URS Table Number	General Notes
2A, 2B	Data continues to be pulled from 3 different independent sources (community mental health database, state hospital data system, and the children services database). Each independent system collects client demographic information so unduplicated counts can be achieved. The methodology for unduplicated counts is near completion. The ND Department of Human Services continues to work on the development of an overview system to assign a unique client identifier to an individual receiving services which will cross all independent data systems. This will enable more accurate data collection and reporting, with the goal of unduplicated counts.
4	A "fix" to the electronic health record was added in 2010 to update employment status on an annual basis. All records should have been updated. This change affects the employment numbers across SFY 2009 through 2011.
5A, 5B	The changes from SFY 2010 through SFY 2012 appear to be correct. Methodology for calculating this indicator has not changed.
6	Residential Treatment Centers - Unable to report discharges during the year, LOS of discharged patients, Average LOS for residents at the end of the year for clients in facility for 1 year or less, and Average LOS for residents at the end of the year for clients in facility for more than 1 year. Data retrieval from the children services database is under revision.
11	The percent change from 2011 to 2012 for "Percent of adults reporting positively about outcomes" appears to be correct. However the percent reported in 2013, will be compared to what was reported previously, as 2012 may have been an anomaly.
12	The methodology used in SFY 2009, SFY 2010, and SFY 2011 for this indicator, based on the changes in methodology in calculating Tables 14a and 14b, remains consistent for this reporting period.
14A, 14B	The methodology remains consistent with the use of data from the electronic checklists, within the community mental health database, to assist case managers with identification of individuals diagnosed with serious mental illness and individuals diagnosed with a severe emotional disturbance. This methodology was implemented in SFY 2009.
16	PATH=PATH, Inc. of North Dakota. Data from Therapeutic Foster Care is collected separately from the community mental health data, from which the Children with SED numbers are derived. There is ongoing work to combine the data from the separate data systems. The Therapeutic Foster Care youth demographics cannot be reported, creating the discrepancy between the number of "not available" youth and the number of "not available youth with SED receiving services." With data being collected from separate, independent data systems, there continues to be error in reporting. The methodology will continue to be refined to minimize discrepancy errors, with an emphasis on accessing demographic information.
17	Data for Integrated Treatment is collected separately from the community mental health data, from which the number of adults with SMI is derived. There continues to be ongoing work to combine data from the separate data systems.
