED (from skip pattern).....  
91 = NEVER USED ALCOHOL.....  
94 = DON'T KNOW.....  
97 = REFUSED.....  
98 = BLANK (NO ANSWER).....

## CONSUMPTION OF ALCOHOL

[Earlier the computer recorded that you had 5 or more drinks on the same occasion in the past 30 days.] How old were you the first time you had 5 or more drinks on the same occasion?

(CA11)

**CABNGAGE<sup>1</sup>**

Len : 3 AGE 1ST TIME HAD 5 OR MORE DRINKS SAME OCCASION

RANGE = 1 - 95 .....  
 985 = BAD DATA Logically assigned .....  
 991 = NEVER USED ALCOHOL .....  
 994 = DON'T KNOW .....  
 997 = REFUSED .....  
 998 = BLANK (NO ANSWER).....  
 999 = LEGITIMATE SKIP .....

NOTE: EIBNGAGE is an "editing indicator" for the variable CABNGAGE. The default value of EIBNGAGE is 1, when no editing has been done to CABNGAGE, other than to replace values with "bad data" codes or to assign relevant LEGITIMATE SKIP/NEVER USED ALCOHOL codes when the question did not apply. EIBNGAGE has values of 2 when values in CABNGAGE have logically been replaced with other values as part of the data editing procedures.

**EIBNGAGE<sup>1</sup>**

Len : 1 EDITING INDICATOR FOR CABNGAGE

1 = Questionnaire data (or bad data/legitimate skip).....  
 2 = Logically assigned data.....

Did you first have 5 or more drinks on the same occasion in [CURRENT YEAR - 1] or [CURRENT YEAR]?

Did you first have 5 or more drinks on the same occasion in [CURRENT YEAR - 2] or [CURRENT YEAR - 1]?

In what month in [CURRENT YEAR] did you first have 5 or more drinks on the same occasion?

(CA11A, CA11B, CA11C)

**CABNGYFU<sup>1</sup>**

Len : 4 YEAR OF FIRST 5+ DRINKS ON SAME OCCASION - RECODE

RANGE = 2009 - 2011 .....  
 9985 = BAD DATA Logically assigned .....  
 9989 = LEGITIMATE SKIP Logically assigned.....  
 9991 = NEVER USED ALCOHOL .....  
 9994 = DON'T KNOW .....  
 9997 = REFUSED .....  
 9998 = BLANK (NO ANSWER).....  
 9999 = LEGITIMATE SKIP .....

NOTE: EIBNGYFU is an "editing indicator" for the variable CABNGYFU. The default value of EIBNGYFU is 1, when no editing has been done to CABNGYFU, other than to replace values with "bad data" codes or to assign relevant LEGITIMATE SKIP/NEVER USED ALCOHOL codes when the question did not apply. EIBNGYFU has values of 2 when values in CABNGYFU have logically been replaced with other values as part of the data editing procedures.

**EIBNGYFU<sup>1</sup>**

Len : 1 EDITING INDICATOR FOR CABNGYFU

1 = Questionnaire data (or bad data/legitimate skip).....  
 2 = Logically assigned data.....

## CONSUMPTION OF ALCOHOL

In what month in [CURRENT YEAR] did you first have 5 or more drinks on the same occasion?

In what month in [YEAR FROM CA11a or CA11b] did you first have 5 or more drinks on the same occasion?

(CA11C, CA11D)

CABNGMFU<sup>1</sup>

Len : 2 MONTH OF 5+ DRINKS ON SAME OCCASION - RECODE

1 = January .....  
 2 = February .....  
 3 = March .....  
 4 = April .....  
 5 = May .....  
 6 = June .....  
 7 = July .....  
 8 = August .....  
 9 = September .....  
 10 = October .....  
 11 = November .....  
 12 = December .....  
 85 = BAD DATA Logically assigned .....  
 89 = LEGITIMATE SKIP Logically assigned .....  
 91 = NEVER USED ALCOHOL .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER) .....  
 99 = LEGITIMATE SKIP .....

NOTE: EIBNGMFU is an "editing indicator" for the variable CABNGMFU. The default value of EIBNGMFU is 1, when no editing has been done to CABNGMFU, other than to replace values with "bad data" codes or to assign relevant LEGITIMATE SKIP/NEVER USED ALCOHOL codes when the question did not apply. EIBNGMFU has values of 2 when values in CABNGMFU have logically been replaced with other values as part of the data editing procedures.

EIBNGMFU<sup>1</sup>

Len : 1 EDITING INDICATOR FOR CABNGMFU

1 = Questionnaire data (or bad data/legitimate skip) .....  
 2 = Logically assigned data.....

Have you ever had 4 or more drinks on the same occasion?

(CA12)

CA4FDEV<sup>1</sup>

Len : 2 EVER HAD 4 OR MORE DRINKS ON THE SAME OCCASION

1 = Yes .....  
 2 = No .....  
 3 = Yes LOGICALLY ASSIGNED .....  
 5 = Yes LOGICALLY ASSIGNED (from skip pattern) .....  
 91 = NEVER USED ALCOHOL .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER) .....  
 99 = LEGITIMATE SKIP (IRSEX=1) .....

## CONSUMPTION OF ALCOHOL

NOTE: The distributions for CA4FDDYS, EI4FDDYS, CA4FDAGE, EI4FDAGE, CA4FDYFU, EI4FDYFU, CA4FDMFU, and EI4FDMFU for the 2006 survey are not comparable to the corresponding distributions in this survey year. A sizable number of female respondents in 2006 were incorrectly skipped out of the items corresponding to the variables CA4FDDYS and CA4FDAGE. In turn, the error for CA4FDAGE affected female respondents' eligibility to be asked the items corresponding to CA4FDYFU and CA4FDMFU. This error was corrected for the 2007 survey.

During the past 30 days, that is, since [DATEFILL], on how many days did you have 4 or more drinks on the same occasion?

(CA13)

CA4FDDYS<sup>1</sup>

Len : 2 # DAYS HAD 4+ DRINKS SAME OCCASION PAST 30 DAYS

RANGE = 0 - 30 .....  
 85 = BAD DATA Logically assigned .....  
 91 = NEVER USED ALCOHOL .....  
 93 = DID NOT USE ALCOHOL IN THE PAST 30 DAYS .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

NOTE: EI4FDDYS is an "editing indicator" for the variable CA4FDDYS. The default value of EI4FDDYS is 1, when no editing has been done to CA4FDDYS, other than to replace values with "bad data" codes or to assign relevant LEGITIMATE SKIP/NEVER USED ALCOHOL codes when the question did not apply. EI4FDDYS has values of 2 when values in CA4FDDYS have logically been replaced with other values as part of the data editing procedures.

EI4FDDYS<sup>1</sup>

Len : 1 EDITING INDICATOR FOR CA4FDDYS

1 = Questionnaire data (or bad data/legitimate skip).....  
 2 = Logically assigned data.....

How old were you the first time you had 4 or more drinks on the same occasion?

(CA14)

CA4FDAGE<sup>1</sup>

Len : 3 AGE 1ST TIME HAD 4 OR MORE DRINKS SAME OCCASION

RANGE = 3 - 82 .....  
 985 = BAD DATA Logically assigned .....  
 991 = NEVER USED ALCOHOL .....  
 994 = DON'T KNOW .....  
 997 = REFUSED .....  
 998 = BLANK (NO ANSWER).....  
 999 = LEGITIMATE SKIP .....

NOTE: EI4FDAGE is an "editing indicator" for the variable CA4FDAGE. The default value of EI4FDAGE is 1, when no editing has been done to CA4FDAGE, other than to replace values with "bad data" codes or to assign relevant LEGITIMATE SKIP/NEVER USED ALCOHOL codes when the question did not apply. EI4FDAGE has values of 2 when values in CA4FDAGE have logically been replaced with other values as part of the data editing procedures.

EI4FDAGE<sup>1</sup>

Len : 1 EDITING INDICATOR FOR CA4FDAGE

1 = Questionnaire data (or bad data/legitimate skip).....  
 2 = Logically assigned data.....

## CONSUMPTION OF ALCOHOL

Did you first have 4 or more drinks on the same occasion in [CURRENT YEAR - 1] or [CURRENT YEAR]?

Did you first have 4 or more drinks on the same occasion in [CURRENT YEAR - 2] or [CURRENT YEAR - 1]?

In what month in [CURRENT YEAR] did you first have 4 or more drinks on the same occasion?

(CA14A, CA14B, CA14C)

CA4FDYFU<sup>1</sup>      Len : 4    YEAR OF FIRST 4+ DRINKS ON SAME OCCASION - RECODE

 2 = Logically assigned data.....

# RECODED CONSUMPTION OF ALCOHOL

## RECODED CONSUMPTION OF ALCOHOL

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the preceding section.

NOTE: Certain source variables that were used to create recoded variables have valid values that might not have been reported or assigned for the current survey year. However, these values have been included in the general specifications in the codebook on how the recoded variables were created. See additional details about this issue in the Organization of the Data File section of this codebook introduction.

The following variable defines the social context of a respondent's last alcohol use, including whether they drank alone or if they were with one or more persons.

(CADRPEOP)

UADPEOP

Len : 1 SOCIAL CONTEXT OF MOST RECENT ALCOHOL USE

- . = Unknown (Otherwise) .....
- 1 = Drank Alone (CADRPEOP=1) .....
- 2 = Drank with one other person (CADRPEOP=2).....
- 3 = Drank with two or more other people (CADRPEOP=3).....
- 4 = No Past Mon Alc/Aged 21+ (CADRPEOP=89,91,93,99) .....

NOTE: The following 8 variables define the locations where respondents had their most recent alcohol use.

(CADRCAR)

UADCAR

Len : 1 MOST RECENT ALCOHOL USE IN A CAR

- . = Unknown/No PM Use/Aged 21+ (Otherwise) .....
- 1 = Yes (CADRCAR=1,3).....
- 2 = No (CADRCAR=6) .....

(CADRHOME)

UADHOME

Len : 1 MOST RECENT ALCOHOL USE AT HOME

- . = Unknown/No PM Use/Aged 21+ (Otherwise) .....
- 1 = Yes (CADRHOME=1,3) .....
- 2 = No (CADRHOME=6).....

(CADROTHM)

UADOTHM

Len : 1 MOST RECENT ALCOHOL USE AT SOMEONE ELSE'S HOME

- . = Unknown/No PM Use/Aged 21+ (Otherwise) .....
- 1 = Yes (CADROTHM=1,3) .....
- 2 = No (CADROTHM=6) .....

(CADRPUBL)

UADPUBL

Len : 1 MOST RECENT ALCOHOL USE AT A PARK, BEACH, OR LOT

- . = Unknown/No PM Use/Aged 21+ (Otherwise) .....
- 1 = Yes (CADRPUBL=1,3).....
- 2 = No (CADRPUBL=6) .....

(CADRBAR)

UADBAR

Len : 1 MOST RECENT ALCOHOL USE AT RESTAURANT, BAR OR CLUB

- . = Unknown/No PM Use/Aged 21+ (Otherwise) .....
- 1 = Yes (CADRBAR=1,3).....
- 2 = No (CADRBAR=6) .....

(CADREVNT)

UADREVNT

Len : 1 MOST RECENT ALCOHOL USE AT CONCERT OR SPORTS GAME

- . = Unknown/No PM Use/Aged 21+ (Otherwise) .....
- 1 = Yes (CADREVNT=1,3).....
- 2 = No (CADREVNT=6) .....

# RECODED CONSUMPTION OF ALCOHOL

(CADRSCHL)

UADSCHL

Len : 1 MOST RECENT ALCOHOL USE AT SCHOOL

- . = Unknown/No PM Use/Aged 21+ (Otherwise) .....
- 1 = Yes (CADRSCHL=1,3) .....
- 2 = No (CADRSCHL=6) .....

The following variable, UADROTH, was assigned a negative response if a respondent indicated not receiving their most recent alcohol from some other place (CADROTH=6) or indicated receiving their most recent alcohol from one of the other specific locations asked about (CADROTH=1 & CADROTSP=1-7). A missing was assigned if a respondent indicated that they received their most recent alcohol from some other place (CADROTH=1) and their response to the other-specify follow-up question was invalid or unknown (CADROTSP=70, 85, 94, 97, 98) or if they were not alcohol users, or did not indicate any location for their most recent alcohol use (CADROTH=91, 93, 94, 97, 98, 99).

(CADROTH, CADROTSP)

UADROTH

Len : 1 MOST RECENT ALCOHOL USE AT SOME OTHER PLACE

- . = Unknown/No PM Use/Aged 21+ (See comment above) .....
- 1 = Yes (CADROTH=1 and CADROTSP=9-41) .....
- 2 = No (See comment above) .....

(CADROTSP)

UADOTSP

Len : 1 OTHER LOCATIONS OF MOST RECENT ALCOHOL USE

- . = Unknown (CADROTSP=70,85,94,97,98) .....
- 1 = Party, wedding, or celebration (CADROTSP=35) .....
- 2 = Outside; Location not specified (CADROTSP=24) .....
- 3 = Hotel, motel, or resort (CADROTSP=15) .....
- 4 = Camping, hunting, or fishing (CADROTSP=22) .....
- 5 = Cabin, cottage, vacation home, etc. (CADROTSP=14) .....
- 6 = Dorm room (CADROTSP=29) .....
- 7 = Other location, nonuser, or aged 21+ (Otherwise) .....

(CABUYFRE)

UADPAID

Len : 1 UNDERAGE DRINKER PAID FOR MOST RECENT ALCOHOL

- . = Unknown (Otherwise) .....
- 1 = Yes (CABUYFRE=1) .....
- 2 = No (CABUYFRE=2) .....
- 3 = No Past Mon Alc/Aged 21+ (CABUYFRE=89,91,93,99) .....

A respondent was assigned a value of UADMONEY=3 if they did not use alcohol in the past month, were aged 21 or older, or were past month alcohol users who were under 21 but did not pay for their most recent alcohol (CAGVMONEY=89,91,93,99).

(CAGVMONEY)

UADMONEY

Len : 1 UNDERAGE DRINKER PURCHASED MOST RECENT ALCOHOL

- . = Unknown (Otherwise) .....
- 1 = Bought it myself (CAGVMONEY=1) .....
- 2 = Gave money to someone else to buy it (CAGVMONEY=2) .....
- 3 = No Pst Mon Alc/Aged 21+/No Pay (See comment above) .....

A respondent was assigned a value of UADBWHO=3 if they did not use alcohol in the past month, were aged 21 or older, were past month alcohol users who were under 21 but did not pay for their most recent alcohol, or were past month alcohol users who were under 21 and paid for their most recent alcohol but did not buy it themselves (CABUYWHO=89,91,93,99).

(CABUYWHO)

UADBWHO

Len : 1 HOW UNDERAGE DRINKER PURCHASED MOST RECNT ALCOHOL

- . = Unknown (Otherwise) .....
- 1 = Bought it at a store/restaurant/etc. (CABUYWHO=1) .....
- 2 = Bought it from another person (CABUYWHO=2) .....
- 3 = No PM Alc/Aged 21+/No Pay, Buy (See comment above) .....

## RECODED CONSUMPTION OF ALCOHOL

A respondent was assigned a value of UADPLACE=4 if they did not use alcohol in the past month, were aged 21 or older, were past month alcohol users who were under 21 but bought from another person, were past month alcohol users who were under 21 but did not pay for their most recent alcohol, or were past month alcohol users who were under 21 and paid for their most recent alcohol but did not buy it themselves (CABPLACE=89,91,93,99).

(CABPLACE)

UADPLACE

Len : 1 WHERE UNDERAGE DRINKER PURCHSD MOST RECNT ALCOHOL

- . = Unknown (Otherwise) .....
- 1 = Bought it at liquor/grocery store (CABPLACE=1) .....
- 2 = Bought it at a restaurant/bar/club (CABPLACE=2) .....
- 3 = Bought it at a concert/sports/event (CABPLACE=3) .....
- 4 = No PM Alc/21+/Prsn/No Pay, Buy (See comment above) .....

A respondent was assigned a value of UADBUND=3 if they did not use alcohol in the past month, were aged 21 or older, were past month alcohol users who were under 21 and bought it at a store, restaurant, bar, club, or event, were past month alcohol users who were under 21 but did not pay for their most recent alcohol, or were past month alcohol users who were under 21 and paid for their most recent alcohol but did not buy it themselves (CABUNDAG=89,91,93,99).

(CABUNDAG)

UADBUND

Len : 1 AGE PERSON WHO PURCHASED ALC FOR UNDERAGE DRINKER

- . = Unknown (Otherwise) .....
- 1 = Under age 21 (CABUNDAG=1) .....
- 2 = Age 21 or older(CABUNDAG=2) .....
- 3 = No PM Alc/21+/Plce/No Pay, Buy (See comment above) .....

A respondent was assigned a value of UADCAG=5 if they did not use alcohol in the past month, were aged 21 or older, were past month alcohol users who were under 21 but did not pay for their most recent alcohol, or were past month alcohol users who were under 21 but bought it themselves (CAGVWHO=89,91,93,99).

(CAGVWHO)

UADCAG

Len : 1 WHO PURCHASED UNDERAGE DRINKER MOST RECENT ALCOHOL

- . = Unknown (Otherwise) .....
- 1 = Parent or guardian (CAGVWHO=1) .....
- 2 = Another family member aged 21 or older (CAGVWHO=2) .....
- 3 = Someone not related aged 21 or older (CAGVWHO=3) .....
- 4 = Someone under the age of 21 (CAGVWHO=4) .....
- 5 = No PM Alc/21+/No Pay/Buy Self (See comment above) .....

The following variable, UADFWHO, was assigned missing if a respondent indicated that some other person gave them the last alcohol they drank (CAFREWHO=7) and their response to the other-specify follow-up question was unknown (CAFRESP=70, 85, 94, 97, 98) or if they did not indicate who gave them the last alcohol they drank (CAFREWHO=85, 94, 97, 98). A respondent was assigned a value of UADFWHO=8 if they did not use alcohol in the past month, were aged 21 or older, or were past month alcohol users who were under 21 but paid for it themselves (CAFREWHO=89,91,93,99).

(CAFRESP, CAFREWHO)

UADFWHO

Len : 1 WHO GAVE UNDERAGE DRINKER MOST RECENT ALCOHOL

- . = Unknown (See comment above) .....
- 1 = Parent or guardian (CAFREWHO=1,11) .....
- 2 = Another family member, 21 or older (CAFREWHO=2,12) .....
- 3 = Someone not related, 21 or older (CAFREWHO=3,13) .....
- 4 = Someone under the age of 21 (CAFREWHO=4,14) .....
- 5 = Took it from my home (CAFREWHO=5,15) .....
- 6 = Took it from someone else's home (CAFREWHO=6,16) .....
- 7 = Some other way (CAFREWHO=7 & CAFRESP=8-43) .....
- 8 = No PM Alc/Aged 21+/Pay (See comment above) .....

## RECODED CONSUMPTION OF ALCOHOL

The following variable, UADFRD, was assigned a negative response if a respondent indicated receiving their most recent alcohol not from a friend (CAFREWHO=1-6, 11-16) or from some other person besides a friend (CAFREWHO=7 & CAFRESP=8-21, 23-42). A missing was assigned if a respondent indicated that some other person gave them the last alcohol they drank (CAFREWHO=7) and their response to the other-specify follow-up question was unknown (CAFRESP=70, 85, 94, 97, 98) or if they did not indicate who gave them the last alcohol they drank (CAFREWHO=85, 94, 97, 98). A respondent was assigned a value of UADFRD=3 if they did not use alcohol in the past month, were aged 21 or older, or were past month alcohol users who were under 21 but paid for it themselves (CAFREWHO=89,91,93,99).

(CAFRESP, CAFREWHO)

UADFRD      Len : 1    MOST RECENT ALCOHOL FROM FRIEND, UNSPEC AGE/METHOD

. = Unknown (See comment above) .....

1 = Got it from a friend (CAFREWHO=7 & CAFRESP=22,43) .....

2 = Not from a friend (See comment above) .....

3 = No PM Alc/Aged 21+/Pay (See comment above) .....

NOTE: The following 12 variables define specific drugs used at the same time or within a couple hours of the respondents last alcohol use.

 1 = Yes (CADRKSTM=1,5) .....

The following variable, DRKMTH, was created to capture the respondent's use of methamphetamine with his or her most recent use of alcohol. A positive response was assigned if the respondent reported methamphetamine use with his or her most recent alcohol use (CADRMTH=1, 5) and if he or she reported methamphetamine use in the core Stimulants module or he or she reported its use in the noncore Special Drugs module and they did not report methamphetamine use in the core Stimulants module because he or she did not consider it to be a prescription drug. A negative response was assigned if the respondent reported no methamphetamine use with his or her most recent alcohol use or reported never having used alcohol or methamphetamine or not having used in the past 30 days (CADRMTH=6,81,83,89,91,93,99). A negative response could also be assigned if a respondent reported methamphetamine use with his or her most recent alcohol use (CADRMTH=1,5) but he or she did not report ever having used methamphetamine in the core Stimulants module or in the noncore Specialty Drug module because they did not consider it to be a prescription drug.

(CADRMTH)

DRKMTH

Len : 1 USED METHAMPHETAMINE WITH LAST ALCOHOL USE

. = Unknown (Otherwise) .....  
 0 = No (See comment above).....  
 1 = Yes (See comment above) .....

(CADRKSED)

DRKSED

Len : 1 USED SEDATIVES WITH LAST ALCOHOL USE

. = Unknown (Otherwise) .....  
 0 = No (CADRKSED=6,81,83,89,91,93,99).....  
 1 = Yes (CADRKSED=1,5) .....

The following variable, DRKSUM, was created to capture the use of any illicit drug with the respondent's most recent use of alcohol. It was created by examination of the following variables: DRKMRJ, DRKCOC, DRKHER, DRKHAL, DRKINH, DRKANL, DRKTRN, DRKSTM, DRKMTH, and DRKSED. A positive response was assigned if a respondent answered 'Yes' to any of the individual drug variables. A negative response was assigned if a respondent answered 'No' to all drug variables or the respondent was not a past month user of any illicit drugs (SUMMON=0). If neither of these was true, then DRKSUM was set to missing.

(DRKANL, DRKCOC, DRKHAL, DRKHER, DRKINH, DRKMRJ, DRKMTH, DRKSED, DRKSTM, DRKTRN, SUMMON)

DRKSUM

Len : 1 USED ILLICIT DRUGS WITH LAST ALCOHOL USE

. = Unknown (See comment above) .....  
 0 = No (See comment above).....  
 1 = Yes (See comment above) .....

The following variable, DRKIEM, was created to capture the use of any illicit drug other than marijuana with the respondent's most recent use of alcohol. It was created by examination of the following recoded variables: DRKCOC, DRKHER, DRKHAL, DRKINH, DRKANL, DRKTRN, DRKSTM, DRKMTH, and DRKSED. A positive response was assigned if a respondent answered 'Yes' to any of these individual drugs. A negative response was assigned if a respondent answered 'No' to all of these drugs or they were not a past month user of any illicit drug other than marijuana (IEMMON=0). If neither of these was true, then DRKIEM was set to missing.

(DRKANL, DRKCOC, DRKHAL, DRKHER, DRKINH, DRKMTH, DRKSED, DRKSTM, DRKTRN, IEMMON)

DRKIEM

Len : 1 USED ILLICIT DRUGS OTHR THAN MRJ WITH LAST ALC USE

. = Unknown (See comment above) .....  
 0 = No (See comment above).....  
 1 = Yes (See comment above) .....

## HOUSEHOLD COMPOSITION (ROSTER)

**HOUSEHOLD COMPOSITION (ROSTER)**

The variables in the household composition (roster) section were created from the questionnaire roster. For each member of the respondent's household, the sex, age, and relationship to the respondent are reported. The result is a grid with rows corresponding to the respondent's household size and columns corresponding to the sex, age, and relationship code for each household member. These characteristics are edited according to logical consistency checks. For example, when a household member could not possibly have a particular relationship to the respondent with a given age (e.g., a 12-year-old respondent older than his grandmother), the age and relationship code are set to bad data. The household composition variables are counts of various ages and relationship-types across the grid. Missing values in these household composition variables are the result of one or more household members having an age or relationship code that is either bad or missing. For two respondents who are members of a pair within a household, no attempt was made to reconcile disagreements in these counts between pair members. Also, if a respondent's information was missing, neither the other pair member's information nor the screener was used to fill in the missing data, which was left to be imputed. The justification for this: the screener interview and interviews of different members of pairs were conducted at different times, and the household composition could conceivably change between interviews. Variables are available in the roster pairs section that reconcile counts between pair members.

NOTE: Starting from 2003, the following variable, EDFAM18, replaced the variable IRFAM18 (the imputation-revised indicator for having family members in the household aged 18 or older). Prior to 2003, the edited proxy variables were created using IRFAM18. However in 2003, the procedures for creating the edited proxy variables changed due to changes in the proxy questions in the questionnaire. The new procedures required an edited form of this indicator.

Note: The following variables (ROSMSL1-ROSMSL25) are edited indicators for each member of the respondent's household, starting with the oldest (if the age of the household member is given). They identify the other member of the household selected as part of a pair, if a pair was selected. Some of these variables may not appear on this file because they do not have non-missing values.

**PAIRID** Len : 6 LINK OF OTHER RESPONDENT IN PAIR

The variables which follow are counts of the total number of people in the household (HHSIZE) and the number of people within various age categories (AGE011, AGE1214, AGE1217, AGE1220, AGE1825, AGE2634, AGE3549, AGE50P, and AGE15P). These variables are consistent across a household, so that two members of a pair will have the same values for these variables. If the values for one pair member are missing, the other pair member's information is used. If values for both pair members were missing, or they disagree, the screener is used to determine the count. Note that these variables will NOT be consistent with variables that were given in the household composition (roster) section (TOTPEOP and IRHHSIZE for household size, KID17 and IRKID17 for number of children under 18, KIDS for number of children under 12, and HH65 and IRHH65 for the number in the household 65 or over). When these latter variables were created, no attempt was made to reconcile information between pair members.

(TOTPEOP)

## HEALTH INSURANCE

### HEALTH INSURANCE

The next questions are about [SAMPLE MEMBER POSS] health insurance coverage and the kinds and amounts of income that [SAMPLE MEMBER] and other people in your family receive.

NOTE: Beginning in 2003, respondents under the age of 65 who reported that they were covered by Medicare were asked to confirm their answer.

Medicare is a health insurance program for persons 65 and older and for certain disabled persons. Is [SAMPLE MEMBER A] covered by Medicare?

(QH101, QH101V)

MEDICARE

Len : 2 COVERED BY MEDICARE

1 = Yes .....  
2 = No .....  
85 = BAD DATA Logically assigned .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....

NOTE: The variable CAIDCHIP was created from responses to the first question shown below for respondents who were aged 20 or older. For respondents who were aged 12 to 19, CAIDCHIP was created from responses to the two questions shown below. This variable replaces the variable MEDICAID that was present in prior years. Beginning in 2003, respondents aged 65 or older who reported that they were covered by Medicaid were asked to confirm their answer.

Medicaid is a public assistance program that pays for medical care for low income and disabled persons. The Medicaid program in [STATE FILL] is also called [MEDIFILL].

Is [SAMPLE MEMBER A] covered by Medicaid?

Is [SAMPLE MEMBER A] currently covered by [CHIPFILL]?

(QH102, QH102A, QH102V)

CAIDCHIP

Len : 2 COVERED BY MEDICAID/CHIP

1 = Yes .....  
2 = No .....  
85 = BAD DATA Logically assigned .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....

Is [SAMPLE MEMBER A] currently covered by TRICARE, or CHAMPUS, CHAMPVA, the VA, or military health care?

(These programs cover active duty and retired career military personnel and their dependents and survivors and also disabled veterans and their dependents and survivors.)

(QH103)

CHAMPUS

Len : 2 COV BY TRICARE, CHAMPUS, CHAMPVA, VA, MILITARY

1 = Yes .....  
2 = No .....  
85 = BAD DATA Logically assigned .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....

## HEALTH INSURANCE

Private health insurance can be obtained through work, such as through an employer, union, or professional association or by paying premiums directly to a health insurance company.

Is [SAMPLE MEMBER A] currently covered by private health insurance?

(QH106)

PRVHLTIN

Len : 2 COVERED BY PRIVATE INSURANCE

1 = Yes .....  
2 = No .....  
85 = BAD DATA Logically assigned .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....

Was [SAMPLE MEMBER POSS] private health insurance obtained through work, such as through an employer, union, or professional association?

(QH107)

GRPHTIN

Len : 2 PRIVATE PLAN OFFERED THROUGH EMPLOYER OR UNION

1 = Yes .....  
2 = No .....  
85 = BAD DATA Logically assigned .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (PRVHLTIN = 2).....

Does [SAMPLE MEMBER POSS] private health insurance include coverage for treatment for any of the following conditions?

Alcohol abuse or alcoholism?

(QH108)

HLTINALC

Len : 2 ALCOHOL ABUSE OR ALCOHOLISM

1 = Yes .....  
2 = No .....  
85 = BAD DATA Logically assigned .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (PRVHLTIN = 2).....

Drug abuse?

(QH109)

HLTINDRG

Len : 2 DRUG ABUSE

1 = Yes .....  
2 = No .....  
85 = BAD DATA Logically assigned .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (PRVHLTIN = 2).....

Mental or emotional problems?

(QH110)

HLTIMNT

Len : 2 MENTAL OR EMOTIONAL DIFFICULTIES

1 = Yes .....  
2 = No .....  
85 = BAD DATA Logically assigned .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP (PRVHLTIN = 2).....

## HEALTH INSURANCE

Is [SAMPLE MEMBER A] currently covered by any kind of health insurance, that is, any policy or program that provides or pays for medical care?

(QHI11)

HLTINNOS

Len : 2 COVERED BY HEALTH INSUR (NOT OTHERWISE SPECIFIED)

1 = Yes .....  
 2 = No .....  
 85 = BAD DATA Logically assigned .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

During the past 12 months, was there any time when [SAMPLE MEMBER] did not have any kind of health insurance or coverage?

(QHI13)

HLCNOTYR

Len : 2 ANYTIME DID NOT HAVE HEALTH INS/COVER PAST 12 MOS

1 = Yes .....  
 2 = No .....  
 85 = BAD DATA Logically assigned .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

During the past 12 months, about how many months were [FILL WEREWAS] without any kind of health insurance or coverage?

(QHI14)

HLCNOTMO

Len : 2 PAST 12 MOS, HOW MANY MOS W/O COVERAGE

RANGE = 1 - 12 .....  
 85 = BAD DATA Logically assigned .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

About how long has it been since [SAMPLE MEMBER] last had any kind of health coverage?

(QHI15)

HLCLAST

Len : 2 TIME SINCE LAST HAD HEALTH CARE COVERAGE

1 = Within the past 6 months .....  
 2 = More than 6 months ago, but within the past year.....  
 3 = More than 1 year ago, but within the past 3 years.....  
 4 = More than 3 years ago .....  
 5 = Never had coverage.....  
 85 = BAD DATA Logically assigned .....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

## HEALTH INSURANCE

Which of the reasons on this card is the main reason why [SAMPLE MEMBER] stopped being covered by health insurance?

(QHI17)

HLLOSRSN

Len : 2 MAIN REASON STOPPED COVERED BY HEALTH INSURANCE

- 1 = Pers in family w/health ins lost job/chng employer .....
- 2 = Lost Medicaid/Med Assist b/c new job/incr income .....
- 3 = Lost Medicaid/Med Assist some other reason .....
- 4 = Cost is too high/can't afford premiums .....
- 5 = Became ineligible because of age or leaving school .....
- 6 = Employer does not offer coverage, or not eligible .....
- 7 = Got divorced or separated from person w/insurance .....
- 8 = Death of spouse or parent .....
- 9 = Insurance company refused coverage .....
- 10 = Don't need it .....
- 11 = Received Medicaid/med insur only while pregnant .....
- 12 = Some other reason .....
- 85 = BAD DATA Logically assigned .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

Len : 2 NEVER HAD HLTH INS SOME OTHER REASON

1 = Response entered.....  
 6 = Response not entered.....  
 94 = DON'T KNOW .....  
 97 = REFUSED .....  
 98 = BLANK (NO ANSWER).....  
 99 = LEGITIMATE SKIP .....

The variables which follow, PINSUR and INSUR, are recoded health insurance variables. PINSUR is a recode of the variable PRVHLTIN. INSUR is a recode of PRVHLTIN plus MEDICARE, MEDICAID, and CHAMPUS.

For PINSUR, a respondent is classified as having private health insurance (PINSUR=1) if PRVHLTIN=1, and as not having private health insurance (PINSUR=2) if PRVHLTIN=2. If PRVHLTIN does not equal 1 or 2, PINSUR is set to missing (98).

(PRVHLTIN)

PINSUR

Len : 2 PRIVATE HEALTH INSURANCE

1 = Respondent does have private health insurance .....  
 2 = Respondent does not have private health insurance .....  
 98 = BLANK (NO ANSWER).....

For INSUR, a respondent is classified as having any health insurance (INSUR=1) if he/she satisfied ANY of the following conditions.

- (1) PINSUR=1
- (2) Covered by Medicare (MEDICARE=1)
- (3) Covered by Medicaid (answered question QHI02 as yes)
- (4) Covered by Champus, Champva, Va, or Military (CHAMPUS=1)

A respondent is classified as NOT having any health insurance (INSUR=2) if he/she met EVERY one of the following conditions.

- (1) PINSUR=2
- (2) Not covered by Medicare (MEDICARE=2)
- (3) Not covered by Medicaid (answered question QHI02 as no)
- (4) Not covered by Champus, Champva, Va, or Military (CHAMPUS=2)

If the respondent is not classified as having or not having any health insurance, then he/she is set to missing (INSUR=98).

(CHAMPUS, MEDICARE, PINSUR)

INSUR

Len : 2 HEALTH INSURANCE

1 = Yes, respondent does have health insurance .....  
 2 = No, respondent does not have health insurance .....  
 98 = BLANK (NO ANSWER).....

## HEALTH INSURANCE

The INSUR3 variable is similar to INSUR. The only difference is that it uses the variable CAIDCHIP (covered by Medicaid or state health insurance programs for children) instead of question QHI02 only(covered by Medicaid), and it uses an additional variable, HLTINNOS (covered by any other health insurance). This results from changes in the 2001 questionnaire when compared to previous years.

For INSUR3, a respondent is classified as having any health insurance (INSUR3=1) if he/she satisfied ANY of the following conditions.

- (1) PINSUR=1
- (2) Covered by Medicare (MEDICARE=1)
- (3) Covered by Medicaid or state health insurance programs for children (CAIDCHIP=1)
- (4) Covered by Champus, Champva, Va, or Military (CHAMPUS=1)
- (5) Covered by any type of health insurance (not otherwise specified) (HLTINNOS=1)

A respondent is classified as NOT having any health insurance (INSUR3=2) if he/she met EVERY one of the following conditions.

- (1) PINSUR=2
- (2) Not Covered by Medicare (MEDICARE=2)
- (3) Not Covered by Medicaid or state health insurance programs for children (CAIDCHIP=2)
- (4) Not Covered by Champus, Champva, Va, or Military (CHAMPUS=2)
- (5) Not covered by any type of health insurance (not otherwise specified) (HLTINNOS=2)

If the respondent is not classified as having or not having any health insurance, then he/she is set to missing (INSUR3=98).

(CAIDCHIP, CHAMPUS, MEDICARE, PINSUR)  
INSUR3      Len : 2    HEALTH INSURANCE

1 = Yes, respondent does have health insurance .....  
2 = No, respondent does not have health insurance .....  
98 = BLANK (NO ANSWER).....

## IMPUTED HEALTH INSURANCE

### **IMPUTED HEALTH INSURANCE**

The following variable, IRPINSUR, is the imputation-revised version of the edited variable PRVHLTIN.

(PINSUR)  
IRPINSUR

Len : 1 IMPUTATION-REVISED PRIVATE HEALTH INSURANCE

- 1 = Yes, respondent does have private health insurance .....
- 2 = No, respondent does not have private health insur .....

(PINSUR)  
IIPINSUR

Len : 1 IRPINSUR IMPUTATION INDICATOR

- 1 = Questionnaire data .....
- 3 = Statistically imputed data .....

IRINSUR is the imputation-revised health insurance that does not include coverage by Medicaid/CHIP (CAIDCHIP).

(INSUR)  
IRINSUR

Len : 1 IMPUTATION-REVISED HEALTH INSURANCE

- 1 = Yes, respondent does have health insurance .....
- 2 = No, respondent does not have health insurance .....

(INSUR)  
IIINSUR

Len : 1 IRINSUR IMPUTATION INDICATOR

- 1 = Questionnaire data .....
- 2 = Logically assigned data .....
- 3 = Statistically imputed data .....

IRINSUR3 is the imputation-revised version of health insurance that includes coverage by Medicaid/CHIP (CAIDCHIP).

(INSUR3)  
IRINSUR3

Len : 1 IMPUTATION-REVISED HEALTH INSURANCE

- 1 = Yes, respondent does have health insurance .....
- 2 = No, respondent does not have health insurance .....

(INSUR3)  
IIINSUR3

Len : 1 IRINSUR3 IMPUTATION INDICATOR

- 1 = Questionnaire data .....
- 2 = Logically assigned data .....
- 3 = Statistically imputed data .....

Starting in 2002, missing values in the variables describing the type of health insurance were imputed. In particular, missing values in the edited variables PRVHLTIN (private health insurance), MEDICARE, CAIDCHIP (Medicaid/children's state-assisted health insurance), CHAMPUS, and a modified version of HLTINNOS (other health insurance) were imputed. The overall health insurance variable was then created by combining the information from the detailed imputation-revised variables in the variable IRINSUR4. This differs from the method used in 1999-2001 where the edited health insurance variables were combined before imputation to create a recoded overall health insurance variable (INSUR3), the missing values of which were imputed in the variable IRINSUR3. As in previous years, missing values in PRVHLTIN were imputed. However, the name has changed (IRPINSUR in 1999-2001, IRPRVHLT in 2002) to reflect the fact that the imputation of missing values in PRVHLTIN was univariate from 1999-2001, and multivariate (with the other detailed variables) in 2002.

# RECODED HEALTH INSURANCE

## RECODED HEALTH INSURANCE

NOTE: The variable HLCALLFG is a created "flag" variable that indicates when a respondent (or proxy) reported that the respondent was covered by all of the following: Medicare, Medicaid, the Children's Health Insurance Program (if aged 12 to 19), military health care, and private health insurance. The variable HLCALL99 also is a created "flag" variable that indicates when respondents were reported to be covered by Medicare, Medicaid, military health care, and private health insurance. This HLCALL99 variable is comparable to HLCALLFG in 1999, when these four types of health insurance were the only types of current coverage that were asked about in the interview.

**HLCALLFG** Len : 2 FLAG IF EVERY FORM OF HEALTH INS REPORTED

## INCOME

The following variable FAMINC2, was created by examination of the variables PINC2 and FINC2. If the respondent is the only member in the household, the value of FAMINC2 is same as that of PINC2. If there is more than 1 person in the household, FAMINC2 was assigned a value from FINC2.

NOTE: Beginning in 2004 (and continuing in the current survey year), FAMINC2 includes a level 29 for incomes of \$100,000 or more. Documentation of level 28 also is now "\$75,000 to \$99,999." Prior to 2004, documentation for level 28 in FAMINC2 was "\$75,000 or more."

Since 2010, respondents who report total personal income of \$100,000 or more are not asked the question about their total family income. Therefore, edits since 2010 assign a code of 29 (\$100,000 or more) to FAMINC2 when the total personal income is \$100,000 or more (PINC2 = 29).

# RECODED INCOME

## RECODED INCOME

NOTE: The variables in this section are recoded variables that were created from one or more of the edited or imputed variables from the two preceding sections.

The following variable, GOVTPROG, was created by examination of these government assistance program variables: Supplemental Security Income (IRFAMSSI), food stamps (IRFSTAMP), cash assistance (IRFAMPMT), and non-cash assistance (IRFAMSVC).

(IRFAMPMT, IRFAMSSI, IRFAMSVC, IRFSTAMP)

GOVTPROG Len : 1 PARTICIPATED IN ONE OR MORE GOVT ASSIST PROGRAMS

1 = YES (ANY SOURCE VARIABLE=1).....  
2 = NO (ALL SOURCE VARIABLES=2).....

(IRFAMIN2)

INCOME Len : 1 TOTAL FAMILY INCOME RECODE

1 = Less than \$20,000 .....  
2 = \$20,000 - \$49,999.....  
3 = \$50,000 - \$74,999.....  
4 = \$75,000 or More.....

(IRFAMIN2)

INCOME5 Len : 1 TOTAL FAMILY INCOME RECODE, 5 LEVELS

1 = LESS THAN \$20,000 .....  
2 = \$20,000 - \$49,999.....  
3 = \$50,000 - \$74,999.....  
4 = \$75,000 - \$99,999.....  
5 = \$100,000 OR MORE.....

NOTE: The following variables, POVPER and POVERTY2, indicate a person's family income relative to poverty thresholds. The U.S. Census Bureau assigns a poverty threshold for each combination of family size (IRFMLYSZ) and number of children (IRKDFMLY) in the household. To be at 100% of the poverty threshold is equivalent to having a family income that is the same as the poverty threshold. A poverty level less than 100% indicates having a family income less than the poverty threshold and therefore defined by the Federal government as living in poverty. A poverty level greater than 100% indicates having a family income greater than the poverty threshold.

POVPER was created for each individual based on their poverty threshold (determined by their age (AGE), family size (IRFMLYSZ), the number of children in the household (IRKDFMLY), and total family income (IRFAMIN2)). Since NSDUH only collects categorical values of family income, for each level of income (IRFAMIN2), the midpoint of each range was assigned as the effective family income. However, for the highest level of income, \$100,000 or more, an effective family income of \$120,000 was assigned. Effective family income was divided by the poverty threshold and multiplied by 100 to show family income as a percentage of the federal poverty threshold. Respondents aged 18 to 22 currently living in a college dormitory (AGE=18-22 and GQTYPE='C') were set to SAS missing and do not have a valid value for this variable.

(AGE, GQTYPE, IRFAMIN2, IRFMLYSZ, IRKDFMLY)

POVPER Len : 12 CONT POVERTY LEVEL (% OF US CENSUS POV THRESHOLD)

RANGE = 1.0764030914 - 1147.4469306.....  
. = Persons aged 18 to 22 living in a college dorm.....

(POVPER)

POVERTY2 Len : 1 POVERTY LEVEL (% OF US CENSUS POVERTY THRESHOLD)

. = Persons Aged 18-22 in a College Dorm (POVPER=.) .....  
1 = Living in Poverty (POVPER=0 to <100).....  
2 = Income Up to 2X Fed Pov Thresh(POVPER=100 to <200) .....  
3 = Income More Than 2X Fed Pov Thresh (POVPER>=200).....

# RECODED INCOME

NOTE: The following variable, POVPRHHS, indicates a person's family income relative to the 2011 U.S. Department of Health and Human Services (HHS) poverty guidelines. The HHS poverty guidelines are a simplified version of the poverty thresholds assigned by the U.S. Census Bureau (used to create POVPER and POVERTY2), based only on state of residence, income, and family size. The HHS poverty guidelines are used for administrative purposes such as determining financial eligibility for certain federal programs, whereas the Census Bureau poverty thresholds are used for statistical purposes such as determining number of persons in poverty. The variable POVPRHHS uses HHS guidelines that are determined separately for Alaska, Hawaii, and for the contiguous states including D.C. To be at 100% of the poverty guideline is equivalent to having a family income that is the same as the HHS-specified poverty guideline. A level less than 100% indicates having a family income less than the poverty guideline and a level greater than 100% indicate having a family income greater than the poverty guideline.

POVPRHHS was created for each individual based on their HHS poverty guideline (determined by their state of residence (STATE), family size (IRFMLYSZ), and total family income (IRFAMIN2)). Since NSDUH only collects categorical values of family income, for each level of income (IRFAMIN2), the midpoint of each range was assigned as the effective family income. However, for the highest level of income, \$100,000 or more, an effective family income of \$120,000 was assigned. Effective family income was divided by the HHS poverty guideline and multiplied by 100 to show family income as a percentage of the HHS poverty guideline. Respondents aged 18 to 22 currently living in a college dormitory (AGE=18-22 and GQTYPE='C') were set to SAS missing and do not have a valid value for this variable.

(AGE, GQTYPE, IRFAMIN2, IRFMLYSZ, STATE)

POVPRHHS Len : 12 CONT POVERTY LEVEL (% OF US HHS POV GUIDELINES)

RANGE = 1.1044842059 - 1101.9283747 .....  
 . = Persons aged 18 to 22 living in a college dorm .....

## INTERVIEW INFORMATION

### INTERVIEW INFORMATION

INTDATE is stored as a SAS date with a format of DATE7. to allow for easy manipulation. DAY, MONTH, and YEAR functions return such to the user.

NOTE: Within each module of the questionnaire, the time that the module was filled out is automatically saved by the CAI instrument. The time for each module is called a time stamp, and the date portion of the time stamp is called a date stamp. In 1999, the date stamp information was not used in the determination of interview date. However, from 2000 onward, this information was used to help determine the value for the interview date. The specific date stamps (dt stps) used to determine INTDATE are indicated in the variable EIIDATE. In the labels that define the levels in EIIDATE, if the label indicates that the interview date was set to a particular date stamp, that date stamp is consistent with all subsequent date stamps unless otherwise indicated. If the interview is set to the end-of-interview date stamp, then that date stamp is consistent with all preceding date stamps except those indicated. In some cases, the respondent's birthday occurred between the beginning and the end of the interview. In that case, the interview date was set to the end-of-interview date stamp, which was consistent with the first date stamp after the respondent's birthday (this date stamp is indicated). A date stamp was not used to set the interview date if (1) the date stamp was outside of the quarter in which the interview was supposed to take place, or (2) the date stamp is later in time than a subsequent date stamp, or (3) the date stamp occurs before a birthday, which in turn occurs before the end of the interview.

INTDATE      Len : 7    EDITED INTERVIEW DATE

 3 = Quarter 3 .....  
 4 = Quarter 4 .....

## INTERVIEW INFORMATION

**GQTYPE**            Len : 1    TYPE OF GROUP QUARTER

                      = Not a Group Quarter .....

                      B = Boarding House .....

                      C = College Dorm.....

                      O = Other .....

                      S = Shelter .....

                      1 = Halfway House .....

The following variable, SDUMIL, was created from the screening information gathered for each household member of the SDU. If active military status and current residence in household was indicated for any household member, this variable was set to 1. Analysts are cautioned to use this variable with care as it is gathered for operational purposes at the time of screening by the field interviewer and is not reviewed for accuracy or consistency.

**SDUMIL**            Len : 1    ANY MILITARY HOUSEHOLD MEMBERS IN THE SDU

                      1 = Yes .....

                      2 = No .....

The following ten variables, DUCCHAR1 through DUCCHAR10, are the characteristics of the sampled dwelling unit (SDU) as entered by the Field Interviewer (FI) during the screening process.

The FI was able to choose from a list of all the categories upon their first visit to the SDU. Beginning in 2006, the FI was able to choose all characteristics of the SDU on their FIRST encounter. Once the FI transmitted the screening, they could no longer view the data.

This data, along with record of call and result code data, was intended to be used to analyze the type of access situations that are encountered when conducting household studies across the country. Field managers could view this data to gain a better understanding of the access situations faced by their FIs and also use the data to assist in making case management decisions. Analysts should use these variables with caution as they are captured for operational purposes and are not reviewed and edited.

**DUCHAR1**            Len : 1    SDU CHARACTERISTICS: HOUSE/SINGLE UNIT

                      1 = Yes .....

                      2 = No .....

**DUCHAR2**            Len : 1    SDU CHARACTERISTICS: MULTI-UNIT, 2-9 UNITS

                      1 = Yes .....

                      2 = No .....

**DUCHAR3**            Len : 1    SDU CHARACTERISTICS: MULTI-UNIT, 10-49 UNITS

                      1 = Yes .....

                      2 = No .....

**DUCHAR4**            Len : 1    SDU CHARACTERISTICS: MULTI-UNIT, 50+ UNITS

                      1 = Yes .....

                      2 = No .....

**DUCHAR5**            Len : 1    SDU CHARACTERISTICS: MILITARY BASE

                      1 = Yes .....

                      2 = No .....

# INTERVIEW INFORMATION

**DUCHAR6**      Len : 1    SDU CHARACTERISTICS: STUDENT HOUSING

1 = Yes .....

2 = No .....

**DUCHAR7**      Len : 1    SDU CHARACTERISTICS: NATIVE AMERICAN TRIBAL LAND

1 = Yes .....

2 = No .....

**DUCHAR8**      Len : 1    SDU CHARACTERISTICS: SR. HOUSING/ASSISTED LIVING

1 = Yes .....

2 = No .....

**DUCHAR9**      Len : 1    SDU CHARACTERISTICS: OTHER GQU

1 = Yes .....

2 = No .....

**DUCHAR10**      Len : 1    SDU CHARACTERISTICS: EMPTY LOT

1 = Yes .....

2 = No .....

The following five variables, CATYPE1 through CATYPE5, indicate the presence and type of controlled access, i.e., specific barriers to entry, as entered by the Field Interviewer (FI) during the screening process.

The FI was able to select from a list of the different types of access. Beginning in 2006, the FI was able to choose all descriptions of the initial access situation for the SDU on their FIRST encounter. In prior years only one response was captured which represented the best description. The FI recorded the situation as they found it, even if they were able to overcome it and gain access on future visits. Once the FI transmitted the screening, they could no longer view the data.

This data, along with record of call and result code data, was intended to be used to analyze the type of access situations that are encountered when conducting household studies across the country. Field managers could view this data to gain a better understanding of the access situations faced by their FIs and also use the data to assist in making case management decisions. Analysts should use these variables with caution as they are captured for operational purposes and are not reviewed and edited.

**CATYPE5**      Len : 1    LCKD MAIN ENT/GATE W/INTRCM/BZR, W/UNIT ADD LBLS

1 = Yes .....

2 = No .....

**DEMOGRAPHICS****CORE DEMOGRAPHICS**

NOTE: After a respondent has entered his/her birthdate in the first part of the questionnaire, he/she has multiple opportunities to change his/her age in response to consistency checks throughout the questionnaire. It is therefore possible for the age recorded by the respondent at the beginning of the questionnaire (CALCAGE) to be different than the age at the end of the questionnaire (NEWAGE). The final age variable, AGE, is determined using these two variables, in addition to the age calculated from the raw birthdate (AGE1) and the final edited interview date (INTDATE), the age entered in the questionnaire roster (if it exists), and the pre-interview screener age. Priority is given to CALCAGE, NEWAGE, and the age calculated from AGE1 and INTDATE. In the labels for the levels of the variable EIAge, if an age is listed as being consistent with the screener age, and the roster age exists, then it is also consistent with the roster age. If the final age (AGE) does not agree with the originally entered birthdate (AGE1), then the birthdate must also be edited. Note that the edits of AGE and BRTHDATE implemented since 2000 are more thorough than those used in 1999.

AGE                      Len : 3    FINAL EDITED AGE  
RANGE = 12 - 100 .....

(AGE1, CALCAGE, CONFIRM)  
EIAge                      Len : 2    AGE INDICATOR  
1 = NEWAGE (consistent with CALCAGE & INTDATE-AGE1).....

RANGE = 1911 - 1999 .....

## CORE DEMOGRAPHICS

NOTE: The variable SKPX2PER has been edited for consistency with the within-dwelling-unit pair selection variable PAIRSEL. Similarly, the variables SKPX1217, and SKPXPRNT were edited for consistency with PAIRSEL and the within-dwelling-unit respondent variable PAIRRESP. However, SKPX2PER, SKPX1217, and SKPXPRNT were not edited for consistency with roster information on people's relationships within the dwelling unit. In the variables SKPX1217 and SKPXPRNT, codes of 3 and 4 were assigned when PAIRSEL and PAIRRESP were consistent with respect to whether a 12- to 17-year-old should (or should not have) been selected. Codes of 11 and 12 were assigned to SKPX1217 and SKPXPRNT when an inconsistency occurred with respect to the selection or interviewing of a 12- to 17-year-old.

INTERVIEWER: WERE 2 PERSONS SELECTED FOR AN INTERVIEW AT THIS SDU?

## CORE DEMOGRAPHICS

NOTE: The variable STATELOC contains the data that the interviewers keyed (in item FIPE4 in the questionnaire) prior to the main interview. This item indicates the interviewer's report of the State where the sampled dwelling unit was located. STATELOC is included on the file because it is used to define information that is filled in for State-dependent variables later in the interview. It also is used in subsequent data processing steps. The response options for STATELOC do not correspond to state Federal Information Processing Standards (FIPS) codes. Because of the potential for interviewer error in keying the State information, analysts are advised not to use STATELOC in any State-level analysis. Instead, they should use data from the variable STATE, a variable created at the sampling stage, where the response categories correspond to State FIPS codes.

INTERVIEWER: IN WHAT STATE IS THIS SAMPLE DWELLING UNIT (SDU) LOCATED?

(FIPE4)

STATELOC

# IMPUTED CORE DEMOGRAPHICS

IRRACEWH, IRRACEBK, IRRACENA, IRRACENH, IRRACEPI, and IRRACEAS indicate whether each level of QD05 was mentioned by the respondent. These could have either been directly selected in QD05, or mentioned in an other-specify response to QD05, QD05ASIA, and/or QD04. These six variables are consistent with IRNWRACE, except in cases where the respondent directly selected a level of QD05, and mentioned that they were multiple race in one of the other-specify responses. For these cases, IRNWRACE is 15, but only one of the six IRRACExx variables is 1.

## NON-CORE DEMOGRAPHICS

### NON-CORE DEMOGRAPHICS

For the remaining questions, I will read the question out loud, you can tell me your answer, and I will enter it into the computer.

How many times in the past 12 months have you moved?

(QD13)

MOVESPYR

Len : 3 # TIMES MOVED PAST 12 MONTHS

RANGE = 0 - 61 .....  
 985 = BAD DATA Logically assigned .....  
 994 = DON'T KNOW .....  
 997 = REFUSED .....  
 998 = BLANK (NO ANSWER).....

NOTE: EIMOVPIR is an indicator of editing to MOVESPYR. The default value for EIMOVPIR is 1, when no editing was done to MOVESPYR. EIMOVPIR has a value of 2 when the item corresponding to MOVESPYR had missing data but it could be logically inferred that the respondent moved zero times in the past 12 months, because SNMOV5YR or YEMOV5YR indicated zero moves in the past 5 years.

EIMOVPIR

Len : 1 EDITING INDICATOR FOR MOVESPYR

1 = Questionnaire data .....  
 2 = Logically assigned data.....

NOTE: MOVYRFLG is a "flag" variable that indicates inconsistent reports between moves in the past 12 months in MOVESPYR and moves in the past 5 years from either SNMOV5YR or YEMOV5YR. The default value for MOVYRFLG is 98 (blank). MOVYRFLG has a value of 1 when respondents reported more moves in the past 12 months than they reported for moves in the past 5 years. However, no editing was done to MOVESPYR, SNMOV5YR, or YEMOV5YR in these situations.

MOVYRFLG

Len : 2 CONSISTENCY FLAG FOR MOVESPYR VS SNMOV5YR/YEMOV5YR

1 = Moves in past yr greater than moves in past 5 yrs .....  
 98 = BLANK (NO ANSWER).....

## NON-CORE DEMOGRAPHICS

NOTE: The edited education variables take into account interviewer comments when the highest grade was lower than the current grade. In 2001, these edited education variables took into account interviewer comments when the highest and current grades differed by 2 or more years.

The variable EDTEDUC is a supplemental, edited version of the "core" education variable EDUC. In situations where respondents reported being currently enrolled in school (see below), EDTEDUC was edited for consistency with the current reported grade and the respondent's age; no such editing was done for the "core" education variable. Consequently, the values in EDTEDUC could differ from those in EDUC and the imputed education variable IREDUC. In addition, EDTEDUC in subsequent years could be affected by any changes in the content of the "non-core" education variables.

(EDUC)  
EDTEDUC

Len : 2 HIGHEST GRADE COMPLETED - EDITED VERSION

0 = NEVER ATTENDED SCHOOL .....

85 = BAD DATA Logically assigned .....  
94 = DON'T KNOW .....  
97 = REFUSED .....

NOTE: The school enrollment variable SCHENRL is analogous to the variable ENROLED from prior years. SCHENRL takes into account information from follow-up probes if respondents originally reported that they were not enrolled in school. Based on these probes, respondents were coded as yes (i.e., enrolled) if they were on break from school and intended to return to school once their break was over. SCHENRL was assigned a code of 11 if the respondent reported currently being enrolled but there was uncertainty about the respondent's school enrollment status.

The next questions are about school. Are you now attending or are you currently enrolled in school? By "school," we mean an elementary school, a junior high or middle school, a high school, or a college or university. Please include home schooling as well.

(QD17, QD17B)  
SCHENRL

- 3 = Statistically imputed data .....

IRENTAG2 is analogous to the variable IRENTAGE, which was created in the NSDUHs prior to 2004. In 2004, the question QD16 was replaced with three parts, which essentially asked non-US born respondents to provide more specific time on how long they lived in US. The variable, IRENTAG2, gives the age at which an immigrant to the United States entered this country. It was derived from the respondent's age and the variables LIVUS1YR, LIVUSYRS and LIVUSMOS, which gave the number of years that an immigrant to the U.S. has lived in this country. Any respondents born in the U.S. (IRBORNUS=1) were coded as 999.

(BRTHDATE, INTDATE, LIVUSMOS, LIVUSYRS)

IRENTAG2

Len : 12 IMPUTATION-REVISED IMMIGRANT AGE OF ENTRY IN US

(IRENTAG2)

IMGBF12 Len : 1 US BORN/IMMIGRANT ENTERED US PRIOR TO AGE 12

- 1 = Yes (IRENTAG2=999 or IRENTAG2 < 12).....
- 2 = No (IRENTAG2 >= 12).....

The following variable, YRSLIVUS, provides the number of years a respondent not born in the United States (IRBORNUS=2) has lived in the U.S. The number of years lived in the U.S. was computed by taking the difference between the respondent's continuous age estimate and their entry age into the U.S. (IRENTAG2). The continuous age estimate was computed by taking the difference between the respondent's interview date (INTDATE) and birth date (BRTHDATE).

(BRTHDATE, INTDATE, IRBORNUS, IRENTAG2)

YRSLIVUS Len : 1 NUMBER OF YEARS PERSONS NOT US BORN LIVED IN US

- 1 = Less Than 5 Yrs (See comment above).....
- 2 = At least 5 Yrs but <10 Yrs (See comment above).....
- 3 = 10 Yrs or More (See comment above).....
- 4 = US Born (IRBORNUS=1).....

A respondent was defined as a full-time college student if they were aged 18 to 22 (AGE=18-22), enrolled in school (SCHENRL=1, 3, 5, 11), enrolled at the college level (EDUCATND=13-17, 33), and a full-time student (SDNTFTPT=1). Respondents in the category "Other Persons Aged 18-22" include those not enrolled in school, enrolled in college part-time, enrolled in other grades either full or part-time, or enrolled with no other information available.

(AGE, EDUCATND, SCHENRL, SDNTFTPT)

# IMPUTED EMPLOYMENT AND WORKPLACE

## **IMPUTED EMPLOYMENT AND WORKPLACE**

The following variable, EMPSTATY, was created to promote consistency across survey years. The similar variable EMPSTAT3 was created in 1999 and 2000; it could not be created in the survey years since 2001 because of changes to the questionnaire. (See the comment before JBSTATR for more details.) The levels of EMPSTATY are close to those in the Current Population Survey. The main difference is that EMPSTATY considers people who did not have a job last week and were not looking for a job all to be unemployed. In comparison, the CPS definition requires people who did not have a job last week and were not looking for a job to be waiting to be recalled to their old job, in order for them to be classified as unemployed.

(JBSTATR)

EMPSTATY

Len : 2 IMPUTATION REVISED EMPLOYMENT STATUS

1 = Employed full time.....  
2 = Employed part time .....  
3 = Unemployed .....  
4 = Other (incl. not in labor force) .....  
99 = 12-14 year olds .....

(JBSTATR)

IIEMPSTY

Len : 1 IMPUTATION INDICATOR EMPLOYMENT STATUS

1 = Employment status from questionnaire .....  
3 = Employment statistically imputed.....  
9 = 12-14 years old .....

(JBSTATR)

II2EMSTY

Len : 1 IMPUTATION INDICATOR EMPLOYMENT STATUS (DETAILS)

1 = Employment status from questionnaire .....  
3 = Emp. statistically imputed (unrestricted) .....  
4 = Emp. stat. imp. (restr. to full-time or part-time).....  
9 = 12-14 years old .....

EMPSTAT4 is a recode of EMPSTATY and AGE. Respondents aged 15-17 are assigned a skip code, regardless of their answers to the employment status questions.

(AGE, EMPSTATY)

EMPSTAT4

Len : 2 IMPUTATION REVISED EMPLOYMENT STATUS 18+

1 = Employed full time.....  
2 = Employed part time .....  
3 = Unemployed .....  
4 = Other (incl. not in labor force) .....  
99 = 12-17 year olds .....

(AGE, IIEMPSTY)

IIEMPST4

Len : 1 IMPUTATION INDICATOR EMPLOYMENT STATUS 18+

1 = Employment status from questionnaire .....  
3 = Employment statistically imputed.....  
9 = 12-17 years old .....

(AGE, II2EMSTY)

II2EMST4

Len : 1 IMP. IND. EMPLOYMENT STATUS 18+ (DETAILS)

1 = Employment status from questionnaire .....  
3 = Emp. statistically imputed (unrestricted) .....  
4 = Emp. stat. imp. (restr. to full-time or part-time).....  
9 = 12-17 years old .....

## PROXY INFORMATION

### **PROXY INFORMATION**

NOTE: The following variables PRXABLE2, PRXHOME2, PRXJOIN2, and PRXANS2 are comparable to the variables PROXABLE, PROXHOME, PROXJOIN, and PROXANS prior to 2003. These variables have been given new names to account for differences in the CAI questionnaire.

(QP01)

PRXABLE2

Len : 2 ANOTHER FAMILY MEMBER THAT CAN GIVE INFO ABOUT HTH

- 1 = Yes .....
- 2 = No .....
- 89 = LEGITIMATE SKIP Logically assigned .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

NOTE: The following variable, PRXRELAT, replaces the variables PROXREL1 and PROXREL2 prior to 2003. Previously, respondents were asked to specify which family member would be better able to serve as their proxy. However, now the respondent is shown a list of eligible family members based on their household rosters and told to choose the family member that would serve as their proxy.

(QP02)

PRXRELAT

Len : 2 RELATIONSHIP OF RELATIVE TO RESPONDENT

- 1 = Father .....
- 2 = Mother .....
- 3 = Son .....
- 4 = Daughter .....
- 5 = Brother .....
- 6 = Sister .....
- 7 = Husband .....
- 8 = Wife .....
- 9 = Male live-in/Boyfriend.....
- 10 = Female live-in/Girlfriend .....
- 11 = Son-in-law .....
- 12 = Daughter-in-law .....
- 14 = Granddaughter .....
- 15 = Father-in-law .....
- 16 = Mother-in-law .....
- 17 = Grandfather .....
- 18 = Grandmother .....
- 19 = Other Male Relative .....
- 20 = Other Female Relative .....
- 21 = Other Adult Relative .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

(QP03)

PRXHOME2

Len : 2 IS RELATIVE AT HOME NOW?

- 2 = No .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

(QP04)

PRXJOIN2

Len : 2 ASK THE RELATIVE TO JOIN US

- 1 = Yes .....
- 2 = No .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

PROXY INFORMATION

(HASJOIN)  
PRXYANS2

Len : 2 HAS THE RELATIVE JOINED?

1 = Yes .....  
2 = No .....  
94 = DON'T KNOW .....  
97 = REFUSED .....  
98 = BLANK (NO ANSWER).....  
99 = LEGITIMATE SKIP .....

# FI DEBRIEFING QUESTIONS

## **FI DEBRIEFING QUESTIONS**

Did you conduct this interview at the respondent's home - either inside or outside?

(FIDBF01)

INTATHOM

Len : 2 INTERVIEW CONDUCTED INSIDE OR OUTSIDE RESP'S HOME

- 1 = Yes .....
- 2 = No .....
- 3 = Yes LOGICALLY ASSIGNED (INTATWHR = 70) .....
- 85 = BAD DATA Logically assigned .....
- 98 = BLANK (NO ANSWER).....

Where did you conduct this interview?

(FIDBF02)

INTATWHR

Len : 2 WHERE WAS INTERVIEW HELD

- 1 = At the respondent's workplace .....
- 2 = At the home of the respondent's relative/friend .....
- 3 = In some type of conference room .....
- 4 = At a library .....
- 5 = In some type of common area .....
- 21 = At the respondent's workplace .....
- 22 = At the home of the respondent's relative or friend .....
- 23 = Conference rm attached residence hall/school/apt .....
- 24 = At a library .....
- 25 = In common area; lobby/hallway/stairwell/laundry rm .....
- 42 = At a church, religious or spiritual place .....
- 43 = At school or college .....
- 44 = At the R's parent/relative/friend(s)'s workplace .....
- 45 = In a motor vehicle .....
- 46 = At a hotel/motel/resort .....
- 47 = Outside; park, parking lot, barn, unfinished house .....
- 48 = Interviewer's/interviewer's relative's home/workpl .....
- 49 = Place of business other than restaurant/Laundromat .....
- 51 = At a social service/community center .....
- 52 = In a Tribal or Indian common area .....
- 54 = At a Laundromat; place of business specified .....
- 56 = At a restaurant/eatery .....
- 58 = Admin/public bldg/office; otherwise unspecified .....
- 63 = Conference/study room; location unspecified .....
- 70 = At the respondent's home, inside or outside .....
- 98 = BLANK (NO ANSWER).....
- 99 = LEGITIMATE SKIP .....

Please estimate for how much of the ACASI interview the respondent had their headphones on.

(FIDBF04C)

HEADPHONE

Len : 2 EST HOW MUCH OF ACASI RESPONDENT WORE HEADPHONES

- 0 = None/R took headphones off immediately .....
- 1 = Less than half of the ACASI interview .....
- 2 = About half of the ACASI interview .....
- 3 = More than half of the ACASI interview .....
- 4 = All of the ACASI interview .....
- 85 = BAD DATA Logically assigned .....
- 94 = DON'T KNOW .....
- 97 = REFUSED .....
- 98 = BLANK (NO ANSWER).....

## FI DEBRIEFING QUESTIONS

Estimate the respondent's understanding of the interview.

(FIDBF05)  
UNDINT

Len : 2 ESTIMATE RESPONDENTS UNDERSTANDING OF INTERVIEW

- 1 = No difficulty - no language or reading problem .....
- 2 = Just a little difficulty - almost no lang/read prb .....
- 3 = A fair amount of difficulty - some lang/read prb .....
- 4 = A lot of difficulty - considerable lang/read prb .....
- 85 = BAD DATA Logically assigned .....
- 98 = BLANK (NO ANSWER) .....

How cooperative has the respondent been?

(FIDBF06)  
COOPINT

Len : 2 HOW COOPERATIVE WAS RESP

- 1 = Very cooperative .....
- 2 = Fairly cooperative .....
- 3 = Not very cooperative .....
- 4 = Openly hostile .....
- 85 = BAD DATA Logically assigned .....
- 98 = BLANK (NO ANSWER) .....

Indicate on this scale of 1 through 5 how private the interview was. Please do not count yourself as another person in the room.

(FIDBF07)  
PRIVACY

Len : 2 SCALE OF PRIVACY DURING INTERVIEW

- 1 = Completely private-no one present/able to overhear .....
- 2 = Minor distractions .....
- 3 = Person(s) in the room or listening about 1/3 time .....
- 4 = Serious interruptions of privacy more thn 1/2 time .....
- 5 = Constant presence of other person(s) .....
- 85 = BAD DATA Logically assigned .....
- 98 = BLANK (NO ANSWER) .....

Not including yourself, other people present or listening to the interview were . . .

## STATE AND REGION

NOTE: The following variable, STATE, is created at the sampling stage and analysts are advised to use this variable in State-level analyses. The levels of STATE represent the Federal Information Processing Standards (FIPS) State codes for the 50 States and the District of Columbia. The State FIPS codes are numeric values that range from 1 to 56 with 5 values (3, 7, 14, 43, and 52) not assigned to any State. Therefore, the levels of STATE are not consecutive. STATE does not contain any SAS missing values. To use this variable in software which may require a consecutive value variable, this variable should be recoded so that the 51 levels have consecutive values. An alternative (if allowed by the software) would be use STATE as defined with 56 levels, allow the software to generate missing data for the 5 unassigned values, and then delete the missing data from the analysis.

### STNAME

Len : 20 STATE NAME

### STUSAB

Len : 2 STATE US ABBREVIATION

## STATE AND REGION

NOTE: SSREGION is an aggregation of census tracts which collectively represents explicit stratification within each state. There are 48 state sampling regions (or strata) in each of the 8 large States (CA, FL, IL, MI, NY, OH, PA, and TX) and 12 state sampling regions (or strata) in each of the remaining 42 States and DC for a total of 900 nationwide. SSREGION is based on the 2000 Census and is comparable for the 2005-2013 NSDUHs, but is not comparable with other survey years.

**SSREGION**      Len : 2    STATE SAMPLING REGION WITHIN STATE

## COUNTY

### COUNTY

COUNTY represents the Federal Information Processing Standards (FIPS) county code based on the 2000 Census. This variable is not directly comparable to COUNTY from the 2002-2004 NSDUHs, as they were based on 1990 Census geographies. There are differences between the 1990 and 2000 Census county definitions, as outlined at the link below. Between 1990 and 2000, three new counties were formed, three counties were removed, substantial changes were made to the boundaries of 25 counties, and seven counties were re-named.

<https://www.census.gov/programs-surveys/geography/technical-documentation/county-changes.html>

COUNTY                      Len : 3    COUNTY FIPS CODE (NUMERIC)

The county-level variable CYPOP00 is derived by aggregating the 2000 Census block-level total resident population estimates to form county-level estimates.

CYPOP00                      Len : 12    COUNTY POPULATION

The county-level variable CYPOP00 is derived by aggregating the 2000 Census block-level total resident population estimates for urban blocks to form county-level estimates. Urban classifications were defined based on the 2000 Census. The Census classifies as urban all blocks located within urbanized areas (UA) and urban clusters (UC). UAs and UCs generally consist of core census block groups or blocks that have a population density of at least 1,000 people per square mile and surrounding census blocks that have an overall density of at least 500 people per square mile. In addition, under certain conditions, less densely settled territory may be part of each UA or UC.

CYPOP00                      Len : 12    COUNTY URBAN POPULATION

The county-level variable CYPCTU00 is derived by dividing the 2000 Census urban resident population in the county (CYPOP00) by the 2000 Census resident population in the county (CYPOP00) and multiplying this ratio by 100. Urban classifications were defined based on the 2000 Census. The Census classifies as urban all blocks located within urbanized areas (UA) and urban clusters (UC). UAs and UCs generally consist of core census block groups or blocks that have a population density of at least 1,000 people per square mile and surrounding census blocks that have an overall density of at least 500 people per square mile. In addition, under certain conditions, less densely settled territory may be part of each UA or UC.

CYPCTU00                      Len : 12    PERCENT URBAN POPULATION IN COUNTY

The variable PDEN00 is based on 2000 Census data and the June 2003 Core-Based Statistical Area classifications provided by the Office of Management and Budget (OMB).

PDEN00                      Len : 1    POPULATION DENSITY 2000

- 1 = Segment in a CBSA with 1 million or more persons.....
- 2 = Segm. in a CBSA with fewer than 1 million persons .....
- 3 = Segment not in a CBSA .....

The variable PDEN200 is based on 2000 Census data and the June 2003 Core-Based Statistical Area classifications provided by the Office of Management and Budget (OMB).

PDEN200                      Len : 1    POPULATION DENSITY - FIVE LEVELS

- 1 = Segment in a CBSA with 1 million or more persons.....
- 2 = Segm. in a CBSA from 250,000 to 999,999 persons.....
- 3 = Segment in a CBSA with fewer than 250,000 persons .....
- 4 = Segment not in a CBSA and not in a rural area .....
- 5 = Segment not in a CBSA and in a rural area .....

## COUNTY

NOTE: The Rural-Urban Continuum Codes, also known as Beale Codes, are classifications for all U.S. counties created by the U.S. Department of Agriculture (USDA). Rural-Urban Continuum Codes form a classification scheme that distinguishes metro counties by the population size of their metro area, and nonmetro counties by degree of urbanization and adjacency to a metro area or areas. The metro and nonmetro categories have been subdivided into three metro and six nonmetro groupings, resulting in a nine-part county codification. All U.S. counties and county equivalents are grouped according to their official metro-nonmetro status based on the June 2003 statistical area definitions provided by OMB. Metro counties are distinguished by population size of the metro area of which they are part. Nonmetro counties are classified according to the aggregate size of their urban population. Nonmetro areas include counties in micropolitan statistical areas as well as counties outside of both metropolitan and micropolitan statistical areas. All population counts are from the 2000 Census representing the resident population. Within the three urban size categories, nonmetro counties are further identified by whether or not they have some functional adjacency to a metro area or areas. A nonmetro county is defined as adjacent if it physically adjoins one or more metro areas, and has at least 2 percent of its employed labor force commuting to central metro counties. Nonmetro counties that do not meet these criteria are classed as nonadjacent. Note: the USDA combined nonmetro independent cities in Virginia with their counties of origin when computing the Rural-Urban Continuum Codes. However, independent cities in Virginia that have a population of 100,000 or more were treated as county equivalents.

### RUCC03

Len : 1 RURAL/URBAN CONTINUUM CODE (2003)

- 1 = Counties in metro areas, pop>=1 million .....
- 2 = Counties in metro areas, pop 250,000-1,000,000 .....
- 3 = Counties in metro areas, pop<250,000 .....
- 4 = Urban pop>=20,000, adjacent to metro area.....
- 5 = Urban pop>=20,000, not adjacent to metro area.....
- 6 = Urban pop 2,500-19,999, adjacent to metro area.....
- 7 = Urban pop 2,500-19,999, not adjacent to metro.....
- 8 = Rural or < 2,500 urban pop, adj to metro.....
- 9 = Rural or < 2,500 urban pop, not adj to metro.....

NOTE: COUTYP1 and COUTYP2 are recodes based on the 2003 Rural/Urban Continuum Codes (RUCC03). Although similar in concept, these variables are not fully comparable to recoded variables CNTYTYP1 and CNTYTYP2 used in 2002 and prior years. This is due to the changes that occurred in the way the Rural/Urban Continuum Codes were created in 2003.

### (RUCC03)

#### COUTYP1

Len : 1 COUNTY METRO/NONMETRO STATUS (6-LEVEL)

- 1 = Large Metro, pop>=1 million (RUCC03=1) .....
- 2 = Small Metro, pop 250K-1,000,000 (RUCC03=2) .....
- 3 = Small Metro, <250K population (RUCC03=3) .....
- 4 = Nonmetro, 20K or more urban pop (RUCC03=4,5) .....
- 5 = Nonmetro, 2,500-19,999 urban pop (RUCC03=6,7) .....
- 6 = Nonmetro, <2,500 urban pop (RUCC03=8,9) .....

### (COUTYP1)

#### COUTYP2

Len : 1 COUNTY METRO/NONMETRO STATUS (3-LEVEL)

- 1 = Large Metro (COUTYP1=1) .....
- 2 = Small Metro (COUTYP1=2,3) .....
- 3 = Nonmetro (COUTYP1=4,5,6).....

NOTE: The following six variables were created based on December 2009 metropolitan statistical area classifications from the Office of Management and Budget (OMB). These areas are defined based on a combination of one or more counties or county equivalents.

The following county-based variable, CBSA09, is a code associated with the respondent's 2009 Core Based Statistical Area (CBSA). If a county is not located within a CBSA, it is assigned a value of 99999. The title of the CBSA is available on a separate file that can be merged with analytic data by state and county FIPS variables (STATE and COUNTY).

### CBSA09

Len : 5 2009 CBSA CODE

A Combined Statistical Area may comprise two or more Metropolitan Statistical Areas, a Metropolitan Statistical Area and a Micropolitan Statistical Area, two or more Micropolitan Statistical Areas, or multiple Metropolitan and Micropolitan Statistical Areas that have social and economic ties as measured by commuting, but at lower levels than are found among counties within Metropolitan and Micropolitan Statistical Areas.

The following variable, CSA09, is a code associated with the respondent's 2009 Combined Statistical Area (CSA). If a county is not located within a CSA, it is assigned a value of 999. The title of the CSA is available on a separate file that can be merged with analytic data by state and county FIPS variables (STATE and COUNTY).

### CSA09

Len : 3 2009 CSA CODE

## COUNTY

A Metropolitan Division is a county or group of counties within a Metropolitan Statistical Area that has a population core of at least 2.5 million. A Metropolitan Division is a subdivision of a larger Metropolitan Statistical Area, and often functions as a distinct social, economic, and cultural area within the larger region.

The following variable, METDIV09, is a code associated with the respondent's 2009 Metropolitan Division. If a county is not located within a Metropolitan Division, it is assigned a value of 99999. The title of this division is available on a separate file that can be merged with analytic data by state and county FIPS variables (STATE and COUNTY).

**METDIV09**      Len : 5    2009 METROPOLITAN DIVISION CODE

The following variable, CBSTA109, is an indicator for whether a respondent resides in a metropolitan CBSA (CBSTA109=1), a micropolitan CBSA (CBSTA109=2), or outside a CBSA (CBSTA109=3). The classification of metropolitan and micropolitan core-based statistical areas for CBSTA109 are based on the December 2009 OMB Delineations and Standards.

**CBSTA109**      Len : 1    2009 CBSA 1 STATUS

1 = Metropolitan CBSA .....  
2 = Micropolitan CBSA .....  
3 = Outside CBSA .....

The following variable, CBSTA209, is an indicator for whether a respondent resides in a division area within a metropolitan CBSA (CBSTA209=1), a non-division area within a metropolitan CBSA (CBSTA209=2), a micropolitan CBSA (CBSTA209=3), or outside a CBSA (CBSTA209=4). The classification of metropolitan and micropolitan core-based statistical areas for CBSTA209 are based on the December 2009 OMB Delineations and Standards.

**CBSTA209**      Len : 1    2009 CBSA 2 STATUS

1 = Division Metropolitan CBSA .....  
2 = Not Division Metropolitan CBSA .....  
3 = Micropolitan CBSA .....  
4 = Outside CBSA .....

Metro areas are associated with at least one Census Bureau-defined urbanized area, or core, of 50,000 or more population and consist of one or more whole counties (or county equivalents). Every metro area contains at least one central county. Some metro areas also contain one or more outlying counties.

The central county or counties of a metro area are those containing all or a substantial portion of the urbanized area. These counties are used in measuring commuting with other counties that potentially qualify for inclusion in the metro area as outlying counties. A county qualifies as outlying under the following circumstances: (1) one-quarter or more of the employed residents work in the central counties of the metro area, or (2) one-quarter or more of the employment is composed of workers who live in the central counties.

The following variable, CYSTAT09, is an indicator for whether a respondent resides in a central (CYSTAT09=1) or outlying (CYSTAT09=2) area, according to the 2009 status of his or her county's Core Based Statistical Area.

**CYSTAT09**      Len : 1    2009 CBSA COUNTY STATUS, 1=CENTRAL 2=OUTLYING

1 = Central area .....  
2 = Outlying area .....  
3 = Outside CBSA .....

## COUNTY

MCTY10 is the county in which the MTRACT10 (i.e., majority Census tract for segment) resides. In some cases this county may differ from the variable COUNTY which is the county where the sampled respondent resides. The sampled segment is nested within a county (and most of the time within a tract) when based on 2000 Census geography. However, when this sample is linked to the 2010 geography, many segments are no longer nested within a tract. When the segment overlaps two or more tracts, those tracts can be in different counties. In most cases when this happens, the majority tract falls within the sample county (i.e., COUNTY=MCTY10). However there may be a handful of exceptions. There are four segments on the 2011 sample where MCTY10 is not equal to COUNTY. Two of the segments are in Alaska (where five new counties were created from three deleted counties, i.e., using 2010 Census geography, Alaska has two more counties than it had based on 2000 Census geography). Segments AK5128 and AK5132 each lie within one sample county (COUNTY=201 and 280, respectively). These are two of the deleted Alaska counties and new counties were formed with its area. These counties are MCTY10=198 and 275. Thus when the sample was linked to the new 2010 Census geography, these two segments originally in COUNTY=201 (AK5128) and 280 (AK5132) were assigned MCTY10=198 for AK5128 and MCTY10=275 for AK5132. The third and fourth segments where COUNTY is not equal to MCTY10 were in Florida (segment FL6527) and New Mexico (segment NM6029). These are cases where after linking the segment to 2010 Census geography, it is made up of two tracts that are in two separate counties (in Florida and New Mexico, respectively): segment FL6029 in COUNTY=085 and COUNTY=099 and segment NM6029 in COUNTY=001 and COUNTY=043. As discussed in more detail later in the documentation for MTRACT10, the tract with the maximum number of dwelling units is assigned the majority tract: for segment FL6527, the majority tract assigned in county 085 was not in the sample county 099 and for segment NM6029, the majority tract assigned in county 043 was not in the sample county 001. These are two examples of minor county border changes (between 2000 and 2010 Census geography) as opposed to the Alaska example where counties were added and/or deleted. For more information on county changes in the 2000 and 2010 Census, please refer to <https://www.census.gov/programs-surveys/geography/technical-documentation/county-changes.html>

**MCTY10**                      Len : 3    COUNTY OF MAJORITY TRACT (2010)

The county-level variable CYPOP10 is derived by aggregating the 2010 Census block-level total resident population estimates to form county-level estimates.

**CYPOP10**                      Len : 12    COUNTY POPULATION (2010)

The county-level variable CYPOPU10 is derived by aggregating the 2010 Census block-level total resident population estimates for urban blocks to form county-level estimates. Urban classifications were defined based on the 2010 Census. For the 2010 Census, an urban area will comprise a densely settled core of census tracts and/or census blocks that meet minimum population density requirements, along with adjacent territory containing non-residential urban land uses as well as territory with low population density included to link outlying densely settled territory with the densely settled core. To qualify as an urban area, the territory identified according to criteria must encompass at least 2,500 people, at least 1,500 of which reside outside institutional group quarters. The Census Bureau identifies two types of urban areas: 1) Urbanized Areas (UAs) of 50,000 or more people; 2) Urban Clusters (UCs) of at least 2,500 and less than 50,000 people. "Rural" encompasses all population, housing, and territory not included within an urban area.

**CYPOPU10**                      Len : 12    COUNTY URBAN POPULATION (2010)

The county-level variable CYPCTU10 is derived by dividing the 2010 Census urban resident population in the county (CYPOPU10) by the 2010 Census resident population in the county (CYPOP10) and multiplying this ratio by 100. Urban classifications were defined based on the 2010 Census. For the 2010 Census, an urban area will comprise a densely settled core of census tracts and/or census blocks that meet minimum population density requirements, along with adjacent territory containing non-residential urban land uses as well as territory with low population density included to link outlying densely settled territory with the densely settled core. To qualify as an urban area, the territory identified according to criteria must encompass at least 2,500 people, at least 1,500 of which reside outside institutional group quarters. The Census Bureau identifies two types of urban areas: 1) Urbanized Areas (UAs) of 50,000 or more people; 2) Urban Clusters (UCs) of at least 2,500 and less than 50,000 people. "Rural" encompasses all population, housing, and territory not included within an urban area.

**CYPCTU10**                      Len : 12    PERCENT URBAN POPULATION IN COUNTY (2010)

## COUNTY

NOTE: The Rural-Urban Continuum Codes, also known as Beale Codes, are classifications for all U.S. counties created by the U.S. Department of Agriculture (USDA). Rural-Urban Continuum Codes form a classification scheme that distinguishes metro counties by the population size of their metro area, and nonmetro counties by degree of urbanization and adjacency to a metro area or areas. The metro and nonmetro categories have been subdivided into three metro and six nonmetro groupings, resulting in a nine-part county codification. All U.S. counties and county equivalents are grouped according to their official metro-nonmetro status based on the June 2013 statistical area definitions provided by OMB. Metro counties are distinguished by population size of the metro area of which they are part. Nonmetro counties are classified according to the aggregate size of their urban population. Nonmetro areas include counties in micropolitan statistical areas as well as counties outside of both metropolitan and micropolitan statistical areas. All population counts are from the 2010 Census representing the resident population. Within the three urban size categories, nonmetro counties are further identified by whether or not they have some functional adjacency to a metro area or areas. A nonmetro county is defined as adjacent if it physically adjoins one or more metro areas, and has at least 2 percent of its employed labor force commuting to central metro counties based on 2006-2010 community flow data from the American Community Survey. Nonmetro counties that do not meet these criteria are classed as nonadjacent. Note: the USDA combined nonmetro independent cities in Virginia with their counties of origin when computing the Rural-Urban Continuum Codes. However, independent cities in Virginia that have a population of 100,000 or more were treated as county equivalents. Although similar in concept, RUCC13 is not comparable to RUCC03 defined above because RUCC03 is based on June 2003 statistical area definitions and 2000 census data.

### RUCC13 Len : 1 RURAL/URBAN CONTINUUM CODE (2013)

- 1 = Counties in metro areas, pop>=1 million .....

- 4 = Outside Core Based Statistical Area .....

## TRACT

### TRACT

In most cases, NSDUH sample segments are nested within one Census tract. When this is the situation, that tract is designated as the majority tract (MTRACT). When a sample segment covers more than one tract (i.e., sample segments may comprise several partial tracts), a single majority tract is assigned to that segment. In such a case, the tract that contains the maximum number of dwelling units from the segment is designated as the majority tract for that segment. The variable, TRACTIND, can be used to identify whether the segment contains only one tract or multiple tracts. MTRACT can be used to merge the 2000 Census tract level variables onto the sample. Note that to merge such variables onto the sample, a combination of State, county (COUNTY) and tract (MTRACT) variables will need to be used. MTRACT is based on 2000 Census geography.

**MTRACT** Len : 6 MAJORITY CENSUS (2000) TRACT FOR SEGMENT

**TRACTIND** Len : 1 INDICATOR-MULTIPLE CENSUS (2000) TRACTS IN SEGMENT

0 = Segment consists of 1 tract.....  
1 = Segment consists of 2 or more tracts .....

The PSU-level variable PMDRNT00 is derived from the 2000 Census tract-level median monthly contract rent (in dollars) among renter-occupied housing units paying cash rent. PMDRNT00 is calculated by taking the median value across all 2000 Census tracts associated with the PSU. For the 2005 through 2013 NSDUHs, census tracts represented the first stage of sample selection followed by the selection of segments within census tracts, dwelling units within segments, and persons within dwelling units. In some cases, census tracts had to be aggregated in order to include a specified minimum number of dwelling units for sampling purposes. NSDUH Primary Sampling Units (i.e., PSUs) are defined as the collection of single or aggregated tracts meeting the minimum dwelling unit requirement. During the sample selection process, PMDRNT00 and PMDVAL00 were used to classify PSUs into different CBSA/SES (core-based statistical area/socioeconomic status) categories. These CBSA/SES classifications were used in the implicit stratification when selecting PSUs.

**PMDRNT00** Len : 12 PSU MEDIAN RENT, RENTER-OCCUPIED HUS

The PSU-level variable PMDVAL00 is derived from the 2000 Census tract-level median property value (in dollars) among owner-occupied housing units. PMDVAL00 is calculated by taking the median value across all 2000 Census tracts associated with the PSU. For the 2005 through 2013 NSDUHs, census tracts represented the first stage of sample selection followed by the selection of segments within census tracts, dwelling units within segments, and persons within dwelling units. In some cases, census tracts had to be aggregated in order to include a specified minimum number of dwelling units for sampling purposes. NSDUH Primary Sampling Units (i.e., PSUs) are defined as the collection of single or aggregated tracts meeting the minimum dwelling unit requirement. During the sample selection process, PMDRNT00 and PMDVAL00 were used to classify PSUs into different CBSA/SES (core-based statistical area/socioeconomic status) categories. These CBSA/SES classifications were used in the implicit stratification when selecting PSUs.

**PMDVAL00** Len : 12 PSU MEDIAN VALUE, OWNER-OCCUPIED HUS

The CBSA/SES (core-based statistical area/socioeconomic status) indicator was defined using 2000 Census data and the June 2003 Core-Based Statistical Area classifications provided by the Office of Management and Budget (OMB). First, census tract-level median rents and property values were given a rank from 1 to 5 based on State and CBSA quintiles. That is, within each State and CBSA, the census tract-level median rents were sorted and the first 20 percent of values were assigned a rank of 1, the second 20 percent a rank of 2, and so on. Similarly, property values were sorted within State and CBSA and assigned a rank based on the resulting quintiles. The rent and value ranks then were averaged, weighted by the percentages of renter- and occupied- DUs, respectively. If the resulting score fell in the lower 25th percentile by State and CBSA, the area was considered "low SES"; otherwise, it was considered "high SES." In order to get a representative sample of areas, segments were implicitly stratified (i.e., sorted) by the CBSA/SES indicator prior to selecting a sample of them.

**MSASES00** Len : 1 CBSA/SES INDICATOR

1 = CBSA/low SES.....  
2 = CBSA/high SES .....  
3 = Non-CBSA/low SES.....  
4 = Non-CBSA/high SES .....

## TRACT

MTRACT10 is the majority Census tract based on 2010 Census geography. A file with both 2010 Census blocks and 2000 Census blocks was used to link the NSDUH sample geography (which was based on the 2000 Census) to the 2010 Census geography. NSDUH sample segments are typically nested within one Census tract. When this is the situation, that tract is designated as the majority tract (MTRACT10). When a sample segment covers more than one tract (i.e., sample segments may comprise several partial tracts), a single majority tract is assigned to that segment. In such a case, the tract that contains the maximum number of dwelling units from the segment is designated as the majority tract for that segment. The variable, TRTIND10, can be used to identify whether the segment contains only one tract or multiple tracts. Since the sampling frame was based on the 2000 Census and it is being mapped here to the 2010 Census, there are a large number of segments that comprise more than one census tract (based on 2010 geography).

MTRACT10 can be used to merge the 2010 Census tract level variables onto the sample. Note that to merge such variables onto the sample, a combination of State, county (MCTY10) and tract (MTRACT10) variables will need to be used.

**MTRACT10**      Len : 6    MAJORITY CENSUS (2010) TRACT FOR SEGMENT

**TRTIND10**      Len : 1    INDICATOR-MULTIPLE CENSUS (2010) TRACTS IN SEGMENT

0 = SEGMENT CONSISTS OF 1 TRACT.....  
1 = SEGMENT CONSISTS OF 2 OR MORE TRACTS.....

## SEGMENT

### SEGMENT

SEGID is the six character segment identifier. The first two characters are the abbreviation for the state in which the segment is located. The third and fourth characters correspond to the state sampling region. The range for the third and fourth characters is 01 through 48 for the 1999 through 2004 NSDUHs and 51 through 98 for the 2005 through 2013 NSDUHs. The fifth and sixth characters represent the segment suffix, and are a sequential numbering of segments within state sampling regions and indicate the survey year and initial quarter assignment of the segment. The fifth and sixth characters range from 01 through 24 for the 1999 through 2004 NSDUHs and 01 through 40 for the 2005 through 2013 NSDUHs. Definitions can be found in the Sample Design Reports.

SEGID                      Len : 6    SEGMENT ID

The variables LAT and LONG are the latitude and longitude of the segment geographic centroid, respectively. During sampling frame development, each segment was defined as a collection of census blocks that were aggregated until the total number of dwelling units reached the minimum number needed for sampling and data collection purposes. The LAT/LONG values of each census block (also centroid values) were used to identify its geographic proximity to other blocks for the purpose of aggregation. The segment-level LAT/LONG was calculated as the average LAT/LONG values of the census blocks. No link was established between the census block and the location of the respondent, and LAT/LONG values corresponding to the actual location of the respondent are not available; so the best LAT/LONG information available for each respondent is these segment centroid values. Every respondent within a given segment will have the same LAT/LONG coordinates. These variables are based on 2000 Census geography.

LAT                        Len : 10    SEGMENT GEOGRAPHIC CENTROID - LATITUDE

LONG                      Len : 10    SEGMENT GEOGRAPHIC CENTROID - LONGITUDE

The variable PLACNM00 is the Census place name associated with each segment. From the Census documentation, "places, for the reporting of decennial census data, include census designated places, consolidated cities, and incorporated places." If there are duplicate place names within the same county, the places are distinguished by their legal description (e.g. "city" or "village"). However, since the variable PLACNM00 is used to help the FIs locate the segment and is limited by the number of characters printed on the map, identifiers like "city" or "village" have been removed from the place name for most places. A missing value in PLACNM00 implies that it is not a census designated place, consolidated city, or incorporated place. PLACNM00 is based on 2000 Census data.

PLACNM00                Len : 20    PLACE NAME

For the reporting of decennial census data, the variables PLACE00 and FPLNM00 represent the code and name, respectively, of census designated places (CDPs), consolidated cities, and incorporated places. These variables were created by converting census block-level values into segment-level variables in order to help the lister and field interviewer locate the segment. They may not represent the actual place for a given respondent. As a result, these variables may not be optimal for analytic purposes, but are useful nonetheless. Census assigns each place a five-digit Federal Information Processing Standards (FIPS) code, based on the alphabetical order of the place name within each state. If place names are duplicated within a state and they represent distinctly different areas, Census assigns a separate code to each place name alphabetically by primary county in which each place is located, or if both places are in the same county, alphabetically by their legal description (for example, city before village). Most place names will consist of the name of the area followed by the label "borough," "city," "town," or "CDP." For example, the place name for Washington, D.C. is "Washington city." The variables PLACE00 and FPLNM00 are both based on 2000 census data. In order to convert the block-level values to segment-level variables, census block-level place codes and names are first set to missing if the place name contains "Remainder of," "division," "remain," or "unorg." Then, census blocks are sorted within segments and the first non-missing place code and name is assigned to the segment. Missing values for PLACE00 and FPLNM00 imply that the segment is not in a census designated place, consolidated city, or incorporated place.

PLACE00                 Len : 5    PLACE (FIPS)

The full place name (FPLNM00) and place code (PLACE00) variables are based on 2000 Census data.

FPLNM00                 Len : 39    FULL PLACE NAME

## SEGMENT

The variables MAIAN00 and MAINM00 represent the census code and name, respectively, of the majority American Indian, Alaska Native, and Native Hawaiian area (AIANNHA) in a segment. The Census provides data for seven types of AIANNHAs:

- Federally-recognized American Indian reservations (AIRs) and off-reservation trust land areas – areas that have been set aside by the U.S. for the use of American Indian tribes. The tribes have primary governmental authority over the AIRs and associated off-reservation trust lands. Federal AIRs may cross State and all other area boundaries.
- State-recognized American Indian Reservations (SAIRs) - reservations established by some State governments for tribes recognized by the State. The tribes may have governmental authority over the SAIRs. SAIRs must be defined within a single State but may cross county and other types of boundaries.
- Hawaiian home lands (HHLs) - areas held in trust for Native Hawaiians by the State of Hawaii. HHLs are contained within the State of Hawaii but may cross all other area boundaries.
- Alaska Native village statistical areas (ANVSAs) - areas representing permanent and/or seasonal residences of Alaska Natives who are members of, or receive governmental services from, the defining Alaska Native village. ANVSAs are contained within the State of Alaska but may cross all other area boundaries.
- Oklahoma tribal statistical areas (OTSAs) - areas intended to represent the former American Indian reservations that existed in Indian and Oklahoma territories prior to Oklahoma statehood in 1907. OTSAs are contained within the State of Oklahoma but may cross all other area boundaries.
- Tribal designated statistical areas (TDSAs) - areas identified and delineated for federally-recognized American Indian tribes that do not currently have an AIR or off-reservation trust land. A TDSA is intended to encompass a compact and contiguous area that contains a concentration of individuals who identify with the delineating federally-recognized American Indian tribe. TDSAs may cross State and all other area boundaries.
- State designated tribal statistical areas (SDTSAs) - areas identified and delineated for State-recognized tribes that are not federally-recognized and do not have an AIR or off-reservation trust land. SDTSAs provide State-recognized tribes without reservations statistical data for a geographic area that encompasses a substantial concentration of tribal members. SDTSAs must be defined within a single State but may cross county and other types of boundaries. SDTSAs were called State Designated American Indian Statistical Areas (SDAISAs) for Census 2000.

The AIANNHAs are mutually exclusive in that no AIANNHA can overlap another AIANNHA. In cases where more than one tribe claims jurisdiction over an area, the Census Bureau creates a joint-use area as a separate entity to define this area of dual claims.

Some NSDUH segments can cross more than one AIANNHA. In order to assign a single AIANNHA to a segment, a 'majority' AIANNHA variable was created by summing the total number of dwelling units within each of the AIANNHAs within the segment and then assigning the AIANNHA with the most dwelling units to that segment. If the majority of the dwelling units are not in an AIANNHA, MAIAN00 and MAINM00 are assigned values of '9999' and 'Not in an AIANNHA,' respectively. MAIAN00 and MAINM00 are based on 2000 census data.

As summarized in the codebook introduction, a coverage analysis was conducted to evaluate the coverage of the segment-level AIANNHA variables. Because they make up a small proportion of the U.S. population, people residing in Hawaiian home lands, tribal designated statistical areas, and State-recognized American Indian reservations may not be represented adequately by the sample. Several years of data may be required to sufficiently represent these particular populations.

**MAIAN00** Len : 4 MAJORITY AIANNHA CENSUS CODE FOR SEGMENT

**MAINM00** Len : 76 MAJORITY AIANNHA NAME FOR SEGMENT

The variable MAIIND00 is derived from MAIAN00 and is based on 2000 census data.

(MAIAN00)  
**MAIIND00**

Len : 1 MAJORITY AIANNHA INDICATOR

1 = Fed-recognized reservation (MAIAN00=0001-4999).....  
2 = Hawaiian home land (MAIAN00=5000-5499).....  
3 = Oklahoma tribal stat area (MAIAN00=5500-5999).....  
4 = Alaska Nat village stat area (MAIAN00=6000-7999).....  
5 = Tribal designated stat area (MAIAN00=8000-8999).....  
7 = State des tribal stat area (MAIAN00=9500-9998).....  
8 = Not in an AIANNHA.....

NOTE: Since one zip code can correspond to several cities or areas and one city can contain multiple zip codes, neither the CITY nor the ZIPCODE variable can be used to exactly determine if respondents reside inside or outside city limits or a particular area.

The following variable, CITY, was originally captured during the sampling frame construction phase of NSDUH by the Lister and may have been updated during the screening or interviewing phase by the Field Interviewer. CITY may or may not correspond to actual physical boundaries associated with the name provided.

**CITY** Len : 25 CITY NAME

## SEGMENT

The following variable, ZIPCODE, was originally captured during the sampling frame construction phase of NSDUH by the Lister and may have been updated during the screening or interviewing phase by the Field Interviewer upon return to the SDU if discrepancies were noted. It represents the Zip Code within which the interview was conducted.

**ZIPCODE**            Len : 5    ZIP CODE

The segment-level variable SEGAREA is derived from the 2000 Census block-level area in square meters. The block-level area was converted to square miles and counts were aggregated to form segment-level estimates. Following sample selection, SEGAREA is used to identify segments with extremely large areas as candidates for subsegmentation, which partitions these large segments into subsegments.

**SEGAREA**            Len : 12    AREA OF SEGMENT (SQ MILES)

The segment-level variable NSBLK00 represents the number of 2000 Census blocks in the segment.

**NSBLK00**            Len : 12    NUMBER OF CENSUS BLOCKS IN SEGMENT

The segment-level variable NSBLKU00 represents the number of 2000 Census blocks in the segment classified as urban. Urban classifications were defined based on the 2000 Census. The Census classifies as urban all blocks located within urbanized areas (UA) and urban clusters (UC). UAs and UCs generally consist of core census block groups or blocks that have a population density of at least 1,000 people per square mile and surrounding census blocks that have an overall density of at least 500 people per square mile. In addition, under certain conditions, less densely settled territory may be part of each UA or UC.

**NSBLKU00**            Len : 12    NUMBER OF URBAN CENSUS BLOCKS IN SEGMENT

The segment-level variable SGPOP00 is derived by aggregating the 2000 Census block-level total resident population estimates to form segment-level estimates.

**SGPOP00**            Len : 12    SEGMENT POPULATION

The segment-level variable SGPOPU00 is derived by aggregating the 2000 Census block-level total resident population estimates for urban blocks to form segment-level estimates. Urban classifications were defined based on the 2000 Census. The Census classifies as urban all blocks located within urbanized areas (UA) and urban clusters (UC). UAs and UCs generally consist of core census block groups or blocks that have a population density of at least 1,000 people per square mile and surrounding census blocks that have an overall density of at least 500 people per square mile. In addition, under certain conditions, less densely settled territory may be part of each UA or UC.

**SGPOPU00**            Len : 12    SEGMENT URBAN POPULATION

The segment-level variable SGPCTU00 is derived by dividing the 2000 Census urban resident population in the segment (SGPOPU00) by the 2000 Census resident population in the segment (SGPOP00) and multiplying this ratio by 100. Urban classifications were defined based on the 2000 Census. The Census classifies as urban all blocks located within urbanized areas (UA) and urban clusters (UC). UAs and UCs generally consist of core census block groups or blocks that have a population density of at least 1,000 people per square mile and surrounding census blocks that have an overall density of at least 500 people per square mile. In addition, under certain conditions, less densely settled territory may be part of each UA or UC.

**SGPCTU00**            Len : 12    PERCENT URBAN POPULATION IN SEGMENT

The segment-level variable SGQP00A is derived by aggregating the Claritas-adjusted 2000 Census block-level group quarters population estimates to form segment-level estimates. The group quarters population includes all people not living in households. Two general categories of people in group quarters are recognized: (1) the institutionalized population and (2) the noninstitutionalized population. The institutionalized population includes people under formally authorized, supervised care or custody in institutions at the time of enumeration; such as correctional institutions, nursing homes, and juvenile institutions. The noninstitutionalized population includes all people who live in group quarters other than institutions, such as college dormitories, military quarters, and group homes. Also, included are staff residing at institutional group quarters. Adjustment factors were calculated at the Census block group level by taking the ratio of the 2007 Claritas group quarters population to the 2000 Census group quarters population. Block group adjustment factors were applied to 2000 Census block-level estimates and aggregated at the segment level. The Claritas projections adjust the 2000 Census estimates to account for changes in the population between the 2000 Census and the time the sample is fielded.

**SGQP00A**            Len : 12    SEGMENT GROUP QUARTERS POPULATION

## SEGMENT

The segment-level variable SEGHU00A is derived by aggregating the Claritas-adjusted 2000 Census block-level housing unit estimates to form segment-level estimates. A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied (or if vacant, is intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live and eat separately from any other persons in the building and which have direct access from the outside of the building or through a common hall. Adjustment factors were calculated at the Census block group level by taking the ratio of the 2007 Claritas estimated number of housing units to the 2000 Census number of housing units. Block group adjustment factors were applied to 2000 Census block-level estimates and aggregated at the segment level. The Claritas projections adjust the 2000 Census estimates to account for changes in the population between the 2000 Census and the time the sample is fielded. During the sample selection process, SEGHU00A is used in the derivation of SEGDU00A.

SEGHU00A      Len : 12    NUMBER OF HOUSING UNITS IN SEGMENT

The segment-level variable SEGDU00A is derived by aggregating the Claritas- and NSDUH data-adjusted 2000 Census block-level estimates to form segment-level estimates. At the block-level, the 2000 Census noninstitutionalized group quarters population, excluding persons in military quarters, was divided by the average group quarters unit size from the 2002 NSDUH to obtain the estimated number of group quarters units in the block. This estimate was combined with the Census 2000 estimated number of housing units at the block-level. The 2000 Census noninstitutionalized group quarters population includes all people who live in group quarters other than institutions, such as college dormitories, military quarters, and group homes. Also, included are staff residing at institutional group quarters. A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied (or if vacant, is intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live and eat separately from any other persons in the building and which have direct access from the outside of the building or through a common hall. Adjustment factors were calculated at the Census block group level by taking the ratio of the 2007 Claritas population 12 and over to the 2000 Census population 12 and over. Block group adjustment factors were applied to NSDUH data-adjusted 2000 Census block-level estimates and aggregated at the segment level. The Claritas projections adjust the 2000 Census estimates to account for changes in the population between the 2000 Census and the time the sample is fielded. Subtracting SEGHU00A from SEGDU00A provides the estimated number of group quarters units in the segment.

SEGDU00A      Len : 12    NUMBER OF DWELLING UNITS IN SEGMENT

The segment-level variable SOCHU00A is derived by aggregating the Claritas-adjusted 2000 Census block-level occupied housing unit estimates to form segment-level estimates. An occupied housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied as separate living quarters. Separate living quarters are those in which the occupants live and eat separately from any other persons in the building and which have direct access from the outside of the building or through a common hall. Adjustment factors were calculated at the Census block group level by taking the ratio of the 2007 Claritas estimated number of housing units to the 2000 Census number of housing units. Block group adjustment factors were applied to 2000 Census block-level estimates and aggregated at the segment level. The Claritas projections adjust the 2000 Census estimates to account for changes in the population between the 2000 Census and the time the sample is fielded. During the sample selection process, SOCHU00A is used in the derivation of SOCDU00A.

SOCHU00A      Len : 12    NUMBER OF OCCUPIED HOUSING UNITS IN SEGMENT

The segment-level variable SOCDU00A is derived by aggregating the Claritas- and NSDUH data-adjusted 2000 Census block-level estimates to form segment-level estimates. At the block-level, the 2000 Census noninstitutionalized group quarters population, excluding persons in military quarters, was divided by the average group quarters unit size from the 2002 NSDUH to obtain the estimated number of group quarters units in the block. This estimate was combined with the Census 2000 estimated number of occupied housing units at the block-level. The 2000 Census noninstitutionalized group quarters population includes all people who live in group quarters other than institutions, such as college dormitories, military quarters, and group homes. Also, included are staff residing at institutional group quarters. An occupied housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied as separate living quarters. Separate living quarters are those in which the occupants live and eat separately from any other persons in the building and which have direct access from the outside of the building or through a common hall. Adjustment factors were calculated at the Census block group level by taking the ratio of the 2007 Claritas population 12 and over to the 2000 Census population 12 and over. Block group adjustment factors were applied to NSDUH data-adjusted 2000 Census block-level estimates and aggregated at the segment level. The Claritas projections adjust the 2000 Census estimates to account for changes in the population between the 2000 Census and the time the sample is fielded. During the sample selection process, the number of occupied dwelling units is used when forming segments to ensure that segments meet the minimum dwelling unit requirement (100 dwelling units in rural areas and 150 dwelling units in urban areas). Subtracting SOCHU00A from SOCDU00A provides the estimated number of occupied group quarters units in the segment.

SOCDU00A      Len : 12    NUMBER OF OCCUPIED DWELLING UNITS IN SEGMENT

## SEGMENT

The segment-level variable RURURB00 is derived from the 2000 Census block-level designation of rural or urban. The Census classifies as urban all blocks located within urbanized areas (UA) and urban clusters (UC). UAs and UCs generally consist of core census block groups or blocks that have a population density of at least 1,000 people per square mile and surrounding census blocks that have an overall density of at least 500 people per square mile. In addition, under certain conditions, less densely settled territory may be part of each UA or UC. In the NSDUH sample, if one or more of the blocks within a segment is urban, the segment is defined as urban. If one hundred percent of the blocks are rural, the segment is defined as rural. This definition was used when forming segments to ensure that segments meet the minimum dwelling unit requirement (100 dwelling units in rural areas and 150 dwelling units in urban areas).

RURURB00

Len : 1 RURAL OR URBAN SEGMENT

1 = Rural.....  
2 = Urban .....

## SUBSTATE

### SUBSTATE

The following five (5) variables are associated with the 2008-10 substate regions. Any analysis using these variables must be done in conjunction with the variable, STATE. The 2008-10 substate region definitions (and redefined 2006-08 definitions) consisted of the original 2006-08 definitions for 43 States and the District of Columbia and revised definitions for seven States: Alaska, Arkansas, California, Georgia, North Carolina, Pennsylvania, and West Virginia. For more details on these substate regions, see the Substate Region Definition Appendix.

SBST10N is the substate region name used in the 2008-10 Substate report. The values of SBST10N are unique within a State, but two or more States may have substate regions with the same substate region name.

**SBST10N**      Len : 53    2008-10 SUBSTATE REGION NAME

SBST10 is a numeric value that corresponds to the substate region name within a State. If a State has "n" substate regions, then SBST10 will take on values 1, 2, . . . n within that State. SBST10 was created by assigning a unique ID to the sorted order of SBST10N. For example if there are 10 substate regions in a State, Region 10 would come after Region 1, but before Region 2 and hence Region 1 would get a SBST10 value of 1, Region 10 would get a SBST10 value of 2 and Region 2 would get an SBST value of 3. An actual example from the 2008-2010 substate regions is as follows: there are 15 substate regions (SBST10N) for New York, Region 1, Region 2 . . . Region 15. For this example, Region 1 would get an SBST10 value of 1, Region 10 through Region 15 would get SBST10 values 2 through 7, and Region 2 through Region 9 would get SBST10 values 8 through 15. Note, the order of SBST10 does not always match the order that the region names (SBST10N) are listed in published substate reports. The values of SBST10 are shown in the Substate Region Definition Appendix.

**SBST10**      Len : 2    2008-10 SUBSTATE REGION ID WITHIN STATE

Several States also have aggregate substate areas. These aggregate areas are made up of two or more of the substate regions. SBSTA10N is the name of the aggregate area variable; this variable is blank for the States with no aggregate areas. Within the States with aggregate areas, there are some substate regions that do not belong to an aggregate area. For these cases, SBSTA10N=SBST10N and AGGFLG10=0 (see below).

**SBSTA10N**      Len : 53    2008-10 AGGREGATE SUBSTATE AREA NAME

## SUBSTATE

SBSTAG10 is a numeric variable within State assigned to each aggregate area (i.e., area assigned an aggregate name, SBSTA10N). If a State has "n" aggregate areas, then SBSTAG10 will take on values 1, 2, . . . n within that State. SBSTAG10 was created by assigning a unique ID to the sorted order of SBSTA10N. For example, if a State has 3 substate areas (Region 1, Region 2, and Region 3) and two of these regions make up an aggregate region called Regions 2 and 3. Then SBSTAG10=1 for Region 1, and SBSTAG10=2 for Regions 2 and 3. An actual example from the 2008-2010 substate regions is as follows: there are 11 aggregate substate regions (SBSTA10N) for Texas, Region 1, Region 2, . . . Region 11. For this example, Region 1 would get an SBSTAG10 value of 1, Region 10 through Region 11 would get SBSTAG10 values 2 through 3, and Region 2 through Region 9 would get SBSTAG10 values 4 through 11. Note, the order of SBSTAG10 does not always match the order that the aggregate region names (SBSTA10N) are listed in published substate reports. The values of SBSTAG10 are shown in the Substate Region Definition Appendix.

Below is example SAS/SUDAAN code that could be used to produce estimates for any given outcome variable for all substate regions and aggregate substate regions (for those States with aggregate regions). Also, there is code to add the region/aggregate region names to the output files (i.e., SBST10N will be added to the files when using the numeric variable, SBST10, in SUDAAN).

```
proc describe data= filetype=sas design=wr;

run;
```

```
/*Now merge this variable back onto the full dataset*/
data in12_all;
merge mast12 regions;
by state sbst10;
run;
```

/\*STREG10 can be used in the class, or tables statement of SUDAAN to get estimates for all substate regions\*/

**SBSTAG10**      Len : 2    2008-10 AGGREGATE AREA ID WITHIN STATE

**AGGFLG10**      Len : 1    2008-10 AGGREGATE AREA FLAG

0 = 2008-10 Substate region not part of aggregate area .....  
1 = 2008-10 Substate region part of aggregate area.....

The following six (6) variables are associated with the 2010-12 substate regions. Any analysis using these variables must be done in conjunction with the variable, STATE. For more details on these substate regions, see the Substate Region Definition Appendix.

SBST12N is the substate region name used in the 2010-12 Substate report. The values of SBST12N are unique within a State, but two or more States may have substate regions with the same substate region name.

**SBST12N**      Len : 55    2010-12 SUBSTATE REGION NAME

SBST12 is a numeric value that corresponds to the substate region name within a State. If a State has "n" substate regions, then SBST12 will take on values 1, 2, . . . ,n, within that State. SBST12 was created by assigning a unique ID to the sorted order of SBST12N. For example if there are 10 substate regions in a State, Region 10 would come after Region 1, before Region 2 and hence Region 1 would get a SBST12 value of 1, Region 10 would get a SBST12 value of 2 and Region 2 would get a SBST12 value of 3. An actual example from the 2010-2012 substate regions is as follows: there are 15 substate regions (SBST12N) for New York, Region 1, Region 2 . . . Region 15. For this example, Region 1 would get an SBST12 value of 1, Region 10 through Region 15 would get SBST12 values 2 through 7, and Region 2 through Region 9 would get SBST12 values 8 through 15. Note, the order of SBST12 does not always match the order that the region names (SBST12N) are listed in published substate tables and other documents. The values of SBST12 are shown in the tables in the Substate Region Definition Appendix.

**SBST12**      Len : 2    2010-12 SUBSTATE REGION ID WITHIN STATE

Several States also have aggregate substate areas. These aggregate areas are made up of two or more of the substate regions. SBSTA12N is the name of the aggregate area variable; this variable is blank for the States with no aggregate areas. Within the States with aggregate areas, there are some substate regions that do not belong to an aggregate area. For these cases, SBSTA12N=SBST12N and AGGFLG12=0 (see below).

**SBSTA12N**      Len : 53    2010-12 AGGREGATE SUBSTATE AREA NAME

SBSTAG12 is a numeric variable within State assigned to each aggregate area (i.e., area assigned an aggregate name, SBSTA12N). If a State has "n" aggregate areas, then SBSTAG12 will take on values 1, 2, . . . ,n, within that State. SBSTAG12 was created by assigning a unique ID to the sorted order of SBSTA12N. For example, if a State has 3 substate areas (Region 1, Region 2, and Region 3) and two of these regions make up an aggregate region called Regions 2 and 3. Then SBSTAG12=1 for Region 1, and SBSTAG12=2 for the aggregate regions called Regions 2 and 3. An actual example from the 2010-2012 substate regions is as follows: there are 11 aggregate substate regions (SBSTA12N) for Texas, Region 1, Region 2. . . Region 11. For this example, Region 1 would get an SBSTAG12 value of 1, Region 10 and Region 11 would get SBSTAG12 values of 2 and 3, and Region 2 through Region 9 would get SBST12 values 4 through 11. Note, the order of SBSTAG12 does not always match the order that the aggregate region names (SBSTA12N) are listed in published substate tables and other documents. The values of SBSTAG12 are shown in the tables in the Substate Region Definition Appendix.

An example of SAS/SUDAAN code that could be used to produce estimates for any given outcome variable for all substate regions and aggregate areas (for those States with aggregate regions) is included above the 2008-10 substate aggregate area variable (SBSTAG10). Note, the code includes the 2008-10 substate variables, but the same code will work with the 2010-12 substate variables. In the same location, there is also code to add the region/aggregate region names to the output files (i.e., SBST12N can be added to the files when using the numeric variable, SBST12, in SUDAAN).

**SBSTAG12**      Len : 2    2010-12 AGGREGATE AREA ID WITHIN STATE

SUBSTATE

AGGFLG12

Len : 1 2010-12 AGGREGATE AREA FLAG

Len : 1 CHANGE INDICATOR B/N 2008-10 & 2010-12 REGIONS

0 = Substate region changed b/n 2008-10 & 2010-12.....  
1 = Substate region consistent b/n 2008-10 & 2010-12 .....

## SAMPLE WEIGHTING AND ESTIMATION VARS

### **SAMPLE WEIGHTING AND ESTIMATION VARS**

The following variable, ANALWT is the product of 15 weight components: WT1\*...\*WT15. WT14 is a post-stratification adjustment factor that adjusts the sample weights to 2010 Census based population estimates for various demographic domains including AGE with six categories (12-17, 18-25, 26-34, 35-49, 50-64, 65+). ANALWT is the final person level weight that should be used in all analysis of the 2011 NSDUH. Similar to the 2005, 2006, 2007, 2008, 2009 and 2010 NSDUH, a new four stage sample selection scheme was implemented in 2011. To reflect this change, an additional design weight component (WT1: Inverse Selection Probability of Census Tract) was added. As a result, there are now a total of 15 weight components for the 2011 NSDUH as for the 2005, 2006, 2007, 2008, 2009 and 2010 NSDUHs. Note that in previous NSDUHs, the variable name of weight components contained a year specific indicator, for example, weight component 1 in 2010 NSDUH was called YR10WT1 and YR09WT1 in the 2009 NSDUH. Starting from the 2011 NSDUH, the year specific indicator is removed, for example, the weight component 1 is now called WT1.

ANALWT	Len : 12	FINAL PERSON LEVEL ANALYSIS WEIGHTS
WT1	Len : 12	INVERSE PROBABILITY OF SELECTING CENSUS TRACT
WT2	Len : 12	INVERSE PROBABILITY OF SELECTING SEGMENT
WT3	Len : 12	QUARTER SEGMENT WEIGHT ADJUSTMENT
WT4	Len : 12	SUBSEGMENTATION INFLATION ADJUSTMENT
WT5	Len : 12	INVERSE PROBABILITY OF SELECTING DWELLING UNIT
WT6	Len : 12	SUBSAMPLING OF ADDED DWELLING UNIT ADJUSTMENT
WT7	Len : 12	DWELLING UNIT PERCENT RELEASE ADJUSTMENT
WT8	Len : 12	DU NON-RESPONSE ADJUSTMENT
WT9	Len : 12	DU POSTSTRATIFICATION ADJUSTMENT
WT10	Len : 12	DU EXTREME WEIGHT ADJUSTMENT
WT11	Len : 12	INVERSE PROB. OF SELECTING A PERSON WITHIN DU
WT12	Len : 12	SELECTED PERSON PS TO SCREENER DATA ADJUSTMENT
WT13	Len : 12	PERSON-LEVEL NON-RESPONSE ADJUSTMENT
WT14	Len : 12	PERSON LEVEL POST-STRATIFICATION ADJUSTMENT
WT15	Len : 12	PERSON-LEVEL EXTREME WEIGHT ADJUSTMENT

DUANALWT, the final dwelling unit level weight, is the product of 15 weight components, WT1- WT10 and DUWT11-DUWT15. The first 10 components of DUANALWT are also the first 10 components of ANALWT, the final person level weight, and PRANALWT, the final person pair level weight. The remaining 5 components of DUANALWT are specific to the calculation of dwelling unit level weights. DUANALWT can be used to produce household-level estimates. Note that in previous NSDUHs, the variable name of 5 household-level weight specific components contained a year specific indicator, for example, weight component 11 in 2010 NSDUH was called DU10WT11 and DU09WT11 in the 2009 NSDUH. Starting from the 2011 NSDUH, the year specific indicator is removed, for example, the weight component 11 is now called DUWT11.

DUANALWT	Len : 12	FINAL QUESTIONNAIRE DU LEVEL WEIGHTS
DUWT11	Len : 12	INVERSE OF SEL. PROB. OF AT LEAST ONE PERSON IN DU

# SAMPLE WEIGHTING AND ESTIMATION VARS

DUWT12      Len : 12    SELECTED QDU PS TO SDU-BASED CONTROL TOTALS

DUWT13      Len : 12    RESPONDENT QDU NONRESPONSE ADJUSTMENT

DUWT14      Len : 12    RESPONDENT QDU PS TO SDU-BASED CONTROL TOTALS

This adjustment was not implemented, and DUWT15 was set to 1 for every completed QDU.

DUWT15      Len : 12    RESPONDENT QDU EXTREME WEIGHT ADJUSTMENT

The following variable, PRANALWT is the product of 15 weight components: WT1-WT10 and PRWT11-PRWT15. The first 10 components of PRANALWT are also the first 10 components of ANALWT, the final person level weight, and DUANALWT, the final dwelling unit level weight. The remaining 5 components of PRANALWT are specific to the calculation of person pair level weights. Note that in previous NSDUHs, the variable name of 5 pair weight specific components contained a year specific indicator, for example, weight component 11 in 2010 NSDUH was called PR10WT11 and PR09WT11 in the 2009 NSDUH. Starting from the 2011 NSDUH, the year specific indicator is removed, for example, the weight component 11 is now called PRWT11.

PRANALWT      Len : 12    FINAL PERSON PAIR LEVEL ANALYSIS WEIGHTS

PRWT11      Len : 12    INVERSE OF SELECTION PROB. OF A PERSON PAIR

PRWT12      Len : 12    SELECTED PAIR POSTSTRATIFICATION TO POSS. PAIRS

PRWT13      Len : 12    RESPONDENT PAIR NONRESPONSE ADJUSTMENT

PRWT14      Len : 12    RESPONDENT PAIR POSTSTRATIFICATION TO POSS. PAIRS

PRWT15      Len : 12    RESPONDENT PAIR EXTREME WEIGHT ADJUSTMENT

VESTR      Len : 5    ANALYSIS STRATUM

VEREP      Len : 2    ANALYSIS REPLICATE

The analysis stratum (VESTR) with only one replicate is collapsed with adjacent stratum within the same state. In 2011, vestr=30070 was collapsed with vestr=30069.

PRVESTR      Len : 5    PERSON PAIR LEVEL VERSION OF ANALYSIS STRATUM

PRVEREP      Len : 2    PERSON PAIR LEVEL VERSION OF ANALYSIS REPLICATE

## **APPENDIX B**

### **Drug Codes for Open-Ended Questions**

## APPENDIX B

### Drug Codes for Open-Ended Questions (2011 CAI NSDUH)

#### Numerical Listing

NOTE: Due to changes in the survey instrument in 1999,  
codes for some drugs may differ from those used in prior survey years.

Code	Definition
101	Butisol
102	Buticaps
103	Amytal
104	Mebaral
105	Placidyl, Ethchlorvynol
106	Doriden
107	Noludar
108	Nembutal
109	Seconal
110	Tuinal
111	Dalmane, Flurazepam
112	Restoril, Temazepam
113	Halcion, Triazolam
114	Amobarbital
115	Phenobarbital
116	Methaqualone, Sopor, Quaalude [see also 138]
117	Chloral hydrate, Noctec
118	Pentobarbital, Pentothal, Sodium pentothal, Thiopental
119	Secobarbital
120	Downers; OTHER Sedative, NOT OTHERWISE SPECIFIED
121	USED SEDATIVE, DON'T KNOW NAME
122	Over-the-counter sleep aid; not specified <OTC>
123	Unisom <OTC>
124	Yellow jackets
126	Sominex <OTC>
127	Nytol <OTC>
128	Nervine <OTC>
129	Reds
130	Phenergan, Promethazine
131	Haldol, Haloperidol
132	Sleepettes <OTC>
136	Dimetapp <OTC>
137	7-14
138	Mandrax, Mandrix [see also 116]
139	Black widows
140	Seldane

Code	Definition
141	Dilantin
142	Belladonna
145	Red devil(s)
146	Bentyl, Dicyclomine
148	Actifed <OTC>
152	Eskabarb
153	Luminal
154	Alurate
156	Sodium barbital
157	Barbiturates
159	Octanox
163	Blue meanies
164	Yellow zombies
171	NyQuil <OTC>
172	Dream Ease <OTC>
173	Wafers
174	Ambien, Stilnox, Zolpidem
176	Melatonin <OTC>
177	Bean
178	Quetiapine, Seroquel
179	Water tee [sic]
180	Tylenol P.M. <OTC>
181	Excedrin P.M. <OTC>
182	Melzone
183	Mysoline
184	Red and blues
186	Butalbital
187	Belladonna plant/flower/root, deadly nightshade
188	Estazolam, Prosom
189	Sonata
190	Dormin <OTC>
191	Blues
192	Promazine
193	Meclizine
194	Quiet World <OTC>
195	Lotusate, Talbutal
196	Simply Sleep <OTC>
197	Topamax, Topiramate
198	Seducaps
199	Ansiovit <OTC>

Code	Definition
201	Valium, Diazepam
202	Librium, Chlordiazepoxide HCl
203	Limbitrol [see also 276]
204	Menrium
205	Serax, Oxazepam
206	Tranxene
207	Ativan, Lorazepam, Orfidal
208	Centrax
209	Xanax, Alprazolam, Tafil, Xanax bars
210	Paxipam
211	BuSpar, Buspirone
212	Miltown
213	Equanil
214	Deprol
215	Vistaril
216	Atarax, Hydroxyzine
217	Durrax
219	SK-Lygen
220	Meproamate
221	OTHER Tranquilizer, NOT OTHERWISE SPECIFIED
222	USED TRANQUILIZER, DON'T KNOW NAME
223	Carbacot, Marbaxin, Methocarbamol, Robaxin
224	Triavil
225	Desyrel, Trazodone hydrochloride
226	Stelazine, Trifluoperazine HCl
227	Thorazine
228	Amitriptyline, Elavil
229	Librax
230	Compazine, Prochlorperazine
232	Mellaril
233	Trilafon, Perphenazine
234	Flexeril, Cyclobenzaprine
235	Imipramine
237	Dormicum, Hypnovel, Midazolam, Versed
240	Lithium carbonate, Lithonate
241	Prozac, Fluoxetine
242	Equagesic
243	Etrafon
245	Tryptophan
246	Klonopin, Clonazepam, Diocam, Rivotril
247	Adapin, Doxepin, Sinequan
249	Asendin
250	Aventyl, Nortab, Nortriptyline, Pamelor
252	Strawberry whip cream
257	Zestril
259	Desipramine, Norpramin

Code	Definition
260	PCB
262	Prolixin
263	Vivactil
266	Verstran

## **APPENDIX C**

### **Tobacco Brand Codes for Open-Ended Questions**

The final tobacco brand codes were created from listings of brands that appeared on the computer screen(s) corresponding to that particular type of tobacco, or from answers that respondents specified, if they indicated use of "a brand not on this list." For each tobacco product (cigarettes, chewing tobacco, snuff, and cigars), the available responses in the contiguous order of appearance on the screen (based on the 1999 through 2004 CAI instruments) were used to initially create each tobacco product group. Although the tobacco brands that appeared on the screens for respondents changed beginning in 2005 for cigarettes, snuff, and cigars, the editing and coding procedures in this survey year continued to use existing codes that had been developed prior to 2005. For example, American Spirit cigarettes became the first brand on the screen for question CG11 in 2005 ("The next questions are about the brand of cigarettes you smoke -- the brand is the name that is on the pack. During the past 30 days, what brand of cigarettes did you smoke most often?"). For consistency with prior years, however, mention of American Spirit cigarettes continues to retain a code of 161, even though CG11=1 (with this answer verified in question CG13) would indicate that the respondent smoked American Spirit cigarettes most often in the past 30 days.

Tobacco brand codes 100-199 and 1000-1999 represent cigarette brands, codes 200-299 and 2000-2999 represent chewing tobacco brands, codes 300-399 and 3000-3999 represent snuff brands, and codes 400-499 and 4000-4999 represent cigar brands. Additional codes were added to each group list as needed. Miscellaneous tobacco and non-tobacco groups are represented by the 500-599, 600-699, 700-799, and 800-899 series.

For tobacco brands that respondents could choose from a list, no distinction was made in the coding between situations where respondents chose that particular brand from the list, and those where respondents reported use of "a brand not on this list" and then specified use of that brand. In addition, there was no distinction between particulars such as menthol, light, or full-flavor varieties in the coding. In addition, the coding took into account situations where respondents might specify a brand that corresponded to a different type of tobacco. For example, if a snuff brand was specified as a brand of "chewing tobacco," then the reported brand of "chewing tobacco" was assigned a code in the 300 series, corresponding to snuff.

## APPENDIX C

### Tobacco Brand Codes for Open-Ended Questions (2011 CAI NSDUH)

#### Numerical Listing

4410	Motion Picture Projectionists
4420	Ushers, Lobby Attendants, and Ticket Takers
4430	Miscellaneous Entertainment Attendants and Related Workers

#### **Funeral Related Occupations**

4460	Funeral Service Workers
------	-------------------------

#### **\* Personal Care and Service Workers**

4500	Barbers
4510	Hairdressers, Hairstylists, and Cosmetologists
4520	Miscellaneous Personal Appearance Workers
4530	Baggage Porters, Bellhops, and Concierges
4540	Tour and Travel Guides
4550	Transportation Attendants
4600	Child Care Workers

2003 Census code	Occupation category
4610	Personal and Home Care Aides
4620	Recreation and Fitness Workers
4640	Residential Advisors
4650	Personal Care and Service Workers, All Other

#### **Sales and Related Workers**

4700	First-Line Supervisors/Managers of Retail Sales Workers
4710	First-Line Supervisors/Managers of Non-Retail Sales Workers
4720	Cashiers
4740	Counter and Rental Clerks
4750	Parts Salespersons
4760	Retail Salespersons
4800	Advertising Sales Agents
4810	Insurance Sales Agents
4820	Securities, Commodities, and Financial Services Sales Agents
4830	Travel Agents
4840	Sales Representatives, Services, All Other
4850	Sales Representatives, Wholesale and Manufacturing
4900	Models, Demonstrators, and Product Promoters
4920	Real Estate Brokers and Sales Agents
4930	Sales Engineers
4940	Telemarketers
4950	Door-To-Door Sales Workers, News and Street Vendors, and Related Workers
4960	Sales and Related Workers, All Other

#### **Office and Administrative Support Workers (5000-5930)**

5000	First-Line Supervisors/Managers of Office and Administrative Support Workers
5010	Switchboard Operators, Including Answering Service
5020	Telephone Operators
5030	Communications Equipment Operators, All Other
5100	Bill and Account Collectors
5110	Billing and Posting Clerks and Machine Operators
5120	Bookkeeping, Accounting, and Auditing Clerks
5130	Gaming Cage Workers
5140	Payroll and Timekeeping Clerks
5150	Procurement Clerks
5160	Tellers
5200	Brokerage Clerks
5210	Correspondence Clerks
5220	Court, Municipal, and License Clerks
5230	Credit Authorizers, Checkers, and Clerks
5240	Customer Service Representatives
5250	Eligibility Interviewers, Government Programs
5260	File Clerks
5300	Hotel, Motel, and Resort Desk Clerks
5310	Interviewers, Except Eligibility and Loan
5320	Library Assistants, Clerical
5330	Loan Interviewers and Clerks
5340	New Accounts Clerks
5350	Order Clerks
5360	Human Resources Assistants, Except Payroll and Timekeeping
5400	Receptionists and Information Clerks
5410	Reservation and Transportation Ticket Agents and Travel Clerks
5420	Information and Record Clerks, All Other
5500	Cargo and Freight Agents
5510	Couriers and Messengers

2003 Census code	Occupation category
5520	Dispatchers
5530	Meter Readers, Utilities
5540	Postal Service Clerks
5550	Postal Service Mail Carriers
5560	Postal Service Mail Sorters, Processors, and Processing Machine Operators
5600	Production, Planning, and Expediting Clerks
5610	Shipping, Receiving, and Traffic Clerks
5620	Stock Clerks and Order Fillers
5630	Weighers, Measurers, Checkers, and Samplers, Recordkeeping
5700	Secretaries and Administrative Assistants
5800	Computer Operators
5810	Data Entry Keyers
5820	Word Processors and Typists
5830	Desktop Publishers
5840	Insurance Claims and Policy Processing Clerks
5850	Mail Clerks and Mail Machine Operators, Except Postal Service
5860	Office Clerks, General
5900	Office Machine Operators, Except Computer
5910	Proofreaders and Copy Markers
5920	Statistical Assistants
5930	Office and Administrative Support Workers, All Other

#### **Farming, Fishing, and Forestry Occupations (6000-6130)**

6000	First-Line Supervisors/Managers/Contractors of Farming, Fishing, and Forestry Workers
6010	Agricultural Inspectors
6020	Animal Breeders
6040	Graders and Sorters, Agricultural Products
6050	Other Agricultural Workers
6100	Fishers and Related Fishing Workers
6110	Hunters and Trappers
6120	Forest and Conservation Workers
6130	Logging Workers

#### **Construction Trades and Extraction Workers (6200-6940)**

6200	First-Line Supervisor/Managers of Construction Trades and Extraction Workers
6210	Boilermakers
6220	Brickmasons, Blockmasons, and Stonemasons
6230	Carpenters
6240	Carpet, Floor, and Tile Installers and Finishers
6250	Cement Masons, Concrete Finishers, and Terrazzo Workers
6260	Construction Laborers
6300	Paving, Surfacing, and Tamping Equipment Operations
6310	Pile-Driver Operators
6320	Operating Engineers and Other Construction Equipment Operators
6330	Drywall Installers, Ceiling Tile Installers, and Tapers
6350	Electricians
6360	Glaziers
6400	Insulation Workers
6420	Painters, Construction and Maintenance
6430	Paperhangers
6440	Pipelayers, Plumbers, Pipefitters, and Steamfitters
6460	Plasterers and Stucco Masons
6500	Reinforcing Iron and Rebar Workers
6510	Roofers

2003 Census code	Occupation category
6520	Sheet Metal Workers
6530	Structural Iron and Steel Workers
6600	Helpers, Construction Trades
6660	Construction and Building Inspectors
6700	Elevator Installers and Repairers
6710	Fence Erectors
6720	Hazardous Materials Removal Workers
6730	Highway Maintenance Workers 6740 Rail-Track Laying and Maintenance Equipment Operators
6750	Septic Tank Servicers and Sewer Pipe Cleaners
6760	Miscellaneous Constructions and Related Workers
6800	Derrick, Rotary Drill, and Service Unit Operators, Oil, Gas, and Mining
6820	Earth Drillers, Except Oil and Gas
6830	Explosives Workers, Ordnance Handling Experts, and Blasters
6840	Mining Machine Operators
6910	Roof Bolters, Mining
6920	Roustabouts, Oil and Gas
6930	Helpers – Extraction Workers
6940	Other Extraction Workers

#### **Installation, Maintenance, and Repair's Workers**

7000	First-Line Supervisors/Managers of Mechanics, Installers, and Repairers
7010	Computer, Automated Teller, and Office Machine Repairers
7020	Radio and Telecommunications Equipment Installers and Repairers
7030	Avionics Technicians
7040	Electric Motor, Power Tool, and Related Repairers 49-2092
7050	Electrical and Electronics Installers and Repairers, Transportation Equipment 49-2093
7100	Electrical and Electronics Repairers, Industrial and Utility 49-2094, 49-2095
7110	Electronic Equipment Installers and Repairers, Motor Vehicles 49-2096
7120	Electronic Home Entertainment Equipment Installers and Repairers
7130	Security and Fire Alarm Systems Installers
7140	Aircraft Mechanics and Service Technicians
7150	Automotive Body and Related Repairers
7160	Automotive Glass Installers and Repairers
7200	Automotive Service Technicians and Mechanics
7210	Bus and Truck Mechanics and Diesel Engine Specialists
7220	Heavy Vehicle and Mobile Equipment Service Technicians and Mechanics
7240	Small Engine Mechanics
7260	Miscellaneous Vehicle and Mobile Equipment Mechanics, Installers, and Repairers
7300	Control and Valve Installers and Repairers
7310	Heating, Air Conditioning, and Refrigeration Mechanics and Installers
7320	Home Appliance Repairers
7330	Industrial and Refractory Machinery Mechanics
7340	Maintenance and Repair Workers, General
7350	Maintenance Workers, Machinery 49-9043
7360	Millwrights 49-9044
7410	Electrical Power-Line Installers and Repairers
7420	Telecommunications Line Installers and Repairers
7430	Precision Instrument and Equipment Repairers
7510	Coin, Vending, and Amusement Machine Servicers and Repairers

2003 Census code	Occupation category
7520	Commercial Divers
7540	Locksmiths and Safe Repairers
7550	Manufactured Building and Mobile Home Installers
7560	Riggers
7600	Signal and Track Switch Repairers
7610	Helpers – Installation, Maintenance, and Repair Workers
7620	Other Installation, Maintenance, and Repair Workers

#### **Production and Operating Workers**

7700	First-Line Supervisors/Managers of Production and Operating Workers
7710	Aircraft Structure, Surfaces, Rigging, and Systems Assemblers
7720	Electrical, Electronics, and Electromechanical Assemblers
7730	Engine and Other Machine Assemblers
7740	Structural Metal Fabricators and Fitters
7750	Miscellaneous Assemblers and Fabricators

#### **Food Preparation Occupations**

7800	Bakers
7810	Butchers and Other Meat, Poultry, and Fish Processing Workers
7830	Food and Tobacco Roasting, Baking, and Drying Machine Operators and Tenders
7840	Food Batchmakers
7850	Food Cooking Machine Operators and Tenders

#### **Setter, Operators, and Tenders**

7900	Computer Control Programmers and Operators
7920	Extruding and Drawing Machine Setters, Operators, and Tenders, Metal and Plastic
7930	Forging Machine Setters, Operators, and Tenders, Metal and Plastic
7940	Rolling Machine Setters, Operators, and Tenders, Metal and Plastic
7950	Cutting, Punching, and Press Machine Setters, Operators, and Tenders, Metal and Plastic
7960	Drilling and Boring Machine Tool Setters, Operators, and Tenders, Metal and Plastic
8000	Grinding, Lapping, Polishing, and Buffing Machine Tool Setters, Operators, and Tenders, Metal and Plastic
8010	Lathe and Turning Machine Tool Setters, Operators and Tenders, Metal and Plastic
8020	Milling and Planing Machine Setters, Operators, and Tenders, Metal and Plastic
8030	Machinists
8040	Metal Furnace and Kiln Operators and Tenders
8060	Model Makers and Patternmakers, Metal and Plastic
8100	Molders and Molding Machine Setters, Operators, and Tenders, Metal and Plastic
8120	Multiple Machine Tool Setters, Operators, and Tenders, Metal and Plastic
8130	Tool and Die Makers
8140	Welding, Soldering, and Brazing Workers
8150	Heat Treating Equipment Setters, Operators, and Tenders, Metal and Plastic
8160	Lay-Out Workers, Metal and Plastic
8200	Plating and Coating Machine Setters, Operators, and Tenders, Metal and Plastic
8210	Tool Grinders, Filers, and Sharpeners

2003 Census code	Occupation category
8220	Metalworkers and Plastic Workers, All Other
8230	Bookbinders and Bindery Workers
8240	Job Printers
8250	Prepress Technicians and Workers
8260	Printing Machine Operators
8300	Laundry and Dry-Cleaning Workers
8310	Pressers, Textile, Garment, and Related Materials
8320	Sewing Machine Operator
8330	Shoe and Leather Workers and Repairers
8340	Shoe Machine Operators and Tenders
8350	Tailors, Dressmakers, and Sewers
8360	Textile Bleaching and Dyeing Machine Operators and Tenders
8400	Textile Cutting Machine Setters, Operators, and Tenders
8410	Textile Knitting and Weaving Machine Setters, Operators, and Tenders
8420	Textile Winding, Twisting, and Drawing Out Machine Setters, Operators, and Tenders
8430	Extruding and Forming Machine Setters, Operators, and Tenders, Synthetic and Glass Fibers 51-6091
8440	Fabric and Apparel Patternmakers
8450	Upholsters
8460	Textile, Apparel, and Furnishings Workers, All Other
8500	Cabinetmakers and Bench Carpenters
8510	Furniture Finishers
8520	Model Makers and Patternmakers, Wood
8530	Sawing Machine Setters, Operators, and Tenders, Wood
8540	Woodworking Machine Setters, Operators, and Tenders, Except Sawing
8550	Woodworkers, All Other
8600	Power Plant Operators
8610	Stationary Engineers and Boiler Operators
8620	Water and Liquid Waste Treatment Plant and System Operators
8630	Miscellaneous Plant and System
8640	Chemical Processing Machine Setters, Operators, and Tenders
8650	Crushing, Grinding, Polishing, Mixing, and Blending Workers
8710	Cutting Workers
8720	Extruding, Forming, Pressing, and Compacting Machine Setters, Operators, and Tenders
8730	Furnace, Kiln, Oven, Drier, and Kettle Operators and Tenders
8740	Inspectors, Testers, Sorters, Samplers, and Weighers
8750	Jewelers and Precious Stone and Metal Workers
8760	Medical, Dental, and Ophthalmic Laboratory Technicians
8800	Packaging and Filling Machine Operators and Tenders
8810	Painting Workers
8830	Photographic Process Workers and Processing Machine Operators
8840	Semiconductor Processors
8850	Cementing and Gluing Machine Operators and Tenders
8860	Cleaning, Washing, and Metal Pickling Equipment Operators and Tenders
8900	Cooling and Freezing Equipment Operators and Tenders
8910	Etchers and Engravers

2003 Census code	Occupation category
8920	Molders, Shapers, and Casters, Except Metal and Plastic
8930	Paper Goods Machine Setters, Operators, and Tenders
8940	Tire Builders
8950	Helpers – Production Workers
8960	Production Workers, All Other

#### **Transportation and Material Moving Workers**

9000	Supervisors, Transportation and Material Moving Workers
9030	Aircraft Pilots and Flight Engineers
9040	Air Traffic Controllers and Airfield Operations Specialists
9110	Ambulance Drivers and Attendants, Except Emergency Medical Technicians
9120	Bus Drivers
9130	Driver/Sales Workers and Truck Drivers
9140	Taxi Drivers and Chauffeurs
9150	Motor Vehicle Operators, All Other
9200	Locomotive Engineers and Operators
9230	Railroad Brake, Signal, and Switch Operators
9240	Railroad Conductors and Yardmasters
9260	Subway, Streetcar, and Other Rail Transportation Workers
9300	Sailors and Marine Oilers
9310	Ship and Boat Captains and Operators
9330	Ship Engineers
9340	Bridge and Lock Tenders
9350	Parking Lot Attendants
9360	Service Station Attendants
9410	Transportation Inspectors
9420	Other Transportation Workers
9500	Conveyor Operators and Tenders
9510	Crane and Tower Operators 53-7021
9520	Dredge, Excavating, and Loading Machine Operators 53-7030
9560	Hoist and Winch Operators 53-7041
9600	Industrial Truck and Tractor Operators
9610	Cleaners of Vehicles and Equipment
9620	Laborers and Freight, Stock, and Material Movers, Hand
9630	Machine Feeders and Offbearers
9640	Packers and Packagers, Hand
9650	Pumping Station Operators
9720	Refuse and Recyclable Material Collectors
9730	Shuttle Car Operators
9740	Tank Car, Truck, and Ship Loaders
9750	Material Moving Workers, All Other

#### **Armed Forces (for CPS)**

9840	Armed Forces
------	--------------

#### **CPS Special Codes**

9970	Problem Referral
9990	Not Reported (Includes Refused, Classified, Blank and all other noncodable)

#### **Military Specific Occupations (for ACS)**

9800	Military officer special and tactical operations leaders/managers
9810	First-line enlisted military supervisor/managers
9820	Military enlisted tactical operations and air/weapons specialists and crew members

2003 Census code	Occupation category
9830	Military, rank not specified

#### **ACS Special Codes**

9950	Not in Labor Force
9960	Retired
9970	Problem Referral
9990	Uncodable (includes Refused or Classified)

## **APPENDIX E**

### **Occupational Classification System for Analytic Recodes**

2003 Census Code	Occupation category
<b>1</b>	<b>Executive, Administrative, and Managerial Occupations</b>
	Chief Executives General and Operations Managers Legislators Advertising and Promotions Managers Marketing and Sales Managers Public Relations Managers Administrative Services Managers Computer and Information Systems Managers Financial Managers Human Resources Managers Industrial Production Managers Purchasing Managers Transportation, Storage, and Distribution Managers Farm, Ranch, and Other Agricultural Managers Farmers and Ranchers Construction Managers Education Administrators Engineering Managers Food Service Managers Funeral Directors Gaming Managers Lodging Managers Medical and Health Services Managers Natural Sciences Managers Postmasters and Mail Superintendents Property, Real Estate, and Community Association Managers Social and Community Service Managers Managers, All Other
<b>2</b>	<b>Management Related Occupations</b>
	Agents and Business Managers of Artists, Performers, and Athletes Purchasing Agents and Buyers, Farm Products Wholesale and Retail Buyers, Except Farm Products Purchasing Agents, Except Wholesale, Retail, and Farm Products Claims Adjusters, Appraisers, Examiners, and Investigators Compliance Officers, Except Agriculture, Construction, Health and Safety, and Transportation Cost Estimators Human Resources, Training, and Labor Relations Specialists Logisticians Management Analysts Meeting and Convention Planners Other Business Operations Specialists

## **APPENDIX F**

### **Industry Classification System**

2003 Census code	Industry category
<b>Agriculture, Forestry, Fishing and Hunting</b>	
0170	Crop production
0180	Animal production
0190	Forestry except Logging
0270	Logging
0280	Fishing, hunting, and trapping
0290	Support activities for agriculture and forestry
<b>Mining</b>	
0370	Oil and gas extraction
0380	Coal mining
0390	Metal ore mining
0470	Nonmetallic mineral mining and quarrying
0480	Not specified type of mining
0490	Support activities for mining
<b>Utilities</b>	
0570	Electric power generation, transmission and distribution
0580	Natural gas distribution
0590	Electric and gas, and other combinations
0670	Water, steam, air conditioning, and irrigation systems
0680	Sewage treatment facilities
0690	Not specified utilities
<b>Construction</b>	
0770	Constructions (Includes the cleaning of buildings and dwellings is incidental during construction and immediately after construction)
<b>Food Manufacturing</b>	
1070	Animal food, grain and oilseed milling
1080	Sugar and confectionery products
1090	Fruit and vegetable preserving and specialty foods
1170	Dairy products
1180	Animal slaughtering and processing
1190	Retail bakeries
1270	Bakeries, except retail
1280	Seafood and other miscellaneous food
1290	Not specified food industries
<b>Beverage and Tobacco Products Manufacturing</b>	
1370	Beverage
1390	Tobacco
<b>Textile Mills and Textile Product Mills</b>	
1470	Fiber, yarn, and thread mills
1480	Fabric mills, except knitting
1490	Textile and fabric finishing and coating mills
1570	Carpets and rugs
1590	Textile product mills except carpets and rugs
<b>Apparel Manufacturing</b>	
1670	Knitting mills
1680	Cut and sew apparel
1690	Apparel accessories and other apparel
<b>Leather and Allied Product Manufacturing</b>	
1770	Footwear
1790	Leather tanning and products, except footwear

2003 Census code	Industry category
<b>Paper Manufacturing</b>	
1870	Pulp, paper, and paperboard mills
1880	Paperboard containers and boxes
1890	Miscellaneous paper and pulp products
<b>Printing and Related Support Activities</b>	
1990	Printing and related support activities
<b>Petroleum and Coal Products Manufacturing</b>	
2070	Petroleum refining
2090	Miscellaneous petroleum and coal products
<b>Chemical Manufacturing</b>	
2170	Resin, synthetic rubber and fibers, and filaments
2180	Agricultural chemicals
2190	Pharmaceuticals and medicines
2270	Paint, coating, and adhesives
2280	Soap, cleaning compound, and cosmetics
2290	Industrial and miscellaneous chemicals
<b>Plastics and Rubber Product Manufacturing</b>	
2370	Plastics products
2380	Tires
2390	Rubber products, except tires
<b>Nonmetallic Mineral Product Manufacturing</b>	
2470	Pottery, ceramics, and related products
2480	Structural clay products
2490	Glass and glass products
2570	Cement, concrete, lime, and gypsum products
2590	Miscellaneous nonmetallic mineral products
<b>Metal Industries</b>	
2670	Iron and steel mills and steel products
2680	Aluminum production and processing
2690	Nonferrous metal, except aluminum, production and processing
2770	Foundries
2780	Metal forgings and stampings
2790	Cutlery and hand tools
2870	Structural metals, and tank and shipping containers
2880	Machine shops; turned products; screws, nuts and bolts
2890	Coating, engraving, heat treating and allied activities
2970	Ordnance
2980	Miscellaneous fabricated metal products
2990	Not specified metal industries
<b>Machinery Manufacturing</b>	
3070	Agricultural implements
3080	Construction mining and oil field machinery
3090	Commercial and service industry machinery
3170	Metalworking machinery
3180	Engines, turbines, and power transmission equipment
3190	Machinery
3290	Not specified machinery

2003 Census code	Industry category
<b>Computer and Electronic Product Manufacturing</b>	
3360	Computer and peripheral equipment
3370	Communications, audio, and video equipment
3380	Navigational, measuring, electrometrical, and control instruments
3390	Electronic components and products
<b>Electrical Equipment, Appliances, and Component Manufacturing</b>	
3470	Household appliances
3490	Electrical machinery, equipment, and supplies
<b>Transportation Equipment Manufacturing</b>	
3570	Motor vehicles and motor vehicle equipment
3580	Aircraft and parts
3590	Aerospace products and parts
3670	Railroad rolling stock
3680	Ship and boat building
3690	Other transportation equipment
<b>Wood Products, including Furniture, Manufacturing</b>	
3770	Sawmills and wood preservation
3780	Veneer, plywood, and engineered wood products
3790	Prefabricated wood buildings and mobile homes
3870	Miscellaneous wood products
3890	Furniture and fixtures
<b>Miscellaneous Manufacturing</b>	
3960	Medical equipment and supplies
3970	Toys, amusement, and sporting goods
3980	Miscellaneous manufacturing
3990	Not specified industries
<b>Durable Goods, Wholesalers</b>	
4070	Motor vehicles, parts and supplies
4080	Furniture and home furnishing
4090	Lumber and other construction materials
4170	Professional and commercial equipment and supplies
4180	Metals and minerals, except petroleum
4190	Electrical goods
4260	Hardware, plumbing and heating equipment, and supplies
4270	Machinery, equipment, and supplies
4280	Recyclable materials
4290	Miscellaneous durable goods
<b>Nondurable Goods, Wholesalers</b>	
4370	Paper and paper products
4380	Drugs, sundries, and chemical and allied products
4390	Apparel, fabrics, and notions
4470	Groceries and related products
4480	Farm product raw materials
4490	Petroleum and petroleum products
4560	Alcoholic beverages
4570	Farm supplies
4580	Miscellaneous nondurable goods
*4585	Wholesale electronic markets, agents, and brokers
4590	Not specified trade

2003 Census code	Industry category
<b>Retail Trade</b>	
4670	Automobile dealers
4680	Other motor vehicle dealers
4690	Auto parts, accessories, and tire stores
4770	Furniture and home furnishings stores
4780	Household appliance stores
4790	Radio, TV, and computer stores
4870	Building material and supplies dealers
4880	Hardware stores
4890	Lawn and garden equipment and supplies stores
4970	Grocery stores
4980	Specialty food stores
4990	Beer, wine, and liquor stores
5070	Pharmacies and drug stores
5080	Health and personal care, except drug
5090	Gasoline stations
5170	Clothing and accessories, except shoe
5180	Shoe stores
5190	Jewelry, luggage, and leather goods stores
5270	Sporting goods, camera, and hobby and toy stores
5280	Sewing, needlework and piece goods stores
5290	Music stores
5370	Book stores and news dealers
5380	Department stores and Discount stores
5390	Miscellaneous general merchandise stores
5470	Retail florists
5480	Office supplies and stationary stores
5490	Used merchandise stores
5570	Gift, novelty, and souvenir shops
5580	Miscellaneous stores
5590	Electronic shopping
*5591	Electronic auctions
*5592	Mail order houses
5670	Vending machine operators
5680	Fuel dealers
5690	Other direct selling establishments
5790	Not specified trade
<b>Transportation and Warehousing</b>	
6070	Air transportation
6080	Rail transportation
6090	Water transportation
6170	Truck transportation
6180	Bus service and urban transit
6190	Taxi and limousine service
6270	Pipeline transportation
6280	Scenic and sightseeing transportation
6290	Services incidental to transportation
6370	Postal Service
6380	Couriers and messengers
6390	Warehousing and storage
<b>Publishing Industries</b>	
6470	Newspaper publishers
6480	Publishing, except newspapers and software
6490	Software publishing
6570	Motion pictures and video industries
6590	Sound recording industries

2003  
 Census Industry category  
 code

#### Broadcasting and Telecommunications

6670 Radio and television broadcasting and cable  
 \*6675 \*\*\*Internet and publishing and broadcasting  
 6680 Wired telecommunications carriers  
 6690 Other telecommunication services  
 \*6692 \*\*\*Internet service providers  
 \*6695 \*\*Data processing, hosting, and related services

#### Information Services and Data Processing Services

6770 Libraries and archives  
 6780 Other information services

#### Finance and Insurance

6870 Banking and related activities  
 6880 Savings institutions, including credit unions  
 6890 Non-depository credit and related activities  
 6970 Securities, commodities, funds, trusts, and other financial investments  
 6990 Insurance carriers and related activities

#### Real Estate and Rental and Leasing

7070 Real estate  
 7080 Automotive equipment rental and leasing  
 7170 Video tape and disk rental  
 7180 Other consumer goods rental  
 7190 Commercial, industrial, and other intangible assets rental and leasing

#### Professional, Scientific, and Technical Services

7270 Legal services  
 7280 Accounting, tax preparation, bookkeeping and payroll services  
 7290 Architectural, engineering, and related services  
 7370 Specialized design services  
 7380 Computer systems design and related services  
 7390 Management, scientific and technical consulting services  
 7460 Scientific research and development services  
 7470 Advertising and related services  
 7480 Veterinary services  
 7490 Other professional, scientific and technical services

#### Management, Administrative and Support, and Waste Management Services

7570 Management of companies and enterprises  
 7580 Employment services  
 7590 Business support services  
 7670 Travel arrangements and reservation services  
 7680 Investigation and security services  
 7690 \*\*Services to buildings and dwellings (except cleaning during construction and immediately after construction)  
 7770 Landscaping services  
 7780 Other administrative, and other support services  
 7790 Waste management and remediation services

#### Educational Services

7860 Elementary and secondary school  
 7870 Colleges, including junior colleges, and universities  
 7880 Business, technical, and trade schools and training  
 7890 other schools, instruction and educational services

2003  
 Census Industry category  
 code

#### Health Care

7970 Offices of physicians  
 7980 Offices of dentists  
 7990 Office of chiropractors  
 8070 Offices of optometrists  
 8080 Offices of other health practitioners  
 8090 Outpatient care centers  
 8170 Home health care services  
 8180 Other health care services  
 8190 Hospitals  
 8270 Nursing care facilities  
 8290 Residential care facilities, without nursing

#### Social Assistance

8370 Individual and family services  
 8380 Community food and housing, and emergency services  
 8390 Vocational rehabilitation services  
 8470 Child day care services

#### Arts, Entertainment, and Recreation

8560 Independent artists, performing arts, spectator sports and related industries  
 8570 Museums, art galleries, historical sites, and similar institutions  
 8580 Bowling centers  
 \* 8590 Other amusement, gambling, and recreation industries

#### Accommodations and Food Services

8660 Traveler accommodation  
 8670 Recreational vehicle parks and camps, and rooming and boarding houses  
 8680 Restaurants and other food services  
 8690 Drinking places, alcohol beverages

#### Repair and Maintenance

8770 Automotive repair and maintenance  
 8780 Car washes  
 8790 Electronic and precision equipment repair and maintenance  
 8870 Commercial and industrial machinery and equipment repair and maintenance  
 8880 Personal and household goods repair and maintenance  
 8890 Footwear and leather goods repair

#### Personal and Laundry Services

8970 Barber shops  
 8980 Beauty salons  
 8990 Nail salons and other personal care services  
 9070 Dry cleaning and laundry services  
 9080 Funeral homes, cemeteries and crematories  
 9090 Other personal services

#### Religious, Grantmaking, Civic, Business, and Similar Organizations

9160 Religious organizations  
 9170 Civic, social, advocacy organizations and grantmaking and giving services  
 9180 Labor unions  
 9190 Business, professional, political and similar organizations

## **APPENDIX H**

### **Recoded Substance Dependence and Abuse Variable Documentation**

*This page intentionally left blank*

The 2011 National Survey on Drug Use and Health (NSDUH) computer-assisted interviewing (CAI) instrumentation included questions that were designed to measure dependence and abuse of illicit drugs, alcohol, and dependence on nicotine (cigarettes). For nicotine (cigarettes), questions pertaining to dependence were based on criteria from the Nicotine Dependence Syndrome Scale (NDSS; Shiffman, Hickcox, Gnys, Paty, & Kassel, 1995; Shiffman, Waters, & Hickcox, 2004) and the Fagerstrom Test of Nicotine Dependence (FTND; Fagerstrom, 1978; Heatherton, Kozlowski, Frecker, & Fagerstrom, 1991). The above-mentioned criteria were first used to measure nicotine dependence in NSDUH in 2003. For substances other than nicotine (cigarettes), which include alcohol, cocaine, heroin, pain relievers, sedatives, marijuana, tranquilizers, stimulants, hallucinogens, and inhalants, dependence and abuse questions were based on the criteria in the *Diagnostic and Statistical Manual of Mental Disorders (DSM-IV)*, 4<sup>th</sup> edition (American Psychiatric Association [APA], 1994). Due to the complexity of defining the dependence and abuse variables, additional details regarding the creation of these variables are included in this appendix.

Given the current editing and imputation procedures, along with the use of both core and noncore questions to determine whether a respondent was asked the dependence and abuse questions, users should be aware of the possible inconsistencies that may exist between the dependence and abuse variables and the imputed substance use and frequency of use variables for selected substances.

Responses from core substance use, frequency of substance use, and noncore substance use questions were used as criteria to determine whether a respondent was asked the alcohol and/or illicit drug dependence and abuse questions. Unknown responses to the core substance use and frequency of substance use questions were imputed. However, the imputation process did not take into account data reported in the noncore CAI modules. Therefore, responses to the dependence and abuse questions that were inconsistent with responses to the imputed substance use or frequency of use questions could exist. These inconsistent responses remained in the edited data and were not excluded in the creation of the dependence and abuse recodes. Since different sets of criteria were used as skip logic for each substance, different types of inconsistencies between the dependence and abuse variables and the imputed substance use and frequency of substance use variables could occur by substance. These inconsistencies are discussed in further detail in the appropriate sections on each substance.

Differences also exist between the methodologies used for determining dependence on nicotine (cigarettes) and for determining dependence on other substances. For example, to classify as nicotine (cigarette) dependent, a respondent must be a past month user of cigarettes. However, to classify as dependent on one of the other substances by *DSM-IV* criteria, a respondent must be a past year user of that substance. A second difference is that the Nicotine Dependence Syndrome Scale (NDSS) questions are imputed in order to optimize the number of respondents who may be classified for nicotine (cigarette) dependence, unlike the *DSM-IV* dependence questions that are used in the nonimputed, edited form.

## Nicotine (Cigarette) Dependence

The 2011 NSDUH CAI questions designed to assess nicotine (cigarette) dependence were based on the NDSS and the FTND. To identify patterns of nicotine (cigarette) dependence within the 2011 NSDUH data, variable indicators were created to measure dependence on nicotine through the use of cigarettes. A respondent was defined as being dependent if he or she met either the NDSS or the FTND criteria for dependence.

### Nicotine Dependence Syndrome Scale (NDSS):

The conceptual roots of the NDSS are similar to those behind the *DSM-IV* concept of dependence (Edwards & Gross, 1976). The 2011 NSDUH contains 19 NDSS questions that address five aspects of dependence:

1. Smoking drive (compulsion to smoke driven by nicotine craving and withdrawal)
  - a. After not smoking for a while, you need to smoke in order to feel less restless and irritable (IRCGIRTB)
  - b. When you don't smoke for a few hours, you start to crave cigarettes (IRCGCRV)
  - c. You sometimes have strong cravings for a cigarette where it feels like you're in the grip of a force you can't control (IRCGCRGP)
  - d. You feel a sense of control over your smoking - that is, you can "take it or leave it" at any time (IRCGNCTL)
  - e. You sometimes worry that you will run out of cigarettes (IRCGROUT).
2. Nicotine tolerance
  - a. Since you started smoking, the amount you smoke has increased (IRCGINCR)
  - b. Compared to when you first started smoking, you need to smoke a lot more now in order to be satisfied (IRCGSAT)
  - c. Compared to when you first started smoking, you can smoke much, much more now before you start to feel anything (IRCGLMR).
3. Continuous smoking
  - a. You smoke cigarettes fairly regularly throughout the day (IRCGRGDY)
  - b. You smoke about the same amount on weekends as on weekdays (IRCGRGWK)
  - c. You smoke just about the same number of cigarettes from day to day (IRCGRGNM)
  - d. It's hard to say how many cigarettes you smoke per day because the number often changes (IRCGNCG)
  - e. It's normal for you to smoke several cigarettes in an hour, then not have another one until hours later (IRCGSLHR).
4. Behavioral priority (preferring smoking over other reinforcing activities)
  - a. You tend to avoid places that don't allow smoking, even if you would otherwise enjoy them (IRCGAVD)
  - b. There are times when you choose not to be around your friends who don't smoke because they won't like it if you smoke (friends question - CIGFNLKE)
  - c. Even if you're traveling a long distance, you'd rather not travel by airplane because you wouldn't be allowed to smoke (IRCGPLN).
5. Stereotypy (fixed patterns of smoking)
  - a. Do you have any friends who do not smoke cigarettes (friends question - CIGFNSMK)

- b. The number of cigarettes you smoke per day is often influenced by other things - how you're feeling, or what you're doing, for example (IRCGINFL)
- c. Your smoking is not affected much by other things. For example, you smoke about the same amount whether you're relaxing or working, happy or sad, alone or with others (IRCGNINF).

Each of these five domains can be assessed by a separate measure, but an average score across all domains also can be obtained for overall nicotine dependence (Shiffman et al., 2004). The NDSS algorithm for calculating this average score was based on the respondent's answers to 17 of the 19 questions listed above. The items regarding nonsmoking friends (4b - CIGFNLKE and 5a - CIGFNSMK) were excluded due to higher item nonresponse rates.

For respondents who answered 16 of the 17 NDSS nicotine (cigarette) dependence questions used in the NDSS algorithm, imputation using the 16 answered NDSS items as covariates in a weighted least squares regression model was implemented (Frechtel et al., 2013).

Responses to items IRCGIRTB, IRCGCRV, IRCGCRGP, IRCGAVD, IRCGPLN, IRCGROUT, IRCGRGDY, IRCGRGWK, IRCGRGNM, IRCGNINF, IRCGINCR, IRCGSAT, and IRCGLMR were coded from 1 to 5 where

- 1= Not at all true
- 2= Somewhat true
- 3= Moderately true
- 4= Very true
- 5= Extremely true

Responses to items IRCGNCTL, IRCGNCG, IRCGSLHR, and IRCGINFL were reverse coded from 5 to 1 where

- 5= Not at all true
- 4= Somewhat true
- 3= Moderately true
- 2= Very true
- 1= Extremely true

For respondents who reported smoking cigarettes in the past month, the NDSS score, NDSSANSP, was calculated as the sum of the responses to the previous questions divided by 17. The NDSS score was calculated only for those who had responses to all 17 questions after imputation. If a respondent did not have valid responses (based on actual reporting and imputation) to all 17 questions, then his or her NDSS score was defined as missing.

A respondent was defined as nicotine dependent, NDSSDNSP=1, if the NDSS score was greater than or equal to 2.75. If the NDSS score was less than 2.75 or missing, then the respondent was determined to be nondependent, NDSSDNSP=0, based on the NDSS. The threshold of 2.75 was derived by examining the distribution of scores in other samples of smokers who were administered the NDSS, including a contrast of scores obtained for nondependent smokers (chippers) versus heavy smokers (Shiffman, Paty, Kassel, Gnys, & Zettler-Segal, 1994).

**Fagerstrom Test of Nicotine Dependence (FTND):**

The FTND is a multi-item measure of dependence, but much of its ability to discriminate dependent smokers derives from a single item assessing how soon after waking smokers have their first cigarette (Heatherton, Kozlowski, Frecker, Rickert, & Robinson, 1989). Because most nicotine is cleared from the bloodstream overnight, smokers typically wake in nicotine deprivation, and rapid movement to smoke is considered a sign of dependence. A respondent who reported smoking cigarettes in the past month was defined as nicotine dependent based on the FTND, FTNDDNSP, if the first cigarette smoked was within 30 minutes of waking up on the days he or she smoked (CIGWAKE=1 or 2).

**Nicotine (Cigarette) Dependence:**

Using both the NDSS and the FTND, a respondent was defined as having nicotine (cigarette) dependence in the past month, DNICNSP, if he or she met either the NDSS (NDSSDNSP=1) or FTND (FTNDDNSP=1) criteria for dependence.

## ***DSM-IV Dependence and Abuse***

The 2011 NSDUH CAI questions were designed to assess substance dependence and abuse of alcohol and illicit drugs based on the criteria for dependence and abuse in the *DSM-IV* (APA, 1994). For marijuana, inhalants, hallucinogens, and tranquilizers, a respondent was defined as having dependence if he or she met three or more of six standard dependence criteria. A seventh withdrawal criterion was added for alcohol, pain relievers, cocaine, heroin, sedatives, and stimulants. A respondent was defined as having dependence if he or she met three or more of seven dependence criteria. For each illicit drug and alcohol, a respondent was defined as having abused that substance if he or she met one or more of four abuse criteria and was determined not to be dependent upon the substance of interest.

Dependence and abuse variables are mutually exclusive with dependence taking precedence (i.e., dependence is determined first and respondents are only classified as having been abused if they are not already classified as dependent, regardless of responses to the abuse questions). Therefore, it is possible for the variables showing abuse of a combination of substances to not correspond with the abuse status of those individual substances. For example, a respondent who is classified as having abused cocaine in the past year may be classified as not having abused illicit drugs because he or she was dependent on marijuana and already classified as being dependent on illicit drugs.

For alcohol and marijuana, the criteria used to determine whether a respondent was asked the dependence and abuse questions included past year use of the respective substance and reported use of the respective substance on more than 5 days in the past year. Because respondents were asked the dependence and abuse questions if they reported substance use in the past year, regardless of whether they reported their frequency of substance use in the past year, inconsistencies could occur where the imputed frequency of use variable indicated less frequent use than required for respondents to be asked the dependence and abuse questions originally.

For heroin and cocaine, the criteria included reporting past year use in a core drug module or past year use in the noncore special drugs module. Inconsistencies could occur when core substance use variables indicated no use in the past year but a dependence and abuse variable indicated substance dependence or abuse.

For pain relievers, tranquilizers, and inhalants, the only criterion used was that the respondent reported past year use of the respective substance. Thus, no inconsistencies could occur where the respondent was considered a nonuser of the substance but was dependent on or abusing the substance.

For stimulants, prior to the 2005 NSDUH, the criteria included only reporting past year stimulant use in a core drug module or past year use in the noncore special drugs module. Inconsistencies could occur when either the core or the noncore substance use variables indicated no use in the past year but a dependence and abuse variable indicated substance dependence or abuse. In 2005 and 2006, new questions were added to the noncore special drugs module to identify respondents who had used methamphetamine but had failed to report it in the core prescription stimulant module because they did not think of methamphetamine as a prescription drug. In 2005, new questions were added concerning past year methamphetamine use: "Have you ever, even once, used methamphetamine?" and "Have you ever, even once, used a needle to inject methamphetamine?" In 2006, an additional follow-up consistency question was added to confirm prior responses about methamphetamine use: "Earlier, the computer recorded that you have never used methamphetamine. Which answer is correct?" Persons identified as methamphetamine users in these new questions were also administered the stimulant dependence

and abuse questions. However, based on the decisions made during the analysis of the new methamphetamine data,<sup>1</sup> respondents who met the criteria for stimulant dependence or abuse but had reported past year methamphetamine use *only* on these new 2005 and 2006 special drug use questions (i.e., did not indicate methamphetamine use from the core drug module or other questions in the noncore special drugs module) were categorized as NOT having past year stimulant dependence or abuse. In the 2008 NSDUH, the skip logic was further modified allowing respondents who reported using Adderall® in the noncore special drugs section but failed to report it in the core prescription stimulant module to be asked the stimulant dependence and abuse questions. Consistent with the decision made for the new methamphetamine questions, those respondents who met the criteria for stimulant dependence or abuse based only on the new Adderall® questions were also categorized as NOT having past year stimulant dependence or abuse. This decision prevents additional inconsistencies between core and noncore indicators of use. Furthermore, if these same respondents were categorized as not having past year dependence on or abuse of any other substance (e.g., pain relievers, tranquilizers, or sedatives for the psychotherapeutic drug grouping), then they were categorized as NOT having past year dependence on or abuse of psychotherapeutics, illicit drugs, illicit drugs or alcohol, and illicit drugs and alcohol.

For hallucinogens and sedatives, prior to the 2008 NSDUH, the criteria included only reporting past year use in a core drug module. Thus, no inconsistencies could occur where the respondent was considered a nonuser of the substance but was dependent on or abusing the substance. In 2008, questionnaire logic for determining hallucinogen and sedative dependence or abuse was modified. The revised skip logic used information collected in the noncore special drugs module in addition to questions from the core drug modules. Respondents were asked about hallucinogen dependence and abuse if they reported in the noncore special drugs module additionally using Ketamine, DMT, AMT, Foxy, or *Salvia divinorum* and were asked about sedative dependence and abuse if they reported additionally using Ambien®. Consistent with the previous decision to exclude respondents whose methamphetamine use was based solely on responses in a noncore module from being classified as having dependence or abuse, respondents who indicated past year hallucinogen or sedative use based solely on these noncore special drug questions were categorized as NOT having past year dependence or abuse regardless of how they answered the dependence and abuse questions. This decision prevents any inconsistencies between core and noncore indicators of use for these drugs. Further details are provided in Section B.4.3 of Appendix B of the 2009 summary of national findings (Office of Applied Studies, 2010a; 2010b).

A respondent might have provided ambiguous information about past year use of any individual substance, in which case these respondents were not asked the dependence and abuse questions for that substance. Subsequently, these respondents could be imputed to be past year users of the respective substance. In this situation, the dependence and abuse data were unknown. Thus, these respondents were classified as not dependent on or abusing the respective substance, without ever having been asked the dependence and abuse questions.

Listed below are the definitions used for each of the individual dependence and abuse measures, as well as specific notes about inconsistency issues for each measure. Additional variables were created using a combination of these individual dependence and abuse measures and are listed in the main part of the codebook.

---

<sup>1</sup> See Section B.4.8 of Appendix B in the 2008 NSDUH national findings for more details on the methamphetamine analysis (Office of Applied Studies, 2009).

## **Substance Dependence Recodes Defined with Withdrawal Criteria**

### **ALCOHOL:**

To be defined with alcohol dependence, DEPNDALC, a respondent must have met three or more of these alcohol dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of alcohol (ALCLOTTM=1 or ALCGTOVR=1)
- (2) Used alcohol more often than intended or was unable to keep set limits on alcohol use (ALCKPLMT=2)
- (3) Needed to use alcohol more than before to get desired effects or noticed that same amount of alcohol use had less effect than before (ALCNDMOR=1 or ALCLSEFX=1)
- (4) Inability to cut down or stop using alcohol every time tried or wanted to (ALCCUTEV=2)
- (5) Continued to use alcohol even though it was causing problems with emotions, nerves, mental health, or physical problems (ALCEMCTD=1 or ALCPHCTD=1)
- (6) Alcohol use reduced or eliminated involvement or participation in important activities (ALCLSACT=1)
- (7) Reported experiencing two or more alcohol withdrawal symptoms at the same time that lasted longer than a day after alcohol use was cut back or stopped. Symptoms include (i) sweating or feeling that heart was beating fast, (ii) having hands tremble, (iii) having trouble sleeping, (iv) vomiting or feeling nauseous, (v) seeing, hearing, or feeling things that were not really there, (vi) feeling like could not sit still, (vii) feeling anxious, and (viii) having seizures or fits. (ALCWDSMT=1).

Note: A respondent could answer the dependence questions if he or she reported using alcohol in the past year, regardless of whether he or she reported the frequency of days in which he or she drank an alcoholic beverage. Thus, cases may exist where a respondent was classified as dependent on alcohol but drank an alcoholic beverage less than 6 days in the past year according to the imputed frequency of use variable (IRALCFY).

### **COCAINE:**

To be defined with cocaine dependence, DEPNDCOC, a respondent must have met three or more of these cocaine dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of cocaine (COCLOTTM=1 or COCGTOVR=1)
- (2) Used cocaine more often than intended or was unable to keep set limits on cocaine use (COCKPLMT=2)
- (3) Needed to use cocaine more than before to get desired effects or noticed that same amount of cocaine use had less effect than before (COCNDMOR=1 or COCLSEFX=1)
- (4) Inability to cut down or stop using cocaine every time tried or wanted to (COCCUTEV=2)
- (5) Continued to use cocaine even though it was causing problems with emotions, nerves, mental health, or physical problems (COCCEMCTD=1 or COCPHCTD=1)
- (6) Cocaine use reduced or eliminated involvement or participation in important activities (COCLSACT=1)

- (7) Reported feeling blue or down when trying to stop or cut down using cocaine (COCFLBLU=1) as well as experiencing two or more additional cocaine withdrawal symptoms at the same time that lasted longer than a day after cocaine use was cut back or stopped. Symptoms include (i) feeling tired or exhausted, (ii) having bad dreams, (iii) having trouble sleeping or sleeping more than normal, (iv) feeling hungry more often, and (v) feeling either very slowed down or could not sit still. (COCWDSMT=1).

Note: A respondent could answer the dependence questions if he or she reported injecting cocaine with a needle in the past year, even if he or she reported not using cocaine in the past year. Thus, cases may exist where a respondent was classified as being dependent on cocaine, even though he or she had not used cocaine in the past year according to the imputed recency variable (COCYR).

## **HEROIN:**

To be defined with heroin dependence, DEPNDHER, a respondent must have met three or more of these heroin dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of heroin (HERLOTTM=1 or HERGTOVR=1)
- (2) Used heroin more often than intended or was unable to keep set limits on heroin use (HERKPLMT=2)
- (3) Needed to use heroin more than before to get desired effects or noticed that same amount of heroin use had less effect than before (HERNDMOR=1 or HERLSEFX=1)
- (4) Inability to cut down or stop using heroin every time tried or wanted to (HERCUTEV=2)
- (5) Continued to use heroin even though it was causing problems with emotions, nerves, mental health, or physical problems (HEREMCTD=1 or HERPHCTD=1)
- (6) Heroin use reduced or eliminated involvement or participation in important activities (HERLSACT=1)
- (7) Reported experiencing three or more heroin withdrawal symptoms at the same time that lasted longer than a day after heroin use was cut back or stopped. Symptoms include (i) feeling kind of blue or down, (ii) vomiting or feeling nauseous, (iii) having cramps or muscle aches, (iv) having teary eyes or a runny nose, (v) feeling sweaty, having enlarged eye pupils, or having body hair standing up on skin, (vi) having diarrhea, (vii) yawning, (viii) having a fever, and (ix) having trouble sleeping. (HERWDSMT=1).

Note: A respondent could answer the dependence questions if he or she reported injecting with a needle, smoking, sniffing, or snorting heroin in the past year, even if he or she reported not using heroin in the past year. Thus, cases may exist where a respondent was classified as dependent on heroin, even though he or she had not used heroin in the past year according to the imputed recency variable (HERYR).

## **PAIN RELIEVERS:**

To be defined with pain reliever dependence, DEPNDANL, a respondent must have met three or more of these pain reliever dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of pain relievers (ANLLOTTM=1 or ANLGTOVR=1)

- (2) Used pain relievers more often than intended or was unable to keep set limits on pain reliever use (ANLKPLMT=2)
- (3) Needed to use pain relievers more than before to get desired effects or noticed that same amount of pain reliever use had less effect than before (ANLNDMOR=1 or ANLLSEFX=1)
- (4) Inability to cut down or stop using pain relievers every time tried or wanted to (ANLCUTEV=2)
- (5) Continued to use pain relievers even though they were causing problems with emotions, nerves, mental health, or physical problems (ANLEMCTD=1 or ANLPHCTD=1)
- (6) Pain reliever use reduced or eliminated involvement or participation in important activities (ANLLSACT=1)
- (7) Reported experiencing three or more pain reliever withdrawal symptoms at the same time that lasted longer than a day after pain reliever use was cut back or stopped. Symptoms include (i) feeling kind of blue or down, (ii) vomiting or feeling nauseous, (iii) having cramps or muscle aches, (iv) having teary eyes or a runny nose, (v) feeling sweaty, having enlarged pupils, or having body hair standing up on skin, (vi) having diarrhea, (vii) yawning, (viii) having a fever, and (ix) having trouble sleeping. (ANLWDSMT=1).

## **SEDATIVES:**

To be defined with sedative dependence, DEPNDSED, a respondent must have been routed to the dependence and abuse questions in 2011 based on variables in the skip logic that existed in 2007 (SEDDAFLG=98) and must have met three or more of these sedative dependence criteria (i.e., respondents who indicated sedative use based only on responses from the questions in the noncore special drugs module added to the skip logic in 2008 were defined as NOT having past year sedative dependence):

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of sedatives (SEDLOTTM=1 or SEDGTOVR=1)
- (2) Used sedatives more often than intended or was unable to keep set limits on sedative use (SEDKPLMT=2)
- (3) Needed to use sedatives more than before to get desired effects or noticed that same amount of sedative use had less effect than before (SEDNDMOR=1 or SEDLSEFX=1)
- (4) Inability to cut down or stop using sedatives every time tried or wanted to (SEDCUTEV=2)
- (5) Continued to use sedatives even though they were causing problems with emotions, nerves, mental health, or physical problems (SEDEMCTD=1 or SEDPHCTD=1)
- (6) Sedative use reduced or eliminated involvement or participation in important activities (SEDLSACT=1)
- (7) Reported experiencing two or more sedative withdrawal symptoms at the same time that lasted longer than a day after sedative use was cut back or stopped. Symptoms include (i) sweating or feeling that heart was beating fast, (ii) having hands tremble, (iii) having trouble sleeping or sleeping more than normal, (iv) vomiting or feeling nauseous, (v) seeing, hearing, or feeling things that were not really there, (vi) feeling like could not sit still, (vii) feeling anxious, and (viii) having seizures or fits. (SEDWDSMT=1).

## STIMULANTS:

To be defined with stimulant dependence, DEPNDSTM, a respondent must have been routed to the dependence and abuse questions in 2011 based on variables in the skip logic that existed in 2004 (STMDAFLG=98) and must have met three or more of these stimulant dependence criteria (i.e., respondents who did not indicate methamphetamine use or other stimulant use from the core drug module or questions in the noncore special drugs module [other than the questions added in 2005, 2006, and 2008 as mentioned above] and who met three or more of these stimulant dependence criteria were categorized as NOT having past year stimulant dependence):

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of stimulants (STMLOTTM=1 or STMGTOVR=1)
- (2) Used stimulants more often than intended or was unable to keep set limits on stimulant use (STMKPLMT=2)
- (3) Needed to use stimulants more than before to get desired effects or noticed that same amount of stimulant use had less effect than before (STMNDMOR=1 or STMLSEFX=1)
- (4) Inability to cut down or stop using stimulants every time tried or wanted to (STMCUTEV=2)
- (5) Continued to use stimulants even though they were causing problems with emotions, nerves, mental health, or physical problems (STMEMCTD=1 or STMPHCTD=1)
- (6) Stimulant use reduced or eliminated involvement or participation in important activities (STMLSACT=1)
- (7) Reported feeling blue or down when trying to stop or cut down using stimulants (STMFLBLU=1) as well as experiencing two or more additional stimulant withdrawal symptoms at the same time that lasted longer than a day after stimulant use was cut back or stopped. Symptoms include (i) feeling tired or exhausted, (ii) having bad dreams, (iii) having trouble sleeping or sleeping more than normal, (iv) feeling hungry more often, and (v) feeling either very slowed down or like could not sit still. (STMWDSMT=1).

Note: A respondent could answer the dependence questions if he or she reported injecting stimulants (including methamphetamine) with a needle in the past year, even if he or she reported not using stimulants in the past year. Thus, cases may exist where a respondent was classified as being dependent on stimulants, even though he or she had not used stimulants in the past year according to the imputed recency variable (CPNSTMYR).

## **Substance Dependence Recodes Defined without Withdrawal Criteria**

### **HALLUCINOGENS:**

To be defined with hallucinogen dependence, DEPNDHAL, a respondent must have been routed to the dependence and abuse questions in 2011 based on variables in the skip logic that existed in 2007 (HALDAFLG=98) and must have met three or more of these hallucinogen dependence criteria (i.e., respondents who indicated hallucinogen use based only on responses from the questions in the noncore special drugs module added to the skip logic in 2008 were defined as NOT having past year hallucinogen dependence):

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of hallucinogens (HALLOTTM=1 or HALGTOVR=1)
- (2) Used hallucinogens more often than intended or was unable to keep set limits on hallucinogen use (HALKPLMT=2)
- (3) Needed to use hallucinogens more than before to get desired effects or noticed that same amount of hallucinogen use had less effect than before (HALNDMOR=1 or HALLSEFX=1)
- (4) Inability to cut down or stop using hallucinogens every time tried or wanted to (HALCUTEV=2)
- (5) Continued to use hallucinogens even though they were causing problems with emotions, nerves, mental health, or physical problems (HALEMCTD=1 or HALPHCTD=1)
- (6) Hallucinogen use reduced or eliminated involvement or participation in important activities (HALLSACT=1).

### **INHALANTS:**

To be defined with inhalant dependence, DEPNDINH, a respondent must have met three or more of these inhalant dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of inhalants (INHLOTTM=1 or INHGTOVR=1)
- (2) Used inhalants more often than intended or was unable to keep set limits on inhalant use (INHKPLMT=2)
- (3) Needed to use inhalants more than before to get desired effects or noticed that same amount of inhalant use had less effect than before (INHNDMOR=1 or INHLSEFX=1)
- (4) Inability to cut down or stop using inhalants every time tried or wanted to (INHCUTEV=2)
- (5) Continued to use inhalants even though they were causing problems with emotions, nerves, mental health, or physical problems (INHEMCTD=1 or INHPHCTD=1)
- (6) Inhalant use reduced or eliminated involvement or participation in important activities (INHLSACT=1).

### **MARIJUANA:**

To be defined with marijuana dependence, DEPNDMRJ, a respondent must have met three or more of these marijuana dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of marijuana (MRJLOTTM=1 or MRJGTOVR=1)

- (2) Used marijuana more often than intended or was unable to keep set limits on marijuana use (MRJKPLMT=2)
- (3) Needed to use marijuana more than before to get desired effects or noticed that same amount of marijuana use had less effect than before (MRJNDMOR=1 or MRJLSEFX=1)
- (4) Inability to cut down or stop using marijuana every time tried or wanted to (MRJCUTEV=2)
- (5) Continued to use marijuana even though it was causing problems with emotions, nerves, mental health, or physical problems (MRJEMCTD=1 or MRJPHCTD=1)
- (6) Marijuana use reduced or eliminated involvement or participation in important activities (MRJLSACT=1).

Note: A respondent could answer the dependence questions if he or she reported using marijuana in the past year, regardless of whether he or she reported the frequency of days in which he or she used marijuana. Thus, cases may exist where a respondent was classified as dependent on marijuana but used marijuana less than 6 days in the past year according to the imputed frequency of use variable (IRMJFY).

### **TRANQUILIZERS:**

To be defined with tranquilizer dependence, DEPNDTRN, a respondent must have met three or more of these tranquilizer dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of tranquilizers (TRNLOTTM=1 or TRNGTOVR=1)
- (2) Used tranquilizers more often than intended or was unable to keep set limits on tranquilizer use (TRNKPLMT=2)
- (3) Needed to use tranquilizers more than before to get desired effects or noticed that same amount of tranquilizer use had less effect than before (TRNNDMOR=1 or TRNLSEFX=1)
- (4) Inability to cut down or stop using tranquilizers every time tried or wanted to (TRNCUTEV=2)
- (5) Continued to use tranquilizers even though they were causing problems with emotions, nerves, mental health, or physical problems (TRNEMCTD=1 or TRNPHCTD=1)
- (6) Tranquilizer use reduced or eliminated involvement or participation in important activities (TRNLSACT=1).

## **Substance Abuse Recodes**

### **ALCOHOL:**

To be defined with abuse of alcohol, ABUSEALC, a respondent must have met one or more of these alcohol abuse criteria in the past year and must not have been dependent upon alcohol in the past year (DEPNDA LC=0):

- (1) Serious problems at home, work, or school caused by using alcohol, such as
  - neglecting their children
  - missing work or school
  - doing a poor job at work or school
  - losing a job or dropping out of school(ALCSERP B=1)
- (2) Used alcohol regularly and then did something that might have put you in physical danger (ALCPDANG=1)
- (3) Use of alcohol caused you to do things that repeatedly got you in trouble with the law (ALCLAWTR=1)
- (4) Problems with family or friends that were probably caused by using alcohol (ALCFMFPB=1) and continued to use alcohol even though you thought using alcohol caused these problems (ALCFMCTD=1).

Note: A respondent could answer the abuse questions if he or she reported using alcohol in the past year, regardless of whether he or she reported the frequency of days in which he or she drank an alcoholic beverage. Thus, cases may exist where a respondent was classified to have abused alcohol but drank an alcoholic beverage less than 6 days in the past year according to the imputed frequency of use variable (IRALCFY).

### **COCAINE:**

To be defined with abuse of cocaine, ABUSECOC, a respondent must have met one or more of these cocaine abuse criteria in the past year and must not have been dependent upon cocaine in the past year (DEPNDCOC=0):

- (1) Serious problems at home, work, or school caused by using cocaine, such as
  - neglecting their children
  - missing work or school
  - doing a poor job at work or school
  - losing a job or dropping out of school(COCSERPB=1)
- (2) Used cocaine regularly and then did something that might have put you in physical danger (COCPDANG=1)
- (3) Use of cocaine caused you to do things that repeatedly got you in trouble with the law (COCLAWTR=1)
- (4) Problems with family or friends probably caused by using cocaine (COCFMFPB=1) and continued to use cocaine even though you thought using cocaine caused these problems (COCFMCTD=1).

Note: A respondent could answer the abuse questions if he or she reported injecting cocaine with a needle in the past year, even if he or she reported not using cocaine in the past year. Thus, cases may exist where a respondent was classified to have abused cocaine,

even though he or she had not used cocaine in the past year according to the imputed recency variable (COCYR).

## **HALLUCINOGENS:**

To be defined with abuse of hallucinogens, ABUSEHAL, a respondent must have been routed to the dependence and abuse questions in 2011 based on variables in the skip logic that existed in 2007 (HALDAFLG=98), must have met one or more of these hallucinogen abuse criteria in the past year (i.e., respondents who indicated hallucinogen use based only on responses from the questions in the noncore special drugs module added to the skip logic in 2008 were categorized as NOT having abused hallucinogens in the past year), and must not have been dependent upon hallucinogens in the past year (DEPNDHAL=0):

- (1) Serious problems at home, work, or school caused by using hallucinogens, such as
  - neglecting their children
  - missing work or school
  - doing a poor job at work or school
  - losing a job or dropping out of school(HALSERPB=1)
- (2) Used hallucinogens regularly and then did something that might have put you in physical danger (HALPDANG=1)
- (3) Use of hallucinogens caused you to do things that repeatedly got you in trouble with the law (HALLAWTR=1)
- (4) Problems with family or friends probably caused by using hallucinogens (HALFMFPB=1) and continued to use hallucinogens even though you thought using hallucinogens caused these problems (HALFMCTD=1).

## **HEROIN:**

To be defined with abuse of heroin, ABUSEHER, a respondent must have met one or more of these heroin abuse criteria in the past year and must not have been dependent upon heroin in the past year (DEPNDHER=0):

- (1) Serious problems at home, work, or school caused by using heroin, such as
  - neglecting their children
  - missing work or school
  - doing a poor job at work or school
  - losing a job or dropping out of school(HERSERPB=1)
- (2) Used heroin regularly and then did something that might have put you in physical danger (HERPDANG=1)
- (3) Use of heroin caused you to do things that repeatedly got you in trouble with the law (HERLAWTR=1)
- (4) Problems with family or friends probably caused by using heroin (HERFMFPB=1) and continued to use heroin even though you thought using heroin caused these problems (HERFMCTD=1).

**Note:** A respondent could answer the abuse questions if he or she reported injecting with a needle, smoking, sniffing, or snorting heroin in the past year, even if he or she reported not using heroin in the past year. Thus, cases may exist where a respondent was classified to have abused heroin, even though he or she had not used heroin in the past year according to the imputed recency variable (HERYR).

## **INHALANTS:**

To be defined with abuse of inhalants, ABUSEINH, a respondent must have met one or more of these inhalant abuse criteria in the past year and must not have been dependent upon inhalants in the past year (DEPNDINH=0):

- (1) Serious problems at home, work, or school caused by using inhalants, such as
  - neglecting their children
  - missing work or school
  - doing a poor job at work or school
  - losing a job or dropping out of school(INHSERPB=1)
- (2) Used inhalants regularly and then did something that might have put you in physical danger (INHPDANG=1)
- (3) Use of inhalants caused you to do things that repeatedly got you in trouble with the law (INHLAWTR=1)
- (4) Problems with family or friends probably caused by using inhalants (INHFMFPB=1) and continued to use inhalants even though you thought using inhalants caused these problems (INHFMCTD=1).

## **MARIJUANA:**

To be defined with abuse of marijuana, ABUSEMRJ, a respondent must have met one or more of these marijuana abuse criteria in the past year and must not have been dependent upon marijuana in the past year (DEPNDMRJ=0):

- (1) Serious problems at home, work, or school caused by using marijuana, such as
  - neglecting their children
  - missing work or school
  - doing a poor job at work or school
  - losing a job or dropping out of school(MRJSERPB=1)
- (2) Used marijuana regularly and then did something that might have put you in physical danger (MRJPDANG=1)
- (3) Use of marijuana caused you to do things that repeatedly got you in trouble with the law (MRJLAWTR=1)
- (4) Problems with family or friends probably caused by using marijuana (MRJFMFPB=1) and continued to use marijuana even though you thought using marijuana caused these problems (MRJFMCTD=1).

Note: A respondent could answer the abuse questions if he or she reported using marijuana in the past year, regardless of whether he or she reported the frequency of days in which he or she used marijuana. Thus, cases may exist where a respondent was classified to have abused marijuana but used marijuana less than 6 days in the past year according to the imputed frequency of use variable (IRMJFY).

## **PAIN RELIEVERS:**

To be defined with abuse of pain relievers, ABUSEANL, a respondent must have met one or more of these pain reliever abuse criteria in the past year and must not have been dependent upon pain relievers in the past year (DEPNDANL=0):

- (1) Serious problems at home, work, or school caused by using pain relievers, such as
  - neglecting their children
  - missing work or school
  - doing a poor job at work or school
  - losing a job or dropping out of school
 (ANLSERP=1)
- (2) Used pain relievers regularly and then did something that might have put you in physical danger (ANLPDANG=1)
- (3) Use of pain relievers caused you to do things that repeatedly got you in trouble with the law (ANLLAWTR=1)
- (4) Problems with family or friends probably caused by using pain relievers (ANLFMFPB=1) and continued to use pain relievers even though you thought using pain relievers caused these problems (ANLFMCTD=1).

### **SEDATIVES:**

To be defined with abuse of sedatives, ABUSESED, a respondent must have been routed to the dependence and abuse questions in 2011 based on variables in the skip logic that existed in 2007 (SEDDAFLG=98), must have met one or more of these sedative abuse criteria in the past year (i.e., respondents who indicated sedative use based only on responses from the questions in the noncore special drugs module added to the skip logic in 2008 were categorized as NOT having abused sedatives in the past year), and must not have been dependent upon sedatives in the past year (DEPNSED=0):

- (1) Serious problems at home, work, or school caused by using sedatives, such as
  - neglecting their children
  - missing work or school
  - doing a poor job at work or school
  - losing a job or dropping out of school
 (SEDSERP=1)
- (2) Used sedatives regularly and then did something that might have put you in physical danger (SEDPDANG=1)
- (3) Use of sedatives caused you to do things that repeatedly got you in trouble with the law (SEDLAWTR=1)
- (4) Problems with family or friends probably caused by using sedatives (SEDFMFPB=1) and continued to use sedatives even though you thought using sedatives caused these problems (SEDFMCTD=1).

### **STIMULANTS:**

To be defined with abuse of stimulants, ABUSESTM, a respondent must have been routed to the dependence and abuse questions in 2011 based on variables in the skip logic that existed in 2004 (STMDAFLG=98), must have met one or more of these stimulant abuse criteria in the past year (i.e., respondents who did not indicate methamphetamine use or other stimulant use from the core drug module or questions in the noncore special drugs module [other than the questions added in 2005, 2006, and 2008 as mentioned above] and who met one or more of these stimulant abuse criteria were categorized as NOT having abused stimulants in the past year), and must not have been dependent upon stimulants in the past year (DEPNDSTM=0):

- (1) Serious problems at home, work, or school caused by using stimulants, such as
  - neglecting their children
  - missing work or school

- doing a poor job at work or school
- losing a job or dropping out of school  
(STMSERPB=1)
- (2) Used stimulants regularly and then did something that might have put you in physical danger (STMPDANG=1)
- (3) Use of stimulants caused you to do things that repeatedly got you in trouble with the law (STMLAWTR=1)
- (4) Problems with family or friends probably caused by using stimulants (STMFMFPB=1) and continued to use stimulants even though you thought that using stimulants caused these problems (STMFMCTD=1).

Note: A respondent could answer the abuse questions if he or she reported injecting stimulants (including methamphetamine) with a needle in the past year, even if he or she reported not using stimulants in the past year. Thus, cases may exist where a respondent was classified to have abused stimulants, even though he or she had not used stimulants in the past year according to the imputed recency variable (CPNSTMYR).

## **TRANQUILIZERS:**

To be defined with abuse of tranquilizers, ABUSETRN, a respondent must have met one or more of these tranquilizer abuse criteria in the past year and must not have been dependent upon tranquilizers in the past year (DEPNDTRN=0):

- (1) Serious problems at home, work, or school caused by using tranquilizers, such as
  - neglecting their children
  - missing work or school
  - doing a poor job at work or school
  - losing a job or dropping out of school  
(TRNSERPB=1)
- (2) Used tranquilizers regularly and then did something that might have put you in physical danger (TRNPDANG=1)
- (3) Use of tranquilizers caused you to do things that repeatedly got you in trouble with the law (TRNLAWTR=1)
- (4) Problems with family or friends probably caused by using tranquilizers (TRNFMFPB=1) and continued to use tranquilizers even though you thought using tranquilizers caused these problems (TRNFMCTD=1).

## **APPENDIX I**

### **Recoded Mental Health**

*This page intentionally left blank*

The 2011 National Survey on Drug Use and Health (NSDUH) included a "mental health" module that was designed to provide data on various mental health measures for adults aged 18 or older, such as serious psychological distress (SPD), mental illness (i.e., any mental illness [AMI], serious mental illness [SMI], moderate mental illness [MMI], serious or moderate mental illness [SMMI], low [i.e., mild] mental illness [LMI]), and suicidal ideation and behavior (i.e., thoughts, plans, and attempts).

Estimates of past year and past month SPD, past year mental illness, and past year suicidal ideation and behavior are presented in the 2011 mental health detailed tables (Center for Behavioral Health Statistics and Quality [CBHSQ], 2012c). With the exception of SPD, these measures also are presented in the 2011 mental health findings report (CBHSQ, 2012d). The tables and report on mental health are published separately<sup>1</sup> from the 2011 detailed tables (CBHSQ, 2012b) and the 2011 summary of national findings report (CBHSQ, 2012e).

Past year mental illness estimates for 2008 through 2011 found in tables and reports published prior to the 2012 NSDUH were based on a prediction model for mental illness developed using the 2008 data from the Mental Health Surveillance Study (MHSS) (referred to as the "2008 model"). This model was developed using approximately 750 cases obtained from a clinical follow-up study. Although the Substance Abuse and Mental Health Services Administration (SAMHSA) continued to obtain clinical interviews after 2008, estimates of SMI and AMI from the 2009, 2010, and 2011 NSDUHs have been based on the model developed from the 2008 clinical assessment sample. The same model was applied to each year's NSDUH data to provide consistency in SMI and AMI comparisons across the years. Producing a new model each year based on the small annual clinical samples (only 500 interviews in 2009 and 2010) would have resulted in large changes in the model parameters and corresponding prevalence rates due to sampling error, making it impossible to detect real trends in SMI and AMI over time. Furthermore, an evaluation of the 2008 model, using the 2009 NSDUH clinical data, found that the model could not be significantly improved with the additional 500-case 2009 clinical sample. The clinical follow-up study, started in 2008, continued until 2012, leading to a nationally representative sample of approximately 5,000 cases that were used to develop an improved mental illness prediction model (referred to as the "2012 model"). This revised and improved model was used to predict mental illness starting with the 2012 NSDUH. As of October 2013, the 2008 detailed tables (Office of Applied Studies, 2009) and the 2009-2011 mental health detailed tables (CBHSQ, 2010a; 2012a; 2012c) containing estimates for past year AMI and SMI for adults have been revised based on the 2012 model. For further information on the revised model, see the NSDUH short report titled *Revised Estimates of Mental Illness from the National Survey on Drug Use and Health* at <http://samhsa.gov/data/>. For additional information about the 2008 model, see Appendix B, Section B.4.3, in the 2009 mental health findings report (CBHSQ, 2010b). For more information on the MHSS and the mental illness indicators, see the Development of Mental Illness Indicators section below.

Unfortunately, the 2012 model could not be applied to the 2007 and earlier NSDUH data because some of the predictors in the 2012 model were not collected before 2008. However, the 2005-2007 NSDUHs did collect some of the necessary predictors, along with other mental health variables that could potentially be good predictors of SMI and AMI. Given the analytic benefits

---

<sup>1</sup> Separate tables and reports for mental health measures started with the 2009 NSDUH.

of having comparable indicators of SMI for additional years of NSDUH data, alternative models were developed from the MHSS data in an attempt to be comparable with mental illness data for 2008 and later years (CBHSQ, 2017). Users should consider the difference in methodology prior to making any decisions on whether and how to use the 2005-2007 measures.

This appendix provides details about the use of the psychological distress and functional impairment scales to measure mental illness and the development of the mental illness indicators based on the aforementioned 2012 model. Additionally, this appendix provides details about the alternative model for the 2005-2007 measures. Information about the availability of the mental illness variables as well as guidance regarding analysis of these variables including weighting information is also provided in this appendix. Furthermore, Appendix N, Key Mental Health Variables, provides a table with the variable names for the most commonly used NSDUH mental health measures as well as information regarding comparability across survey years 2002 and later NSDUHs.

## **2011 NSDUH Scales Used To Measure Mental Illness**

### ***Psychological Distress Scale: K6***

The K6 screening instrument for nonspecific psychological distress (Furukawa, Kessler, Slade, & Andrews, 2003; Kessler et al., 2003) included in the computer-assisted interviewing instrument was used to create both past month (SPDMON) and past year (SPDYR) SPD indicators.<sup>2</sup> For both of the time periods, respondents were classified with SPD if a score based on these K6 measures was 13 or greater.

The two six-item K6 scales gather information regarding how frequently a respondent experienced symptoms of psychological distress during the past 30 days and during a month in the past 12 months when he or she felt more depressed, anxious, or emotionally stressed than in the past 30 days, respectively. Only respondents who indicated that there was a worse month than the past 30 days (DSTWORST=1) were asked about the worst month in the past year other than the past 30 days.

The questions comprising the two K6 scales and the screener question for the worst month scale are provided below with their associated edited variable names from the mental health module as well as the response categories for each question:

**DSTNRV30**      During the past 30 days, how often did you feel nervous?

- 1 All of the time
- 2 Most of the time
- 3 Some of the time
- 4 A little of the time
- 5 None of the time

---

<sup>2</sup> Because of the addition of the 30-day K6 questions in the 2008 NSDUH, past year K6 and SPD variables in 2008 and subsequent years are not comparable with past year K6 and SPD variables from previous years and therefore have been renamed.

DK/REF

*Response categories are the same for the remaining past month K6 questions:*

- DSTHOP30** During the past 30 days, how often did you feel hopeless?
- DSTRST30** During the past 30 days, how often did you feel restless or fidgety?
- DSTCHR30** During the past 30 days, how often did you feel so sad or depressed that nothing could cheer you up?
- DSTEFF30** During the past 30 days, how often did you feel that everything was an effort?
- DSTNGD30** During the past 30 days, how often did you feel down on yourself, no good, or worthless?
- DSTWORST** The last questions asked about how you have been feeling during the past 30 days. Now think about **the past 12 months**. Was there a month in the past 12 months when you felt more depressed, anxious, or emotionally stressed than you felt during the past 30 days?
- 1 Yes  
2 No
- DSTNRV12** Think of one month in the past 12 months when you were the most depressed, anxious, or emotionally stressed.
- During that month, how often did you feel nervous?
- 1 All of the time  
2 Most of the time  
3 Some of the time  
4 A little of the time  
5 None of the time  
DK/REF

*Response categories are the same for the remaining worst month K6 questions:*

- DSTHOP12** During that same month when you were at your worst emotionally . . . how often did you feel hopeless?
- DSTRST12** During that same month when you were at your worst emotionally . . . how often did you feel restless or fidgety?
- DSTCHR12** During that same month when you were at your worst emotionally . . . how often did you feel so sad or depressed that nothing could cheer you up?

**DSTEFF12** During that same month when you were at your worst emotionally . . .  
how often did you feel that everything was an effort?

**DSTNGD12** During that same month when you were at your worst emotionally . . .  
how often did you feel down on yourself, no good, or worthless?

Each K6 scale item shown above was transformed so that "All of the time" was coded 4, "Most of the time" was coded 3, "Some of the time" was coded 2, "A little of the time" was coded 1, and "None of the time" was coded 0, along with responses matching "Don't know," refusals, bad data, blanks, and legitimate skips.

A past month distress score (K6SCMON) was calculated by summing these transformed values across the six past 30-day variables (DSTNRV30, DSTHOP30, DSTRST30, DSTCHR30, DSTEFF30, and DSTNGD30) to arrive at a value ranging between 0 and 24. Likewise, a worst month in the past year distress score (K6SCYR) was calculated by summing the transformed values across the six worst month in the past year variables (DSTNRV12, DSTHOP12, DSTRST12, DSTCHR12, DSTEFF12, and DSTNGD12) to arrive at a value ranging between 0 and 24. The worst month in the past year distress score (K6SCYR) has values only for adult respondents who indicated that there was a month in the past year that was worse than the past 30 days (DSTWORST=1). A worst total score (K6SCMAX) was then created that takes on the maximum value of the past month distress score (K6SCMON) and the worst month in the past year distress score (K6SCYR) in order to represent the worst distress score during the past year, regardless of whether this contradicts the response to DSTWORST. For all the K6 score and SPD variables, youths aged 12 to 17 were assigned the standard SAS missing code (.) because the mental health module was not administered to youths.

An alternative worst month in the past year total score variable (WSPDSC2) was created to indicate the worst distress score during the past year. Using the worst month total score (K6SCMAX), the alternative worst month total score (WSPDSC2) is coded 0 when K6SCMAX has a value from 0 to 7, and WSPDSC2 is assigned a value of 1 to 17 when K6SCMAX has a corresponding value of 8 to 24. This variable was not used in the creation of past month and past year SPD variables but was used in the 2012 model to create the mental illness variables discussed later in this document. The decision to create a recoded version of the past month K6 score was based on an analysis of the 2008 MHSS. Specifically, the alternative past year K6 score (WSPDSC2) was used in the model because the SMI prevalence was typically extremely low for respondents with worst month in the past year K6 scores of less than 8, and the prevalence rates started increasing only once scores were 8 or greater. For more details about how this recoded score was created as well as more details on the original score, see Aldworth et al. (2009).

Using the past month distress score defined above, adults aged 18 or older are classified as having past month SPD (SPDMON=1) if their distress score is 13 or greater ( $K6SCMON \geq 13$ ), and they are classified as not having past month SPD (SPDMON=0) if their distress score is less than 13 ( $K6SCMON < 13$ ). This cutoff point was chosen because it has been shown to be highly correlated with SMI (Colpe, Epstein, Barker, & Gfroerer, 2009) and is the standard cutoff point used by other surveys. Likewise, past year SPD (SPDYR) is defined the

same way as past month SPD by using the total past year score (K6SCMAX) and the same cutoff value of 13.

The use of the two reference periods to create the total past year score (K6SCMAX) that defines past year SPD (SPDYR) started with the 2008 NSDUH. From 2005 to 2007, respondents were asked only about distress in the month when they were the most depressed, anxious, or emotionally distressed in the past year. Because of this change, past year K6 and SPD estimates from years prior to 2008 were no longer comparable with estimates from 2008 onward. To address this comparability issue, an adjusted version of the worst total K6 score (K6SMXADJ) and past year SPD (SPDYRADJ) variables were created retroactively for survey years 2005 through 2007. These variables were statistically adjusted to make the 2005-2007 K6 and SPD estimates comparable with the 2008 and subsequent K6 and SPD estimates. The 2005-2007 adjusted variables (K6SMXADJ and SPDYRADJ) can be renamed for use in analyses to match the 2008 and subsequent variable names (K6SCMAX and SPDYR) to produce comparable estimates across all years (2005 and subsequent years), as seen in the 2011 mental health detailed tables (CBHSQ, 2012c). More information about how the statistically adjusted K6 and SPD variables were created can be found in the 2005-2007 codebooks and in the report describing these adjustments (Aldworth, Kott, Yu, Mosquin, & Barnett-Walker, 2012).

### ***Functional Impairment Scale: WHODAS***

The World Health Organization Disability Assessment Schedule (WHODAS) is a scale used to measure functional impairment that consists of a series of items that are used for assessing disturbances in social adjustment and behavior (i.e., functional impairment). A reduced set of 13 WHODAS items (Novak, Colpe, Barker, & Gfroerer, 2010; Rehm et al., 1999) are included in the NSDUH. Responses to this impairment scale were used to create eight variables that were transformed and summed to define the WHODAS total score used in the development of the 2012 SMI prediction model. The questions comprising the abbreviated WHODAS are provided below, with their associated edited variable names from the mental health module as well as the response categories for each question:

The next questions are about how much your emotions, nerves, or mental health caused you to have **difficulties in daily activities**.

In answering, think of the **one month** in the past 12 months when your emotions, nerves, or mental health interfered **most** with your daily activities.

**IMPREMEM** During that one month when your emotions, nerves or mental health interfered **most** with your daily activities . . .

how much difficulty did you have **remembering to do things you needed to do?**

- 1 No difficulty
- 2 Mild difficulty
- 3 Moderate difficulty
- 4 Severe difficulty

DK/REF

**IMPCONCN**      how much difficulty did you have **concentrating on doing something important when other things were going on around you?**

- 1    No difficulty
- 2    Mild difficulty
- 3    Moderate difficulty
- 4    Severe difficulty

DK/REF

**IMPGOUT**      how much difficulty did you have **going out of the house and getting around on your own?**

- 1    No difficulty
- 2    Mild difficulty
- 3    Moderate difficulty
- 4    Severe difficulty
- 5    You didn't leave the house on your own

DK/REF

**IMPGOUTM**    [IF IMPGOUT = 5] Did problems with your emotions, nerves, or mental health keep you from leaving the house on your own?

- 1    Yes
- 2    No

DK/REF

**IMPPEOP**      how much difficulty did you have **dealing with people you did not know well?**

- 1    No difficulty
- 2    Mild difficulty
- 3    Moderate difficulty
- 4    Severe difficulty
- 5    You didn't deal with people you did not know well

DK/REF

**IMPPEOPM**    [IF IMPPEOP = 5] Did problems with your emotions, nerves, or mental health keep you from dealing with people you did not know well?

- 1    Yes
- 2    No

DK/REF

**IMPSOC**      how much difficulty did you have **participating in social activities, like**

**visiting friends or going to parties?**

- 1 No difficulty
- 2 Mild difficulty
- 3 Moderate difficulty
- 4 Severe difficulty
- 5 You didn't participate in social activities
- DK/REF

**IMPSOCM** [IF IMPSOC=5] Did problems with your emotions, nerves, or mental health keep you from participating in social activities?

- 1 Yes
- 2 No
- DK/REF

**IMPHHLD** how much difficulty did you have **taking care of household responsibilities?**

- 1 No difficulty
- 2 Mild difficulty
- 3 Moderate difficulty
- 4 Severe difficulty
- 5 You didn't take care of household responsibilities
- DK/REF

**IMPHHLD** [IF IMPHHLD=5] Did problems with your emotions, nerves, or mental health keep you from taking care of household responsibilities?

- 1 Yes
- 2 No
- DK/REF

**IMPRES** how much difficulty did you have **taking care of your daily responsibilities at work or school?**

- 1 No difficulty
- 2 Mild difficulty
- 3 Moderate difficulty
- 4 Severe difficulty
- 5 You didn't work or go to school
- DK/REF

**IMPRES** [IF IMPRES=5] Did problems with your emotions, nerves, or mental health keep you from working or going to school?

- 1 Yes

2 No  
DK/REF

**IMPWORK** [IF IMPRESP NE 5] During that one month when your emotions, nerves or mental health interfered **most** with your daily activities . . .

how much difficulty did you have **getting your daily work done as quickly as needed?**

1 No difficulty  
2 Mild difficulty  
3 Moderate difficulty  
4 Severe difficulty  
DK/REF

An original WHODAS total score (WHODASC2) was created to indicate the level of difficulty in performing daily activities due to problems with emotions, nerves, or mental health. Each of the eight variables created from the WHODAS items shown above was transformed into values of 0 to 3 so that a response of "severe difficulty" was coded 3, "moderate difficulty" was coded 2, and "mild difficulty" was coded 1. Values of "no difficulty" were coded 0, along with nonresponses (i.e., for responses of "no," "don't know," or "refused"). Some items had a fifth category to deal with "not applicable" responses. For example, the question about difficulties regarding taking care of daily responsibilities at work or school (IMPRESP) had a fifth category, "you didn't work or go to school." If this category was selected, then another question was asked as to whether respondents' emotions, nerves, or mental health caused them to be unable to work or go to school (IMPRESPM). A "yes" response to the follow-up question (IMPRESPM=1) was coded 3 and a "no" response (IMPRESPM=2) was coded 0. One exception to this coding was the last WHODAS recode on how much difficulty the respondents had in getting their daily work done as quickly as needed (IMPWORK). This item was asked of the respondents only if in the previous question they responded that they worked or went to school (IMPRESP=1 to 4). In the case that they responded that they did not work or go to school (IMPRESP=5), their response to the follow-up question referred to above (IMPRESPM) determined the final item score for IMPWORK; otherwise, IMPWORK was recoded similar to the other items.

The transformed scale values were summed across the eight variables created from the WHODAS items (remembering, concentrating, going out of the house on your own, dealing with people you don't know well, participating in social activities, taking care of household responsibilities, taking care of daily work/school responsibilities, and getting your daily work done as quickly as needed) to arrive at a value ranging between 0 and 24. For both the WHODAS total scores, youths aged 12 to 17 were assigned the standard SAS missing code (.) because the mental health module was not administered to youths.

An alternative WHODAS total score (WHODASC3) was created to indicate the number of daily activities in which a respondent had moderate or severe difficulty performing or did not perform due to problems with emotions, nerves, or mental health. Each of the eight variables created from WHODAS items shown above was transformed into values of 0 or 1 so that responses indicating "moderate difficulty" or "severe difficulty" were coded 1 and responses

indicating "mild difficulty" or "no difficulty" were coded 0. If a fifth category of "not applicable" was available and selected (see above for an example of a fifth question), then another question was asked as to whether respondents' emotions, nerves, or mental health caused them to be unable to work or go to school. A "yes" response was coded 1 and a "no" response was coded 0. The transformed scale values were summed across the eight WHODAS activities to arrive at a value ranging between 0 and 8. This alternative WHODAS total score was used in both the 2008 and 2012 models estimating the mental illness variables. The decision to create a recoded version of the WHODAS total score was based on an analysis of the 2008 MHSS. Use of the recoded version of the WHODAS score (WHODASC3) in the models was driven by the realization that a dichotomous measure dividing severely impaired from less severely impaired respondents fit better than a linear continuous measure. For more details about how this alternative score was created as well as more details on the original score, see Aldworth et al. (2009).

## **Development of Mental Illness Indicators**

The MHSS was initiated in 2008 with the primary goal of producing SMI estimates. Because of constraints on the interview time in the NSDUH and the need for trained mental health clinicians, it was not possible to administer a full structured diagnostic clinical interview to assess mental illness on all 45,000 adult respondents; therefore, the approach adopted by SAMHSA was to utilize short scales separately measuring psychological distress and functional impairment as described above that could be used in a statistical model to accurately predict whether a respondent had mental illness. Models that used these short scales to predict mental illness status have been developed using a subsample of NSDUH respondents who had completed the NSDUH interview and were administered a diagnostic interview (First, Spitzer, Gibbon, & Williams, 2002) via a clinical follow-up study.

In the 2008 NSDUH, the first year of the MHSS, approximately 1,500 NSDUH respondents participated in the clinical follow-up. Half of these respondents (approximately 750) were administered the WHODAS (discussed earlier in the text) and the other half were administered the Sheehan Disability Scale (SDS). This MHSS sample was used to develop a prediction model (the "2008 model") that was initially used to produce estimates of mental illness from the main NSDUH samples for the 2008-2011 NSDUHs. The purpose of the 2008 split sample was to determine whether the SDS or WHODAS impairment scale was a better predictor of SMI; therefore, for the 2008 NSDUH, two models were used to predict SMI: one for each impairment scale (WHODAS and SDS). The 2008 models for SMI were chosen so that the estimates from the WHODAS and the SDS samples were approximately equal, and hence published estimates of SMI were based on both WHODAS and SDS samples.<sup>3</sup> The WHODAS model was determined to be the better predictor of SMI; therefore, starting with the 2009 NSDUH, only the WHODAS impairment scale was administered in the NSDUH and used for estimating all levels of mental illness (SMI, AMI, LMI, MMI, and SMMI). For further details, see Appendix B, Section B.4.3, in the 2009 mental health findings report (CBHSQ, 2010b).

In 2010, SAMHSA began preliminary investigations to assess whether improvements to the model were warranted using the MHSS clinical data collected since 2008. The 2011 and

---

<sup>3</sup> For 2008, estimates of AMI, SMMI, LMI, and MMI were based only on the WHODAS half sample because notable differences were observed between the WHODAS and the SDS samples.

2012 MHSS clinical samples were augmented to include 1,500 respondents per year, leading to a combined sample of approximately 5,000 clinical interviews for the MHSS from 2008 to 2012. It was recognized that altering the model for generating estimates would complicate the measurement of changes in SMI and other mental illness estimates across years. For example, if one model was used to produce estimates for the 2008-2011 NSDUH data and a different model was used for the 2012 NSDUH, then it would not be straightforward to determine whether changes in the prevalence of SMI could be attributed to a real underlying change in the population or to changes in the model. Similarly, if the 2012 NSDUH prevalence estimates were based on a new model and not significantly different from NSDUH estimates since 2008, it still could not be concluded that changing the model did not affect estimates. Rather, changes to the model used for the 2012 NSDUH could obscure actual changes in the population and lead to the erroneous conclusion of no changes in prevalence.

Despite these concerns, SAMHSA determined that the 2008 model had some important shortcomings that had not been detected in the original model fitting because of the small number of respondents in the 2008 MHSS. Specifically, the 2008 model substantially overestimated SMI and AMI among young adults relative to the clinical interview data. In addition, improvements were needed to the weighting procedures for the MHSS sample data to better account for nonresponse and undercoverage (i.e., because persons with mental illness appeared to be more likely to participate in the follow-up and because only NSDUH respondents who answered their surveys in English were eligible for the clinical follow-up). Therefore, SAMHSA decided to revise the model using the combined 2008-2012 clinical data (the "2012 model"). Consistent with the 2008 model, for the clinical interview respondents who had been administered the SDS in the 2008 NSDUH, an alternative 2012 SMI model was fit using the complete 2008-2012 MHSS data set (i.e., including both the WHODAS and SDS half samples in 2008). See CBHSQ (2014b) for more details on the 2008-2012 MHSS operations and data collections.

To reduce bias and improve prediction, a recoded age variable and additional mental health-related variables (i.e., serious thoughts of suicide in the past year and having a past year MDE) were added in the 2012 model. The addition of these mental health predictors in the model, however, impacts the types of analyses that can be performed with the mental illness variables derived from the model. See the Using Mental Illness Variables in Analysis section for more details. To eliminate coverage and nonresponse error, alternatives for the weights were applied to the clinical sample data for the model development. To provide consistent data for trend assessment, the mental illness estimates in the 2008 detailed tables (OAS, 2009) and the 2009-2011 mental health detailed tables (CBHSQ, 2010a; 2012a; 2012c) were recomputed using the new 2012 model. For more detailed information on the 2008 MHSS design and analysis, see Colpe et al. (2009), Colpe et al. (2010), and Aldworth et al. (2009). The remainder of this section summarizes the 2012 model and the methods that were used to compute estimates of mental illness from the main NSDUH sample.

## **2012 SMI Prediction Model**

The 2012 model is a prediction model for mental illness. This prediction model is a weighted logistic regression. The response variable  $Y$  was defined so that  $Y = 1$  when an SMI diagnosis was positive based on the clinical interview; otherwise,  $Y = 0$ . If  $\mathbf{x}$  is a vector of

realized explanatory variables, then the response probability  $\pi = \Pr(Y = 1 \mid \mathbf{x})$  can be estimated using a weighted logistic regression model. For further technical details on the 2012 prediction models as well as the impact of the revised model on the 2008-2011 estimates, see the 2012 Mental Health Surveillance Study: Design and Estimation Report (CBHSQ, 2014a).

The 2012 SMI prediction model was fit with data from 4,912 WHODAS MHSS respondents from 2008 through 2012, excluding the one case from 2008 and the one case from 2009 that were dropped because of data errors. The final WHODAS calibration model for the 2012 prediction model for SMI was determined as

$$\text{logit}(\hat{\pi}) = \log[\hat{\pi} / (1 - \hat{\pi})] = -5.972664 + 0.0873416X_k + 0.3385193X_w + 1.9552664X_s + 1.1267330X_m + 0.1059137X_a$$

This model includes the following from the main NSDUH interview data:

- $X_k$  = Alternative worst month in the past year total score variable (WSPDSC2). See subsection *Psychological Distress Scale: K6* for coding information.
- $X_w$  = Alternative WHODAS total score (WHODASC3). See subsection *Functional Impairment Scale: WHODAS* for coding information.
- $X_s$  = *Serious Thoughts of Suicide in the Past Year (MHSUTK\_U)*: Coded as 1 if "yes"; coded as 0 otherwise.
- $X_m$  = *Past Year MDE (AMDEY2\_U for WHODAS: AJAMDE\_U for SDS)*: Coded as 1 if the criteria for past year MDE (major depressive episode) were met;<sup>4</sup> coded as 0 otherwise.
- $X_a$  = *Recoded Age (AGE1830)*: Coded as age minus 18 if aged 18 to 30; coded as 12 otherwise.

Table 1 displays the WHODAS model specifications for the 2012 SMI prediction model.

**Table 1. Final 2012 WHODAS SMI Prediction Model**

<b>Final 2012 Model: WSPDSC2 + WHODASC3 + MHSUTK_U + AMDEY2_U + AGE1830</b>						
<b>Term</b>	<b>Beta</b>	<b>Beta SE</b>	<b>T-statistic</b>	<b>P-value</b>	<b>DF</b>	<b>Wald P-value</b>
Intercept	-5.9727	0.3201	-18.6586	0.0000		
WSPDSC2	0.0873	0.0248	3.5247	0.0009	1	0.0009
WHODASC3	0.3385	0.0349	9.7034	0.0000	1	0.0000
MHSUTK_U	1.9553	0.2164	9.0342	0.0000	1	0.0000
AMDEY2_U	1.1267	0.2196	5.1308	0.0000	1	0.0000
AGE1830	0.1059	0.0244	4.3380	0.0001	1	0.0001

<sup>4</sup> In this situation, the past year MDE measure is from the main NSDUH interview (i.e., not from the Structured Clinical Interview for DSM-IV). See Section B.4.4 of the 2012 mental health findings report (CBHSQ, 2013).

DF = degrees of freedom, SE = standard error, SMI = serious mental illness, WHODAS = abbreviated eight-item World Health Organization Disability Assessment Schedule.

The formula for the predicted probability of SMI (SMIPP\_U) using the model parameter estimates in [Table 1](#) (but expressed with more decimal points) is as follows:

$$\text{SMIPP\_U} = 1/(1 + \exp[-(-5.972664 + 0.0873416*\text{WSPDSC2} + 0.3385193*\text{WHODASC3} + 1.9552664*\text{MHSUTK\_U} + 1.1267330*\text{AMDEY2\_U} + 0.01059137*\text{AGE1830})]).$$

In the 2012 SMI WHODAS prediction model, the respondent is classified as having past year SMI if SMIPP\_U is greater than or equal to 0.260573529 (SMI cutoff point).

### ***Modified 2012 Model for the 2008 SDS Half Sample***

As described in the Development of Mental Illness Indicators section above, the 2008 NSDUH data included a split sample. Similar to the 2008 model, the revised 2012 model also has an alternative model for the SDS data that was fit with data from the *complete* 2008-2012 MHSS clinical sample that contains 5,653 MHSS respondents, excluding four cases from 2008 (one from the WHODAS half sample and three from the SDS half sample) and one case from 2009 that were dropped because of data errors.

The modified 2012 SMI prediction model for the SDS half sample was determined as

$$\begin{aligned} \text{logit}(\hat{\pi}) = \log[\hat{\pi} / (1 - \hat{\pi})] = & -5.7736246 + 0.1772067X_k + 1.8392433X_s \\ & + 1.6428623X_m + 0.1231266X_a \end{aligned}$$

[Table 2](#) displays the SDS half sample model specifications for the 2012 SMI prediction model.

**Table 2. Final 2012 SDS Half Sample SMI Prediction Model**

<b>Final 2012 Model: WSPDSC2 + MHSUTK_U + AJAMDE_U + AGE1830</b>						
<b>Term</b>	<b>Beta</b>	<b>Beta SE</b>	<b>T-statistic</b>	<b>P-value</b>	<b>DF</b>	<b>Wald P-value</b>
Intercept	-5.7736	0.3479	-16.5960	0.0000		
WSPDSC2	0.1772	0.0190	9.3251	0.0000	1	0.0000
MHSUTK_U	1.8392	0.1941	9.4781	0.0000	1	0.0000
AJAMDE_U	1.6429	0.2119	7.7528	0.0000	1	0.0000
AGE1830	0.1231	0.0259	4.7482	0.0000	1	0.0000

DF = degrees of freedom, SDS = Sheehan Disability Scale, SE = standard error, SMI = serious mental illness.

Although the model was fit across all years and the cutoff points were determined based on all years, these cutoff points were used only for the main survey respondents in the 2008 Sample B to predict SMI, AMI, and SMMI positives. The formula for the predicted probability of SMI (SMIPP\_U) using the model parameter estimates in [Table 2](#) (but expressed with more decimal points) is as follows:

$$\text{SMIPP\_U} = 1/(1 + \exp[-(-5.7736246 + 0.1772067*\text{WSPDSC2} + 1.8392433*\text{MHSUTK\_U} + 1.6428623*\text{AJAMDE\_U} + 0.1231566*\text{AGE1830})]).$$

In the 2012 SMI SDS half sample prediction model, the respondent is classified as having past year SMI if SMIPP\_U is greater than or equal to 0.236434 (SMI cutoff point).

### **Alternative Model for 2005 to 2007**

As described above, estimates of SMI and AMI have been produced each year since 2008 using models developed with 2008-2012 clinical interview data, along with data from the main survey mental health module that has remained in NSDUH. Initially, these models could not be applied to the 2007 and earlier NSDUH data because some of the predictors in the 2008-2012 models were not collected before 2008. However, alternative models were developed from the MHSS data in an attempt to be comparable with the 2008 and later estimates (CBHSQ, 2017).

Because the aim was to provide alternative measures of SMI and AMI that matched those derived from the 2012 model (SMIYR\_U/AMIYR\_U), the 2012 model-based past year mental illness (SMIYR\_U/AMIYR\_U) variable(s) was designated as the *response variable(s)* in the alternative models. Therefore, the entire adult NSDUH data from 2008A<sup>5</sup> to 2012 was available for the development of these models. Candidate *predictor variables* were created from information contained in common in all NSDUHs from 2005 to 2012. A set of suitable predictor variables meeting this requirement was identified, and subsets of these variables were selected to formulate alternative final SMI and AMI prediction models. The final models were selected based on how well the associated cutoff point estimators performed in terms of the total error rate in the receiver operating characteristic analysis and in terms of bias at the overall and domain (i.e., subpopulation) levels.

Unfortunately, even the final selected alternative AMI prediction model exhibited a fairly high total error rate and levels of bias statistically, significantly different from zero at the .05 level for a large number of domains. Therefore, a decision was made not to proceed with creating measures of AMI for 2005 to 2007 based on the final alternative AMI prediction model.

However, the final selected alternative SMI prediction model exhibited a very low level of bias and a low total error rate overall. In addition, very few domains exhibited levels of bias significant at the .05 level. Therefore, a decision was made to proceed with creating measures of SMI for 2005 to 2007 based on the final alternative SMI prediction model.

The following variable SMIPP\_A represents the predicted probability that a respondent has SMI based on the final alternative SMI prediction (logistic regression) model for 2005 to 2007:

$$\begin{aligned} \text{SMIPP\_A} = & 1 / (1 + \exp [-(8.481558862 + 0.344567199 * \text{WSPDSC2\_A} \\ & + 2.131295774 * \text{AMDEYR\_A} + 0.172135081 * \text{AGE1830} \\ & + 0.507779212 * \text{ADSDSSC3\_A} + 1.694191582 * \text{ADWRSTHK\_A} \\ & + 0.772597986 * \text{DEPRSYR\_A}))]. \end{aligned}$$

---

<sup>5</sup> The 2008A NSDUH refers to Sample A of the 2008 NSDUH (i.e., the half sample assigned to the WHODAS questions in 2008).

In the 2005-2007 alternative prediction model, the respondent is classified as having past year SMI if SMIPP\_A is greater than or equal to 0.372556455 (SMI cutoff point). Users should consider the differences in methodology prior to making any decisions on whether and how to use the 2005-2007 SMI measures.

### **Variables Available on the Data File**

All of the variables defined above for the K6, SPD, and WHODAS are included on the 2011 data file. For the K6 and SPD, this includes the distress scores (K6SCMON and K6SCYR), both versions of the worst month K6 total score (WSPDSC2 and K6SCMAX), and past month and past year SPD (SPDMON and SPDYR). For the worst month K6 total score, the original version (K6SCMAX) is used in the creation of the SPD variables, and the alternative version (WSPDSC2) is used in the creation of the mental illness variables for the 2012 prediction model.

From the WHODAS, both versions of the WHODAS total score (WHODASC2 and WHODASC3) are included on the 2011 data file. While the original WHODAS total score (WHODASC2) was not used in the 2012 prediction model for the final creation of the mental illness variables, it is included in the data set.

None of the predictor variables used in the 2005-2007 alternative model are included on the data file. Though some are similar in topic, these predictor variables are defined differently than predictor variables used in the 2008 or 2012 models. The alternative model variables end with "\_A" to indicate these variables were generated using the 2005-2007 alternative model rather than the 2012 model. The variables SMIPP\_A and SMIYR\_A are considered comparable with the variables SMIPP\_U and SMIYR\_U, respectively, for 2008 and later NSDUHs. However, users should consider the differences in methodology before making any decisions on whether and how to use the 2005-2007 SMI variables.

Measures of mental illness were renamed due to the use of the 2012 model to define SMI. Measures of mental illness based on the 2012 prediction model are included on the 2011 data file.<sup>6</sup> The variable names for these measures based on the 2012 model end with "\_U" to indicate these variables are not comparable with similarly named variables (based on the "2008 model"). [Table 3](#) displays a crosswalk between the 2008 model and revised 2012 model mental illness variable names. The mental illness variables based on the 2008 prediction model are no longer available on the data files for survey years 2008 through 2011. While the specific mental illness measures based on the 2008 model are no longer available, the predicted probability of the SMI variable, SMIPP, remains available on the 2008-2011 files. For more information on how to use SMIPP from the 2008 model to create the mental illness measures and additional information on how to use the 2008 model measures, see Appendix B, Section B.4.3, in the 2009 mental health findings report (CBHSQ, 2010b). However, mental illness variables based on the 2008 model are no longer recommended for use in analysis.

---

<sup>6</sup> Data files from 2008 to 2011 were updated with the revised 2012 model-based mental illness variables.

**Table 3. Mental Illness Variable Names, 2008 Model and Revised 2012 Model**

2008 Model Variable Name	2012 Model Variable Name	2012 Model Labels
SMIYR	SMIYR_U	SMI IND (1/0) BASED ON REVISED PREDICTED SMI PROB
SMIPP	SMIPP_U	PREDICTED SERIOUS MENTAL ILLNESS PROB REVISED
SMMIYR	SMMIYR_U	SMMI IND (1/0) BASED ON REVISED PREDICTED SMI PROB
AMIYR	AMIYR_U	AMI IND (1/0) BASED ON REVISED PREDICTED SMI PROB
MMIYR	MMIYR_U	MODERATE MI IND (1/0) BASED ON REVISED PRED SMI PROB
LMIYR	LMIYR_U	MILD MI IND (1/0) BASED ON REVISED PREDICTED SMI PROB
MI_CAT	MI_CAT_U	CATEGORICAL MI INDICATOR REVISED
AMIADPA2	AMIDA2_U	AMI AND DRUG/ALCOHOL DEP OR ABUSE REVISED (1/2)
SMIADPA2	SMIDA2_U	SMI AND DRUG/ALCOHOL DEP OR ABUSE REVISED (1/2)

For all the mental illness measures defined below, youths aged 12 to 17 were defined as SAS missing (.) because the mental health module was not administered to youths. The predicted probability of SMI, SMIPP\_U, based on the 2012 prediction model is included on the 2008-2012 data files and ranges in value from 0.0025409721 to 0.9291205406. Cutoff points along the range of SMIPP\_U were used to determine the levels of mental illness for each respondent:

#### 2008 Sample A (WHODAS) and 2009 and Subsequent Years

- SMI:<sup>7</sup> If SMIPP\_U is greater than or equal to 0.260573529, then the respondent is classified as having past year SMI (SMIYR\_U=1).
- SMMI: If SMIPP\_U is greater than or equal to 0.077686285365, then the respondent is classified as having past year SMMI (SMMIYR\_U=1).
- AMI: If SMIPP\_U is greater than or equal to 0.0192519810, then the respondent is classified as having past year AMI (AMIYR\_U=1).
- No Mental Illness: If SMIPP\_U is less than 0.0192519810, then the respondent is classified as not having past year mental illness (AMIYR\_U=0).

#### 2008 Sample B (SDS)

- SMI: If SMIPP\_U is greater than or equal to 0.236434, then the respondent is classified as having past year SMI (SMIYR\_U=1).
- SMMI: If SMIPP\_U is greater than or equal to 0.06616398, then the respondent is classified as having past year SMMI (SMMIYR\_U=1).
- AMI: If SMIPP\_U is greater than or equal to 0.019182625, then the respondent is classified as having past year AMI (AMIYR\_U=1).
- No Mental Illness: If SMIPP\_U is less than 0.019182625, then the respondent is classified as not having past year mental illness (AMIYR\_U=0).

<sup>7</sup> SMI variables in 2008 and subsequent years are not comparable with similarly named SMI variables from 2002 to 2003.

The categories of MMI and LMI were created by subtraction using a combination of the three defined levels of mental illness shown above. Respondents were defined as having past year MMI (MMIYR\_U=1) if they were positive for SMMI (SMMIYR\_U=1) but negative for SMI (SMIYR\_U=0). Respondents were defined as having past year LMI (LMIYR\_U=1) if they were positive for AMI (AMIYR\_U=1) but negative for SMMI (SMMIYR\_U=0).

The categories of SMI, LMI, and MMI were combined to create an overall mental illness indicator (MI\_CAT\_U), which is defined so that a respondent with LMI is coded 1, a respondent with MMI is coded 2, and a respondent with SMI is coded 3. Respondents with no past year mental illness are coded 0.

See Appendix N for a table listing key 2002-2012 NSDUH mental health measures, variable names, and information concerning comparability across survey years.

### **Using Mental Illness Variables in Analysis**

For the 2008 NSDUH, while SMI data for both half samples (SDS and WHODAS) could be analyzed together when using the 2008 model, the AMI, SMMI, LMI, and MMI data from the two half samples could not be combined for analysis. Under the 2012 model, both the 2008 half samples can be combined for the analysis of SMI as well as the other levels of mental illness because the 2012 models were generated such that the estimates would be comparable.

The predicted mental illness variables (e.g., SMIYR\_U, AMIYR\_U) that were derived from the 2012 model were examined to determine how they were associated with the mental health predictor variables in the 2012 model. It was found that the 2012 model significantly overestimated the proportion of adults aged 18 or older with SMI (and those with AMI) who had suicidal thoughts in the past year and also the proportion of adults who had MDE in the past year. Therefore, it is recommended that the mental illness variables derived from the 2012 model should not be used when analyzing past year suicidal thoughts, past year MDE, or other associated variables (including past year suicide attempts, suicide plans, medical treatment for suicide attempts, or lifetime MDE). Similarly, it is recommended that model-based mental illness variables should not be used in conjunction with the K6 variables (including serious psychological distress) or WHODAS variables in any analyses. This recommendation also applies to the 2005-2007 model-based measures. See CBHSQ (2014a) for more details.

### **Standard Errors (SEs) for Mental Illness Measures**

SEs for SMI estimates (and, likewise, estimates for AMI, SMMI, LMI, and MMI) were computed using the NSDUH predicted values as if they were actual values. This ignores the added error resulting from fitting the 2012 SMI model, which can be very large (CBHSQ, 2014a). These SEs, however, are more reasonable to use when making comparisons across years and across subpopulations within years because the errors due to model fitting are roughly the same across the estimates being compared. However, caution is advised when these mental illness measures are used as explanatory variables within a regression analysis because the resulting estimated regression coefficients often will be biased toward zero (Carroll, Ruppert, Stefanski, & Crainiceanu, 2006). Stated another way, values of the regression coefficients for these mental illness variables are likely to be attenuated. Consequently, situations in which AMI

or specific levels of mental illness (e.g., SMI) are true predictors of a dependent variable of interest in the population may not be significant predictors in regression models that use these variables. If a statistically significant association is identified between these mental illness variables and the dependent variable, however, one can be more confident that this truly is a significant association.

## **Weights**

### ***Mental Illness Measures***

Mental illness measures (i.e., SMI, AMI, SMMI, MMI, and LMI) that are defined based on the 2012 model should be analyzed using the standard analysis weight, ANALWT, for all survey years 2008 through 2012. With the revised 2012 model, both the WHODAS and SDS 2008 half samples can be combined to form single estimates and use ANALWT.

This differs from the initial recommendation for analyzing other measures of mental illness besides SMI based on the 2008 model. Due to the 2008 split sample, an adjusted mental health sample weight, MHSAMPWT, was created so that the WHODAS and SDS half samples were separately representative of the civilian, noninstitutionalized population aged 18 or older. However, this weight should not be used to analyze 2008 mental illness data based on the 2012 model.

Analyses using SMI across all years 2005 and later would also be analyzed using the standard analysis weight, ANALWT, for all survey years. Users should consider the differences in methodology prior to making any decisions on whether or how to use this data across all years.

### ***2005 and Subsequent Years: K6 and SPD Measures***

Analyses of past year K6 and SPD can be measured with the adjusted past year K6 and SPD variables from 2005 through 2007 and the past year SPD variables from 2008 and subsequent years using ANALWT.

### ***Combining 2008 and Subsequent Years of Data***

When combining 2008 with subsequent years' data to generate an annual average over a time period greater than 1 year for any of the mental health measures described in this appendix (i.e., K6, SPD, mental illness measures), a new weight should be created that divides the standard weight (ANALWT) by the number of years of data that are combined to correctly estimate weighted population totals. For example, to combine 2008-2012 data, divide ANALWT by 5.

## **APPENDIX J**

### **Incidence Documentation**

*This page intentionally left blank*

Incidence estimates are used to measure trends in the initiation of substance use using the National Survey on Drug Use and Health (NSDUH) data. Two general types of incidence estimates can be generated using NSDUH data: calendar year incidence and past year incidence. Measures of calendar and past year incidence are different in their conceptualization, calculation, and interpretation. Examples showing how to compute past year initiation estimates and mean age of first use are also included at the end of this appendix.

"Calendar year initiates" refer to the number of substance users reporting that they first used a substance within each prior calendar year (between January 1 and December 31), based on age-at-first-use data collected from all lifetime users. Together with information on the interview date and date of birth, age at first use is used to calculate the calendar year in which initial use occurred. Tabulated across calendar years, these estimates can indicate long-term incidence trends. (To avoid counting initiation that occurred outside the United States, the date of entry into the United States is taken into account for respondents who indicated they were not born in the United States.) Calendar year incidence was first presented in the 1999 NSDUH and continued through the 2004 NSDUH. An example showing how to create indicator variables and calculate calendar year incidence estimates can be found in the 2004 or earlier NSDUH analytic codebooks. Calendar year incidence estimates for periods earlier in the respondents' lives may be subject to substantial memory-related bias, thus potentially distorting the data for earlier years in long-term trend tables (Gfroerer, Hughes, Chromy, Heller, & Packer, 2004).

Because of concerns about the validity of trend estimates of incidence based on long recall periods, an alternative approach to estimating incidence was developed: past year incidence. This approach reflects initial use in the 12 months leading up to the date when a respondent was interviewed and does not take into account whether the respondent initiated substance use while a resident of the United States. Although this new measure will not eliminate reporting biases, the approach should minimize recall bias because its estimates are based on a more recent time period than the previously produced calendar year estimates. The more recent time period also provides more timely data on emerging patterns of use. Another advantage of this approach is that initiation estimates can be analyzed in conjunction with past year prevalence estimates because they reflect the same time period and population of interest (all respondents, not only those initiating in the United States), which provides a more complete and consistent picture of substance users.

Past year incidence was presented for the first time in the 2004 NSDUH and was used along with calendar year incidence. However, beginning with the 2005 NSDUH and continuing in subsequent NSDUHs, only past year incidence estimates have been presented; therefore, the 2011 analytic data file contains indicator variables to generate only this type of incidence estimate.<sup>1</sup>

Estimates of the incidence measure, termed "past year initiation," refer to respondents whose date of first use of a substance was within the 12 months prior to their interview date. This

---

<sup>1</sup> Once past year illicit drug initiates (past year incidence) are defined, further examination of the data can provide information on which drug was initiated first out of a group of selected drugs. The measures for past year initiates drug of first use were first created for the 2007 NSDUH but were subsequently also created for all years starting with the 2002 NSDUH. For more information on how these variables and estimates are created, including SAS® code and SUDAAN® examples, see Appendix J, Incidence Documentation, of the 2013 analytic codebook.

measure is determined by self-reported year and month of first use, an imputed day of first use, self-reported past year use (with the exception of daily cigarette use), and the interview date.

Past year incidence is reported in the 2011 detailed tables (Center for Behavioral Health Statistics and Quality [CBHSQ], 2012a) and the 2011 summary of national findings (CBHSQ, 2012b) as the number of new users or initiates of a substance in the past 12 months, as well as past year incidence rates (i.e., the number of new users among persons at risk for initiation in the past 12 months). The number of initiates in the past year is estimated by computing the number of persons who began using a given substance during the 12-month period immediately prior to their interview. Past year incidence rates, labeled as the "percentage of past year initiates among persons at risk for initiation" in the report, are calculated as the number of persons initiating substance use in the past 12 months divided by the number of persons eligible to initiate (expressed per 100). The two measures are equivalent to the epidemiological definition of incidence, which is the number of new cases that occur during a specified time period (e.g., 12 months) within a population at risk (e.g., those who have not initiated drug use).

Included at the end of this appendix are examples of how to compute past year initiation measures and age-of-first-use estimates. Example A contains SAS<sup>®</sup> code<sup>2</sup> to illustrate how to create the numerator and denominator variables that are used to compute cigarette, marijuana, and illicit drug past year incidence estimates. The example also includes SUDAAN<sup>®</sup> code<sup>3</sup> showing how to create the estimated number of initiates and the rate of initiation<sup>4</sup> (RTI International, 2008). Example B contains SUDAAN code showing how to compute the mean age at first marijuana use among past year marijuana initiates aged 12 to 49.<sup>4</sup> Notes have been included within this code to explain the various steps and how similar code can be used to create indicators and estimates for other substances.

For three substance summary measures (illicit drugs, illicit drugs other than marijuana, and nonmedical use of psychotherapeutics), the date of initiation is defined as the earliest date of initiation among the respective subgroup of substances. The SAS<sup>®</sup> code in the example below identifies which substance among the group was most recently initiated and ensures that the past year use indicator variable corresponding to the specific substance with the earliest date of initiation is used in the creation of the past year recent initiation and eligible-for-initiation variables for substance summary measures.

More detailed information about the estimates of past year initiation, including comparability,<sup>5</sup> possible biases, and their relevance, can be found in Section B.4.1 of Appendix B of the 2011 summary of national findings (CBHSQ, 2012b).

---

<sup>2</sup> SAS is a registered trademark of SAS Institute Inc.

<sup>3</sup> SUDAAN is a registered trademark of RTI International (a registered trademark and a trade name of Research Triangle Institute).

<sup>4</sup> The NSDUH suppression rule is used to determine if estimates are reliable. For examples of SAS<sup>®</sup> code showing how to apply the NSDUH suppression rule, see Appendix J, Incidence Documentation, of the 2013 analytic codebook. For details on the NSDUH suppression criteria, see Table B.2 in Appendix B of the 2013 summary of national findings report (CBHSQ, 2014).

<sup>5</sup> The past year initiation variables have changed over time with minor revisions being applied to the definition of these variables, and the impacted variables have been renamed. A detailed summary of the changes and a table showing the variable names and comparability over time can be found in Appendix J, Incidence Documentation, of the 2013 analytic codebook.

## Example A: Past Year Initiation

---

### EXAMPLE OF SAS CODE TO COMPUTE ANALYSIS VARIABLES FOR PAST YEAR INITIATION

The following example SAS code creates analysis variables used in the generation of estimates for past year initiation of cigarettes, marijuana, and illicit drugs. Two separate variables are created for each substance; the first variable, ELIGXXXY, denotes whether the respondent was eligible to initiate substance use in the past year, and the second variable, RECXXXY, denotes whether the respondent initiated substance use in the past year. For both variables, XXX indicates the substance abbreviation (CIG = cigarettes, MJ or MRJ = marijuana and SUM = illicit drug) and Y indicates which version of code is used to create the variable (2 = code for specific substance measures and 3 = code for summary substance measures only). These two variables are used in combination to estimate the rate of initiation in the past year.

\*\*\*\*\*/

```
data INDICAT; /*output dataset to be used in SUDAAN procedure*/
  set DATANAME; /*input dataset containing NSDUH data*/
```

```
/******
SAS code is included below to determine the date of initiation for the
following substance summary measures: illicit drugs (SUM), illicit drugs
other than marijuana (IEM), and non-medical use of psychotherapeutics (PSY).
```

For substance summary measures, the date of initiation is defined as the earliest date of initiation among a group of substances. The group of substances for each summary measure is defined as follows:

Parent	Child
SUM	COC, HER, HAL, INH, ANL, STM, SED, TRN, MJ
IEM	COC, HER, HAL, INH, ANL, STM, SED, TRN
PSY	ANL, STM, SED, TRN

This SAS code identifies which specific substance (child) date of first use (ZZZYFU, ZZZMFU, ZZZDFU) corresponds to the substance summary measure (parent) date of first use (XXXYFU, XXXMFU, XXXDFU) and creates a check variable (XXXCKYR) that indicates the past year recency use (XXXYR) for the specific substance (child) with the earliest initiation date.

The check variable (XXXCKYR) will be used to create the eligibility and initiation variables for the summary measures rather than summary past year recency variables (e.g., SUMYR, IEMYR, PSYR2). Note: A check variable was added to the 2007 NSDUH SAS code to ensure the past year recency use indicator (used to create the eligibility and initiation variables) corresponds to the substance with the earliest date of initiation among the group of substances. Please see the 2007 analytic codebook incidence appendix for details on this change.

Note that the example code below only creates the illicit drug (SUM) summary measure, and does not create illicit drugs other than marijuana (IEM) or nonmedical use of psychotherapeutics (PSY).

### Example A: Past Year Initiation (continued)

---

```
/*Create the REC**** Variable indicating whether a respondent was a
past year initiate or not*/

/*Initialize all respondents as having not been a past year
initiate*/

REC{I}=0;

/*If the respondent has a year of first use less than 9000 (i.e.,
the respondent is a lifetime user) then the date of first use is
examined*/

IF YFU{I} < 9000 THEN DO;

    /*If the difference between the interview date and the
    imputed date of first use is less than or equal to 365 and
    respondent reported past year use, then the respondent
    initiated in the past year */

    IF (INTDATE - MDY(MFU{I}, DFU{I}, YFU{I}) <= 365) AND
    PY(I) = 1 THEN REC{I} = 1;

END;

END;
RUN;
```

---

(continued)

## Example A: Past Year Initiation (continued)

---

\*\*\*\*\*  
EXAMPLE OF SUDAAN CODE

The following SUDAAN code illustrates how to use the variables created with the SAS code above in order to estimate the initiation rate of Marijuana in the past year. The input variables include the analysis weight (ANALWT), the design-based nesting variables (VESTR and VEREP), and two of the variables created in the above SAS code (ELIGMJ2 and RECMJ2). The output includes the estimated rate of initiation (and its respective standard error) and the estimated number of initiates (and its respective standard error).

NOTE: Estimates for only a single substance are produced with the program below. Estimates for multiple substances can be calculated simultaneously; however, keep in mind that all substance estimates will be calculated over all subgroups, and as a result, many estimates in the output will not necessarily make sense. For example, if estimates are calculated for marijuana and cigarettes, the output will show the number of initiates of marijuana among those eligible to be initiates of cigarettes.

## Example B: Mean Age of First Use among Past Year Initiates Aged 12 to 49

---

\*\*\*\*\*  
EXAMPLE OF SUDAAN CODE

The following SUDAAN code shows how to use imputed age-of-first-use variables in order to estimate the mean age of first marijuana use among past year marijuana initiates aged 12 to 49. The input variables include the analysis weight (ANALWT), the design-based nesting variables (VESTR and VEREP), the imputed age-of-first-marijuana-use variable (IRMJAGE), an age recode (INCAGE3) that is restricted to those aged 12 to 49, and the recent initiate recode for marijuana (RECMJ2). The output includes the estimated mean age of first use (and its respective standard error).

NOTE: Estimates for only a single substance are produced with the program below. Estimates for multiple substances can be calculated simultaneously. Further restrictions could be added if interested in those respondents who initiated prior to a specific age.

## **APPENDIX L**

### **Recoded Depression Variable Documentation**

*This page intentionally left blank*

The 2011 National Survey on Drug Use and Health (NSDUH) computer-assisted interviewing (CAI) instrumentation included two modules, the adult depression module and the adolescent depression module, which were designed to measure whether or not respondents had experienced a major depressive episode (MDE) in their lifetime and past year. Additional questions to assess impairment levels caused by MDE and treatment received for depression were included at the end of each MDE module.

This appendix provides details about the questions designed to assess MDE, comparability issues across survey years, development of adjusted lifetime and past year MDE variables, variable naming conventions, and analysis and weighting information. Variable specifications for lifetime and past year MDE as well as MDE with severe impairment are also provided. A flowchart (see [Figure 1](#)) is included to provide details regarding the routing logic leading up to the MDE questions specifying which respondents were asked the MDE questions and were defined as having MDE. The Key Mental Health Variables appendix provides a table with the variable names for the most commonly used NSDUH mental health measures (including depression) as well as information regarding comparability across survey years starting with the 2002 NSDUH.

The NSDUH CAI questions designed to assess MDE symptoms were based on the criteria in the *Diagnostic and Statistical Manual of Mental Disorders (DSM-IV)*, 4<sup>th</sup> edition (American Psychiatric Association, 1994). More specifically, MDE questions for adults were adapted from the depression section of the National Comorbidity Survey-Replication (NCS-R; Harvard School of Medicine, 2005), and those for adolescents (youths) were adapted from the depression section of the National Comorbidity Survey-Adolescent (NCS-A; Harvard School of Medicine, 2005). To make the modules developmentally appropriate for youths, there are minor wording differences in a few questions between the adult and youth modules. A person was defined as having had a lifetime MDE if he or she had five or more of nine symptoms for MDE in the same 2-week period in his or her lifetime, in which at least one of the symptoms was a depressed mood or loss of interest or pleasure in daily activities. A person was defined as having MDE in the past year if he or she had a lifetime MDE and a period of time in the past 12 months when he or she felt depressed or lost interest or pleasure in daily activities for 2 weeks or longer, while also having some of the other symptoms for lifetime MDE.

When the depression modules were first introduced in 2004, all youth respondents, but only half of adult respondents, received the questions because of a split-sample design. Further details on the 2004 split sample are provided in Appendix A of the 2004 national findings report (Office of Applied Studies [OAS], 2005b). Starting with the 2005 NSDUH, all youth and adult respondents received the questions in their respective depression modules. In the 2008 NSDUH, the adult mental health module was updated. This module precedes the adult depression module in the questionnaire which remained unchanged. In this revised 2008 mental health module, the K6 questions on nonspecific psychological distress were asked about two reference periods, the past 30 days and the month in the past 12 months when the distress was the worst. In addition, adult respondents were administered the mental health module through a split-sample design consisting of one of two impairment scales, an abbreviated World Health Organization Disability Assessment Schedule (WHODAS) or the Sheehan Disability Scale (SDS), to measure impairment due to emotions, nerves, or mental health. See the 2008 Recoded Mental Health

codebook appendix for further details. Starting in 2009, the split sample was removed, and the CAI instrument included only the WHODAS questions.

These changes and the fact that this revised mental health module precedes the adult depression module within the questionnaire could have influenced the adult respondent's answers to subsequent depression-related items. This type of influence is referred to as a context effect. A detailed analysis was conducted to examine potential context effects on MDE variables based on the changes in the mental health module. It was determined that MDE estimates for adults aged 18 or older from 2008 could not be compared with the 2007 and prior year estimates. Two subsamples (i.e., WHODAS and SDS) also were examined to determine whether the MDE data from the two 2008 subsamples were comparable. Because of differences in MDE estimates between the two samples, combining the SDS and WHODAS half-samples to produce an overall 2008 adult MDE estimate is not recommended. This applies to all adult MDE-related estimates (treatment/counseling for MDE, MDE-related impairment, etc.). Therefore, given the potential for comparability issues and to facilitate future trend analysis, only the WHODAS half-sample (MHSAMP08=1) is used for 2008 adult MDE estimation in the 2008 detailed tables (OAS, 2009a). See Appendix B, Section B.4.7, in the 2008 national findings report (OAS, 2009b) for further details on the decisions on the 2008 analyses.

Starting with the 2009 NSDUH, the mental health module includes only the WHODAS questions; therefore, the estimates for adult MDE from 2009 onward can be compared with the WHODAS half-sample from 2008. See Appendix B, Section B.4.2, in the 2009 mental health findings report (Center for Behavioral Health Statistics and Quality [CBHSQ], 2010b) for details on the 2009 analyses.

In order to be able to use the full sample of 2008 data and also to make adult MDE comparisons across survey years starting with 2005 and continuing through 2008 and later years, adjusted versions of adult past year MDE (AJAMDEYR) and adult lifetime MDE (AJAMDELT) variables were created retroactively for the years 2005 through 2008. These variables were adjusted to make MDE estimates from the SDS half-sample in 2008 and all adult respondents for 2005 through 2007 comparable with the MDE estimates based on the WHODAS half-sample in 2008 and all adult respondents in later years. More information about how the statistically adjusted adult MDE analysis variables were created can be found in the 2005-2008 codebooks and in the report describing these adjustments (Aldworth, Kott, Yu, Mosquin, & Barnett-Walker, 2012).

In 2009, changes were made to the youth mental health service utilization questions that preceded the questions about adolescent depression. These changes included the replacement of five questions that asked about receipt of special education services and school counseling and time spent in jail or foster care with questions that asked about receipt of mental health services in the education and justice system sectors.

The presence of new items could have influenced how adolescents responded to the adolescent depression questions and therefore the estimates of adolescent MDE. An analysis was performed that showed these questionnaire changes in 2009 did not appear to affect the estimates of adolescent MDE. Therefore, it is possible to assess trends for past year MDE from 2004 to 2011 for adolescents aged 12 to 17 without the need for adjusted variables. For more information

on the 2009 youth analyses results, see Appendix B, Section B.4.2, in the 2009 mental health findings report (CBHSQ, 2010b).

## **Naming Conventions**

In the 2004-2007 NSDUHs, MDE data from both the adult and youth modules were used to create single, combined recoded lifetime (MDELT) and past year MDE (MDEYR) variables, even though adult and youth data were not comparable because of wording differences between the modules. In the 2004-2007 detailed tables, analyses using combined variables were subset to the age group of interest to present estimates separately for adults and youths (OAS, 2005a; 2006; 2007; 2008). Note that in the 2004 detailed tables only, estimates were also presented for adults and youths combined, but producing combined estimates is no longer recommended.

Starting with the 2008 NSDUH, the MDE variables were renamed, and a separate set of variables was created each for adults and for youths. The new variable names have continued to be used in the 2011 NSDUH. Under the new naming convention, adult MDE variables begin with "A" and youth MDE variables begin with "Y" (e.g., AMDEYR, YMDEYR). There is one adolescent variable that does not follow this naming convention (i.e., MDEIMPY). Variables where youth and adult data were not combined into a single variable prior to 2008 were not renamed for adolescents (i.e., YSDSHOME, YSDSWRK, YSDSREL, YSDSSOC, YSDSOVRL, and MDEIMPY), since there was no change in variable construction or comparability. In addition, prior to 2008, the combined set of MDE variables was located in the Recoded Adult and Adolescent Depression section of the codebook. Currently, all adult and youth MDE variables are now located in either the Recoded Adult Depression or Recoded Adolescent Depression sections, respectively.

For adults, the new variable names denoted a break in the trend for the estimates due to the context effects noted earlier. To address the break in the trend, an adjustment was applied to the 2005-2008 adult MDE data, and the resulting new variables were retroactively added to the respective data files. These adjusted adult MDE variables begin with the abbreviation "AJ" for "adjusted" (i.e., AJAMDEYR, AJAMDELT). With the addition of the adjusted adult MDE variables, the documentation for the existing adult MDE variables was retroactively revised to refer to the existing variables as unadjusted adult MDE variables. In summary, for adults, the new variable names indicated that the MDE data from 2008 or later should not be compared or combined with unadjusted variables from 2004 to 2007. However, adjusted variables were later added for 2005 through 2008 to allow comparisons across years from 2005 onward. Adjusted adult MDE variables are not available for 2004. The adjusted variables for 2005 through 2008 can be renamed to match the adult past year MDE (AMDEYR) and adult lifetime MDE (AMDELT) variables for 2009 and subsequent years to produce comparable estimates across years, as seen in the 2011 mental health detailed tables (CBHSQ, 2012).

New variable names indicate changes that may or may not impact comparability with prior years. As described above, the 2008 adult MDE estimates are not considered comparable with 2007 and prior years. For adolescents, despite the new variable names, the MDE data from 2008 or later can be compared or combined with MDE data from 2004 to 2007 since there was no change to the youth modules. But in order to do so, either the original or new set of youth MDE variables should be renamed to match the other so that the data can be combined. See the

2008 Recoded Depression Variable Documentation codebook appendix for sample code on how to rename the 2008 or later survey year variables back to prior year names. In addition, a summary of variable names and comparability across years is presented in [Table 1](#) for both adult and youth lifetime and past year MDE. All variables in a column are comparable for the time periods specified despite nonidentical variable names.

**Table 1. Lifetime and Past Year Major Depressive Episode (MDE) Variable Comparability: 2004 NSDUH and Later Survey Years**

NSDUH Survey Year	Adult MDE			Youth MDE
	Comparable Variables 2004-2007	Comparable Variables 2008 and Later Years Unadjusted Data	Comparable Variables 2005 and Later Years Adjusted Data	Comparable Variables 2004 and Later Years
2004	MDELT, MDEYR <sup>1</sup>			MDELT, MDEYR <sup>1</sup>
2005-2007	MDELT, MDEYR <sup>1</sup>		AJAMDELT, AJAMDEYR	MDELT, MDEYR <sup>1</sup>
2008		AMDELT, AMDEYR <sup>2</sup>	AJAMDELT, AJAMDEYR	YMDELT, YMDEYR
2009 and Later Years		AMDELT, AMDEYR	AMDELT, AMDEYR	YMDELT, YMDEYR

NOTE: All the variables within the same column are comparable across years, once the variables have been renamed to match.

<sup>1</sup> To use these lifetime and past year MDE variables in comparisons, the data must be subset to adults or youths depending on the analysis of interest. Presenting estimates using combined adult and youth data is not recommended due to wording differences between the adult and youth modules.

<sup>2</sup> To use these lifetime and past year MDE variables in comparisons, the data must be subset to the WHODAS subsample (MHSAMP08=1).

Source: SAMHSA, Center for Behavioral Health Statistics and Quality (formerly Office of Applied Studies), National Survey on Drug Use and Health, 2004 and later.

## Weights

Analyses on unadjusted 2008 data that include only adults from the WHODAS half-sample (subset to MHSAMP08=1), such as the 2008 adult MDE analyses in the 2008 detailed tables (OAS, 2009a) or in the 2009 mental health detailed tables (CBHSQ, 2010a), should be weighted by an alternate analysis weight (MHSAMPWT). (Note that 2008 analyses including only adults from the SDS half-sample [subset to MHSAMP08=2] should also be weighted by MHSAMPWT.) This weight has been poststratified so that each of the half-samples is separately representative of the civilian, noninstitutionalized population aged 18 or older. Generating 2008 adult MDE estimates using the entire unadjusted adult sample (both WHODAS and SDS half-samples) is not recommended. To compare or combine 2008 unadjusted adult MDE (using only the WHODAS subsample) and 2009-2011 adult MDE data, users should create a new weight variable that takes on the value of MHSAMPWT for 2008 respondents and the value of ANALWT for 2009-2011 respondents. When doing this, users should restrict the unadjusted 2008 data to MHSAMP08=1 since the 2009-2011 NSDUHs use WHODAS questions and are comparable with only the 2008 WHODAS half-sample. The standard analysis weight (ANALWT) should be used for MDE analyses that include either the entire youth sample (i.e., any year) or adult sample (i.e., 2009 through 2011), such as those in the 2011 mental health detailed tables.

To analyze the 2005-2008 adjusted adult MDE variables in conjunction with the 2009-2011 adult MDE variables (e.g., the MDE multiyear trend analyses published in the 2011 mental health detailed tables [CBHSQ, 2012]), the standard analysis weight (ANALWT) should be used across all years.

Furthermore, when creating estimates based on more than a single year of data, the appropriate weight for each year should be divided by the number of years of data that are combined to correctly estimate weighted population totals. For example, if a user combines 2008 - 2011 to generate an annual average using the unadjusted adult MDE data, the new weight previously described should be divided by 4.

## **MDE Variable Specifications**

In the adult and youth depression modules of the NSDUH, respondents were asked a series of introductory questions to determine whether they had a worst period of time where they experienced feeling sad, empty, depressed, discouraged, or a loss of interest. If respondents fit certain criteria based on the routing logic found in these introductory questions, then they were asked the questions related to the nine attributes (symptoms) of MDE. In order to demonstrate which respondents were actually asked the MDE attributes questions based on these introductory questions, a flowchart using the adult questions is included as [Figure 1](#). These introductory questions in addition to the questions related to the nine attributes associated with MDE (see below) were used to score MDE.

This appendix includes information used for adults to define the lifetime adult MDE variable (AMDELT), the adult past year MDE variable (AMDEYR), and the adult impairment recodes, all of which are found in the Recoded Adult Depression section of the codebook. Similar questions were asked of youth respondents and used to define similar youth MDE variables found in the Recoded Adolescent Depression section but are not specifically defined in this appendix. The questions shown in the flowchart and the documentation below refer to the adult depression-associated question indicator from the CAI instrument specifications followed by the corresponding edited variable name to assist users in mapping the information back to the CAI.

Figure 1. Routing Logic Prior to Adult Major Depressive Episode (MDE) Attribute Questions

The questions below, shown with their associated question indicator from the CAI specifications, refer to the worst period of time the respondent has had that stands out in his or her mind; or, if he or she does not recall a worst period of time, the questions refer to the most recent period of time when the respondent experienced any or all of the following: sadness, discouragement, or lack of interest in most things. **It should be noted that no exclusions were made for MDE caused by medical illness, bereavement, or substance use disorders.**

During that [worst/most recent] period of time...

### 1. Depressed mood most of the day

- a. ... did you feel sad, empty, or depressed **most of the day nearly every day**? (AD24A)
- b. ... did you feel discouraged about how things were going in your life **most of the day nearly every day**? (AD24C)

A respondent was assigned a positive response to this symptom (D\_MDEA1=1) if he or she answered yes to either of the above questions.

### 2. Markedly diminished interest or pleasure in all or almost all activities most of the day

- a. ... did you lose interest in almost all things like work and hobbies and things you like to do for fun? (AD24E)
- b. ... did you lose the ability to take pleasure in having good things happen to you, like winning something or being praised or complimented? (AD24F)

A respondent was assigned a positive response to this symptom (D\_MDEA2=1) if he or she answered yes to either of the above questions.

### 3. Weight

- a. Did you have a much smaller appetite than usual nearly every day during that time? (AD26A)
- b. Did you have a much **larger** appetite than usual nearly every day? (AD26B)
- c. Did you gain weight without trying to during that [worst/most recent] period of time? (AD26C)
  - i. ... because you were growing? (AD26C1)
  - ii. ... because you were pregnant? (AD26C2)
- d. How many pounds did you gain? (AD26D)
- e. Did you lose weight without trying to? (AD26E)
  - i. ... because you were sick or on a diet? (AD26E1)
- f. How many pounds did you lose? (AD26F)

A respondent was assigned a positive response to this symptom (D\_MDEA3=1) if he or she answered yes to questions 'a' or 'b' above, or the answer to either question 'd' or 'f' was greater than or equal to 10. (Note that 'd' was only asked if 'c<sub>i</sub>' and 'c<sub>ii</sub>' were not 'yes,' and 'f' was only asked if 'e<sub>i</sub>' was not 'yes'.)

#### **4. Insomnia or hypersomnia**

- a. Did you have a lot more trouble than usual falling asleep, staying asleep, or waking too early nearly every night during that [worst/most recent] period of time? (AD26G)
- b. During that [worst/most recent] period of time, did you sleep a lot more than usual nearly every night? (AD26H)

A respondent was assigned a positive response to this symptom (D\_MDEA4=1) if he or she answered yes to either of the above questions.

#### **5. Psychomotor agitation or retardation**

- a. Did you talk or move more slowly than is normal for you nearly every day? (AD26L)
  - i. (if AD26L=1) Did anyone else notice that you were talking or moving slowly? (AD26M)
- b. Were you so restless or jittery nearly every day that you paced up and down or couldn't sit still? (AD26N)
  - i. (if AD26N=1) Did anyone else notice that you were restless? (AD26O)

A respondent was assigned a positive response to this symptom (D\_MDEA5=1) if he or she answered yes to either of the above 'a<sub>i</sub>' or 'b<sub>i</sub>' questions. (Note that 'a<sub>i</sub>' was only asked if 'a' was 'yes' and 'b<sub>i</sub>' was only asked if 'b' was 'yes'.)

#### **6. Fatigue or loss of energy**

- a. During that [worst/most recent] period of time, did you feel tired or low in energy nearly every day even when you had not been working very hard? (AD26J)

A respondent was assigned a positive response to this symptom (D\_MDEA6=1) if he or she answered yes to the above question.

#### **7. Feelings of worthlessness**

- a. Did you feel that you were not as good as other people nearly every day? (AD26U)
  - i. (if AD26U=1) Did you feel totally worthless nearly every day? (AD26V)

A respondent was assigned a positive response to this symptom (D\_MDEA7=1) if he or she answered yes to question 'a<sub>i</sub>'. (Note that 'a<sub>i</sub>' was only asked if 'a' was 'yes'.)

#### **8. Diminished ability to think or concentrate or indecisiveness**

- a. During that [worst/most recent] time period, did your thoughts come much more slowly than usual or seem confused nearly every day? (AD26P)
- b. Did you have a lot more trouble concentrating than usual nearly every day? (AD26R)
- c. Were you unable to make decisions about things you ordinarily have no trouble deciding about? (AD26S)

A respondent was assigned a positive response to this symptom (D\_MDEA8=1) if he or she answered yes to any of the above questions.

## 9. Recurrent thoughts of death or recurrent suicide ideation

- a. Did you often think about death, either your own, someone else's, or death in general? (AD26AA)
- b. During that period, did you ever think it would be better if you were dead? (AD26BB)
- c. Did you think about committing suicide? (AD26CC)
  - i. Did you make a suicide plan? (AD26DD)
  - ii. Did you make a suicide attempt? (AD26EE)

A respondent was assigned a positive response to this symptom (D\_MDEA9=1) if he or she answered yes to any of the above questions.

Respondents were classified with lifetime MDE if they had at least five of the nine above attributes. Respondents who have had MDE in their lifetime (AMDELT=1 for adults and YMDELT=1 for youths) and who have reported that they had a period of depression lasting 2 weeks or longer, while also having some of the symptoms mentioned during the past 12 months (ADPB2WK=1 for adults and YOPB2WK=1 for youths), were classified as having past year depression (AMDEYR=1 for adults and YMDEYR=1 for youths). Respondents with no lifetime MDE (AMDELT=2 for adults or YMDELT=2 for youths) or respondents with lifetime MDE (AMDELT=1 for adults and YMDELT=1 for youths) but no period of depression lasting 2 weeks or longer in the past year while having other symptoms (ADPB2WK=2 for adults or YOPB2WK=2 for youths) were defined as not having past year MDE (AMDEYR=2 for adults or YMDEYR=2 for youths).

Otherwise, respondents were classified as system missing for lifetime or past year MDE if they had unknown depression information and/or they were aged 12 to 17 (for adults) or aged 18 or older (for youths).

Respondents with lifetime MDE and respondents with recurrent thoughts of death or recurrent suicide ideation (D\_MDEA9=1 for adults and D\_MDEA9Y=1 for youths), regardless of MDE classification, were guided through the remainder of the depression module. Note that because of this second criterion, variables for treatment of depression may have values for respondents who were not classified as having lifetime MDE. If the subpopulation of interest is respondents with lifetime MDE or past year MDE, these restrictions should be implemented in the analysis using the appropriate variables. Users who are interested in the suicide ideation data<sup>1</sup> from the depression modules should also be aware of the routing logic shown in [Figure 1](#) because only a subset of respondents are asked the suicide-related questions.

---

<sup>1</sup> The suicide estimates presented in the detailed tables are from the mental health module data, not the depression suicide module data.

## MDE with Severe Impairment Variable Specifications

Respondents defined as having had MDE in the past year were then asked questions from the SDS to measure the level of functional impairment in major life activities reported to be caused by the MDE in the past 12 months (Leon, Olfson, Portera, Farber, & Sheehan, 1997).

The SDS measures mental health-related impairment in four major life activities or role domains. These four domains are defined separately for adults aged 18 or older and youths aged 12 to 17 to reflect the different roles associated with the two age groups. Each module consists of four questions that are assessed on a 0 to 10 visual analog scale with categories of "none" (0), "mild" (1-3), "moderate" (4-6), "severe" (7-9), and "very severe" (10).

A maximum impairment score (ASDSOVL2 for adults and YSDSOVRL for youths) is then defined as the single highest severity level of role impairment across all four SDS role domains. The four SDS role domain variables were recoded so that no interference = 1, mild = 2, moderate = 3, severe = 4, and very severe = 5. A maximum level of interference over all four domains was then defined (ASDSOVL2 or YSDSOVRL). Ratings greater than or equal to 7 on the scale (ASDSOVL2 or YSDSOVRL=4, 5) were considered severe impairment. Estimates for past year MDE with severe impairment (AMDEIMP=1 for adults and MDEIMPY=1 for youths) are presented for 2010 and 2011 in the 2011 mental health detailed tables (CBHSQ, 2012). The adult MDE with severe impairment variable is not comparable with NSDUH data prior to 2008 for the reasons discussed previously. Youth MDE with severe impairment data are comparable from 2006 onward. The questions pertaining to the four domains are listed below for both adults and youths.

### *Adult Depression Module: Functional Impairment*

**AD66a** Think about the time in the past 12 months when these problems with your mood were **most severe**.

Using the 0 to 10 scale shown below, where 0 means **no** interference and 10 means very **severe** interference, select the number that describes how much these problems interfered with your ability to do each of the following activities during that period. You can use any number between 0 and 10 to answer.

How much did your [depression symptoms] interfere with your ability to do home management tasks, like cleaning, shopping, and working around the house, apartment, or yard?

**AD66b** During the time in the past 12 months when your [depression symptoms] were most severe, how much did this interfere with your ability to work?

**AD66c** How much did your [depression symptoms] interfere with your ability to form and maintain **close** relationships with other people during that period of time?

**AD66d** How much did [depression symptoms] interfere with your ability to have a social life during that period of time?

***Adolescent Depression Module: Functional Impairment***

**YD66a** Think about the time in the past 12 months when these problems with your mood were the **worst**.

Using the 0 to 10 scale shown below, where 0 means **no** problems and 10 means very **severe** problems, select the number that describes how much your [depression symptoms] caused problems with your ability to do each of the following activities during that time. You can use any number between 0 and 10 to answer.

How much did your [depression symptoms] cause problems with your chores at home?

**YD66b** During the time in the past 12 months when your [depression symptoms] were worst, how much did this cause problems with your ability to do well at school or work?

**YD66c** How much did your [depression symptoms] cause problems with your ability to get along with your family during that time?

**YD66d** How much did your [depression symptoms] cause problems with your ability to have a social life during that time?

## **APPENDIX M**

### **Variable Map**

## **APPENDIX M**

### **Variable Map for 2011 Analytic Codebook Variables**

The purpose of this appendix is to help the user determine the relationship between variables. By searching for a variable listed within the codebook one may find the associated variables used in their creation, called Parent Variables. It should be noted, however, that not all Parent Variables listed in this appendix are included in the codebook.

In particular, many of these Parent Variables may be found in the 2011 Raw Data File and Codebook that was previously delivered to SAMHSA. Thus, if users of this appendix cannot find a Parent Variable on the 2011 Analytic File or in the associated Analytic File Codebook, they may wish to search the 2011 Raw Data File and Codebook.

Raw variables typically (though not always) have a two-letter prefix associated with the corresponding module. For example, the Parent Variables AL01 and ALREF in this appendix are raw variables from the alcohol module that begin with the prefix "AL" and are associated with the edited variable ALCEVER.

In contrast, Parent Variables that underwent editing or recoding will have a mnemonic name associated with them. For example, the Parent Variables ABODALC (abuse of or dependence on alcohol in the past year) and ABODILL (abuse of or dependence on any illicit drug in the past year) are recoded variables that were used to create ABDILAAL (abuse of or dependence on both alcohol and illicit drugs in the past year). Similarly, variables that were statistically imputed will have the prefix "IR" in the variable names. For example, the imputed alcohol recency-of-use variable IRALCRC served as the Parent Variable for ALCFLAG, ALCMON, and ALCYR.

In addition, users of this appendix need to be aware that this appendix may not constitute an exhaustive listing of all variables and the associated relationships with Parent Variables. In particular, not all Parent Variables that were used to create a given variable shown in the left-hand columns may be listed in this

## **APPENDIX N**

### **Key Mental Health Variables**

*This page intentionally left blank*

This Key Mental Health Variables appendix provides several tables that list a set of the most commonly used mental health measures, their associated variable names, and their availability from 2002 to 2016 for the National Survey on Drug Use and Health (NSDUH). These tables also show whether there are comparable or adjusted measures available for the years indicated. [Table 1](#) lists key mental health measures for youths aged 12 to 17, [Table 2](#) lists key mental health measures for adults aged 18 or older, and [Table 3](#) lists the mental health measures that have adjusted versions that allow for the comparisons of estimates across the years where changes were made. Because of such changes, this appendix is being provided as a guide in helping users with these commonly used mental health variables.

As noted above, this appendix only contains a subset of the mental health variables available. Groups of variables that are defined similarly may not all be included in the tables below. Examples of these groups are the variables for location of outpatient mental health treatment and the reason for not receiving mental health treatment, which are listed in [Table 2](#). The variables for location where outpatient mental health treatment was received such as at a day hospital or treatment program (MHLDTMT3), at a school setting (MHLSCHL3), and other locations (MHLOTH3) are not specifically listed in [Table 2](#) but are defined similarly to the variable for received outpatient mental health treatment from private therapist (MHLTHER3) and follow the same pattern of comparability. The variables for reasons for not receiving mental health treatment including fear of negative affect on job (MHRJOBS2), insurance does not cover treatment at all (MHRNCOV2), have no transportation to treatment or inconvenient (MHRTRAN2), and did not want others to find out (MHRFOUT2) are also not listed in [Table 2](#) but follow the same comparability pattern as the variable for reason for not receiving mental health treatment because could not afford cost (MHRCOST2). This appendix is intended to be a guide to assist analysts in their use of mental health measures and does not include a full list of all mental health measures that are available.

There have been several mental health-related questionnaire and estimation changes that impact the comparability of mental health data over time. One such change made to the 2004 and 2008 questionnaires affected the mental health measures of serious psychological distress (SPD) and lifetime and past year major depressive episode (MDE). These changes resulted in noncomparable measures that caused breaks in the trends. Adjusted measures were created that allowed comparisons of estimates across the years where the changes were made. Refer to Aldworth, Kott, Yu, Mosquin, and Barnett-Walker (2012) for details on the adjusted measures, Appendix H, Recoded Depression Variable Documentation, for MDE details, and Appendix E, Recoded Mental Health, for SPD details.

The NSDUH operational definition of serious mental illness (SMI) has also undergone some changes. In previously published 2002-2003 NSDUH reports, the K6 scale used for determining psychological distress was used to produce estimates that were termed "SMI," but in 2004, the estimate produced using the K6 was renamed "SPD." Starting in 2008, a new measure of SMI was produced that used a statistical model to predict mental illness based on a respondent's answers to the NSDUH K6 and World Health Organization Disability Assessment Schedule (WHODAS) questions. For more details on this new SMI measure, see Appendix B, Section B.4.3, in the 2009 mental health findings report (Center for Behavioral Health Statistics and Quality, 2010). This model was revised to produce improved mental illness estimates

starting with the 2012 NSDUH. This updated 2012 model was then used to create revised comparable mental illness estimates for 2008 through 2011. For details on these mental illness revisions, see Appendix B, Section B.4.3, in the 2012 mental health findings report (Center for Behavioral Health Statistics and Quality, 2013). Because of this change, mental illness variables based on the 2012 model have been created from 2008 and later years. A measure of SMI was created for the 2005-2007 NSDUHs based on an alternative predictive model for a methodological report (Center for Behavioral Health Statistics and Quality, 2017). This exploratory SMI measure was developed in an attempt to be comparable with SMI variables for 2008 and later NSDUHs; however, it is based on a different set of predictors. Users should consider the differences in methodology prior to making decisions on whether and how to use the SMI measure. For more information on how mental illness variables were created and how to use these variables, see Appendix E, Recoded Mental Health.

Received Substance Use Treatment at a Specialty Facility but No MH Service (YSPTXNMH) <sup>6</sup>														X	X
Received MH Services and Substance Use Treatment at a Specialty Facility (YMHASPTX) <sup>6</sup>														X	X

MD = medical doctor, MDE = major depressive episode, MH = mental health.

NOTE: The letter X indicates that the measure is available for the year(s) shown. For measures with two variable names listed, the first name corresponds with either the asterisk (\*) or the en dash (–) and the second name corresponds to the letter X in the years available columns. An asterisk (\*) indicates that a comparable measure with 2008 and later years is available for the year(s) shown; thus, variables corresponding to those measures in the indicated years can be renamed to conduct analyses with the 2008 and later year variables. An en dash (–) indicates that a comparable measure with later years is **not** available; thus, variables corresponding to those measures should not be compared across breaks in comparability (i.e., do not compare those measures with an en dash (–) with those measures with the letter X). An empty cell indicates that the measure is not available.

NOTE: The standard analysis weight, ANALWT, should be used for all measures and years.

NOTE: This table lists only the most commonly used mental health measures; it does not constitute a comprehensive list.

NOTE: This table was finalized on June 19, 2017.

<sup>1</sup> These variables were created for years prior to 2010 during the 2014 NSDUH and are comparable with 2010 and later variables.

<sup>2</sup> Revised mental health service variables were developed starting in 2013 because of the change in how the child welfare setting was defined. Prior to 2013, child welfare was defined in the specialty services category as an inpatient service. Child welfare is now defined as a nonspecialty service.

<sup>3</sup> A similarly named measure (without the “2”) exist for years 2002 through 2013 but are no longer being created starting with the 2014 NSDUH.

<sup>4</sup> For measures with two variable names listed, the second-named variables include this change. The original measures (first-named variables) are no longer being created starting with the 2013 NSDUH but are instead replaced with the revised variables.

<sup>5</sup> Both versions of these mental health service variables exist for the 2012 NSDUH because 2012 and 2013 estimates are presented in the 2013 mental health detailed tables (Center for Behavioral Health Statistics and Quality, 2014). The first- and second-named variables are **not** comparable for 2012.

<sup>6</sup> These variables were created during the 2015 NSDUH. Note that these were not included in data files for years prior to 2015 due to substance treatment at a specialty facility not being comparable as a result of the 2015 questionnaire changes.

[illegible]

**Table 2. Key Mental Health Measures for People Aged 18 or Older: 2002-2016 (continued)**

Mental Health Measure (Variable Name)	Years Available														
	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
Serious or Moderate Mental Illness Based on Revised Predicted SMI Probability(SMMIYR_U) <sup>6,7,8</sup>							X	X	X	X	X	X	X	X	X
Categorical Mental Illness Indicator Revised (MI CAT_U) <sup>7,8</sup>							X	X	X	X	X	X	X	X	X

K6 = six-item nonspecific psychological distress scale, MD = medical doctor, MDE = major depressive episode, MH = mental health, WHODAS = abbreviated eight-item World Health Organization Disability Assessment Schedule.

NOTE: The letter X indicates that the measure is available for the year(s) shown. For measures with two variable names listed, the first name corresponds with either the asterisk (\*) or the en dash (–) and the second name corresponds to the letter X in the years available columns. An asterisk (\*) indicates that a comparable measure with later years is available for the year(s) shown; thus, variables corresponding to those measures in the indicated years can be renamed to conduct analyses with the later year variables. An en dash (–) indicates that a comparable measure with later years is **not** available; thus, variables corresponding to those measures should not be compared across breaks in comparability (i.e., do not compare those measures with an en dash (–) with those measures with the letter X). An empty cell indicates that the measure is not available.

NOTE: The standard analysis weight, ANALWT, should be used for all measures and years, except those noted in footnote 1.

NOTE: This table lists only the most commonly used mental health measures; it does not constitute a comprehensive list.

NOTE: This table was finalized on October 23, 2017.

<sup>1</sup> To compare the 2008 data with the 2009 or subsequent years, the 2008 mental health half-sample analysis weight, MHSAMPWT, should be used in conjunction with the sample indicator (MHSAMP08=1) to subset to the 2008 WHODAS half-sample data.

<sup>2</sup> Two versions of these variables exist for years 2002 through 2008. The original variables that end with a "2" have respondents who reported receiving no outpatient mental health coded as a SAS missing. The revised variables that end with a "3" have respondents who reported receiving no outpatient mental health coded as a "No" response. The two versions are not comparable.

<sup>3</sup> These variables were created during the 2015 NSDUH. Note that these are not comparable for years prior to 2015 due to substance treatment at a specialty facility not being comparable as a result of the 2015 questionnaire changes.

<sup>4</sup> Italicized MH measures indicate variables that were excluded from the Public Use File (PUF).

<sup>5</sup> The variables SMIPP\_A and SMIYR\_A were created for the 2005-2007 NSDUHs based on an alternative predictive model for a methodological report (Center for Behavioral Health Statistics and Quality, 2017). These exploratory variables were developed in an attempt to be comparable with SMI variables for 2008 and later NSDUHs; however, they are based on a different set of predictors. Users should consider the differences in methodology prior to making decisions on whether and how to use the SMI measure. For information on the creation of the mental illness variables, see Appendix E, Recoded Mental Health.

<sup>6</sup> SMIPP (a variable included in previous versions of the 2008-2011 data files) is based on the 2008 prediction model and SMIPP\_U is based on the 2012 prediction model. Mental illness variables originally created from SMIPP have been replaced with similarly named variables based on SMIPP\_U. For information on the creation of the mental illness variables, see Appendix E, Recoded Mental Health.

<sup>7</sup> Mental illness variables based on the 2012 prediction model have been created from 2008 and later years. For years 2008-2011, these revised variables have replaced the previously available mental illness variables. See Appendix E, Recoded Mental Health, for further details about these revised mental illness variables.

<sup>8</sup> The 2008 and later years mental illness variables based on the 2012 prediction model and the 2005-2007 SMI variables based on an alternative model should not be used when analyzing variables for past year suicidal thoughts, past year MDE, the K6, or the WHODAS, nor should they be used when analyzing other variables closely linked with these variables (including past year suicide attempts, suicide plans, medical treatment for suicide attempts, lifetime MDE, serious psychological distress [SPD], or components used in the K6 or WHODAS scales). For more details, see Appendix E, Recoded Mental Health.

<sup>9</sup> Mild or Moderate Mental Illness is referred to as "AMI excluding SMI" in the detailed tables.

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health, 2002-2016.

**Table 3. Comparable Versions of Key Mental Health Measures for People Aged 18 or Older: 2002-2016**

Mental Health Measure	Years Available				
	2002-2003	2004	2005-2007	2008	2009-2016
Lifetime Major Depressive Episode			AJAMDELT	AJAMDELT	AMDELT
Past Year Major Depressive Episode			AJAMDEYR	AJAMDEYR	AMDEYR
K6 Total Score in Worst Month of Past Year Based on Long Form Module	SMI_SUM	SPD_ASCR			
K6 Total Score in Worst Month of Past Year Based on Short Form Module		SPD_RSCR	SPD_USCR		
Worst K6 Total Score in Past Year <sup>1</sup>			K6SMXADJ	K6SCMAX	K6SCMAX
Past Year Serious Psychological Distress Indicator Based on Long Form Module	SMI	SPD_ADJ, SPD_UADJ <sup>2</sup>			
Past Year Serious Psychological Distress Indicator Based on Short Form Module		SPD_RADJ	SPD_UADJ		
Past Year Serious Psychological Distress Indicator Based on Worst K6 Total Score			SPDYRADJ	SPDYR	SPDYR

K6 = six-item nonspecific psychological distress scale.

NOTE: All variables within a row are comparable across the years indicated, even if they have different names.

NOTE: The standard analysis weight, ANALWT, should be used for all measures and years, except as indicated in footnote 2 below.

NOTE: This table lists only the mental health measures with adjusted versions for comparability across years.

NOTE: In the 2002 and 2003 NSDUHs, serious psychological distress was referred to as serious mental illness.

NOTE: This table was finalized on June 19, 2017.

<sup>1</sup> Worst K6 Total Score in Past Year is the maximum of K6 Total Score in Past Month (K6SCMON) and K6 Total Score in Worst Month of Past Year (K6SCYR).

<sup>2</sup> SPD\_UADJ, restricted to the 2004 Sample A (Long Form), was used in the 2004 NSDUH detailed tables (Office of Applied Studies, 2005). SPD\_ADJ was created so that comparisons of serious psychological distress based on the long form can be made between 2002, 2003, and the full 2004 sample. The standard analysis weight, ANALWT, should be used for SPD\_ADJ, but for SPD\_UADJ in 2004, the Sample A analysis weight, SPDWGHT, should be used in conjunction with the sample indicator that subsets to the 2004 Sample A data (ADLTSAMP=1).

## **APPENDIX O**

### **2008-2010 and 2010-2012 Substate Region Definitions**

*This page intentionally left blank*

The substate regions defined in [tables O1](#) through [O51](#) were used to produce substate small area estimates using the 2008-2010 combined NSDUH data and the 2010-2012 combined NSDUH data. The tables in this appendix list the substate regions and aggregate regions (where applicable) for each State and the counties or Census Tracts that make up each of these regions.

For most States a single table is included here since the substate region definitions remained the same in 2008-2010 and 2010-2012. For some States, two tables are included since the substate region definitions changed between 2008-2010 and 2010-2012 for that State. These tables include the region names, SBST10N and SBST12N, as well as the numeric IDs, SBST10 and SBST12, of the substate regions. For States that have aggregate regions, the tables also include the 4 aggregate variables: SBSTA10N, SBSTAG10, SBSTA12N, and SBSTA12. It is important to note that the 2008-2010 substate regions were defined in terms of the 2000 Census geography (i.e., using TRACT and COUNTY), whereas the 2010-2012 substate regions were defined in terms of the 2010 Census geography (i.e., using MTRACT10 and MCTY10). For most States, county definitions did not change between the two Census geographies. Exceptions are noted in the tables.

For more information about how these regions were created, see the following: 2008-2010 National Survey on Drug Use and Health Substate Region Estimation Methodology Report at <https://www.samhsa.gov/data/> and 2010-2012 National Survey on Drug Use and Health Substate Region Estimation Methodology at <https://www.samhsa.gov/data/>.

**Table O5.2 CALIFORNIA – Substate Regions (defined in terms of counties and census tracts from the 2000 decennial census, specified by a 6-digit tract identifier) (continued)**

<b>Region 12R (3)</b>	<b>Regions 13 and 19R (20)</b>		<b>Region 14 (Orange) (4)</b>	<b>Region 15R (Fresno) (5)</b>	<b>Region 16R (San Diego) (6)</b>	<b>Region 17R (7)</b>	<b>Region 18R (San Bernardino) (8)</b>	<b>Region 20R (10)</b>
<b>Region 12R (9)</b>	<b>Region 13 (Riverside) (10)</b>	<b>Region 19R (Imperial) (16)</b>	<b>Region 14 (Orange) (11)</b>	<b>Region 15R (Fresno) (12)</b>	<b>Region 16R (San Diego) (13)</b>	<b>Region 17R (14)</b>	<b>Region 18R (San Bernardino) (15)</b>	<b>Region 20R (18)</b>
Alpine Amador Calaveras Mono San Joaquin Tuolumne	Riverside	Imperial	Orange	Fresno	San Diego	Inyo Kern Kings Tulare	San Bernardino	Madera Mariposa Merced Stanislaus
<b>Region 21R (11)</b>								
<b>Region 21R (19)</b>								
Monterey San Benito San Luis Obispo Santa Cruz								

Note: Region 19R (Imperial) has no respondents in the 2012 sample.

Note: This table shows the substate region definitions for California that were used in the 2008-2010 substate estimates.

**Table O6.1 COLORADO – Substate Regions (defined in terms of 2010 Census counties)**

<b>SBST12N (SBST12)</b>					
<b>Region 1 (1)</b>	<b>Regions 2 and 7 (4)</b>	<b>Region 3 (2)</b>	<b>Region 4 (3)</b>	<b>Regions 5 and 6 (5)</b>	
Cheyenne	<u>Region 2</u>	Chaffee	Alamosa	<u>Region 5</u>	<u>Region 6</u>
Elbert	Adams	Custer	Baca	Archuleta	Eagle
Kit Carson	Arapahoe	El Paso	Bent	Delta	Garfield
Larimer	Broomfield	Fremont	Conejos	Dolores	Grand
Lincoln	Clear Creek	Lake	Costilla	Gunnison	Jackson
Logan	Denver	Park	Crowley	Hinsdale	Mesa
Morgan	Douglas	Teller	Huerfano	La Plata	Moffat
Phillips	Gilpin		Kiowa	Montezuma	Pitkin
Sedgwick	Jefferson		Las Animas	Montrose	Rio Blanco
Washington			Mineral	Ouray	Routt
Weld	<u>Region 7</u>		Otero	San Juan	Summit
Yuma	Boulder		Prowers	San Miguel	
			Pueblo		
			Rio Grande		
			Saguache		

Note: This table shows the substate region definitions for Colorado that were used in the 2010-2012 substate estimates. Because the 2010-2012 regions are based on 2010 Census geography, one new county, Broomfield, was created from pieces of four other counties, these region definitions include one additional county (as compared to the 2008-2010 definitions). Because of this extra county, the 2008-2010 and 2010-2012 region definitions may have minor differences; however, the Colorado regions are still comparable across these two time periods.

**Table O6.2 COLORADO – Substate Regions (defined in terms of 2000 Census counties)**

<b>SBST10N (SBST10)</b>					
<b>Region 1 (1)</b>	<b>Regions 2 and 7 (4)</b>	<b>Region 3 (2)</b>	<b>Region 4 (3)</b>	<b>Regions 5 and 6 (5)</b>	
Cheyenne	<u>Region 2</u>	Chaffee	Alamosa	<u>Region 5</u>	<u>Region 6</u>
Elbert	Adams	Custer	Baca	Archuleta	Eagle
Kit Carson	Arapahoe	El Paso	Bent	Delta	Garfield
Larimer	Clear Creek	Fremont	Conejos	Dolores	Grand
Lincoln	Denver	Lake	Costilla	Gunnison	Jackson
Logan	Douglas	Park	Crowley	Hinsdale	Mesa
Morgan	Gilpin	Teller	Huerfano	La Plata	Moffat
Phillips	Jefferson		Kiowa	Montezuma	Pitkin
Sedgwick			Las Animas	Montrose	Rio Blanco
Washington	<u>Region 7</u>		Mineral	Ouray	Routt
Weld	Boulder		Otero	San Juan	Summit
Yuma			Prowers	San Miguel	
			Pueblo		
			Rio Grande		
			Saguache		

Note: Broomfield County, Colorado, was created in 2001. However, the NSDUH sample is based on the counties from the 2000 decennial census when the land area defined by Broomfield County was located in four counties (Adams, Boulder, Jefferson, and Weld); therefore, Broomfield County is not included in this list of substate regions.

Note: This table shows the substate region definitions for Colorado that were used in the 2008-2010 substate estimates.

**Table O7.1 CONNECTICUT – Substate Regions (defined in terms of census tracts from the 2010 decennial census, specified by a 6-digit tract identifier) –**

<b>SBST12N (SBST12)</b>	
<b>Eastern (1)</b>	Tracts 690300 – 980000 in New London County; Tracts 840100 – 881500 and 890201 in Tolland County; Tracts 800300 – 908100 in Windham County
<b>North Central (2)</b>	Tracts 400100 – 524700 and 980000 in Hartford County; Tracts 425300 – 425500 in Litchfield County; Tracts 526101 – 538202, 890100, and 890202 in Tolland County
<b>Northwestern (3)</b>	Tracts 200100 – 257100 in Fairfield County; Tract 330100 in Hartford County; Tracts 250100 – 362102, and 425600 in Litchfield County; Tracts 341100 – 361300 in New Haven County
<b>South Central (4)</b>	Tracts 110100 – 110600 in Fairfield County; Tracts 541100 – 680200 in Middlesex County; Tracts 120100 – 194202 and 361401 in New Haven County; Tracts 650100 – 660102 in New London County
<b>Southwest (5)</b>	Tracts 010101 – 105200 and 257200 in Fairfield County

Note: This table shows the substate region definitions for Connecticut that were used in the 2010-2012 substate estimates. These regions are based on 2010 census geography (i.e., they are defined in terms of 2010 census tracts, whereas the 2008-2010 regions were defined in terms of 2000 census tracts). Despite the tract changes, all of the regions are still comparable across the two time periods.

**Table O7.2 CONNECTICUT – Substate Regions (defined in terms of census tracts from the 2000 decennial census, specified by a 6-digit tract identifier)**

<b>SBST10N (SBST10)</b>	
<b>Eastern (1)</b>	Tracts 690100 – 870100 in New London County; Tracts 840100 – 881500 in Tolland County; Tracts 800300 – 908100 in Windham County
<b>North Central (2)</b>	Tracts 400100 – 524100 in Hartford County; Tracts 425300 – 425500 in Litchfield County; Tracts 526100 – 538202, 890100, and 890200 in Tolland County
<b>Northwestern (3)</b>	Tracts 200100 – 257100 in Fairfield County; Tract 330100 in Hartford County; Tracts 250100 – 362102 in Litchfield County; Tracts 341100 – 361300 in New Haven County
<b>South Central (4)</b>	Tracts 110100 – 110600 in Fairfield County; Tracts 541100 – 680100 in Middlesex County; Tracts 120100 – 194202 in New Haven County; Tracts 650100 – 660102 in New London County
<b>Southwest (5)</b>	Tracts 010101 – 105200 in Fairfield County

Note: This table shows the substate region definitions for Connecticut that were used in the 2008-2010 substate estimates.

**Table O8.1 DELAWARE – Substate Regions (defined in terms of counties and census tracts from the 2010 decennial census, specified by a 6-digit tract identifier)**

<b>SBST12N (SBST12)</b>			
<b>Kent (1)</b>	<b>New Castle (excluding Wilmington City) (2)</b>	<b>Sussex (3)</b>	<b>Wilmington City (4)</b>
Kent	New Castle (excluding Wilmington City)	Sussex	Part of New Castle County (specified by Tracts 000200 – 003002, 012900, and 980100)

Note: This table shows the substate region definitions for Delaware that were used in the 2010-2012 substate estimates. These regions are based on 2010 census geography (i.e., Wilmington City region is defined in terms of 2010 census tracts, whereas the 2008-2010 regions was defined in terms of 2000 census tracts). Despite the tract changes, all of the regions are still comparable across the two time periods.

**Table O8.2 DELAWARE – Substate Regions (defined in terms of counties and census tracts from the 2000 decennial census, specified by a 6-digit tract identifier)**

<b>SBST10N (SBST10)</b>			
<b>Kent (1)</b>	<b>New Castle (excluding Wilmington City) (2)</b>	<b>Sussex (3)</b>	<b>Wilmington City (4)</b>
Kent	New Castle (excluding Wilmington City)	Sussex	Part of New Castle County (specified by Tracts 000100 – 002700 and 012900)

Note: This table shows the substate region definitions for Delaware that were used in the 2008-2010 substate estimates.

**Table O9.1 DISTRICT OF COLUMBIA – Substate Regions (defined in terms of census tracts from the 2010 decennial census, specified by a 6-digit tract identifier)**

<b>SBST12N (SBST12)</b>	
<b>Ward 1 (1)</b>	Tracts 002701 – 003200, 003400 – 004002, and 004400
<b>Ward 2 (2)</b>	Tracts 000100 – 000202, 004100 – 004300, 004902 – 005800, 006202, 010100, and 010700 – 010800
<b>Ward 3 (3)</b>	Tracts 000300 – 001401

Orange			Henry		Petersburg City	Southampton
Page			Lee		Powhatan	Suffolk City
Rappahannock			Lynchburg City		Prince Edward	Virginia Beach City
Rockbridge			Martinsville City		Prince George	Westmoreland
					Richmond City	Williamsburg City
					Surry	York
					Sussex	

Note: This table shows the substate region definitions for Virginia that were used in the 2010-2012 substate estimates. Because the 2010-2012 regions are based on 2010 Census geography, one county, Clifton Forge city, was deleted, thus this county is not included here (as compared to the 2008-2010 definitions). Because of this deleted county, the 2008-2010 and 2010-2012 region definitions may have minor differences; however, the Virginia regions are comparable across these two time periods.

Table O47.2 VIRGINIA – Substate Regions (defined in terms of 2000 census counties)

<b>SBST10N (SBST10)</b>						
<b>Region 1 (1)</b>		<b>Region 2 (2)</b>	<b>Region 3 (3)</b>		<b>Region 4 (4)</b>	<b>Region 5 (5)</b>

## **APPENDIX P**

### **2000 Census American Indian, Alaska Native, and Native Hawaiian Areas**

*This page intentionally left blank*

Census Code	American Indian, Alaska Native, and Native Hawaiian Area (AIANNHA) Name
0010	Acoma Pueblo and Off-Reservation Trust Land
0020	Agua Caliente Indian Reservation
0050	Alabama-Coushatta Reservation
0080	Allegheny Reservation
0095	Alturas Indian Rancheria
0110	Annette Island Reserve
0125	Augustine Reservation
0140	Bad River Reservation
0155	Barona Reservation
0165	Battle Mountain Reservation
0170	Bay Mills Reservation and Off-Reservation Trust Land
0185	Benton Paiute Reservation
0200	Berry Creek Rancheria and Off-Reservation Trust Land
0215	Big Bend Rancheria
0225	Big Cypress Reservation
0240	Big Lagoon Rancheria
0250	Big Pine Reservation
0265	Big Sandy Rancheria
0275	Big Valley Rancheria
0290	Bishop Reservation
0305	Blackfeet Indian Reservation and Off-Reservation Trust Land
0325	Blue Lake Rancheria
0335	Bois Forte Reservation
0350	Bridgeport Reservation
0360	Brighton Reservation
0400	Burns Paiute Indian Colony and Off-Reservation Trust Land
0415	Cabazon Reservation
0435	Cahuilla Reservation
0440	Campbell Ranch
0450	Campo Indian Reservation
0495	Capitan Grande Reservation
0510	Carson Colony
0525	Catawba Reservation
0540	Cattaraugus Reservation
0555	Cedarville Rancheria
0560	Celilo Village
0575	Chehalis Reservation
0585	Chemehuevi Reservation
0605	Cheyenne River Reservation and Off-Reservation Trust Land
0620	Chicken Ranch Rancheria
0635	Chitimacha Reservation
0680	Pueblo de Cochiti
0690	Coconut Creek Reservation
0695	Cocopah Reservation
0705	Coeur d'Alene Reservation
0720	Cold Springs Rancheria
0735	Colorado River Indian Reservation
0750	Colusa Rancheria
0760	Colville Reservation and Off-Reservation Trust Land
0770	Coos, Lower Umpqua, and Siuslaw Reservation and Off-Reservation Trust Land
0775	Coquille Reservation and Off-Reservation Trust Land
0780	Cortina Indian Rancheria
0795	Coushatta Reservation
0815	Cow Creek Reservation
0825	Coyote Valley Reservation
0845	Crow Reservation and Off-Reservation Trust Land
0855	Crow Creek Reservation
0870	Cuyapaipe Reservation

Census Code	American Indian, Alaska Native, and Native Hawaiian Area (AIANNHA) Name
0940	Dresslerville Colony
0955	Dry Creek Rancheria
0965	Duck Valley Reservation
0975	Duckwater Reservation
0990	Eastern Cherokee Reservation
1005	Elko Colony
1010	Elk Valley Rancheria
1040	Ely Reservation
1055	Enterprise Rancheria
1070	Fallon Paiute-Shoshone Colony
1075	Fallon Paiute-Shoshone Reservation and Off-Reservation Trust Land
1100	Flandreau Reservation
1110	Flathead Reservation
1125	Fond du Lac Reservation and Off-Reservation Trust Land
1135	Forest County Potawatomi Community and Off-Reservation Trust Land
1140	Fort Apache Reservation
1150	Fort Belknap Reservation and Off-Reservation Trust Land
1160	Fort Berthold Reservation
