Illinois

URS Table Number	General Notes
4	The reason for the change in unemployment numbers from 2010 to 2011 is not known, however, it could be due to the elevated rates of unemployment in Illinois in general.
5A	The drop in number of persons receiving services paid for by non-medicaid dollars from 2010 to 2011 is a result of the reduction to those dollar amounts in the FY2011 budget.
6	Several factors may contribute to the variance in length of stay from FY10-FY11. For example: there was a reduction in beds at some facilities and persons in the Treatment and Detention Facility are included in this report after previous years' exclusion.
9sc, 11, 11a, 19A & 19B	Survey sampling methods for the caregiver survey was modified in FY2011 to include all caregivers of children and adolescents 0-17. Note: The sample of adolescents was limited to those with more than 9 days of service in the year. In previous years only caregivers of children 0-11 were sampled to avoid problems of confidentiality when older adolescents access services by themselves. By limiting the adolescent sample to those with significant number of visits will avoid the confidentiality concerns; because those who exceed 5 visits will need a caregiver's permission to continue treatment.
12	It is unclear why there is an increase from 2010 to 2011 in adults served by DMH with co-occurring MH/SA diagnosis.
