Note:

Data from NRI's Funding Sources and Expenditures of State Mental Health Agencies, FY 2010 reports - State Mental Health Agency Controlled Expenditures and Revenue, Table 24, 25, and 26.

This table does not show Revenues for state central office including Research, Training, and Administration expenses.

More information on the State Mental Health Agency's Revenues & Expenditures as well as State Footnotes can be found on the NRI website:
<http://www.nri-inc.org/projects/Profiles/RevenuesExpenditures.cfm>

Structure Domain: Mental Health Programs Funded By the Federal Mental Health Block Grant, FY 2012

Alaska

Total Programs = 4

Adult Total: \$593,352

Total: \$593,352

Agency Name	Address	Area Served	Block Grant for Adults with SMI	Block Grant for Children with SED
Gastineau Human Services	5597 Alsek Street, Juneau, AK 99801	Southeast	\$114,374	\$0
Polaris House	434 Willoughby Avenue, Juneau, AK 99801	Southeast	\$201,319	\$0
Frontier Community Services	43335 K-Beach Road, Ste 36, Soldotna, AK 99669	Southcentral	\$101,262	\$0
Anchorage Community Mental health Services, Inc.	4020 Folker Street, Anchorage, AK 99508	Southcentral	\$176,397	\$0

Alaska

URS Table Number	General Notes
All	Reporting year is State Fiscal Year (SFY 2012)
All	Community Programs Data Sources and Limitations: the Division uses an electronic health records system (the Alaska Automated Information Management System (AKAIMS)) to collect and report Community Program data. However, AKAIMS does not include information on adults with serious mental illness (SMI) who receive illness self-management (ISM) services. Starting in FY12, the number of adults who received ISM services (based on grantee quarterly reports) was added to the AKAIMS counts for the total number adults with SMI who received services. Due to this change in methodology, caution should be exercised when making comparisons with prior year data. In FY12, the AKAIMS count of adults with SMI was 7,994; the total number of adults with SMI who received community-based mental health services was 10,414, which includes 2,420 adults who received ISM services. The Division is currently working to improve data collection and reporting of demographic information for clients receiving ISM services; the FY12 count of 2,420 clients who received ISM services is included in the "Not Available" category for age, gender, race, and ethnicity. The AKAIMS FY12 URS data reports were run on November 16, 2012. Unduplicated counts of "clients served" and "SED/SMI clients served" reflect the number of clients who received services through program enrollment. These counts do not include clients who received a mental health service but were not enrolled in a program.
All	State Psychiatric Hospital data source is the Alaska Psychiatric Institute (API) electronic health records system.
All	Other Psychiatric Inpatient Data Sources and Limitations: this includes Designated Evaluation & Treatment (DET) and Acute Psych: DET: High Risk Inpatient Psychiatric Diversion from API. Data is collected and reported using an Access database. FY12 data is not yet available; FY12 URS Tables include the FY11 DET data. Acute Psychiatric: Data is from STARS/MMIS (Medicaid claim data was extracted from STARS on 10-05-12). Includes in- and out-of-state clients. The FY12 unduplicated client count is based on Medicaid claims that have a valid Division of Behavioral Health collocation code; to be counted, a client must have had at least one Medicaid paid claim).
All	RPTC Data Sources and Limitations: data is from STARS/MMIS (Medicaid claim data was extracted from STARS on 10-05-12). Includes in- and out-of-state clients. The FY12 unduplicated client count is based on Medicaid claims that have a valid Division of Behavioral Health collocation code; to be counted, a client must have had at least one Medicaid paid claim).
All	Age - unduplicated counts: for community programs, for all unduplicated client counts, age is assigned as of the middle of the reporting period (SFY 2012 = Age as of December 31, 2011). For API, Other Psychiatric Inpatient, and RPTC, for all unduplicated client counts except those in Table 6, age is assigned as of the middle of the reporting period. Table 6 reports both unduplicated and duplicated counts by age (child versus adult). For API, Other Psychiatric Inpatient, and RPTC, the unduplicated counts by age category in Table 6 have age assigned as of the date of admission. Age - Duplicated Counts: For all duplicated client counts, age is assigned as of the date of admission.
All	Race/Ethnicity: for community programs: 'Hispanic' data is collected separately from 'race' data (i.e., two separate questions); for API, Acute Psychiatric, and RPTCs, 'Hispanic' was collected as part of the 'Race' question; and for DET, neither 'Race' nor 'Hispanic' data was collected. For consistency in reporting in the URS Tables, the API, Acute Psychiatric, and RPTC counts of 'Hispanic' (as a 'Race') were instead entered as being a 'Hispanic' response to the ethnicity question and were assigned 'Race Not Available'; the balance were assigned an ethnicity of 'Hispanic Origin Not Available.' All of the DET counts were assigned an ethnicity of 'Hispanic Origin Not Available.'
Community Program Client Counts	The increase from FY11 to FY12 in the reported number of clients who received community-based services is primarily due to the FY12 inclusion of adults with serious mental illness who received illness self-management (ISM) services. The client counts in each 2012 URS Table that includes community program data reflect this increase. The Division is currently working to improve data collection and reporting of demographic information for these clients.

URS Table Number	General Notes
5A & 5B	<p>In FY12, we used the same methodology for determining Funding Support (Medicaid Status) that was used in FY10 and FY11 (i.e., for consistency in reporting across service settings, the rows reflect 'Primary Insurance Type' = Medicaid or Non-Medicaid). We are not able to identify clients with Medicaid Only, Non-Medicaid Only, or both Medicaid and Non-Medicaid. For most clients, we are able to determine if their primary insurance type is Medicaid or Non-Medicaid. In the row labeled "Medicaid Only," we are reporting the number of clients with "Primary Insurance Type = Medicaid," and in the row labeled "Non-Medicaid Only," we are reporting the number of clients with "Primary Insurance Type = Non-Medicaid." We used the following methodology for each service setting to report the count of clients whose primary insurance type was Medicaid or Non-Medicaid: For Community Programs: In AKAIMS, the primary insurance type is collected. If the client's primary insurance type is Medicaid, then the client is counted under "Medicaid Only;" if the client's primary insurance type is not Medicaid, then the client is counted under "Non-Medicaid only." For State Psychiatric Hospital (API): the primary and secondary insurance types are collected. If the client's primary insurance type is Medicaid, then the client is counted under "Medicaid Only;" if the client's primary insurance type is not Medicaid, then the client is counted under "Non-Medicaid only" (this includes clients who have Medicaid as a secondary insurance type). For RPTCs and Acute Psychiatric: the STARS/MMIS Medicaid claims data was used; the assumption is made that the primary insurance type for all clients is Medicaid, so all clients are counted under "Medicaid only." For DET: Medicaid status is not collected, so all clients are counted under Medicaid Status Not Available.</p>
6	<p>State Hospital: the FY12 increase in the number of admissions/discharges and decreased length-of-stay reflect the Division's efforts to more effectively manage API as an Acute Treatment Facility and build sufficient community-based resources to maintain individuals within their home community. Also, API has relatively few patients with long lengths of stay (LOS), and depending on when these patients are discharged, the average and median LOS may vary considerably from year to year. RPTC: In general, the changes from FY11 to FY12 reflect the "Bring the Kids Home" efforts to expand wrap-around, a community treatment resource, which has resulted in increased service capacity for home and community-based services. In addition, the expectation is that RPTCs will follow individualized treatment plans where the length of stay is individualized and not set at a year or specified program length. Also, relatively few adults receive treatment at RPTCs; consequently the average and median length of stay for adults may vary considerably from year to year. Community: the FY12 increase in the number of clients served at the beginning of year reflects a correction in the reporting logic used in AKAIMS.</p>
8	<p>In SFY2011 Alaska provided CMHS BG funds to the Alaska Behavioral Health Association for MHA Technical Assistance Activities (non-direct). In SFY2012, Alaska funded those services with state general funds and increased CMHS BG funds to agencies providing direct services by \$67,346.</p>
12	<p>We are not yet able to report the count or percentage of clients who have a dual diagnosis. We are able to report counts and percentages of clients who are treated for co-occurring disorders. These counts are based on the client's admission record program type assignment of "treating here for both mental health & substance abuse." Percentages are based on community program data only and reflect percent treated for co-occurring. These percentages do not reflect percent diagnosed with co-occurring.</p>
16	<p>EBP data is reported for community programs only. The Division is working to improve data collection and reporting capability relative to clients receiving EBP services. Until we are better able to report demographic information for clients receiving EBP services, the client counts in Table 16 are included in the "Not Available" category for age, gender, race, and ethnicity. The FY12 decrease in Multi-Systemic Therapy reflects a shift of focus to other EBPs for transitional age youth and lack of staffing to provide MST services.</p>
17	<p>EBP data is reported for Community Programs only. The Division is working to improve data collection and reporting capability relative to clients receiving EBP services. Until we are better able to report demographic information for clients receiving EBP services, the client counts in Table 17 are included in the "Not Available" category for age, gender, race, and ethnicity.</p>
