URS Table Number	General Notes
5A	During this reporting period, the state was unable to unduplicate the number of people who receive Medicaid only versus the number of people who receive Medicaid and other funds. Thus, data was reported in the Medicaid and Non-Medicaid funding category. During the next reporting period, the state expects to be able to report unduplicated data.
6	The decrease in total number of consumers served in state hospital at the beginning of the year is due to DMH transitioned the Crisis Stabilization Units to Community Mental Health Center Providers in 2010. As a result, DMH (State Hospitals) no longer includes individuals served through the CSUs as part of the state hospital census. This would account for the decrease.
6	The decrease in total admissions to residential treatment centers during the year is due to Since DMH transitioned the Crisis Stabilization Units to Community Mental Health Center Providers, individuals can receive voluntary treatment rather than having to be committed. Some of the CSU's are also offering detox. This would account for the decrease. Through the MS Division of Medicaid, the state has a demonstration waiver, MYPAC, designed to served children and adolescents in the community as an alternative to psychiatric residential treatment services. The increases in access to community based wraparound services had decreased admissions to PRTFs.
6	The increase in average LOS of children discharged from state hospitals, average LOS of children and adult (in facility <1 year) who were state hospital residents at the end of the year and average are due to with the transition of the Crisis Stabilization Units to Community Mental Health Center Providers, increases community-based wraparound options for children/youth to prevent/deter admissions to state hospitals, and the increasing needs of individuals who cannot be served adequately served through those models has led to greater lengths of stay due to the fact that community based options have already been exhausted prior to admission.
11	During FY 12, DMH utilized the University of Southern Mississippi rather than the University of Mississippi to administer both the Adult and Youth versions of the MHSIP survey. In order to complete the surveys within the required timelines, the University of Southern Mississippi changed the survey methodology. Rather than utilizing a stratified random sample to administer the survey, USM utilized a convenience sample. DMH believes this contributed to many of the changes to the results of the survey
12	Table 12 data is self-reported by providers. DMH is not sure why there was a reduction in the percentage of individuals with co-occurring disorders reported. Due to serious budget cuts over the past few years' service budgets have been reduced. In order to provide treatment and maximize funding many of these individuals that have co-occurring disorders are being reported as SMI. DMH Division of Community Services and Bureau of Alcohol and Substance Abuse Services are making every effort to ensure individuals are being accurately reported and treated.
15	Through the expansion of CIT programs, partnerships with the Department of Public Safety, implementation of behavioral health courts, and law enforcement training, he state has increased efforts to serve individuals in jails and correctional facilities. Thus, the increase in total number of consumers in jails/correctional facilities.
16	The increase in total N of consumers receiving ACT service is due to we added an additional PACT team.
17	The increase in total number of consumers receiving illness self-management is due to The unit of measurement changed during this reporting period. Previously, the number of trainings was reported. During this reporting period the number of contacts was reported. In the future, the number will be reported by number of trainings and contacts.
19	By accident the vendor that conducted our surveys omitted the Criminal Justice involvement by adult's questions on the survey. These questions will be placed back on the survey and reported on next year.
