Massachusetts

URS Table Number	General Notes
3, 6	Admissions to psychiatric continuing care units run by the MA DMH, but located in facilities operated by the state Public Health agency are included in the State Hospital counts.
3, 6	Individuals admitted to two community mental health centers (CMHCs) delivering acute care and one CMHC providing continuing care are included in "Other Psychiatric Inpatient". Other Psychiatric Inpatient also includes admissions to private inpatient facilities through contract with the MA DMH.
8	DMH received an increase to the Block Grant award in state fiscal year (SFY) 2012. This award increase was allocated to the six DMH-funded Recovery Learning Communities to begin in SFY 2013 due to the length of time needed for decision making, contract amendments, and implementation of activities. In the first year of the increased award, DMH utilized the funds to support several projects related to workforce development.
11	Adult Consumer Surveys: The Official 28 Item MHSIP Outpatient Tool was modified to include the modules on social connectedness, improved functioning and criminal justice contact, as well as several additional questions relating to outcomes. The survey sample was drawn from persons currently in services; however some of these individuals may no longer have been enrolled in that service when interviewed. The universe for the survey sample was adult consumers with a serious mental illness who were receiving Community Based Flexible Support (CBFS) from the MA DMH. The MA DMH contracted with the Center for Mental Health Services Research at U Mass Medical School to administer the survey and provide analysis.
11	Child/Family Consumer Surveys: The survey sample was drawn from families of persons currently in services; however some of these individuals may no longer have been enrolled in that service, when interviewed. The universe for the survey sample was family members of all children/ adolescents enrolled in Child/Adolescent Case Management services from the MA DMH. The MA DMH contracted with the Center for Mental Health Services Research at U Mass Medical School to administer the survey and provide analysis.
12	Child/Adolescent services for the MA DMH are provided through age 18, with adult services delivered for ages 19 and older. Calculations for this table use the federal definition of child and adult. Ages 0 - 3 are served primarily by agencies other than the MA DMH, but service authorization criteria for MA DMH does not preclude service provision for this age group.
12	Individuals counted in the total served by the MA DMH who are referred by the criminal justice system, or seen for outpatient crisis evaluations may or may not meet SMI/SED definitions. All persons who meet DMH clinical standards for approval of continuing care community services meet federal SMI/SED definitions.
12	The calculation for the percentage of persons with a co-occurring diagnosis of substance abuse is obtained by counting the number of persons with a diagnosis of substance abuse on file in the Mental Health Information System (MHIS) as of the close of the reporting period divided by the total served as reported in Table 2 (Total Served) and Table 14 (Total SMI/SED), for whom there was a diagnosis on file in MHIS as of the close of the reporting period.
12, 14A	The increase in the number of children/adolescents with SED served from FY 2012 to FY 2013 is primarily due to focused efforts on improved data tracking at the service authorization level.
15	Living situation is measured at admission for all clients and at the annual review for case managed clients only. In addition, it is assessed annually for all inpatients in state operated facilities with length of stay (LOS) greater than 6 months. The MA DMH does not provide crisis residence services and adult foster care. Information on individuals receiving these services through other agencies is not available in the MA DMH Mental Health Information System (MHIS). The MA DMH does not provide "traditional" foster care for children and adolescents and does not presently collect this data for those clients receiving these services through the state Department of Social Services.
16	Totals for Supported Housing are not available for reporting in SFY13. DMH and CBFS providers collaborated in developing the outcome measures that CBFS providers report to DMH as measures of contract performance. While CBFS providers began reporting housing data in January 2011, the data currently collected does not provide sufficient information to determine which individuals are receiving housing supports consistent with the Supported Housing model. DMH and CBFS providers made significant progress in developing a new housing measure set that is consistent with the federal guidance on the reporting of Supported Housing. However, the implementation of these revised measures was delayed due to a service rate development and re-contracting project that is required under the implementation of Chapter 257 of the Acts of 2008. DMH will continue to work towards the reporting of housing data to comply with federal reporting requirements.
16	Supported employment services are provided within several DMH services, including Community Based Flexible Supports (CBFS), Clubhouse and Program for Assertive Community Treatment (PACT). This data reflects only people enrolled in CBFS services who are receiving supported employment.

URS Table Number	General Notes
16	Fidelity for ACT/PACT programs is measured by a team consisting of MA DMH staff, consumers and a consultant with expertise in ACT, using a scale developed internally, based upon the SAMHSA EBP toolkit. Fidelity is measured every twelve to eighteen months.
16	The decrease in individuals receiving Therapeutic Foster Care in SFY 13 is due primarily to increased difficulties in identifying and recruiting foster parents for this group of DMH youth.
17	Although these EBPs may be provided in some DMH programs, they are not reported as discrete services in the Mental Health Information System (MHIS) and are unavailable for reporting.
20A, 20B	Since most admissions to the state hospital system occur only after one or more acute inpatient hospitalizations, the readmission rates displayed in this table do not necessarily present an accurate representation of the total inpatient readmission rate for discharges in the reporting year.
