URS Table Number	General Notes
4 and 4A	Like the rest of the Nation, Arizona has experienced high unemployment rates (10%) for our general population. As people continue to struggle financially, they may become eligible for Medicaid - which would both add them to our client roster and subsequently increase the number of individuals we show as being out of the labor force.
5 and 5A	Arizona has undergone changes in Medicaid coverage that have shifted many clients to have both Medicaid and non-Medicaid funding. There are also select services that are not Medicaid reimbursable - when a Medicaid-eligible client receives these services they would be funded through non-Medicaid dollars. For example, room and board in a residential facility.
6	The State has experienced a reduction of services for clients in both Other Psychiatric Inpatient and Residential Treatment settings.
16	The Division has made a concerted effort over the past year to emphasize the utilization of supported housing services as a means of preventing an increase in client homelessness and promote stable housing environments.
18	The method for collecting these data was modified for the current reporting period. Arizona is, therefore, reporting accurate number for this table.
