Note:

US totals are based on states reporting.

This table uses data from URS/DIG Table 15.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Ohio has changed the way we determine active cases with housing status, based on available client-level data. This change is consistent with specifications in the CLD file submitted to NRI, Inc., in FFY 2013.

URS Table Number	General Notes
6	ODMH does not maintain an "admission" indicator, so the number of admissions must be calculated based on an algorithm. The previous algorithm calculated difference between total number of cases in current year minus total number of cases in previous year. This resulted in decreased "admissions" when the total number of cases declined in 2012. Current algorithm counts total number of unique cases receiving services in current year current that did not receive services in previous year. New methodology accounts for vast increase in number 2012 admissions.
