Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data for URS/DIG Table 4a.

Alaska

URS Table Number	General Notes
All	Reporting year is State Fiscal Year
All	Data Sources Limitations: Community Programs: The Division uses an electronic health records system (the Alaska Automated Information Management System (AKAIMS)) to collect and report Community Program data. FY11 is the fourth year the Division used AKAIMS to report Community Program data. The AKAIMS FY11 URS data reports were run on 10-5-11. Unduplicated counts of "clients served" and "SED/SMI clients served" reflect the number of clients who received services through program enrollment. These counts do not include clients who received a mental health service but were not enrolled in a program.
All	Data Sources Limitations: State Psych Hospital: Data source is the Alaska Psychiatric Institute (API) electronic health records system.
All	Data Sources Limitations: Other Psych Inpatient: This includes Designated Evaluation & Treatment (DET) and Acute Psych: DET: High Risk Inpatient Psychiatric Diversion from API. Data is collected and reported using an Access database. FY11 data is not yet available; FY11 URS Tables include the FY10 DET data. Acute Psych: Data is from STARS/MMIS (Medicaid claim data was extracted from STARS on 9-28-11). Includes in- and out-of state clients. The FY11 unduplicated client count is based on Medicaid claims that have a valid Division of Behavioral Health collocation code (this includes clients who have at least one Medicaid paid claim and clients who have no Medicaid paid claims).
All	Data Sources Limitations: RPTC: Data is from STARS/MMIS (Medicaid claim data was extracted from STARS on 9-28-11). Includes in- and out-of state clients. The FY11 unduplicated client count is based on Medicaid claims that have a valid Division of Behavioral Health collocation code (this includes clients who have at least one Medicaid paid claim and clients who have no Medicaid paid claims).
All	Age - Unduplicated Counts: For Community Programs, for all unduplicated client counts, age is assigned as of the middle of the reporting period (SFY 2011 = Age as of January 1, 2011). For API, Other Psych Inpatient, and RPTC, for all unduplicated client counts except those in Table 6, age is assigned as of the middle of the reporting period. Table 6 reports both unduplicated and duplicated counts by age (child vs adult). For API, Other Psych Inpatient, and RPTC, the unduplicated counts by age category in Table 6 have age assigned as of the date of admission. Age - Duplicated Counts: For all duplicated client counts, age is assigned as of the date of admission.
All	Race/Ethnicity: For Community Programs, 'Hispanic' data is collected separately from 'Race' data (i.e., two separate questions); for API, Acute Psych, and RPTCs, 'Hispanic' was collected as part of the 'Race' question; and for DET, neither 'Race' nor 'Hispanic' data was collected. For consistency in reporting in the URS Tables, the API, Acute Psych, and RPTC counts of 'Hispanic' (as a 'Race') were instead entered as being a 'Hispanic' response to the Ethnicity question and were assigned 'Race Not Available'; the balance were assigned an Ethnicity of 'Hispanic Origin Not Available.' All of the DET counts were assigned an Ethnicity of 'Hispanic Origin Not Available.'
Community Program Client Counts	The increase from FY10 to FY11 in the reported number of clients who received community-based services reflects both an increase in the number of clients who received services and under-reporting for FY10 (we believe that a number of agencies did not have all their data entered into AKAIMS at the time the FY10 URS data reports were run). The client counts in each 2011 URS Table that includes community program data reflect this increase across the various demographic and outcome categories.

URS Table Number	General Notes
5A/5B	<p>Funding Support -- Medicaid Status: In FY11, we used the same methodology for determining Funding Support (Medicaid Status) that was used in FY10. We are not able to identify clients with Medicaid Only, Non-Medicaid Only, or both Medicaid and Non-Medicaid. For most clients, we are able to determine if their primary insurance type is Medicaid or non-Medicaid. We changed the row label for Medicaid Only to "Primary Insurance Type is Medicaid" and the row label for Non-Medicaid Only to "Primary Insurance Type is Non-Medicaid." We used the following methodology for each service setting to report the count of clients whose primary insurance type was Medicaid or non-Medicaid: For Community Programs: In AKAIMS, the primary insurance type is collected. If the client's primary insurance type is Medicaid, then the client is counted under the row for "Primary Insurance Type is Medicaid;" if the client's primary insurance type is not Medicaid, then the client is counted under the row for "Primary Insurance Type is Non-Medicaid." For State Psych Hospital (API): the primary and secondary insurance types are collected. If the client's primary insurance type is Medicaid, then the client is counted under the row for "Primary Insurance Type is Medicaid;" if the client's primary insurance type is not Medicaid, then the client is counted under the row for "Primary Insurance Type is Non-Medicaid" (this includes client's who have Medicaid as a secondary insurance type). For RPTCs and Acute Psych: the STARS/MMIS Medicaid claim data was used. If a client had at least one Medicaid paid claim, then the client was included under "Primary Insurance Type is Medicaid." If a client did not have any paid claims, then the client was included under "Primary Insurance Type is Non-Medicaid." For DET: Medicaid status is not collected, so all clients were entered under Medicaid Status Not Available.</p>
6	<p>State Hospital: API has relatively few patients with long lengths of stay (LOS), and depending on when these patients are discharged; the average and median LOS may vary considerably from year to year. RPTC: In general, the changes from FY10 to FY11 reflect the "Bring the Kids Home" efforts to (1) expand in-state RPTC capacity and (2) expand wrap-around, community treatment resources. We have increased service capacity for home and community-based services, and the expectation is that RPTC's will follow individualized treatment plans where the length of stay is individualized and not set at a year or specified program length. These efforts are reflected in increased number of in-state RPTC recipients, shorter lengths of stay, increased # of admissions, and increased # of discharges. Also, relatively few adults receive treatment at RPTCs, consequently the average and median length of stay for adults may vary considerably from year to year.</p>
12	<p>Percentage of Persons Served who has a Dual Diagnosis (Co-Occurring): We are not yet able to report the count or percentage of clients who have a Dual Diagnosis. We are able to report counts and percentages of clients who are "Treated for Co-Occurring Disorders." These counts are based on the client's admission record program type assignment of "Treating here for Both Mental Health & Substance Abuse." Percentages are based on Community Program data only.</p>
16	<p>EBP data is reported for Community Programs only. Currently, most EBP services are not tracked in AKAIMS. We generally rely on grantee quarterly reports to determine the number of clients receiving EBP services and the client demographic data; sometimes the demographic data is not included in the quarterly reports. At this time, we do not have a way of matching these clients with their records in AKAIMS to obtain demographic information. Therefore, in Table 16, clients might be included in the "Not Available" category for age, gender, race, and ethnicity. The FY11 increase in Therapeutic Foster Care and Multi-Systemic Therapy reflects the state's efforts to expand wrap-around, community treatment resources. As more agencies have expanded their capacity to serve youth and families, TFC and MST have increased. More agencies are providing TFC as a step down for their residential clients and as an alternative placement option for youth who cannot return home. MST appears to be an expanding scope of services within agencies who have increased their family focused services.</p>

URS Table Number	General Notes
17	<p>EBP data is reported for Community Programs only. Currently, most EBP services are not tracked in AKAIMS. We generally rely on grantee quarterly reports to determine the number of clients receiving EBP services and the client demographic data; sometimes the demographic data is not included in the quarterly reports. At this time, we do not have a way of matching these clients with their records in AKAIMS to obtain demographic information. Therefore, in Table 17, clients might be included in the "Not Available" category for age, gender, race, and ethnicity. Also, specific to Illness Self Management and Recovery, we believe that there are a number of clients who receive this service who do not have client records in AKAIMS; thus, the counts for a specific demographic group receiving this service could be higher than the AKAIMS total SMI counts reported for that demographic group.</p> <p>Family Psychoeducation: FY11 is a baseline year for reporting the count of clients who received evidence-based family psychoeducation. None of our grantee agencies provide family psychoeducation services that would be considered an evidence-based practice. Prior to FY11, counts reflected the number of clients who were enrolled in programs that included some family involvement and education.</p> <p>Integrated Treatment for Co-occurring Disorders: FY11 is a baseline year for reporting the count of clients who received "integrated treatment" for co-occurring disorders. The FY11 reported count might be low; the count reflects a measurement process that is under review for refinement. Prior to FY11, counts reflected the number of clients who were treated for co-occurring disorders, and not those who received evidence-based "integrated treatment."</p> <p>Receiving Illness Self Management and Recovery: The FY11 increase in the number of clients who received illness self management and recovery services reflects increased need, more outreach, and improved service delivery.</p> <p>Receiving Medication Management: FY11 is a baseline year for reporting the count of clients who received evidence-based medication management. None of our grantee agencies provide medication management services that would be considered an evidence-based practice. Prior to FY11, counts reflected the number of clients who received general medication management services.</p>
