General Notes FY 2012

Texas

URS Table Number	General Notes
2, 3, 4, 5a, 5b & 6	About 15-20% of the Texas population is served in a managed care model called NorthSTAR. Many of the measures that excluded NorthSTAR prior to 2005 now have NorthSTAR included. NorthSTAR understates served count due to the lag in claim reporting. Clients served late in the year may not be represented when the reports are produced in November.
3	NorthSTAR is included in local hospital starting in 2005. NorthSTAR had significant late reporting of other hospitalizations in 2005 resulting in an under reporting of approximately 1000 to URS.
3	Starting in 2010, "Other Hospitalization" data is primarily collected from encounters directly reported from centers. There was an increase that corresponded with this change.
3	Starting in 2012, the methodology for counting those served in the state hospital was changed to mirror the client level data reporting. Anyone served in a state hospital was included, so there is an increase in the number of clients in the length of stay greater than one year between FY11 and FY12.
4	Consumers without a diagnosis primarily include those who only received a crisis or assessment service. Diagnoses are not required to perform crisis services. Diagnoses do not need recorded for consumers that are not eligible for ongoing services.
4	The federal domains are measured at admission and annually thereafter; the non-federal domains are measured quarterly.
5a	A client is counted as Medicaid if they were eligible at any time in the year.
6	NorthSTAR is included in local hospital starting in 2005. NorthSTAR had significant late reporting of other hospitalizations in 2005 resulting in an under reporting of approximately 1000 to URS.
10	Areas served are counties or statewide.
10	Includes NorthSTAR starting in 2008.
12	The increase in percent of adults served by the SMHA with co-occurring MH/SA diagnoses from 2011 to 2012 is due to the following: in 2012 the process of summarizing diagnosis information for a client was moved from a mainframe program to a warehouse load program that has access to the all diagnostic detail.
14b	DSHS operational definition of SM/SED: consumers assessed to need or authorized for an RDM service package, consumers who received a crisis service or mental health hospitalization, and those with a mental health diagnostic assessment (past or present).
4 and 15	In FY2008 the number served increased, in part, due to funding increases for crisis services and this pattern continued through FY2009. It is anticipated that funding for crisis services will continue into FY2010. Unlike admission to ongoing services, providers are not required to assess consumer's employment situation upon admission to crisis services. Therefore, the number of "not applicable" may be higher in FY2008 and beyond when compared to FY2007.
15	NorthSTAR included starting in 2005. Living situation is part of the community assessment and not will not generally be available for those in hospital.
16	The introduction of Resiliency and Disease Management (RDM) to the Texas mental health service delivery system brought with it an integration of supported employment services within the delivery of evidence-based mental health services, such as counseling, psychosocial rehabilitative services, and case management. This integration brought changes in the manner by which supported employment services were recorded within the mental health service delivery system. The decreasing provision frequency of supported employment services from FY2005-FY2006 is likely the after effect of this integration and recording change.
16	Therapeutic Foster care has been discontinued in Texas and should be removed from future counts.
16	Best Practice programs delivered via NorthSTAR included starting in 2005. Clients only served in the hospital have been removed from the client count. ACT was counted via authorized level of care starting in 2005. In 2004 it was counted from CARE service assignments. ACT alternative (a modified model for Rural service areas) is included in the ACT count.
16	Contractual fidelity measures for ACT services were introduced in late 2005. These likely contributed to a reduction in ACT service volumes.
16	The increased in total number of consumers receiving Supported Housing services is due to increase the volume service and it has even been introduced as a contract measure for this coming year.
16	NorthSTAR began providing Supported Employment services in 2010 which accounted for most of the increase from the previous year.

URS Table Number	General Notes
17	Clients only served in the hospital have been removed from the client count. SA is counted via SA diagnosis authorized for ACT or Rehabilitative Case Management Service Packages (3 and 4). The Service Package criteria began in 2005 but more accurately reflects the best practice guidelines
