Iowa

URS Table Number	General Notes
4, 4a, 5b, 15	Variance from FY14 to FY15 due to a redesign of Iowa's mental health and disability services and implementation of the Iowa Health and Wellness plan resulting in fewer clients reported through the regional submissions for data source for tables 4, 4a, 5b and 15.
5A	Variance from FY14 to FY15 due to a redesign of Iowa's mental health and disability services and implementation of the Iowa Health and Wellness plan resulting in fewer clients served by the regions and an increase in clients eligible for Medicaid funding through the Iowa Health and Wellness Plan.
6	Increase in number of people served in community programs at the beginning of the year is due to an expansion of community-based services through the redesign of Iowa's mental health and disability services. The Managed Care Organization that provided the residential treatment center data is no longer in contract with the Mental Health Authority; therefore further data analysis is not available. Variance from FY14 to FY15 on average length of stay is due to a change in reporting procedures for the data source.
8	Primary increase in expenditures, categorized under MHA Technical Assistance Activities, were directed towards developing a statewide psychiatric bed-tracking system.
12	Data gathered does not identify co-occurring substance abuse and mental illness
14A	Variance from FY14 to FY15 is due to an update on how the data source reports American Indian/Alaska Native and Native Hawaiian/Other Pacific Islander. The shift may also be attributed to an increase in number of clients served due to increased eligibility for Medicaid funding through the Iowa Health and Wellness Plan
