* Reported under Hispanic ethnicity.

Note:

US totals are based on states reporting.

This table uses data from URS/DIG Table 15.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Adults receiving Assertive Community Treatment, Rehabilitative Mental Health Services or Dialectical Behavior Therapy. Data is from calendar year 2011.

CONSUMER SURVEY RESULTS, FY 2012

STATE: Minnesota

Indicators	Children: State	Children: U.S. Average	States Reporting	Adults: State	Adults: U.S. Average	States Reporting
Reporting Positively About Access	82.8%	84.5%	49	82.0%	86.3%	51

Minnesota

URS Table Number	General Notes
All	Tables labeled 2011 are developed using calendar year 2011 data. Tables labeled 2012 are developed using State Fiscal Year 2012 data (July 1, 2011 through June 30, 2012)
3, 6	Other Psychiatric Inpatient includes regular psychiatric beds and state-contracted beds in community hospitals.
4	Like other states, Minnesota has experienced an economic slowdown resulting in an increased unemployment rate. The rate of unemployment increased by 1% which was equivalent to the statewide unemployment rate increase of .8%. There was a shift in the unemployed category; females (decrease 3%) and males (increase 3%). One explanation is the continued decrease in labor/manufacture field.
6	Minnesota continues to focus on community behavior health services in lieu of Child and Adolescent Behavioral Health inpatient hospital. In 2008, one of the two Child and Adolescent Hospitals was closed, while the other treats youth with highly complex diagnostic and treatment needs.
6	Change in reporting method - State Hospital data for CY2011 was completed by State Operated Services (AVATAR). CY2010 AVATAR Children Average LOS is 32; CY2011 Average LOS is 47 and increase of 47%. In 2010 there were 3 cases with LOS over 100 days and in 2011 there were 7 cases with LOS over 100 days. Because the children's state psychiatric hospital population is quite small (16 beds), the variance in frequency of LOS resulting from such a small data base can be significant.
6	Minnesota continues to focus on Community Behavior Health Hospital for adults in lieu of institutional facility in a large, regional treatment center campus. CBHH are short-term acute psychiatric hospitals.
8	The SMHA has increased its efforts to evaluate quality of mental health services, to train providers in research supported evidence based practices, to implement evidence based practices, to provide technical assistance to providers and payors of mental health services. Due to state budget realities, the SMHA has experienced some reduction in state funding for these activities.
9, 11, 11a & 19a	In 2012 the adult population from which the sample was drawn is those persons who receive Assertive Community Treatment, Adult Rehabilitative Mental Health Services, or Day Treatment service during calendar year 2010.
10	Block grant funding amount reported for adults with SMI also serves children with SED
11, 11a	Minnesota developed its own Adult and Family survey, based on MHSIP
12, 14	In 2008, Minnesota combined the population served to include the Community Mental Health Reporting System (CMHRS) and the Medicaid Management Information System (MMIS). With the addition of the MMIS claims data, a methodology was developed to determine whether the recipient was likely to have a serious mental illness (SMI) or a severe emotional disorder (SED). The method for children with SED was further refined this year.
12	Minnesota is not able to report the Percentage of adults and Percentage of children/adolescents served by the SMHA who also have a diagnosis of substance abuse problem, because clients could receive substance abuse treatment by another payor and only one diagnosis is required when Medicaid services are claimed. See Percentage of adults meeting Federal definition of SMI who also have a diagnosis of substance abuse problem and Percentage of children/adolescents meeting the Federal definition of SED who also have a diagnosis of substance abuse problem for SMI and SED counts.
15	Data for living situation is reported for adults receiving Assertive Community Treatment, Rehabilitative Mental Health Services or Dialectical Behavior Therapy. Effective 7/1/2012 Minnesota replaced Program Outcome Status Reporting system with the new client-level outcome reporting system called Mental Health Information System, which does not allow Residential/Living situation field to be blank or "Unknown".
15	Increase in the number of consumers who were homeless: The most recent Wilder survey on homelessness indicated an increase in number of adolescents/young adults who are homeless/living in shelters. In addition, housing reports indicate the weak economy and housing market has lowered the rental vacancy rate, and average rents have increased. This makes it more competitive and challenging for poor individuals to afford and find housing. Some landlords may be less willing to rent to individuals with inconsistent rental histories. Also, some individuals who lost their employment may be experiencing periods of homelessness because they do not have savings or financial supports to help them transition until new employment is found.
16	Minnesota is unable to report Children's EBP service because: Minnesota does not provide this tool-kit EBP. Minnesota is in the third year of transforming its children's mental health system through development of the Hawaii Model of evidence-based practices.

URS Table Number	General Notes
16	Supported Employment numbers are reduced from last CY (2010). This is likely due to a number of factors including static funding for the projects, project waiting lists for entry into job placement services, the 21 day state shutdown with accompanying employment provider shutdown during this time and significant staff turnover impacting employment service continuity and ultimately number of persons served in at least three years of the projects. MN IPS pilot project was mature in CY2010.
16	Supported housing numbers are reduced from last CY (2010). The variation is a reflection of the delay and overlap in new housing project development and implementation in CY 2011 combined with yearly variation in unit availability.
17	Minnesota is unable to report Integrated Treatment for Co-occurring services data due to grant ending. There is a plan to implement new data collection methods.
17	Minnesota is unable to report Illness Self-Management service because Minnesota does not monitor this service for EBP, also there is not a separate CPT code for Illness Self-Management it is bundled with EBP ACT and ARMHS service.
17	Minnesota has chosen not to report on Medication Management services because: Minnesota does not track Medication Management EBP as defined in Table 17 through a Toolkit. Medication Management is a covered service, but the EBP version is not tracked.
20b	The two primary assumptions as to the reasons for reductions in readmissions rates for this people are: 1) The sample size is small, so that variation in actual number of readmissions at 30 and 180 days is only a difference of 3 from the last year. Yet this appears more significant when viewed as a percentage; 2) The leadership and staff of the state forensics programs continue to improve the quality of discharge planning done with clients being discharged to assure linkage to community resources and health and behavioral services; thus reducing the possibility of unnecessary readmissions.
21	The reduction in 180 day readmission rate is quite significant compared to the previous year. This change is not fully understood, but include the following assumptions: 1) Normal variations in results year-to-year; 2) The leadership and staff of the Minnesota's State Operated Services programs continue to improve the quality of discharge planning done with clients being discharged to assure linkage to community resources and health and behavioral services; thus reducing the possibility of unnecessary readmissions. 3) DHS, community mental health providers and other stakeholders focus on development of community-based services alternatives to hospitalization for individuals with SMI and significant functional and support needs. Examples: Assertive Community Treatment teams, continued expansion of community mobile crisis intervention services to divert individuals from psychiatric hospitalization/rehospitalization; increase staff resources and capacity of community residential treatment programs to address the needs of individuals with complex and multiple challenges; improved integrated dual disorder treatment programs; and increased supported housing services.

ADULT MENTAL HEALTH ACT

Minnesota Statutes 2009, Chapter 245

245.462 Definitions

Subd. 20. **Mental illness.**

- (a) “Mental illness” means an organic disorder of the brain or a clinically significant disorder of thought, mood, perception, orientation, memory, or behavior that is listed in the clinical manual of the International Classification of Diseases (ICD-9-CM), current edition, code range 290.0 to 302.99 or 306.0 to 316.0 or the corresponding code in the American Psychiatric Association’s Diagnostic and Statistical Manual of Mental Disorders (DSM-MD), current edition, Axes I, II, or III, and that seriously limits a person’s capacity to function in primary aspects of daily living such as personal relations, living arrangements, work, and recreation.
- (b) An “adult with acute mental illness” means an adult who has a mental illness that is serious enough to require prompt intervention.
- (c) For purposes of case management and community support services, a “person with serious and persistent mental illness” means an adult who has a mental illness and meets at least one of the following criteria:
 - (1) the adult has undergone two or more episodes of inpatient care for a mental illness within the preceding 24 months;
 - (2) the adult has experienced a continuous psychiatric hospitalization or residential treatment exceeding six months’ duration within the preceding 12 months;
 - (3) the adult has been treated by a crisis team two or more times within the preceding 24 months;
 - (4) the adult:
 - (i) has a diagnosis of schizophrenia, bipolar disorder, major depression, or borderline personality disorder;
 - (ii) indicates a significant impairment in functioning; and
 - (iii) has a written opinion from a mental health professional, in the last three years, stating that the adult is reasonably likely to have future episodes requiring inpatient or residential treatment, of a frequency described in clause (1) or (2), unless ongoing case management or community support services are provided;
 - (5) the adult has, in the last three years, been committed by a court as a person who is mentally ill under chapter 253B, or the adult’s commitment has been stayed or continued; or
 - (6) the adult (i) was eligible under clauses (1) to (5), but the specified time period has expired or the adult was eligible as a child under section [245.4871, subdivision 6](#); and (ii) has a written opinion from a mental health professional, in the last three years, stating that the adult is reasonably likely to have future episodes requiring inpatient or residential treatment, of a frequency described in clause (1) or (2), unless ongoing case management or community support services are provided.

CHILDREN'S MENTAL HEALTH ACT

Minnesota Statutes 2009, Chapter 245

245.4871 Definitions.

Subd. 6. Child with severe emotional disturbance.

For purposes of eligibility for case management and family community support services, "child with severe emotional disturbance" means a child who has an emotional disturbance and who meets one of the following criteria:

- (1) the child has been admitted within the last three years or is at risk of being admitted to inpatient treatment or residential treatment for an emotional disturbance; or
- (2) the child is a Minnesota resident and receiving inpatient treatment or residential treatment for an emotional disturbance through the interstate compact; or
- (3) the child has one of the following as determined by a mental health professional:
 - (i) psychosis or a clinical depression; or
 - (ii) risk of harming self or others as a result of an emotional disturbance; or
 - (iii) psychopathological symptoms as a result of being a victim of physical or sexual abuse or of psychic trauma within the past year; or
- (4) the child, as a result of an emotional disturbance, has significantly impaired home, school, or community functioning that has lasted at least one year or that, in the written opinion of a mental health professional, presents substantial risk of lasting at least one year.

The term "child with severe emotional disturbance" shall be used only for purposes of county eligibility determinations. In all other written and oral communications, case managers, mental health professional, mental health practitioners, and all other providers of mental health services shall use the term "child eligible for mental health case management" in place of "child with severe emotional disturbance."

Subd. 15 Emotional disturbance.

"Emotional disturbance" means an organic disorder of the brain or clinically significant disorder of thought, mood, perception, orientation, memory, or behavior that:

- (1) is listed in the clinical manual of the International Classification of Diseases (ICD-9-CM), current edition, code range 290.0 to 302.99 or 306.0 to 316.0 or the corresponding code in the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders (DSM-MD), current edition, Axes I, II, or III; and
- (2) seriously limits a child's capacity to function in primary aspects of daily living such as personal relations, living arrangements, work, school, and recreation.

"Emotional disturbance" is a generic term and is intended to reflect all categories of disorder described in DSM-MD, current edition as "usually first evident in childhood or adolescence."
