**State Notes:**

We used the same items for calculating these items as we did for the 2014 CSS. There were 88 fewer respondents in the 2015 adult CSS than in the 2014 survey. Perhaps, individuals who would have reported negatively about outcomes did not participate in the survey. This may have contributed to the lower N and the increased positive reporting.

**Note:**

US totals are based on states reporting.

This table uses data from URS Tables 20a and 20b.

State Notes:

This table has been populated using Mississippi's first year submission of MH-TEDS data files. The data source, methodology, and assumptions used in populating the 2015 URS Tables may account for significant differences from earlier state URS Tables.
