Iowa

URS Table Number	General Notes
12	Iowa does not have the ability to identify the percent of adults and children/adolescents meeting the Federal definition of SMI and SED, respectively, who also have a substance abuse problem.
15	More programs are working with clients in jails. The residential data is collected at the beginning of services and may not have been updated when the client left the facility.
16	Supported Housing Services; Supported Employment Services, Family Functional Therapy. This information was collected from a contractor which the department no longer contracts. We could not duplicate the number the contractor used, therefore, rather than continue to use undocumented numbers, we chose to not report these programs.
