Note:

US totals are based on states reporting.

This table uses data from URS Table 15.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

For the 2015 reporting year, living situation information was provided through an encounter data system for all SMHA programs. In 2014, an enrollment system (not encounters) were used.

In addition to the above definition of the Adult Priority Group, any adult who met the standards for involuntary treatment (as defined in Chapter 5100 Regulations – Mental Health Procedures) within the 12 months preceding the assessment is automatically assigned to this high priority consumer group.</p>
16	<p>OMHSAS is in the process of encouraging county offices to report services as encounters. Services were previously reported in the aggregate. As more counties change to this reporting method, and more encounters are added to the system, this number will continue to show dramatic increases in relation to previous year's numbers .</p>
12, 14A, 17, 16	<p>Increased emphasis has been placed on reporting all diagnosis codes, which has resulted in two or more diagnosis codes being received per encounter. This improvement has resulted in an increase in the number of individuals being reported as SMI/SED and co-occurring MH/SA.</p>
16	<p>A different Data System was used to report Table 16 results in 2015. The encounter system allowed for validation checks to ensure that all individuals were eligible for this report. The previous system could not match the data to actual encounters.</p>
