What populations are reported? Data includes a sample of people who received community services and completed the Tennessee Outcomes Measurement System (TOMS) survey.

Number of States Reporting All Clients: 32 Number of States Reporting Some Clients: 25

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
TN	-	-	-	-	See Overall State Footnote
US	43	29	3	4	34

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS/DIG Table 4.

State Notes:

Age Age determined at midpoint of reporting year.

Gender None

Overall Data collected through the Tennessee Outcome Management System (TOMS) survey. New clients are surveyed at intake, 3 months, 6 months, 12 months, and then every 12 months thereafter. Existing clients are surveyed every 12 months.

Outcomes Domain: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2012

Note:

Other 24-Hour Care includes state psychiatric hospital and community based other 24-hour as well as community based inpatient expenditures.

Ambulatory/Community includes expenditures for less than 24-hour care services provided at state psychiatric hospitals. It excludes community based other-24 hour and community based inpatient expenditures.

Total also includes additional SMHA Expenditures for research, training, administration, and other central and regional office expenditures.

Data from NRI's Funding Sources and Expenditures of State Mental Health Agencies, FY 2010 reports - Table 18 "SMHA-Controlled Expenditures for Mental Health Services."

U.S. totals are based on 50 states reporting.

More information on the State Mental Health Agency's Revenues & Expenditures as well as State Footnotes can be found on the NRI website:
<http://www.nri-inc.org/projects/Profiles/RevenuesExpenditures.cfm>

STRUCTURE DOMAIN: State Mental Health Agency Controlled Revenues by Funding Sources, FY 2010

STATE Tennessee

Funding Source	Ambulatory/Community			State Hospital		
	State Revenues	Percent Total (State)	Percent Total (US)	State Revenues	Percent Total (State)	Percent Total (US)
Medicaid	\$277,300,000	82.5%	58.4%	\$25,700,000	17.8%	23.5%
Community MH Block Grant	\$7,300,000	2.2%	1.4%	-	-	0.0%
Other SAMHSA	\$5,900,000	1.8%	0.4%	-	-	0.0%
other Federal(non-SAMHSA)	-	-	2.2%	\$11,300,000	7.8%	4.6%
State	\$45,800,000	13.6%	30.7%	\$104,300,000	72.2%	67.4%
Other	-	-	4.8%	\$3,100,000	2.1%	3.6%
Total	\$336,300,000	100.0%	100.0%	\$144,400,000	100.0%	100.0%

Note:

Data from NRI's Funding Sources and Expenditures of State Mental Health Agencies, FY 2010 reports - State Mental Health Agency Controlled Expenditures and Revenue, Table 24, 25, and 26.

This table does not show Revenues for state central office including Research, Training, and Administration expenses.

More information on the State Mental Health Agency's Revenues & Expenditures as well as State Footnotes can be found on the NRI website:

Tennessee

URS Table Number	General Notes
2A, 5A, 14A, 20A, 20B, 21	Neither TennCare nor Behavioral Health Safety Net (BHSN) collect Hispanic Origin separately. TennCare and state psychiatric hospitals include Native Hawaiians or Other Pacific Islanders in the Asian category. TennCare does not collect multi-race data.
3, 6	Persons who receive non-inpatient care in state psychiatric hospitals were included in the Community Programs data. A person who is served in both community settings and inpatient settings was included in both data. Persons who receive Medicaid funded inpatient services through a provider that is not licensed or contracted by the SMHA were not counted.
4	Change in the number of employed/ unemployed consumers is due to a change in the methodology of compiling these data. In previous years only consumers who had a T1 and T2 survey during the year were reported. This year we wanted to report everyone that was surveyed so it was not required to have a both T1 and T2 surveys.
5A	Increase in the number of consumers with non-Medicaid funding only is due to the addition of state psychiatric hospital and community forensic population in the 2012 reporting as compared to the data included in the 2011 reporting.
6	Increase in total admissions to other psychiatric facilities is due to: 1) The closing of state hospitals and 2) an increase in admissions through community settings. There were more transfers to psychiatric facilities than in the previous year.
6	Increase in the average LOS of adults discharged from state hospitals is due to more long term patients being discharged in 2012 than in 2011. More long term patients were discharged in 2012 partially due to the closure of a state psychiatric hospital where all patients were discharged.
6	Increase in the average LOS of adults discharged from state hospitals is due to more long term patients being discharged in 2012 than in 2011. More long term patients were discharged in 2012 partially due to the closure of a state psychiatric hospital where all patients were discharged.
6	The residential treatment claims are considered concurrent/continuous if the first date of service on the new claim is within three days of the last date of service on the previous claim.
12	The increase in the percent of adults meeting the federal definition of SMI and the decrease in the percent of adults served by the SMHA with co-occurring MH/SA diagnoses are due to a change in methodology of how the data were requested from TennCare.
12, 14A	TennCare employs an operational definition based on mental health diagnosis (290.xx-314.xx) and a 15-month claims history to categorize individuals as having serious mental illness (SMI). Substance use disorders (SUD) were based on the presence of a secondary diagnosis of substance use disorder (303.xx-305.xx) as with previous years.
14A	TennCare employs an operational definition based on mental health diagnosis (290.xx-314.xx) and a 15-month claims history to categorize individuals as having serious mental illness (SMI). Age was used to determine SMI or SED. TDMHSAS Behavioral Health Safety Net, state psychiatric hospitals, and forensics community population.
14A	The increases in total numbers of SMI/SED are due to the addition of state psychiatric hospital and forensic community consumers.
15	Clients who receive the TOMS are surveyed at intake, 3 months, 6 months, 12 months, and then every 12 months thereafter. Existing clients are surveyed every 12 months.
15	The increases in the total number of consumers in jail/ correctional facility and homeless/shelter are due to using basic client information (BCI) which includes state psychiatric and consumers who received a Tennessee Outcomes Measurement Survey (TOMS). A higher number of TOMS surveys were administered in 2012 than in 2011.
16, 17	Increases and decreases in totals are due to a change in methodology of how the data were collected in 2012 as compared to 2011.
21	There were changes made in the methodology for calculating readmissions from the previous year. In the state fiscal year 2012 data set enrollees were followed for up to an additional 6 months after the close of calendar year 2011. Previously, only admissions and discharges occurring during the calendar year were included with no additional time allowed for readmissions after December 31st of that year.
