

Montana 2011 Mental Health National Outcome Measures (NOMS): CMHS Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	6,879,637	32.83	22.10	56
Community Utilization per 1,000 population	6,587,988	24.56	21.17	55
State Hospital Utilization per 1,000 population	156,387	0.84	0.50	53
Other Psychiatric Inpatient Utilization per 1,000 population	364,926	1.33	1.37	41

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	578,225	54.6%	34.7%	54
Employed (percent with Employment Data)**	578,225	14.6%	18.1%	54

Adult Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	67.0%	70.5%	51

Child/Family Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	63.6%	64.6%	51

Readmission Rates:(Civil "non-Forensic" clients)	U.S.	State	U.S. Rate	States
State Hospital Readmissions: 30 Days	11,213	5.7%	9.0%	50
State Hospital Readmissions: 180 Days	25,438	11.1%	20.5%	52
State Hospital Readmissions: 30 Days: Adults	10,105	5.7%	9.3%	50
State Hospital Readmissions: 180 Days: Adults	22,812	11.1%	21.0%	52
State Hospital Readmissions: 30 Days: Children	1,108	0.0%	7.3%	24
State Hospital Readmissions: 180 Days: Children	2,620	0.0%	17.2%	27

Living Situation	U.S.	State	U.S. Rate	States
Private Residence	4,031,681	68.1%	82.0%	55
Homeless/Shelter	151,011	4.0%	3.1%	53
Jail/Correctional Facility	89,663	0.4%	1.8%	50

Adult EBP Services	U.S.	State	U.S. Rate	States
Supported Housing	68,498	2.5%	2.5%	38
Supported Employment	50,394	0.9%	1.7%	40
Assertive Community Treatment	65,311	2.5%	2.1%	41
Family Psychoeducation	17,644	-	1.2%	16
Dual Diagnosis Treatment	58,876	-	3.6%	24
Illness Self Management	159,167	2.1%	11.6%	21
Medications Management	296,177	-	22.6%	18

Child/Adolescent EBP Services	U.S.	State	U.S. Rate	States
Therapeutic Foster Care	18,392	9.8%	1.7%	28
Multisystemic Therapy	8,448	-	1.1%	20
Functional Family Therapy	10,989	-	1.8%	14

Change in Social Connectedness	State	U.S. Rate	States
Adult Improved Social Connectedness	63.6%	70.0%	51
Child/Family Improved Social Connectedness	81.0%	85.3%	49

*Denominator is the sum of consumers employed and unemployed.

**Denominator is the sum of consumers employed, unemployed, and not in labor force.

Note:
This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2010

US totals are calculated uniquely for each data element based on only those states who reported clients served.
Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

Montana

URS Table Number	General Notes
3	Decrease in Other Psych Inpatient between FY2011 and FY2010 may be explained by inadvertently counting outpatient hospital services as inpatient in FY2010. Recalculating FY2010 numbers based on FY2011 methods, FY2010 Table 3 data for Other Psych Inpt should be Ages 0-17: F=259, M=302; Ages 18-20: F=28, M=35; Ages 21-64: F=373, M=245; Ages 65+: F=29, M=14.Total=1285.
4 & 4A	Data in this table is based on one subset of data totalling 3,700 consumers. When comparing the employment data from this one database with the employment data from the same one database last year, there was a 1% decrease in employment from FY2010 to FY2011 (from 16% to 15%), a 1% decrease in unemployment (from 13% to 12%), and a 2% increase in consumers not in the labor force (from 71% to 73%). The discrepancy between FY2010 and FY2011 in the total number of consumers for whom employment data is available is due to an unrecoverable error in coding within the subset of employment data that was used last year for Table 4, but not this year. Due to this faulty data subset, last year's employment data was most likely inaccurate.
5A	The increase in "People Served by Both Medicaid and Non-Medicaid" from FY2010 to FY2011 is due to the implementation of the state-funded Mental Health Service Plan (MHSP) Waiver in 12/10, which resulted in dual coverage by basic Medicaid and MHSP in the first month of being enrolled as consumers were transitioning from state-funded mental health coverage to basic Medicaid.
6	The increase in the percentage of consumers served in other psychiatric inpatient settings at the beginning of the year may be due to improved data collection adherence in FY2011.
6	Small N may be the reason for the increase in average LOS of adults discharged from State Hospitals. The increase in LOS may help to explain the decrease in the percent readmitted within 180 days.
10	The four regional mental health centers were under contract for our state plan services, funded by the block grant. In July, 2008 a transition began from contract to fee-for-service, which was in full implementation by January of 2009. We reverted back to contracts for what would now be eight licensed mental health centers. This went into effect April 1, 2011. Several categories of prescribers and independent practitioners continue to receive fee-for-service reimbursement.
12	The 1% increase from FY10 to FY11 in the percent of children served by the SMHA with co-occurring MH/SA diagnoses may be explained by the small n.
14A	The 22% increase from FY10 to FY11 in African American consumers with SMI/SED may be due to the African American population in Montana increasing faster than any other race in Montana between the 2000 and 2010 U.S. Census.
14A	The 55% decrease in Native Hawaiian/Other Pacific Islander consumers with SMI/SED may be due to the small n's.
15	Increase in Private Residence status between FY2010 and FY2011 may be explained by improved data collection adherence in FY2011.
15	The increase from FY2010 to FY2011 in Residential Care among youth may be explained by improved data collection adherence in FY2011.
15	The increase in adult Residential Care between FY2010 and FY2011 may be due to including ICBR (Intensive Community-Based Rehabilitation) under "Residential Care" in FY2011, but under "Other" in FY2010.
15	The increase in Residential Care among ages 0-17 may be due to better data collection adherence. In addition, Residential Care for part of FY2011 included Therapeutic Family Care (in which services are provided to birth families in an effort to avoid foster home placement). In FY2012, Therapeutic Family Care will be easily distinguishable from Therapeutic Foster Care.
15	The decrease in Crisis Residence may be explained by reporting the LAST KNOWN residence in FY2011, while in FY2010 all clients who spent any time in a Crisis Residence in FY2010 were counted.
15	The decrease in Children's Residential Treatment in FY2011 compared with FY2010 may be due to counting all those admitted to Children's Residential Treatment in FY10, but only reporting the last known residence in FY2011.
15	The state hospital residents included in Institutional Care only include those residents whose services were funded by the State Mental Health Agency.
15	The decrease in Jail/Correctional Facility and Homeless/Shelter is due to reporting the LAST KNOWN residence in FY2011, while in FY2010, all those known to have spent time being homeless or in jail/correctional facility were counted.

URS Table Number	General Notes
15	The decrease in Other may be explained by improved data collection adherence; and by including ICBR (Intensive Community-Based Rehabilitation) under Other in FY2010, but under Residential Care rather than Other in FY2011.
16	Increase in Supported Housing between FY2010 and FY2011 may be explained by improved data collection adherence in FY2011.
16	Increase in Supported Employment between FY2010 and FY2011 may be explained by improved data collection adherence in FY2011.
16	The increase in the Total Number of Children with SED in FY2011 compared with FY2010 may be due to the inclusion of some children whose mental health services were funded by the state in FY2011, but who were inadvertently not included in FY2010 due to a tweak in the query used to determine Children with SED.
17	The increase in the number of consumers receiving IMR in FY2011 compared with FY2010 is due to an increase in the number of practitioners trained and now billing for IMR. An IMR fidelity review is being planned in FY2012.
19A	Data reported for Assessment of the Impact of Services were obtained from the recommended questions on the MHSIP Adult Consumer survey. Data reported for T1 and T2 was obtained from the State Criminal Justice database and from Medicaid/MHSP paid claims data. Data was available for 20,323 adults (98%) of the 20,805 adults served. In FY2010, all data for T1 and T2 was obtained from the MHSIP Adult Consumer survey, which is why there were so fewer responses in FY2010 compared with FY2011.
19B	The increase in the number of responses on School Attendance compared with FY2010 is due to surveying teenagers in FY2011 but not in FY2010.
20A	The decrease in the percent of non-forensic patients readmitted to Montana's state psychiatric inpatient hospital within 180 days of discharge may be due to: 1) community liaison officer positions whose job is to ease the transition of patients returning to the community upon discharge; 2) additional drop-in centers have been established in rural communities where there was less support; 3) law enforcement training was provided state-wide; 4) community-based crisis intervention emergency services have been implemented in rural communities where this service was not available in FY2010.
