Note:

Are Client Counts Unduplicated? Unduplicated **Number of States with Unduplicated Counts** 43

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2010

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age None
 Gender None
 Race Neither TennCare nor Behavioral Health Safety Net currently collects Hispanic/non-Hispanic Origin as separate data. Neither program collects data for the Native Hawaiian category. TennCare does not collect multi-race data.
 Overall Data combines persons served through TennCare (Medicaid) and through DMH Behavioral Health Safety Net B27-1-10 through 6-30-11 .

Table 2b

Age None
 Gender None
 Race None
 Overall None

Note:
This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2010

US totals are calculated uniquely for each data element based on only those states who reported clients served.
Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 14a
Age None
Gender None
Race Neither TennCare nor Behavioral Health Safety Net currently collects Hispanic/non-Hispanic Origin as separate data. Neither program collects data for the Native Hawaiian category. TennCare does not collect multi-race data.
Overall Data combines persons served through TennCare (Medicaid) 7-1-10 through 6-30-11 and persons served through the DMH Behavioral Health Safety Net.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

Table 3 State Notes:

Age None
 Overall Persons served through TennCare (Medicaid) and Behavioral Health Safety Net 7-1-10 through 6-30-11, except State Hospitals which includes all payers. TN no longer has state hospital beds for those age 17 and under.
 Gender None

Table 6 State Notes:

Hospital TN no longer has state hospital beds for those under 18. Includes all payor types (TennCare, Medicare, Private Insurance, None) for State Hospitals. TennCare only for Other Psychiatric Inpatient, Residential Treatment Centers, Community Programs.
 Other Inpatient Includes TennCare services only.
 Residential Includes TennCare services only.
 Community Includes TennCare services only.
 Overall Total served at beginning of Year (unduplicated) calculation for TennCare is Total served during First Month based on initial service received.

APPROPRIATENESS DOMAIN: Length of Stays in State Psychiatric Hospitals, Other Psychiatric Inpatient and Residential Treatment Centers for Children Settings, FY 2011

TOTAL	-	-	-	-	-	35.0%	-	15.7%	-	100.0%	43

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data for URS/DIG Table 4a.

STRUCTURE DOMAIN: State Mental Health Agency Controlled Expenditures for Mental Health, FY 2009

STATE Tennessee

	Expenditures: State	Percent of Total Expenditures: State	Expenditures: U.S.	Percent of Total Expenditures: U.S.
State Hospitals-Inpatient	\$166,000,000	34%	\$9,790,074,311	26%
Other 24-Hour Care	\$109,000,000	22%	\$7,066,269,663	19%
Ambulatory/Community	\$198,700,000	41%	\$19,905,016,805	53%
Total	\$485,900,000	-	\$37,611,390,427	-

Note:

Other 24-Hour Care includes state psychiatric hospital and community based other 24-hour as well as community based inpatient expenditures.

Ambulatory/Community includes expenditures for less than 24-hour care services provided at state psychiatric hospitals. It excludes community based other-24 hour and community based inpatient expenditures.

Total also includes additional SMHA Expenditures for research, training, administration, and other central and regional office expenditures.

Data from NRI's Funding Sources and Expenditures of State Mental Health Agencies, FY 2009 reports - Table 18 "SMHA-Controlled Expenditures for Mental Health Services."

U.S. totals are based on 50 states reporting.

More information on the State Mental Health Agency's Revenues & Expenditures as well as State Footnotes can be found on the NRI website:
<http://www.nri-inc.org/projects/Profiles/RevenuesExpenditures.cfm>

Tennessee

URS Table Number	General Notes
4	The increase in the number of consumers Employed, Unemployed and Not in Labor Force is due to the fact that this data comes from a survey, and more surveys were completed in 2011 than 2010.
6	Increase in the total number of consumers served in Community Programs and an increase in total admissions to Community Programs during the year and the decrease of consumers served in other Psychiatric Inpatient settings and decrease of consumers served in Residential Treatment Centers is likely due to an increase of the diversion rate to inpatient treatment and more referrals to community based programs. The Crisis Programs and the Behavioral Health Safety Net Program helps divert consumers to services in their communities. As of 2010, Tennessee doesn't have children's beds in state psychiatric hospitals. So this should be listed as "not applicable" rather than "0". The average length of stay for adults decreased due to the discharge of more long-term patients in 2010 than in 2011. This increased the average length of stay.
8	The percent of MHBG Expenditures for Non-Direct Service Activities increased in 2011 as there was a need and carry over funding from 2010 was available.
12	The percent of SMI adults is lower and the percent of SED children is higher than the previous reported year due to a change in the priority definition.
12	The percent of SMI adults with substance related co-morbidities is higher than the previous reported year due to a change in the priority definition which results in fewer adults being identified as priority.
12	The decrease of adults meeting the Federal definition of SMI is due to the change in the way SMI is being measured. TN no longer uses CRG to define SMI. The increase of children/adolescents meeting the Federal definition of SED is due to the change in definition which now includes children with conditions such as ADHD that were not previously picked up using the TPG criteria.
14a	Adults with SMI, if No describe or attach state definition: TN currently uses "Severe and Persistent Mental Illness" (SPMI), as determined by diagnosis. Prior to Jan. 2011, TN used four criteria: diagnosis, severity of functional impairment, duration of functional impairment, need for services to prevent relapse.
14a	Diagnoses included in state SMI definition: Current DSM-IV-TR diagnoses excluding substance abuse disorders, developmental disorders, V-Codes (unless co-occurring).
14a	Children with SED, if No describe or attach state definition: TN currently uses diagnosis. Prior to Jan. 2011, TN used three criteria: diagnosis, current severity of impairment, presence of psychosocial issues that put consumer at high risk.
14a	Diagnoses included in state SED definition: Current DSM-IV-TR diagnoses excluding substance abuse disorders, developmental disorders, V-Codes (unless co-occurring).
15	The increase in total number of consumers living in Private Residence, Jail/correctional Facility and Homeless/Shelter is due to more surveys conducted during FY 2011.
16	Increase for total number of consumers receiving Supported Housing services is likely due to more outreach to consumers who need housing services. Decrease in the number of consumers receiving Supported Employment services, MST services and Family Functional Therapy services are likely due to fewer surveys conducted by providers for 2011. The decrease of adults meeting the Federal definition of SMI is due to the change in the way SMI is being measured. TN no longer uses CRG to define SMI. The increase of children/adolescents meeting the Federal definition of SED is due to the change in definition which now includes children with conditions such as ADHD that were not previously picked up using the TPG criteria.
17	The number of services was too narrowly interpreted, thus the initial low number of consumers receiving services in 2011. The increase in the number of consumers receiving Integrated Dual DX services is due to more agencies capable of providing the service in 2011. The increase in number of consumers receiving Illness Self Management service is due to the increase of the number of people trained to teach the Wellness Recovery Action Plan (WRAP), which is an Illness Self Management service; therefore, the number of people taking a WRAP class has been increasing each year.
20b	The increase of the total percent readmitted to a state-run hospital within 30 days of discharge is likely due to an increase of discharges of forensic patients as they had a higher rate of readmission.
