

2008-2010 National Survey on Drug Use and Health Substate Region Definitions

NOTE: The tables containing 2006-2008 substate estimates were rerun using the 2008-2010 substate region definitions. So, 2006-2008 versus 2008-2010 data comparisons will be possible in all substate regions. As a result, documentation on any changes to the 2008-2010 substate region definitions based on the original 2006-2008 definitions has not been provided.

The substate regions defined here were created in consultation with the California Department of Alcohol and Drug Programs and are defined in terms of the State's 58 counties with the exception of Los Angeles County. Los Angeles County is further split into service planning areas (SPAs) that are defined in terms of census tracts (from the 2000 decennial census). As per the State's request, estimates for 27 substate regions along with two aggregate planning areas (Region 11 for Los Angeles County and Regions 13 and 19R) and maps showing all 27 substate regions have been produced. Note that SPA 1 and SPA 5 in Los Angeles County were combined because individually the sample sizes in these regions were too small for reporting purposes.

Figure 6. COLORADO – Substate Regions (defined in terms of counties)

Table 6. COLORADO – 2008-2010 National Survey on Drug Use and Health Substate Region Definitions (defined in terms of counties)

The substate regions defined here were provided by the State's Alcohol and Drug Abuse Division, Colorado Department of Human Services, and are defined in terms of the State's 63 counties (as in the 2000 decennial census).¹ Because of sample size constraints, certain planning areas were combined to form substate regions.

¹ Broomfield County, Colorado, was created in 2001. However, the NSDUH sample is based on the counties from the 2000 decennial census when the land area defined by Broomfield County was located in four counties (Adams, Boulder, Jefferson, and Weld); therefore, Broomfield County is not included in this list of substate regions.

Table 7. CONNECTICUT – 2008-2010 National Survey on Drug Use and Health Substate Region Definitions (defined in terms of census tracts from the 2000 decennial census, specified by a 6-digit tract identifier)

The Connecticut Department of Mental Health and Addiction Services indicated that planning areas in Connecticut are defined in terms of townships, which in turn are defined in terms of census tracts from the 2000 decennial census within the State's eight counties. Several townships formed a single substate region.	
Eastern	Tracts 690100 – 870100 in New London County; Tracts 840100 – 881500 in Tolland County; Tracts 800300 – 908100 in Windham County

Table 8. DELAWARE – 2008-2010 National Survey on Drug Use and Health Substate Region Definitions (defined in terms of counties and census tracts from the 2000 decennial census, specified by a 6-digit tract identifier)

<p>The State's Division of Alcoholism, Drug Abuse and Mental Health, Delaware Department of Health and Social Services, defines its planning regions in terms of the State's three counties, with the exception of the Wilmington City and New Castle regions. The Wilmington City region (that lies in New Castle County) was defined based on all the census tracts from the 2000 decennial census that are either fully or partially contained in Wilmington City. The New Castle region (excluding Wilmington City) comprises all the tracts that are in New Castle County except those in the Wilmington City limits.</p>

Table 9. DISTRICT OF COLUMBIA – 2008-2010 National Survey on Drug Use and Health Substate Region Definitions (defined in terms of census tracts from the 2000 decennial census, specified by a 6-digit tract identifier)

The District of Columbia's Department of Operations, Addiction Prevention and Recovery Administration, indicated that wards could be used as substate regions. These wards can be described in terms of census tracts from the 2000 decennial census. If a tract overlapped ward boundaries, the tract was placed in the ward in which the majority of the tract fell. Ward 7 is made up of nonadjacent tracts.

Table 12. HAWAII – 2008-2010 National Survey on Drug Use and Health Substate Region Definitions (defined in terms of counties)

The substate regions for Hawaii were defined in consultation with the State's Alcohol and Drug Abuse Division, Hawaii Department of Health. As per the State's request, estimates for four substate regions, corresponding to the four counties in the State, along with one aggregate planning area (Kauai and Maui) have been produced. The 2008-2010 substate report provides separate estimates for Kauai for the first time. Previously, Kauai estimates had been combined with Maui because of low sample precision for Kauai. Aggregate 2008-2010 estimates combining Kauai and Maui have been produced for comparison with the 2006-2008 Kauai-Maui aggregate estimates. Maps showing all four regions also have been produced.

The substate regions defined here were provided by the State's Bureau of Substance Abuse and Addiction Services, Michigan Department of Community Health. All substate regions for Michigan are defined in terms of the State's 83 counties, with the exception of the Detroit City and Southeast regions. The Detroit City region (which lies in Wayne County) is defined based on all of the census tracts from the 2000 decennial census that are either fully or partially contained in Detroit City. The Southeast region comprises Monroe County and all the tracts that are in Wayne County (except those in the Detroit City limits). Some substate regions for Michigan are defined in terms of nonadjacent counties.

Table 36. OHIO – 2008-2010 National Survey on Drug Use and Health Substate Region Definitions (defined in terms of counties)

The Ohio Department of Alcohol and Drug Addiction Services suggested that it would be useful to provide substance use estimates for Ohio boards, which in turn are defined using the State's 88 counties. Because of sample size constraints, in consultation with the State's Center for Substance Abuse Treatment (CSAT) contact, adjacent boards were combined to form substate regions. Urban and rural counties were not collapsed together to form substate regions.
