URS Table Number	General Notes
5A & 5B	<p>ayor source is defined as the "First Payor Billed," which in the case of Medicaid is also usually the ultimate payor for the service. "Medicaid (only Medicaid)" is an unduplicated count of those for whom Medicaid was the First Payor Billed for the last service provided during the state fiscal year. "Non-Medicaid Sources (only)" is an unduplicated count of those for whom some payor source other than Medicaid was the First Payor Billed for the last service provided during the state fiscal year. In DBHS' annual consumer satisfaction stratified random sample survey, recipients are asked how much of the services received were paid for by Medicaid. For 2009 for adults (n= 438), 42% indicated that all services were paid for by Medicaid, 15% indicated that some of the services were paid for by Medicaid and 44% indicated that none of the services were paid for by Medicaid. For 2009 for children (n= 363) 81% indicated that all services were paid for by Medicaid, 12% indicated that some services were paid for by Medicaid and 7% indicated that none of the services were paid for by Medicaid.</p>
6	<p>It is noted that there was a large change in: State Hospital LOS of Children discharged in 2011 report as compared to the 2010 report (-41%), State Hospital LOS of Adults discharged in 2011 report as compared to the 2010 report (+22%), and the LOS of adults in the facility who were state hospital residents at the end of the year in the 2011 report as compared to the 2010 report (-50%). The change in the Children's LOS is attributable to the closing of a unit serving adolescents with dual diagnosis of mental illness and developmental disability (DD) and the placement of these individuals in community DD services. As this unit was phased out the stay of those discharged was on average shorter than those discharged from this unit in previous years. The change in Adult LOS results from successful efforts to shorten the LOS of forensic patients. One effect of this successful effort was to increase the LOS of discharges as a number of long stay patients were discharged. This then resulted in the shorter LOS of those remaining at year's end.</p>
16 & 17	<p>Data on EBPs is based on aggregate data reports from providers. Client level data on EBPs is not reported, the number served is not unduplicated and breakouts of demographic variables are not reported. For SMI/SED client level data is reported, the count is unduplicated and the demographic break outs are reported in tables 14A and 14B.</p>
16	<p>It is noted that there was a large increase in the number reported receiving Supported Housing in SFY 2011 as compared to SFY 2010 (+19%). This increase results from there being one additional provider of this EBP in SFY 2011.</p>
16	<p>It is noted that there was a large decrease in the number receiving ACT in SFY 2011 as compared to SFY 2010 (-23%). This primarily resulted from a 50% decrease in the provision of this service by one provider who reduced services due to financial considerations.</p>
17	<p>It is noted that there was a large increase in the number receiving Integrated Dual Diagnosis services in SFY 2011 as compared to SFY 2010 (+105%). This resulted from the addition of one reporting provider with a very high rate of the provision of this service.</p>
19A & 19B	<p>Sample was drawn from those who had received at least one service between 7/1/10 and 12/31/10. Thus the potential time period covered is between 7/1/08 and 12/31/10.</p>
