URS Table Number	General Notes
17	The Family Psychoeducation estimate includes consumers receiving Consumer Centered Family Consultation, a brief 1-3 session intervention that emphasizes information, support and guidance to family members that is practical for adults with SMI. The Family Psychoeducation training provided by the Family Institute for Education, Practice and Research is in its fifth full year of operation. Though it is reaching more families as the number of trained clinicians has expanded, we can only report data on the families served by clinicians who are participating in the most recent training initiative.
17	The decreased in total number of consumers receiving Illness Self Management services is due to in prior years, the number of clients receiving Illness Self Management were obtained from clinicians participating in Learning Collaboratives. The collaboratives have discontinued. Thus, we have no data.
20A	The number of discharges decreased due to a change in source of data from DMHIS to MHARS. This change enabled us to to exclude persons on leave to another psychiatric hospital, medical/surgical or rehabilitation settings.
20B	The number of discharges decreased due to a change in source of data from DMHIS to MHARS. This change enabled us to exclude persons on leave to a civil facility, medical/surgical or rehabilitation settings.
20B	The number of persons readmitted decreased because this year we are no longer counting as readmissions persons who transferred from forensic to civil inpatient settings.
