Arkansas

URS Table Number	General Notes
4	Not in Labor Force increased for two possible reasons: 1) the overall number of persons increased and 2) Not Available decreased by about 1000 as new EHR implementations changed some designations to Not in Labor Force
5A & 5B	Payor source is defined as the "First Payor Billed," which in the case of Medicaid is also usually the ultimate payor for the service. "Medicaid (only Medicaid)" is an unduplicated count of those for whom Medicaid was the First Payor Billed for the last service provided during the state fiscal year. "Non-Medicaid Sources (only)" is an unduplicated count of those for whom some payor source other than Medicaid was the First Payor Billed for the last service provided during the state fiscal year.
6	The increase in RTC's during this reporting period could be a result of providers having developed the ability to more accurately report these admissions. The admissions number is derived since we do not get actual counts of admissions or discharges.
8	DBHS dispenses MHBG funds to support MHA Technical Assistance Activities through an annual contract with the Arkansas National Alliance on Mental Illness (NAMI). The contract annual amount is \$95,860. Although this amount is usually paid in full using MHBG monies, only \$85,710 of that amount came from MHBG in SFY 2014 while the remaining contract amount of \$10,150 was paid using a different funding source. For MHA Planning Council Activities, the Mental Health Council of Arkansas (MHCA) received additional funding of \$15,000 to support the Annual Behavioral Health Institute. DBHS has also expended \$13,309 under the MHA Administration category as auxiliary support to the Annual Behavioral Health Institute. It is also noted that the overall increase to both direct and non-direct service expenditures in SFY 2015 can be linked to the overall increase in Community Mental Health Block Grant monies in SFY 2015 (4.2 M) compared to (3.8 M) in SFY 2014
12	The state reporting system has a specific reporting field for "co-occurring substance abuse disorder." DBHS believes, however, that the count produced is suppressed because some providers believe that identifying an individual as having a "co-occurring disorder" can have an adverse impact when seeking prior-authorization of Medicaid services.
15	Providers are not required to update this status at defined intervals, only when it changes. These changes are collected on an ongoing basis as an attribute of transactions which are the substrate upon which URS reporting is based
16 & 17	Data on EBPs is based on aggregate data reports from providers. Client level data on EBPs is not reported, the number served is not unduplicated and breakouts of demographic variables are not reported. For SMI/SED client level data is reported, the count is unduplicated and the demographic break outs are reported in tables 14A and 14B.
