Wyoming

URS Table Number	General Notes
5	The data for FY2012 was based on the decision that Wyoming does not accurately gather this data in this way. Client's potential payment source is gathered at the time of admission, but does not determine the actual payment source. Therefore it was decided to be accurate and place the total in the "total number of consumers with both Medicaid and Non-Medicaid Funding". We changed the logic to break out the totals to the potential payment source. Because of the change in logic to break out Medicaid vs. non-Medicaid payment sources at a later date than when all the other data was pulled; demographic changes have been made to approximately 4000 client information records have been updated since the original data was ran. There will discrepancies between tables 2 - 2A and table 5A.
6	The data was revalidated for FY2012 several ways and the data output remained consistent with the figures submitted for the admissions to community programs during the year.
6	The average LOS for the state hospital was based on one client that turned 18 during their stay and was discharged in less than one year.
6	The Wyoming State Hospital makes every effort to transition its clients back to the community as safely and efficiently as possible. Wyoming has worked diligently to bring these numbers down. These numbers reflect that effort.
10	Wyoming does not gather their grant totals by diagnosis, therefore no dollars are entered in this section.
12	Wyoming compiled their co-occurring totals from the field documenting the priority population "co-occurring adults" or "co-occurring children". It may be that FY2011 data was accumulated based on different criteria.
