Notes:

US totals are based on states reporting.

This table uses data from URS/DIG Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

- Age Age Group is calculated upon age at the end of the reporting period.
- Gender None
- Overall None

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2012

Massachusetts

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	73.0%	71.7%	72.0%	54
Percent of Children served through the SMHA who meet the Federal definition for SED	51.0%	73.7%	75.5%	54

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	19.0%	21.7%	21.5%	50
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	1.0%	4.9%	4.0%	50
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	19.0%	25.8%	23.5%	50
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	1.0%	8.8%	4.0%	50

What populations are reported? Please see comment on Data (Overall) Number of States Reporting All Clients: 32 Number of States Reporting Some Clients: 25

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
MA	Yes	-	-	-	Please see footnote on Data (Overall)
US	43	29	3	4	34

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS/DIG Table 4.

State Notes:

Age Age Group is calculated upon age at the end of the reporting period.

Gender None

Overall Employment status is recorded for all clients upon admission, and at annual assessment for case managed clients only.

Outcomes Domain: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2012

Massachusetts

Diagnosis	State				Employed as a % of Labor Force		Employed as % of Known Employment Status		% of Consumers with Dx		States Reporting

Massachusetts

URS Table Number	General Notes
3, 6	Admissions to psychiatric continuing care units run by the MA DMH, but located in facilities operated by the state Public Health agency are included in the State Hospital counts. Individuals admitted to three community mental health centers (CMHCs) delivering acute care and one CMHC providing continuing care are included in "Other Psychiatric Inpatient". This count also includes admissions to private inpatient facilities through contract with the MA DMH.
11	Adult Consumer Surveys: The Official 28 Item MHSIP Outpatient Tool was modified to include the modules on social connectedness, improved functioning and criminal justice contact, as well as several additional questions relating to outcomes. The survey sample was drawn from persons currently in services; however some of these individuals may no longer have been enrolled in that service when interviewed. The universe for the survey sample was adult consumers with a serious mental illness who were receiving Community Based Flexible Support (CBFS) from the MA DMH. The MA DMH contracted with the Center for Mental Health Services Research at U Mass Medical School to administer the survey and provide analysis.
11	Child/Family Consumer Surveys: The survey sample was drawn from families of persons currently in services; however some of these individuals may no longer have been enrolled in that service, when interviewed. The universe for the survey sample was family members of all children/ adolescents enrolled in Child/Adolescent Case Management services from the MA DMH. The MA DMH contracted with the Center for Mental Health Services Research at U Mass Medical School to administer the survey and provide analysis.
12	Child/Adolescent services for the MA DMH are provided through age 18, with adult services delivered for ages 19 and older. Calculations for this table use the federal definition of child and adult. Ages 0 - 3 are served primarily by agencies other than the MA DMH, but eligibility criteria for MA DMH do not preclude service provision for this age group. Individuals aged 4 to 17 counted in the total served by the MA DMH who are referred by the criminal justice system, or seen for outpatient crisis evaluations may or may not meet SMI/SED definitions. All persons who meet DMH clinical standards for approval of continuing care community services meet federal SMI/SED definitions.
12	The calculation for the percentage of persons with a co-occurring diagnosis of substance abuse is obtained by counting the number of persons with a diagnosis of substance abuse on file as of the close of the reporting period divided by the total served as reported in Table 2 (Total Served) and Table 14 (Total SMI/SED), for whom there was a diagnosis on file in the Mental Health Information System (MHIS) as of the close of the reporting period.
15	Living situation is measured at admission for all clients and at the annual review for case managed clients only. In addition, it is assessed annually for all inpatients in state operated facilities with length of stay (LOS) greater than 6 months. The MA DMH does not provide crisis residence services and adult foster care. Information on individuals receiving these services through other agencies is not available in the MA DMH Mental Health Information System (MHIS). The MA DMH does not provide "traditional" foster care for children and adolescents and does not presently collect this data for those clients receiving these services through the state Department of Social Services.
16	Totals for Supported Housing are not available for reporting in SFY12. DMH and CBFS providers continue to work together in developing the outcome measures that CBFS providers report to DMH as measures of contract performance. The federal guidance on the reporting of supported housing are utilized in the development of the outcome measure set. While CBFS providers began reporting housing data in January 2011, there has been further discussion on the method and frequency of collecting housing data to meet both the needs for performance measurement and client-level federal reporting. It is expected that the reporting of housing data will be revised in SFY13. DMH will continue to work towards the reporting of housing data to comply with federal reporting requirements.
16	Supported employment services are provided within several DMH services, including Community Based Flexible Supports (CBFS), Clubhouse and Program for Assertive Community Treatment (PACT). This data reflects only people enrolled in CBFS services who are receiving supported employment.
16	Fidelity for ACT/PACT programs is measured by a team consisting of MA DMH staff, consumers and a consultant with expertise in ACT, using a scale developed internally, based upon the SAMHSA EBP toolkit. Fidelity is measured every twelve to eighteen months.
16	The decrease in individuals receiving Therapeutic Foster Care in SFY12 is due primarily to increased difficulties in identifying and recruiting foster parents for this group of DMH youth.
17	Although these EBPs may be provided in some DMH programs, they are not reported as discrete services in the Mental Health Information System (MHIS) and are unavailable for reporting.

URS Table Number	General Notes
20A, 20B	Since most admissions to the state hospital system occur only after one or more acute inpatient hospitalizations, the readmission rates displayed in this table do not necessarily present an accurate representation of the total inpatient readmission rate for discharges in the reporting year.
