Louisiana

URS Table Number	General Notes
3	During Fiscal Year 2012, Louisiana decreased the number of hospital beds in state inpatient psychiatric facilities with a subsequent decrease in the number of persons served. After March 1, 2012 the managed care system expanded capacity of inpatient hospital level care to include private inpatient facilities reducing the number of admissions to the state hospital system.
4, 5, 14a, 12, & 15	On March 1, 2012, Louisiana Office of Behavioral Health, in partnership with the state management organization, underwent implementation of a new Electronic Behavioral Health Record (EBHR). Following implementation of the new system, the state has experienced temporary disturbances in data collection, particularly in its claims and clinical data systems.
6	Regarding State Hospital Persons served and admissions: During Fiscal Year 2012, Louisiana decreased the number of hospital beds in state inpatient psychiatric facilities with a subsequent decrease in the number of persons served. After March 1, 2012 the managed care system expanded capacity of inpatient hospital level care to include private inpatient facilities reducing the number of admits to the state hospital system. Regarding Community Program Admissions: On March 1, 2012, Louisiana Office of Behavioral Health, in partnership with the state management organization, underwent implementation of a new Electronic Behavioral Health Record (EBHR). Following implementation of the new system, the state has experienced temporary disturbances in data collection, particularly in its claims and clinical data systems. Regarding Increased Average LOS of Children discharged: Increase in community based services available for severely disabled children allowed more children to be discharged from state hospitals and served in the community. Regarding Decreased Average LOS of Adults discharged: Change to managed care system allowed for decreased hospital stays as utilization of outpatient programs increased.
16 & 17	On March 1, 2012, Louisiana Office of Behavioral Health, in partnership with the state management organization, underwent implementation of a new Electronic Behavioral Health Record (EBHR). Following implementation of the new system, the state has experienced temporary disturbances in data collection, particularly in its claims and clinical data systems. Services listed in this table have been converted over to the Medicaid Redesign.
16 & 17	EBPs are practiced in some areas of the state but not others. The use of fidelity measures differs from region to region within the state. In addition, staff training and the use of toolkits varies across the state. Format for data collection of Age, Gender, Race and Ethnicity for individual services differs from data collection for total count so these have been collapsed into 'unavailable' row to avoid conflict with edit checks. The collection of these specific data elements is improving.
19A & 19B	Data is from assessments administered in clinics as follows: For new clients, assessments are administered within 30 days of admission, then at three months. Follow-up assessments are administered every six months thereafter. For existing clients, an initial assessment is administered and then follow-up assessments every six months thereafter. This data is currently collected using TOMS Telesage system. We are working to include these questions in our outpatient clinic data to ensure collection on all persons in service.
