General Notes FY 2012

Delaware

URS Table Number	General Notes
6	The increase in Average LOS of adults discharged from State Hospitals is due to long-term clients being discharged to community under Olmstead consent decree, leading to the appearance of longer average LOS.
12	Percentage of adults served by the SMHA who also have a diagnosis of substance abuse problem: and percent of children/adolescents served by the SMHA who also have a diagnosis of substance abuse problem are much higher than the 2011. We think the higher numbers in 2012 reflects better reporting of diagnosis due to QA efforts.
19a	The 2011 adult measures were calculated using probabilistic matching. For 2012, we used deterministic matching (date of birth, gender, race, and county) to match adult DSAMH cohort with criminal justice data. We could not do change measures as we do not have previous data files. Arrests percent is higher in 2012.
20A, 20B, & 21	Percent readmitted (30 days and 180 days) to state hospital and any psychiatric inpatient facility by age; gender, race and ethnicity differ compared to 2011. We believe changes in state hospital discharges have occurred due to Olmstead Consent which resulted in state hospital bed closures.
