URS Table Number	General Notes
5A	In 2012 our largest provider had a significant shift from serving both Medicaid and non-Medicaid to serving Medicaid only. This same provide also had a significant decrease in the number of clients served. These two factors along with other providers serving more Medicaid only clients account for the -47% decrease in clients served with both. We have verified that the data is accurate.
6	The increases on total admissions to other psychiatric inpatient and consumers served in RTC at the beginning of the year are not attributed to a data issue and there is no known reason for the changes.
12	There was a significant decrease in the percent of children with co-occurring diagnoses because less children were served in FY2012.
15	Some of the increase in Jail/Correctional Facility clients is attributed to a provider making an effort to provide more accurate data.
15	The homeless increase is most likely due to the fact that our largest provider created a mobile crisis team that provides more outreach to homeless clients.
16	The decrease on supported housing services, Supported employment services and total number of adults with SMI are not attributed to a data issue and there is no known reason for the change.
17	The decrease on total number of consumers receiving Medication Management services is not attributed to a data issue and there is no known reason for the change.
20B	There were no readmissions into the Forensic program at the State hospital.
