Note:
This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2010

US totals are calculated uniquely for each data element based on only those states who reported clients served.
Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

URS Table Number	General Notes
5A	There was an increase in clients receiving state funding for those that are "unfunded" this past year and more clients who may have started receiving services using state or block grant money were able to apply and qualify for Medicaid later in the year. Thus showing an large increase in the number of clients receiving both Medicaid and non-Medicaid services.
6	The decrease and increase on these two data elements are not attributed to a data issue and there is no known reason for the change.
12	After further review there was an error in last years numbers and the percent for last year should have been 25.4% thus there is a smaller decrease in the number of clients with co-occurring diagnoses.
15	Number of consumers in Jail/Correctional Facility increased. This data element was stressed to our providers this year due to the fact we use this as an indicator of whether the consumer received services while in Jail. Our providers responded by providing more accurate data which may be the reason for the increase.
18	Increase in percent of adults receiving new generational medication has increased due to increased use of the medications and/or better data collection.
