Note:

Are Client Counts Unduplicated? Unduplicated **Number of States with Unduplicated Counts** 43

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2011

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age None
 Gender None
 Race None
 Overall We are unable to identify pregnant women receiving behavioral health services. Providers are required to complete only one diagnosis code, which is used for the behavioral health service, not for physical health conditions.

Table 2b

Age None
 Gender None
 Race None
 Overall We are unable to accurately identify pregnant women by diagnosis code. If service is for a mental health diagnosis, and providers are not required to supply more than primary diagnosis, pregnancy is not always reported.

Butler County MH/MR/D&A Program	124 West Diamond Street, Butler, PA 16003	Butler	\$192,319	\$0

Pennsylvania

URS Table Number	General Notes
2, 3, 4 & 16	Number increased from 2011 to 2012 because we are able to report on more county based consumers than before. This number will continue to increase as more counties regularly submit encounters on consumers utilizing their services. Previously, counties only reported on the aggregate. However, with the implementation of Consolidated Consumers Reporting Initiative, we have an increasing number of counties reporting encounters, resulting in our being able to more accurately report on this population; however, at the outset of this initiative, encounter submission is irregular and not always successful. As time goes on, information on county based consumers will become more reliable.
5A	Data are correct. The issue of beginning to submit encounters for county based consumers also affects this measure also, as encounter submission is irregular and not always successful. As time goes on, information on county based consumers will become more reliable.
6	Closing of Allentown State Hospital may account for the decrease in admissions, as well as the increase in the use of community psychiatric inpatient facilities. One of Pennsylvania's goals is to reduce the number of RTF admissions, as well as the LOS for adults in other facilities. There are no state mental hospitals for children.
10	PA does not capture county allocation broken out by SMI/SED data. Figure in Adult SMI column represents the total amount given to the county, less Non-direct service activities funds that are listed in Table 8.
12	We only count consumers who have diagnoses of both MH and SA disorders who have been served by providers who are licensed to treat for co-occurring disorders. Since last report, there have been 2 providers who have closed. This may account for the decreased percentage.
14A	Increases results from change in calculation of fee for service population.
