Indiana

URS Table Number	General Notes
6	Admissions to Other Psychiatric Inpatient services decreased by 32% from 2012: Providers are not required to submit data about admission to local psychiatric inpatient units. Typically, the only providers that do report this data operate their own inpatient unit and some of those have reduced beds.
6	Admissions to Residential Treatment Centers increased by 53% from 2012: Admissions to RTCs were historically counted only for youth in Residential Treatment Facilities for Youth. Beginning in SFY 2013, adults in other residential facilities have been included in the counts to match the client-level data reporting protocol.
8	Total MHBG Expenditures for Non-Direct Service Activities Increased by 21% from 2012: State Fiscal Year 2012 was an anomaly due to a delay in paying for some contracted TA and Other services after the close of the fiscal year. Expenditures in 2013 are consistent with 2011.
16	Total number of consumers receiving ACT services decreased by 58% from 2012: Funding for ACT was substantially reduced in State Fiscal Year 2011 due to changes in Medicaid Rehabilitation Option services and rates as well as changes in DMHA contracted support for ACT. In 2010, Indiana had 33 ACT Teams with 3 teams continuing to operate with fidelity in 2013. Many of the ACT programs changed organizationally to ACT-like programs with the primary difference being staffing requirements.
17	Total number of consumers receiving Illness Self Management services decreased by 21% from 2012: As with ACT, the IMR services currently being provided across the state are no longer following the fidelity model. The majority of CMHCs provide some level of self-management service which is not reported as an EBP.
