District of Columbia

URS Table Number	General Notes
4	This data is not currently collected in our system. Previously Supported Employment data was used; however that is not suggested as all of those who are receiving that service do not have gainful employment. Our agency plans on collecting this data with the move to our new electronic system (iCAMS). We may have partial data to report for the upcoming 7/1/14 - 6/30/15 report.
5	The increase in the number of consumers with Medicaid funding only and non-Medicaid funding from 2012 is due to the fact that the 2012 data did not include state hospital, housing, or PRTF consumers. These consumers are included in the current reporting.
6	We recently realized that discharge dates were not always entered after a consumer was discharged from a community hospital. We developed a rule that if a consumer's discharge data was still blank after 1 year, we consider them discharged. This significantly changed the Number Served at Beginning of Year to a more reasonable number.
16	LLC provides tools & training that guide FFT implementation. National FFT Consultant for Phase 1 teams, Trained Site Supervisor for Phase 2 & beyond teams measure fidelity using Weekly Supervision Checklist Global Therapist Rating. Global Therapist Rating is done every 3 or 4 months.
8	The 100% increase in total MHBG expenditures for non-direct services from 2012 is due to the fact that in the 2012 reporting inaccurately reported \$470,218 for MHA Activities Other Than Those Above which should have been \$0.00. This change would have the total for (2012) Non-Direct Services as \$112,715 opposed to \$582,933.
9, 11, 11a	Our agency adjusted the data collection process from a contracted service to an internal process which is now more stringent and is fully electronic via a QuickBase Application.
12	Our agency became the Department of Behavioral Health as of October 1, 2013. Prior to this time we did not have access to Substance Use data beyond diagnosis information which was minimal. Given our recent merger with the former Substance Use Agency (APRA) we are now able to solicit accurate information regarding those individuals who have accessed Substance Use treatment. This information has been added and is solely based on the use of both Mental Health and SU services and is not based upon diagnosis as noted.
16	The increase in the number of consumers receiving MST and FFT services from 2012 is attributed to the intentional efforts to increase access to services. This has been done by adding two additional FFT providers which increased capacity of service delivery, conducted our annual EBP conference which increased awareness of service availability and conducted several agency specific outreach to educate potential referral sources (e.g. Child and Family Services Agency, Department of Youth Rehabilitation Services and Court Social Services).
