URS Table Number	General Notes
17	The Family Psychoeducation estimate includes consumers receiving Consumer Centered Family Consultation, a brief 1-5 session intervention that emphasizes information, support and guidance to family members that is practical for adults with SMI. Each year, the Family Psychoeducation training provided by the Family Institute for Education, Practice and Research reaches more families as the number of trained clinicians has expanded. However, we can only report data on the families served by clinicians who are participating in the most recent training initiative and an average on prior initiatives.
19A	There was a 7.5% decrease in arrests (leading to convictions) in the overall population between 2013 and 2014. This we believe is a contributing factor in the decrease in overall arrests amongst the MH population.
21	Psychiatric inpatient readmission data may be incomplete. For example, a readmission would not be included if it occurred after a person lost Medicaid eligibility, or if a person was hospitalized out of state or in the Veteran's Administration system.
