Texas

URS Table Number	General Notes
5a	A client is counted as Medicaid if they were eligible at any time in the year.
5a	There has been an increase in the total number of clients served from 2014 due to efforts to reduce the number of clients in the wait list and also increase in funding for FY 2015.
5a	Though Pacific Islander is now being captured as a racial category; it is only captured at registration time. Due to very low volume (less than 50 individuals) it has been rolled into the Asian category.
6	NorthSTAR is included in local hospital starting in 2005.
10	Areas served are counties or statewide.
10	Includes NorthSTAR starting in 2008.
12	Starting 2012 the process of summarizing diagnosis information for a client was moved from a mainframe program to a warehouse load program that has access to the all diagnostic detail.
16	The introduction of Resiliency and Disease Management (RDM) to the Texas mental health service delivery system brought with it an integration of supported employment services within the delivery of evidence-based mental health services, such as counseling, psychosocial rehabilitative services, and case management. This integration brought changes in the manner by which supported employment services were recorded within the mental health service delivery system.
16	Therapeutic Foster care has been discontinued in Texas and no counts have been reported.
16	Multi-Systemic Therapy is not offered in Texas and no counts have been reported.
16	Contractual fidelity measures for ACT services were introduced in late 2005. Although numbers of clients served in ACT decreased after the introduction of the measures, there has been an increase in clients served from 2013 to 2014
16	The increase in total number of consumers receiving Supported Housing services is due to increases in the volume of services and it has even been introduced as a contract measure.
16	NorthSTAR began providing Supported Employment services in 2010 which accounted for most of the increase from the previous year.
17	Clients only served in the hospital have been removed from the client count. SA is counted via SA diagnosis authorized for ACT or Rehabilitative Case Management Service Packages (3 and 4). The Service Package criteria began in 2005 but more accurately reflects the best practice guidelines.
