 Duplicated Among Community Programs
 Duplicated between children and adults

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2014

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age Age is calculated at midpoint of the State's elected reporting period (i.e., December 31, 2014).
 Gender Pregnant women - pregnancy status search was limited within the reporting period for clients 15 years and older, which is the earliest age used by CDC to report teen pregnancy.
 Race Demographic values (age, gender, race, ethnicity) - value was based on the last record except when the value is Unknown and search for a valid value from admission records more than 12 months prior the beginning of the reporting period.
 Overall DCF: Race not available includes clients identified as 'other race' (n=5,994)

Table 2b

Note:

This table uses data from URS tables 5a and 5b.

Type of Medicaid Data Reported

Data based on Medicaid Eligibility, not Medicaid Paid Services.

People Served by Both includes people with any Medicaid

State Notes

- 5a Age DMHAS has a racial category, "Other", which is entered into "Race Not Available" for the URS tables.
- 5a Gender DMHAS has begun collecting "transgender" as a gender option. For this table, we classified 4 people classified as transgender into the "not available" column when necessary.
- 5a Overall All data (DMHAS and DCF) have been reported in the "People Served by Both Medicaid and Non-Medicaid Sources" for FY15.
- 5b Overall All data (DMHAS and DCF) have been reported in the "People Served by Both Medicaid and Non-Medicaid Sources" for FY15.

	Age NA	444	107	153	14,369	3,172	5,867	2.90	2.45	16

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table3 and 6.

Table 3 State Notes:

Age None
 Overall None
 Gender None

Table 6 State Notes:

Hospital None
 Other Inpatient Children row has been intentionally left blank. See comments on data overall.
 Residential Children row has been intentionally left blank. See comments on data overall.
 Community Includes children in PRTFs.
 Overall Child utilization of state hospital has decreased through increased use of PRTFs in Connecticut. Clients and admissions that would have been reported under "State Hospitals" in past years are now included in the "Community Programs" totals.

Connecticut

URS Table Number	General Notes
All	DCF: There is some duplication in the tables of the clients receiving community services, resulting from characteristics of the CT Department of Children and Families' Programs and Services Data Collection System (PSDCRS). Client data entered into PSDCRS is unduplicated within each provider. Normally data is de-duplicated across providers by assuming that clients are the same if they have the same first and last name, DOB, and gender. For most of the tables in this report (those not involving SED) we also require that they have the same race, Hispanic/Latino origin status, health insurance coverage and living situation, so if any of these data elements are reported differently between providers this client would be counted more than once. This is done because all of the data elements just listed are used to classify clients in one or more tables in the MHBG report, so if they were not included in the de-duplication process as just described, the totals in the tables would be inconsistent with each other. There is also possible duplication by simple data entry errors, such as different spellings of a client's name by different providers.
2	DMHAS: Discrepancy from previous reporting years may be attributed to the change in data source (starting 2014, CT is using MH-TEDS data files to populate select URS Tables for the adult clients), methodology, and basic assumptions.
2	Demographic values (age, gender, race, ethnicity) - value was based on the last record except when the value is Unknown and search for a valid value from admission records more than 12 months prior the beginning of the reporting period.
2	Duplication in client count between the Children MH System and Adults MH System is limited to fewer than 30 individuals based on a procedure conducted to identify clients served by both agencies.
4	DCF does not collect employment data. DMHAS: recent status is reported unless Unknown/Not Available and a search for valid employment status within a 12-month period are initiated. This accounts for a higher number with employment status other than NA.
5A/5B	DMHAS: DMHAS collects an "Other" category for race. These clients have been recoded to the "Unknown" category.
16	DCF: Family Functional Therapy (FFT): In accordance with FT protocol, our agency monitors fidelity through the clinical lead. Fidelity is also monitored on an ongoing basis by FFT, Inc. through a variety of measures including the national supervisor who monitors our site. Adherence information are recorded on the web-based FFT Client Service System and is measured weekly by the on-site clinical lead and monthly by FFT, Inc., through our national consultant.
16	DCF: Multi-Systemic Therapy (MST): Therapist Adherence Measures (TAM), Supervisory Adherence Measures (SAM) and Program Implementation Reports are used to monitor fidelity by Advanced Behavioral Health, Inc. (vendor) on weekly and monthly basis.
