General Notes FY 2011

Georgia

URS Table Number	General Notes
All	Unless otherwise specified, data in all tables includes consumers served in the following settings: State hospital inpatient stays in Adult Mental Health, Secure, and Child/Adolescent Short-Term Mental Health programs. Data for hospital outpatients and non-admits (including 23-hour observation) is not included; however, hospital-operated community services are included with other community services. Authorizations for residential stays in Psychiatric Residential Treatment Facilities (PRTFs). Authorizations for community services for consumers having at least one authorization with Primary or Secondary Diagnostic Category of MH.
All	Age: Unless otherwise specified the age reported is the consumer's age at the first date active in the State MH system during the SFY. Race: "More Than One Race Reported" includes Multi-Racial. "Race Not Available" includes Other Single Race, Unknown, and not reported. Hispanic/Latino Origin: "Not Available" includes "Unknown" and not reported.
4	Table 4 reports data for community consumers only. Employment Status reported in Table 4 is the latest available for the SFY. Employment Status is collected at admission, at discharge, at re-authorization of services, and at addition of new services to an existing authorization. "Employed" includes Competitive Employment and Community Based Non-Competitive Employment. "Unemployed" includes Unemployed But Available for Work = Yes. "Not in Labor Force" includes Facility Based Non-Competitive Employment and Unemployed But Available for Work = No. "Not Available" includes Not Available and Not Reported.
5A, 5B	"Medicaid (only Medicaid)" includes any consumer in Table 2A for whom a Medicaid MRO/PRTF claim was paid, but no State service encounter or State hospital inpatient episode was reported. "Non-Medicaid Sources (only)" includes any consumer in Table 2A for whom no Medicaid claim was paid, but a State service encounter was reported. "People Served by Both Medicaid and Non-Medicaid" includes any consumer in Table 2A for whom both a Medicaid claim was paid and a State service encounter was reported. "Medicaid Status Not Available" includes all the remaining consumers in Table 2A.
6	The decrease in the number of consumers served in state hospitals at the beginning of the year from 2010 to 2011 is due to a reduction in available beds at state hospitals, while the increase in the total number of consumer served in community programs at the beginning of the year is due to an increase in the total number of individuals being served.
6	Child units at the state psychiatric hospitals were closed resulting in a 100% decrease (from 2010) in the ALOS of children discharged from state hospitals. Per the U.S. DOJ Settlement Agreement, DBHDD has begun discharging a number of long-term consumers to community settings. These discharges have resulted in an increased ALOS of adults discharged from state hospitals. The ALOS of adults (in facility for less than a year) who were state hospital residents at the end of the year decreased from 2010. This is because with the discharging of numerous long-term adults from state hospitals to the community, there has been a turnover in available beds. Also, there have been additional crisis stabilization units opened in the community to divert more admissions from the state hospitals.
9, 11, 19A, 19B	Survey data includes community consumers only.
12, 14A, 14B, 16, 17	Community consumers may receive authorization for a core bundle of services using a simplified authorization request type called "Registration." On these authorization requests, consumers were assigned a diagnostic category of "Mental Health," but they were not assigned specific DSM diagnoses; therefore, consumers whose only request type active during the SFY was Registration cannot be designated as SMI or SED. This yields reported counts and percentages of SMI/SED consumers that are artificially low because no "Registration-only" consumers are included. Such consumers could not be included in: SMI-SED percentages of total served; SMI-SED percentages with co-occurring substance abuse; Tables 14A/14B (total SMI-SED consumers served); Table 16 (SMI-SED consumers receiving specified services); Table 17 (SMI consumers receiving specified services).

URS Table Number	General Notes
15	Table 15 reports data for community consumers only. Living Situation reported in Table 15 is the latest available for the SFY. Living Situation is collected at admission, at discharge, at re-authorization of services, and at addition of new services to an existing authorization. Table 15's category "Residential Care" includes living situations "Residential Care" and "PRTF" where the consumer's age was >= 18. Table 15's category "Children's Residential Treatment" includes living situations "Residential Care" and "PRTF" where the consumer's age was <18. "Crisis Residence" is not included among the response options for living situation in Georgia's information system. "NA" includes living situation Not Reported.
16	"Total unduplicated N - Adults with SMI served" includes only community consumers. "Total unduplicated N - Children with SED" includes only community consumers. See also note for table 15.
20A	Data: This table presents duplicated counts of consumers discharged from a State hospital Adult Mental Health inpatient programs between 1/1/2010 - 12/31/2010, and those consumers' subsequent readmissions within 30/180 days of discharge which occurred during State fiscal year 7/1/2010 - 6/30/2011.
