Illinois

URS Table Number	General Notes
5A	Less services are available to individuals who are not Medicaid eligible. This may account for the increase in the number of Medicaid eligible individuals receiving services for FY 2012 versus FY 2011.
10	The adult column contains a combined dollar figure for services purchased for the adult and child/adolescent population. It is estimated, however, that approximately 25% of block grant dollars are used to purchase services for the child/adolescent population in Illinois
16	The large percentage increase in individuals receiving permanent supportive housing from FY 2011 to FY2012 is due to DMH has a Consent Decree which requires that individuals be transitioned from residing in Nursing Facilities (Institutes for Mental Diseases-IMDs) to permanent supportive housing. DMH is also working with the state Medicaid agency on a "Money Follows the Person" demonstration grant which is also focusing on permanent supportive housing. These 2 initiatives have contributed greatly to the increased percentage of individuals living in permanent supportive housing.
16	The decrease in individuals receiving supported employment from FY2011 to FY 2012 is due to budget reductions have led to less dollars available for non-Medicaid eligible individuals, some who may have previously received supported employment.
