Massachusetts

URS Table Number	General Notes
5	The MA DMH is not the state Medicaid agency and does not presently have access to Medicaid data to complete this table.
6	Admissions to psychiatric continuing care units run by the MA DMH, but located in facilities operated by the state Public Health agency are included in the State Hospital category.
6	Individuals admitted to two community mental health centers (CMHCs) delivering acute care and one CMHC providing continuing care are included in "Other Psychiatric Inpatient". This category also includes admissions to private inpatient facilities through contract with the MA DMH.
6	Total Admissions to Community Program During the Year: The increase in admissions in SFY2014 is a result of the re-procurement of Clubhouse services. Due to this procurement activity, all clients receiving Clubhouse services were enrolled or re-enrolled in the service after the contracts started on July 1, 2013. Under the previous contracts, Clubhouse members who were not receiving another DMH services did not need to be enrolled in the service through DMH. As a result, 7,357 people were enrolled (admitted) into Clubhouse during SFY14. The decrease in SFY2015 represents a return to admission data similar to SFY13.
6	Total Admissions to Residential Treatment Centers During the Year: The increase in admissions is attributed to the re-procurement of some residential treatment centers associated with Caring Together services – a DMH-Department of Children and Families joint purchasing of several residential services for youth. Clients currently in these RTF programs were discharged and re-admitted when the new contracts began on February 1, 2015. These admissions were administrative in nature and did not represent actual movement of the client.
8	Total MHBG Expenditures for Non-Direct Service Activities: During SFY2014 and 2015, DMH re-distributed its use of Block Grant funds to simplify administrative processes and align with federal and state priorities. During the course of this adjustment, DMH utilized a higher proportion of Block Grant dollars for one-time training activities in SFY2014.
9	Percent of children/adolescents reporting positively about Functioning: DMH contracted with a new vendor to conduct the annual survey in SFY2015. DMH revised the family member survey, including the revision of individual items and the creation of new sub-scales. In addition, the sample size in SFY2015 is significantly larger than in previous years, including SFY2014.
9	Child/Adolescent Consumer Survey: Of the 6 recommended items in the YSS-F Functioning Domain, one item "My child is doing better in school and/or work (existing YSS-F Survey item)." was used. Five were substituted with these items: (1) My child has better coping skills. (This item was counted twice for the recommended items of "My child is better able to do things he or she wants" & "My child is better able to cope when things go wrong". (2) Services have improved the quality of my child's life. (3) Services have improved the quality of our family life. (4) My child has friend(s) that support him/here.
11	Percent of children/adolescent reporting positively about Outcomes: DMH contracted with a new vendor to conduct the annual survey in SFY2015. DMH revised the family member survey, including the revision of individual items and the creation of new sub-scales. In addition, the sample size in SFY2015 is significantly larger than in previous years, including SFY2014.
11/11a	Child/Adolescent Consumer Survey: Of the 6 recommended items in the Satisfaction with Services Domain, two items "Overall, I am satisfied with the services my child received" & "I felt my child had someone to talk to when he/she was troubled" were used. Three items were substituted with these items: (1) The services we received met our needs. (2) My child was able to get all the services I thought he/she needed. (This item was counted twice for the recommended items of "My family got the help we wanted for my child" & "My family got as much help as we needed for my child"). One recommended item "The people helping my child stuck with us no matter what" was not substituted with any item; therefore, the constructed Satisfaction with Services Domain score is based on 5 items versus 6 items.
11/11a	Child/Adolescent Consumer Survey: Of the 6 recommended items in the Positive Outcomes of Services Domain, one item "My child is doing better in school and/or work" was used. Five were substituted with these items: (1) Services have improved the quality of my child's life. (2) Services have improved the quality of our family life. (3) My child has friend(s) that support him/her. (4) My child has better coping skills. (5) Overall, I feel these services have helped my family.
11/11a	Child/Adolescent Consumer Survey: Of the 3 recommended items in the Participation in Treatment Domain, all were substituted, with the following: (1) Staff and I worked together to develop a plan that best met my child's needs. (2) The needs and preferences of my child and our family were reflected in the treatment plan(s). (3) I felt comfortable asking questions about my child's treatment and medication.

URS Table Number	General Notes
11/11a	Child/Adolescent Consumer Survey: Of the 4 recommended items in the Cultural Sensitivity Domain; one item "Staff treated me with respect" was used. Three were substituted with these items: (1) Staff were respectful of my cultural/ethnic background (race, religion, language, etc.) (This item was counted twice for the recommended items of "Staff respected my family's religious/spiritual beliefs" & "Staff were sensitive to my cultural/ethnic background". (2) Services were available in my preferred language.
12	Child/Adolescent services for the MA DMH are provided through age 18, with Adult services delivered for ages 19 and older. Calculations for this table use the federal definition of Child and Adult.
12	Ages 0 - 3 are served primarily by agencies other than the MA DMH, but service authorization criteria for MA DMH does not preclude service provision for this age group.
12	Individuals counted in the total served by the MA DMH who are referred by the criminal justice system, or seen for outpatient crisis evaluations may or may not meet SMI/SED definitions. All persons who meet DMH clinical standards for approval of continuing care community services meet federal SMI/SED definitions.
12	The calculation for the percentage of persons with a co-occurring diagnosis of substance abuse is obtained by counting the number of persons with a diagnosis of substance abuse on file in the Mental Health Information System (MHIS) as of the close of the reporting period divided by the total served as reported in Table 2 (Total Served) and Table 14 (Total SMI/SED), for whom there was a diagnosis on file in MHIS as of the close of the reporting period.
15	Total number of consumers in Jail/Correctional Facility: DMH reviewed data on the number of consumers in jail/correctional facilities by service type. The increase is spread across most service types. Anecdotally, DMH staff and contracted providers report an increase in forensic involvement and DMH is leading a number of initiatives related to transitions from prisons to the community as well as diversionary programs. We have not attributed this increase to any change in our service system or data collection processes but will continue to monitor this trend.
15	Living situation is measured at admission for all clients and at the annual review for case managed clients only. In addition, it is assessed annually for all inpatients in state operated facilities with length of stay (LOS) greater than 6 months.
15	The MA DMH does not provide crisis residence services and adult foster care. Information on individuals receiving these services through other agencies is not available in the MA DMH Mental Health Information System (MHIS).
15	The MA DMH does not provide "traditional" foster care for children and adolescents and does not presently collect this data for those clients receiving these services through the state Department of Social Services.
16	Total number of Children with SED: The number of children served by DMH increased from SFY2014 to 2015, both in terms of numbers served at the beginning of the year and admissions during the year. At the same time, the number of children served with SED decreased. DMH is increasingly authorizing children for DMH services for a short-term basis to receive community based services, such as Individual and Family Flexible Support Services or therapeutic afterschool services for children, many of which are receiving care coordination through the MassHealth funded Community Service Agencies. Due to the short-term nature of these services, DMH does not conduct a full service authorization process, decreasing the amount of time from referral to receipt of service. Some of these children may meet the criteria for DMH service authorization (and SED definition), but this is not formally assessed. Therefore, all children with a short-term authorization status are not included in this table.
16	Totals for Supported Housing are not available for reporting in SFY15. DMH and CBFS providers collaborated in developing the outcome measures that CBFS providers report to DMH as measures of contract performance. While CBFS providers began reporting housing data in January 2011, the data currently collected does not provide sufficient information to determine which individuals are receiving housing supports consistent with the Supported Housing model. DMH and CBFS providers made significant progress in developing a new housing measure set that is consistent with the federal guidance on the reporting of Supported Housing. However, the implementation of these revised measures was delayed due to a service rate development and re-contracting project that is required under the implementation of Chapter 257 of the Acts of 2008. DMH will continue to work towards the reporting of housing data to comply with federal reporting requirements.
16	Supported employment services are provided within several DMH services, including Community Based Flexible Supports (CBFS), Clubhouse and Program for Assertive Community Treatment (PACT). This data reflects only people enrolled in CBFS services who are receiving supported employment.
16	DMH does not currently conduct fidelity audits of PACT programs; some PACT programs conduct self-audits.
16	The decrease in individuals receiving Therapeutic Foster Care in SFY15 is due primarily to increased difficulties in identifying and recruiting foster parents for this group of DMH youth.
17	Although these EBPs may be provided in some DMH programs, they are not reported as discrete services in the Mental Health Information System (MHIS) and are unavailable for reporting.
