Hawaii

URS Table Number	General Notes
Multiple	Children's Division administratively discharged a large number of youth, who were part of a program called Mokihana on the Island of Kauai. These youth will be accounted for in the Department of Education system instead. This is the reason for the much lower numbers compared to 2011.
5	The decrease in total number of consumers with Non- Medicaid Funding only is due to efforts to increase the number of people on Medicaid and the decrease in number of people served.
6	We have observed a large number of administrative discharges this year and currently have no marker in our MIS database that differentiates administrative from regular discharges at this time.
8	The increase in Total MHBG Expenditures for Non-Direct Service Activities is due to there was an error in reporting last years "MHA other" category. A calculation error omitted \$504,940 of funds that should have been included. The corrected 2011 Total Non-Direct Services amount should be \$1,298,276.
14	Total number of Multi-racial consumers with SMI/SED dropped due to a decrease in number served and an increase in those for who race is not known
15	Total number of consumers in Jail/Correctional Facility increase is due to we have more data this year from QOLI surveys which is the instrument that tracks living arrangement and there has been an actual increase in the percent of consumers who are forensically involved
16	Total number of consumers receiving Supported Housing services and Total number of consumers receiving Family Functional Therapy services increase are due to these data source were missing last year and this year as well. Last year we just reported what was available. This year we extrapolated using past year's reports (fy2010; those in supported housing > 900). The drop in total number of Children with SED numbers is because we administratively discharged over 500 youth from our system, because they are part of a CAMHD/DOE program and are not included in the CAMHD system anymore.
