#### Note:

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS/DIG Table 4.

#### State Notes:

Age None

Gender None

Overall A "fix" to the electronic health record was completed in 2010 to update employment information annually. All records may not have been updated at this time. See General Notes.

**Outcomes Domain: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2011**

**North Dakota**

Diagnosis	State				Employed as a % of Labor Force		Employed as % of Known Employment Status		% of Consumers with Dx		States Reporting

Lake Region Human Service Center	200 HWY 2 SW; Devils Lake, ND 58301	Kate Kenna	701-665-2200	\$34,334
Northeast Human Service Center	1515 4th St. STE. 401; Grand Forks, ND 58201	Kate Kenna	701-795-3000	\$54,667
South Central Human Service Center	520 3rd St. NW; Jamestown, ND 58402	Candace Fugelsten	701-253-6300	\$34,334
Badlands Human Service Center	300 13th Ave W., STE. 1; Dickinson, ND 58601	Tim Sauter	701-227-7500	\$54,668
Federation of Families	PO Box 3061; Bismarck, ND 58502	Carlotta McCleary	701-222-1223	\$75,000

North Dakota

URS Table Number	General Notes
2A/2B	Data continues to be pulled from 3 different independent sources (community mental health database, state hospital data system, and the children services database). Each independent system collects client demographic information so unduplicated counts can be achieved. The methodology for unduplicated counts is near completion. The ND Department of Human Services continues to work on the development of an overview system to assign a unique client identifier to individual receiving services which will cross all independent data systems. This will enable more accurate data collection and reporting, with the goal of unduplicated counts.
4	A "fix" to the electronic health record was added in 2010 to update employment status on an annual basis. All records have not been updated. This change affects the employment numbers across SFY 2009 to SFY 2010 to SFY 2011.
5A/5B	The change from SFY 2010 to SFY 2011 appears to be correct. Methodology for calculating this indicator has not changed.
6	Unable to report the Total number of consumers served in Residential Treatment Centers at the beginning of the year and total admissions to Residential Treatment Centers During the Year due to data and data retrieval concerns from the children services database. The methodology is under revision based on how the data will be retrieved from the system.
12	The methodology used in SFY 2009 and SFY 2010 for this indicator, based on the changes in methodology in calculating Table 14a and 14b, remains consistent for this reporting period.
14A/14B	The methodology remains consistent with the use of data from the electronic checklists to assist case managers with identification of individuals diagnosed with serious mental illness and individuals diagnosed with a severe emotional disturbance. This methodology was implemented in SFY 2009.
16	PATH=PATH, Inc. of North Dakota. Data from Therapeutic Foster Care is collected separately from the community mental health data, from which the Children with SED numbers are derived. There is ongoing work to combine the data from the separate data systems. This reporting year, the Therapeutic Foster Care youth demographics cannot be reported, creating a discrepancy between the number of "not available" youth and the number of "not available youth with SED receiving services. Similarly, the data reported for the number of "not available" Adults Receiving Supported Employment Services creates a discrepancy between the number of "not available" adults with SMI receiving services. With data being collected from separate, independent data systems, there continues to be error in reporting. The methodology will continue to be refined to minimize discrepancy errors, and a greater effort will be placed on accessing demographic information. There was a decrease in the number of individuals in the Supported Employment Program from SFY 2010 to SFY 2011.
17	Data for Integrated Treatment is collected separately from the Community Mental Health data, from which the number of adults with SMI is derived. There continues to be ongoing work to combine data from the separate data systems. Similar to the Integrated Treatment demographics were unable to be accessed, creating a discrepancy between the number of "not available" adults and the number of "not available" adults with SMI receiving services. In SFY 2010, the Quadrant III group was dissolved and another Quadrant IV team was created. In comparing SFY 2010 to SFY 2011 data is only for 11 months for SFY 2011, and is for both Quadrant IV teams.
