\*Low precision; no estimate reported.

NOTE: Respondents with unknown Risk and Protective Factors, Religious Beliefs, or Parental Involvement data were excluded.

<sup>1</sup> Illicit Drugs include marijuana/hashish, cocaine (including crack), heroin, hallucinogens, inhalants, or prescription-type psychotherapeutics used nonmedically, including data from original methamphetamine questions but not including new methamphetamine items added in 2005 and 2006.

<sup>2</sup> Binge Alcohol Use is defined as drinking five or more drinks on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days.

<sup>3</sup> Respondents were able to select multiple categories of persons that they would talk to about a serious problem, including the choice of "nobody." Respondents who reported both a person that they would talk to and that they had nobody to talk to were excluded from the analysis.

<sup>4</sup> Special occasions, such as weddings, funerals, or other special events, were not to have been considered in the number of times attended religious services.

<sup>5</sup> Response categories for the questions on Religious Beliefs include "Strongly disagree," "Disagree," "Agree," and "Strongly agree." The estimates in this table correspond to persons reporting "Agree" or "Strongly agree."

<sup>6</sup> Response categories for the Parental Involvement questions include "Always," "Sometimes," "Seldom," and "Never." The estimates in this table correspond to persons reporting "Always" or "Sometimes."
