*Low precision; no estimate reported.

NOTE: Respondents with unknown Risk or Protective Factors data were excluded.

^a Difference between estimate and 2013 estimate is statistically significant at the 0.05 level.

^b Difference between estimate and 2013 estimate is statistically significant at the 0.01 level.

¹ Respondents were able to select multiple categories of persons that they would talk to about a serious problem, including the choice of "nobody." Respondents who reported both a person that they would talk to and that they had nobody to talk to were excluded from the analysis.

² Special occasions, such as weddings, funerals, or other special events, were not to have been considered in the number of times attended religious services.
