Idaho

URS Table Number	General Notes
5A/B	Data variance between tables 2A and 5A due to data being generated from two different data systems at two different points in time.
11	Comparing the results of the 2015 survey to the 2014 survey demonstrates that there has been substantial improvement over the past year (2014) surveys in the following notable areas. Comparisons are between the percent that disagreed plus those that strongly disagreed with the written statement. Reductions in 2015 ratings of disagree plus strongly disagree demonstrate that work being done to improve these areas has been making an impact. There was an improvement over previous year surveys, both in number and percent completed.
12	Percentage of children/adolescents served by the SMHA who also have a diagnosis of substance abuse problem and Percentage of children/adolescents meeting the Federal definition of SED who also have a diagnosis of substance abuse problem data are not available.
