Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

Table 3 State Notes:

 Gender None

Table 6 State Notes:

Hospital State Hospital Data includes Adult Psychiatric Inpatient and Forensic Inpatient. Normally the State Hospital does not admit patients who are less than 18 years old, however one 17 was admitted in FY12 under special circumstances.
 Other Inpatient FY12 data is correct and in line with all prior year data except for FY11. The data for FY11 was on target and was incorrectly interpreted by BHSD staff as being too few. The result in FY11 was incorrect coding which is a mistake.
 Residential FY12 data is correct and in line with all prior year data except for FY11. The data for FY11 was on target and was incorrectly interpreted by BHSD staff as being too few. The result in FY11 was incorrect coding which is a mistake.
 Community The State has seen a decrease over the last year in community services. Analysis is being conducted to understand the contributing factors.
 Overall NM has better checks and balances on the data it receives with the client-level data reporting.

16	Supported housing fidelity measure used: SAMHSA's Permanent Supportive Housing Tool KIT, published July 2010, HHS Publication No. SMA-10-4510. BHSD staff perform on site audits for the Linkages program according to the basic principles of Permanent Supportive Housing to ensure that consumers have: a choice of housing; there is separation of housing and services; the housing is safe, and affordable; the housing is integrated into the community (not separate group homes); and support services are flexible and voluntary services.
16	NM has noticed a continual decrease in the number of children diagnosed with SED over the last three years. Further research will be conducted into the reasons why this is occurring.

TARGET POPULATIONS

The Behavioral Health Purchasing Collaborative has sharpened the definition and qualifying criteria for specific adult target populations, including Serious Mental Illness (SMI), Substance Use Disorder (SUD), and Co-Occurring Disorder (COD). Definitions and criteria have been sharpened for specific child and youth target populations, including Serious Emotional Disturbance (SED) and At-Risk of Serious Emotional Disturbance (SED At-Risk). These new definitions create clarity in terms of the diagnostic and functional criteria that apply to each service. The Criteria Checklists are included in this document.

These new definitions and criteria will allow the Collaborative, the Statewide Entity, and service providers to target services to the appropriate population. Some services are intended for individuals and families with complex needs that meet the definitions and criteria. Other services must be available to be a broader group of individuals and families who may present with a wide range of behavioral health and/or substance use issues.

In order to create clarity on which populations are eligible for which services, two charts have been prepared, one for adult services and one for child and youth services. The charts show both Medicaid and non-Medicaid services by eligible diagnoses/conditions.

Services for Adults

Not all services provided through the Collaborative and Statewide Entity require that the individual meet the criteria for SMI, SUD, or COD. As is evident in the chart, services for adults are available through Medicaid and non-Medicaid for a wide range of consumers. Those services restricted under Medicaid for persons who meet the criteria for SMI, SUD, or COD include Crisis Intervention, Comprehensive Community Support Services (CCSS), Psychosocial Rehabilitation (group and classroom), Assertive Community Treatment (ACT), and eventually, Intensive Outpatient. All other Medicaid services are available to a broader population.

Non-Medicaid services for adults are also generally available to a wide range of consumers. Those restricted to persons who meet the criteria for SMI, SUD, or COD include, Comprehensive Community Support Services (CCSS), Psychosocial Rehabilitation (group and classroom), Supported Employment, Supported Housing, and Acute Inpatient Psychiatric Hospitalization.

Services for Children and Youth

Almost all services provided through the Collaborative and Statewide Entity, both through Medicaid and non-Medicaid, are available to a wide range of children and youth. The only service restricted under Medicaid or non-Medicaid for children and youth who meet the criteria for SED or At-Risk SED is Comprehensive Community Support Services (CCSS). All other Medicaid and non-Medicaid services are available to a broader population.

Functioning at school/work:

Impairment in any one of the following:
